1963-64

BULLETIN No. 61

PREPARED UNDER INSTRUCTIONS FROM THE RIGHT HONORABLE THE TREASURER

BY

K. M. ARCHER,
COMMONWEALTH STATISTICIAN

OVERSEA TRADE, 1963-64

PREFACE

Source of Statistics.—Oversea trade statistics are compiled from documents obtained under the Customs Act 1901–1963 and supplied to the Commonwealth Bureau of Census and Statistics by the Department of Customs and Excise. Certain items are excluded for which customs entries are not required. See sub-paragraph (h) *Balance of Trade*, page iv.

These documents are carbon copies of export and import entries submitted by exporters and importers or their agents to the Department of Customs and Excise.

Export entries show date and port of shipment, country of consignment and the description, quantity (where required) and value of the goods. The statistical item number is inserted and verified by officers of the Department of Customs and Excise, Canberra.

Import entries show date and port of entry, country of origin, the description, quantity (where required) and value of the goods, and the amount of duty paid thereon. The tariff item number under which the goods are admitted and the statistical item number are inserted by the importer or his agent, and these are verified by statistical officers of the Department of Customs and Excise in the local offices of the Collectors of Customs.

The Customs Area.—The area to which all oversea trade statistics issued by this Bureau apply is the whole of the Commonwealth of Australia, comprising the States of New South Wales, Victoria, Queensland, South Australia, Western Australia and Tasmania, the Northern Territory and the Australian Capital Territory. Non-contiguous territories under Australian administration are treated as outside countries, and trade transactions between Australia and these non-contiguous territories are part of the oversea trade of Australia. Such transactions are shown separately, i.e., the trade of Australia with each particular area is separately recorded and tabulated.

The Trade System.—There are two generally accepted systems of recording oversea trade statistics, namely (a) special trade and (b) general trade. Statistics of both are published by the Bureau, although greater emphasis is placed on general trade. The Statistical Office of the United Nations defines the two systems as follows.

“*System of Trade.* Two systems of recording trade are in common use, differing mainly in the way warehoused and re-exported goods are recorded.

(a) *Special Trade.* Special imports are the combined total of imports directly for domestic consumption (including transformation and repair) and withdrawals from bonded warehouses or free zones for domestic consumption. Special exports comprise exports of national merchandise, namely, goods wholly or partly produced or manufactured in the country, together with exports of nationalized goods. (Nationalized goods are goods which, having been included in special imports, are then exported without transformation.)

(b) *General Trade.* General imports are the combined total of imports directly for domestic consumption and imports into bonded warehouse or free zone. General exports are the combined total of national exports and re-exports. Re-exports, in the general trade system, consist of the outward movement of nationalized goods plus goods which, after importation, move outward from bonded warehouse or free zone without having been transformed.

Direct transit trade, i.e., goods merely being transhipped or moving through the country for purposes of transport only, is excluded from the statistics of both special and general trade.”

Statistics in this bulletin are compiled on the “General Trade” basis.

Classification of Imports and Exports.—The tables of imports and exports have been compiled according to the Statistical Classification of Imports and Exports. The classification comprises approximately 3,700 import items and 1,300 export items. An extensive index of imports and exports is given on page 818 with the statistical item number shown against each item listed.

An item which is important in import trade is not necessarily important in export trade; consequently, many items classified separately for imports are not separately classified for exports. Similarly, many items important only in export trade are not separately classified for imports. The appearance of a particular item in Table No. 3 (Imports) but not in Table No. 1 (Exports) indicates

that details of the particular item are not recorded separately for exports. Similarly an appearance in Table No. 1 (Exports) but not in Table No. 3 (Imports) indicates that imports of that particular item are not recorded separately. Many items are recorded according to value only, but in all cases where quantities are recorded particulars concerning both quantities and values are shown.

Valuation.—General. All values throughout this Bulletin are expressed in £ (Aust.). Prior to 15th November, 1947, however, imports into Australia were recorded in British currency values. Full explanatory notes on the methods of recording import values before and since 15th November, 1947, were included immediately after the Preface in Oversea Trade Bulletin No. 45, 1947–48.

Exports. The value of goods exported includes the cost of containers and outside packages and has been determined as from 1st July, 1937 as follows:—

- (a) Goods sold to oversea buyers before export—the Australian f.o.b. port of shipment equivalent of the price at which the goods were sold (e.g. as regards wool, the actual price paid by the oversea buyer plus the cost of all services incurred by him in placing the wool on board ship).
- (b) Goods shipped on consignment—the Australian f.o.b. port of shipment equivalent of the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were dispatched for sale (as regards wool, the f.o.b. port of shipment equivalent of current price ruling in Australia will normally provide a sufficient approximation to the f.o.b. port of shipment equivalent of the price ultimately received).

Exporters are required to show all values in terms of Australian currency, and to include the cost of containers.

