## MAIN FEATURES

### MANAGED FUNDS - TOTAL CONSOLIDATED ASSETS AT END OF QUARTER (\$ million)

The market value of consolidated assets of managed funds in Australia at 30 June 1995 was \$269,693 million, an increase of \$12,249 million (4.8%) on the revised March 1995 figure of \$257,444 million, and an increase of \$10,235 million (3.9%) on the June 1994 figure of \$259,458 million.

In the June 1995 quarter, increases in the total value of assets were recorded by all fund types, with the exception of Friendly Societies, which recorded a small decrease of \$12 million (0.1%). The largest increases occurred in Superannuation and Approved Deposit Funds, up \$6,005 million (6.2%), and Public Unit Trusts, up \$2,133 million (6.1%).

Increases in the value of consolidated assets of managed funds occurred in all asset classes. The

largest increases occurred in overseas assets, up \$3,471 million (8.7%), cash and deposits, up \$719 million (5.8%), short term securities, up \$1,593 million (5.7%) and equities and units in trusts, up \$3,734 million (5.3%).

At the end of June 1995, the consolidated assets of managed funds included \$43,167 million (16.0%) in overseas assets. Domestic assets, which totalled \$226,526 million, were mainly comprised of equities and units in trusts (33.0%), and long term securities (23.5%).

The value of managed funds' assets invested through Professional Fund Managers was \$231,532 million at the end of June 1995, representing 85.9% of all the consolidated assets of managed funds.

## NOTES ON CONSOLIDATION

The statistics in this publication relating to the assets of managed funds are presented in two ways; *Part One* contains statistics on the consolidated assets of managed funds, *Part Two* contains individual tables for each type of managed fund on an unconsolidated basis.

The two presentations are included to allow users of the statistics to distinguish between a measure of the total amounts invested with managed funds (*Part One*) and the amounts invested with the individual types of managed funds (*Part Two*). *Part Two* also contains a more detailed asset category dissection.

### Method of Consolidation

To arrive at a figure for the total consolidated assets of managed funds in Australia it is necessary to eliminate the cross-investment between the various types of funds. For example, investments by superannuation funds in public unit trusts are excluded from the assets of superannuation funds in a consolidated presentation. It is not possible however to apportion cross-investment at the level of detail presented in *Part Two*.

The following table presents the unconsolidated, cross-invested and consolidated assets of managed funds by type of fund as at 30 June 1995.

ASSETS OF MANAGED FUNDS IN AUSTRALIA,  
BY TYPE OF FUND — 30 June 1995  
(\$ million)

Type of Fund	Assets		
	Total	Cross-invested	Consolidated
Statutory Funds of Life Insurance Offices	118,880	7,670	111,210
Superannuation and Approved Deposit Funds	113,282	10,733	102,549
Public Unit Trusts	40,265	3,375	36,890
Friendly Societies	8,531	19	8,512
Common Funds	5,023	115	4,908

(a) Includes bank certificates of deposit held by Public Unit Trusts.

## PART TWO: ASSETS OF MANAGED FUNDS — UNCONSOLIDATED BASIS

### Statutory Funds of Life Insurance Offices.

Statutory Funds of Life Insurance Offices have been set up under Commonwealth Government legislation and are analogous to trust funds. The legislation requires that the assets of any statutory fund must be kept separate and distinct from the assets of other statutory funds and any other assets of the company. All income received must be

paid into and become an asset of the appropriate statutory fund and these assets are only available to meet the liabilities and expenses of that fund.

The information presented in the table below was compiled using data from the ABS Survey of Balance Sheet Information and represents total coverage of Life Insurance Office Statutory Funds.

(a) Includes superannuation funds that are wholly invested and administered by life insurance offices.

### Superannuation Funds and Approved Deposit Funds

Superannuation Funds are indefinitely continuing funds maintained for the provision of benefits for either members of the fund, or the dependants of members in the event of retirement or death of the member. Approved Deposit Funds are established under the *Occupational Superannuation Act 1987* and are maintained solely for receiving, on deposit, amounts that are deemed by section 27D of the Tax Act as eligible termination payments.

The information presented in the table below is compiled using data from the ABS Survey of Balance Sheet Information and includes both public and private sector superannuation funds that either directly invest on their own behalf, or use fund managers on a fee for service basis.

For further information see the ABS publication, *Assets of Superannuation Funds and Approved Deposit Funds* (5656.0) — issued quarterly.

(a) Excludes superannuation funds that are wholly invested and administered by life insurance offices. However superannuation funds that invest partly through the statutory funds of life insurance offices are included.

### Public Unit Trusts

A public unit trust is defined as an arrangement, governed by a trust deed between a management company and a trustee, which is open to the public for the purchase of units in the trust. Unit Trusts invest the pooled funds of unit holders to yield returns in the form of income and/or capital gain. Unit holders can dispose of their units within a relatively short period of time.

The information in the table below is compiled from data collected by the ABS in the quarterly Public Unit Trusts Survey.

Excluded from the table below are:

- Trusts which are exempted from providing redemption facilities under Section 1069(3) of the

Corporations Act (e.g. most film and agriculture trusts),

- Cash Management Trusts (see Table 8),
- Trusts which have not sought or do not intend to seek funds from the general public in Australia and therefore have not registered a prospectus with the Australian Securities Commission, and
- Some small trusts which are insignificant in statistical terms.

Further information is available through subscription to a special data service.

### Friendly Societies

Friendly societies are organisations registered as such under the appropriate State legislation. All assets of friendly societies, with the exception of the assets of separately operated and controlled Health Insurance Funds, are included in the table below.

The information in the table below is compiled from data supplied to the ABS by 28 of the largest friendly societies

as part of the