Imports. The recorded value of goods imported represents the amount on which duty is payable or would be payable if the duty were *ad valorem*. Section 154 (1) of the Customs Act 1901–1963 provides that “when any duty is imposed according to value, the value for duty shall be the sum of the following:—

- (a) (i) the actual money price paid or to be paid for the goods by the Australian importer plus any special deduction; or
- (ii) the current domestic value of the goods, whichever is the higher;
- (b) all charges payable or ordinarily payable for placing the goods free on board at the port of export”.

“Current domestic value” is defined as “the amount for which the seller of the goods to the purchaser in Australia is selling or would be prepared to sell for cash, at the date of exportation of these goods, the same quantity of identically similar goods to any and every purchaser in the country of export for consumption in that country”. The recorded values of Australia’s imports, as shown throughout this bulletin, are therefore “transaction value (f.o.b.)” or “domestic value (f.o.b.)” whichever is the higher. These values are f.o.b. port of shipment Australian currency.

Inclusions and Exclusions.—

- (a) *Stores* loaded on board Oversea Vessels and Aircraft (including bunker coal and oil) are omitted from the tabulation of exports. Table No. 25 shows the value of these stores shipped during the year 1963–64.
- (b) *Outside Packages* (containers, crates, etc.) are included as a separate item in the tabulation of imports. For exports, however, the value recorded for each item includes the value of the outside package.
- (c) *Imports and Exports on Government Account* are treated as normal transactions and are an integral part of oversea trade statistics.
- (d) *Currency.* Notes and coins are included in the oversea trade statistics at their commodity value only.
- (e) *Gold Content of Ores and Concentrates.* The value of ores and concentrates imported and exported includes the value of the gold content. The latter is not recorded separately for purposes of inclusion in imports and exports of gold. However, Table No. 22 shows the quantity of gold contained in ores and concentrates exported from Australia.
- (f) *Migrants’ Effects* are included in imports and exports.
- (g) *Direct Transit Trade.* Particulars of direct transit trade through Australia are not recorded.
- (h) *Balance of Trade.* Oversea trade statistics are compiled from information recorded in customs documents. The excess of exports or imports in the recorded figures has to be adjusted for both valuation and coverage to provide estimates of the balance of trade which will be found in Statistical Bulletins on the balance of payments. Imports are adjusted for the excess of recorded value for duty over the actual selling price to the

importer. Recorded exports and imports of gold, government exports for armed forces and overseas projects, and certain items are excluded; imports and exports of ships and aircraft for use on overseas routes, certain imports of defence equipment, exports of uranium and other trade items for which customs entries are not required are added.

- (i) *Balance of Payments.* Statistics relating to overseas trade only do not measure Australia's total balance of payments which includes other transactions such as freight and insurance, charges on imports, shipping expenditure in Australian ports, overseas travel, payments of profits and interest, and private and government borrowing overseas. Estimates are provided in the Statistical Bulletin *Balance of Payments*.

Countries.—"Country of origin" appearing in import tables should be taken to mean the country of production. "Country of consignment" appearing in export tables means the country to which goods were consigned so far as this can be determined at the time of export. Where the country of consignment is not determined at the time of export, goods are shown as exported "For Orders".

In the tables appearing in this Bulletin, countries are arranged in two divisions, namely, (a) Commonwealth countries (including protectorates, trust territories and territories under condominium) and (b) foreign countries.

Where, in respect of any statistical item in Tables Nos. 1 and 3 (except in Class XXI.), the total value is less than £5,000, details of Australian States and overseas countries are omitted. Where country details are shown for a statistical item, only those countries with totals of £5,000 or more are shown separately. In cases where the total value of the item is £5,000 or more but the value for each country is less than £5,000, separate mention is made of the country for which the highest value is recorded. In Class XXI. full details are given for each item.

A list of countries, together with the areas included under each individual country, appears on pages ix to xii.

Units of Quantity.—Where quantities are shown they are generally, but not invariably, expressed in terms of the normal trade unit. Where "cental" is used, the unit is equivalent to 100 lb. avoirdupois.

Quantities are not tabulated in respect of statistical items for which there is no appropriate unit of quantity (for example, a statistical item which covers a number of commodities and cannot be recorded under a uniform unit of quantity).

Unless provision is made in the Classification of Imports and Exports for a separate statistical item for "parts", imports and exports of parts of articles are recorded under the same statistical item as the complete unit. In such cases, if quantities for the items are tabulated, the quantity/value relationship may be distorted, as the quantity represents the number of complete units whereas the value includes, in addition, the value of parts.

Period Covered.—The period covered by this bulletin is the year 1st July, 1963 to 30th June, 1964.

Presentation of Data.—In Table No. 1 Exports of Statistical Items are classified according to (i) Country of Consignment, (ii) State of Final Shipment, and (iii) Australian Produce and Re-exports.

"Australian Produce" comprises the following:—

- (i) Raw materials produced in Australia;
- (ii) Articles manufactured therefrom;
- (iii) Articles wholly or partly manufactured in Australia from imported materials.

"Re-exports" consists of articles produced overseas, imported into Australia and subsequently re-exported.

Particulars of Re-exports classified according to State of Final Shipment are shown in Table No. 2.

In Table No. 3, Imports of Statistical Items are classified according to Country of Origin and Importing State.

Statistical items under which there have been no exports during the past two years are included in Table No. 1, and those under which there have been no imports during the same period are included in Table No. 3. In bulletins prior to 1956-57, "nil" statistical items were omitted.

Table No. 8 shows imports of merchandise classified according to economic class and Table No. 9, shows exports of Australian produce classified according to industrial groups. Tables Nos. 4 to 25 are, in the main, summary tables covering five years in some cases and ten years in others. In the present volume, the tables have been arranged to show, firstly, particulars relating to "Commodities of Trade" and, secondly, particulars relating to "Direction of Trade". Tables Nos. 8 to 14 relate to "Commodities of Trade" and Tables Nos. 15 to 21 to "Direction of Trade".

Table No. 19 gives a summary of the principal imports from and exports to each of the countries which traded with Australia during 1963-64.

Supplementary Bulletins.—In order to meet the demand for up-to-date statistics of Australia's overseas trade, three supplementary bulletins are issued containing statistics in considerable detail for the latest financial year. The first of these bulletins, *Overseas Trade—Preliminary Bulletin, 1963–64*, was published in August–September, 1964 and contains particulars of imports and exports classified according to statistical item and country. The second bulletin, *Australian Exports 1963–64*, relating entirely to exports was published in December, 1964, and contains particulars of exports to individual countries. The third bulletin, *Imports Cleared for Home Consumption, 1963–64*, to be published in December, 1964, shows the quantity and value of goods cleared (and duty paid thereon) under each tariff item classified according to statistical item and further subdivided according to country of origin and nature of tariff.

Other publications relating to overseas trade issued during each year are:—

Trade of Australia with Eastern Countries (annually); *Trade of Australia with the United Kingdom* (half-yearly); *Australian Overseas Trade with Major Groups of Countries* (quarterly); *Monthly Bulletin of Overseas Trade* (monthly); and *Exports of Wool (Australian Produce)* (monthly).

A preliminary statement on merchandise trade totals is also issued each month, and current statistics on overseas trade are contained in the *Quarterly Summary of Australian Statistics*, the *Monthly Review of Business Statistics*, and the *Digest of Current Economic Statistics*.

Abbreviation.—N.E.I. means “not elsewhere included”.

I am especially indebted to Mr. M. J. Griffiths, B.Com., Mr. I. Netliv, M.B.E., B.A., and the other officers of the Overseas Trade Sub-section, for the care and attention bestowed on the compilation of this Bulletin, and the preparation of the material for the Printer.

My thanks are due also to the officers of the Department of Customs and Excise.

Commonwealth Statistician.

(a) The value of refined newly-won gold was £16,770,000 in 1959-60, £16,203,000 in 1960-61, £16,205,000 in 1961-62, £15,734,000 in 1962-63 and £14,259,000 in 1963-64.

Relative Importance of Industrial Groups.—

In the year 1963-64, Australian produce (other than gold) exported amounted to approximately £1,356 million. Of this, £1,180 million or 86.9 per cent. was mainly produce of primary industries, comprising £860 million of unprocessed produce and £320 million of goods which had been processed in some degree before export. The values of the principal individual items of processed Australian primary produce exported were:—raw sugar, £78,256,000; flour (wheaten), £21,119,000; canned fruit, £17,118,000; dried fruit, £10,530,000; wool (scoured, tops, etc.), £50,729,000; canned meats, £6,294,000; butter, £27,357,000; milk (condensed, dried, etc.), £9,850,000; pig lead, £15,286,000; lead bullion, £8,789,000; zinc, bars, blocks, etc., £8,833,000; copper ingots, £7,407,000; and undressed timber, £2,158,000.

The value of manufactures exported as classified above was £140 million, or approximately 10.3 per cent. of Australian produce (other than gold) exported in 1963-64. The values of principal individual items here included were—

Manufactures of metal, £62,210,000; implements and machinery, £17,504,000; drugs and chemicals, £10,174,000; and paper and stationery, £5,860,000.

The items enumerated indicate the arbitrariness of the line necessarily drawn between primary produce and manufactures in any classification of this kind. The value of processed primary products exported includes some element of value added by the simpler processes of manufacture, while the value shown for manufactures exported necessarily includes the value of raw material (primary produce) used in those manufactures.

Refined petroleum oils exported are shown separately, as they consist of imported crude oils refined in Australia and re-exported in the refined form. The values of principal individual items shown as "unclassified" in 1963-64 were—

Individual consignment of less than £50 in value, £6,306,000; and military equipment and stores and supplies for Australian projects overseas, £2,415,000.
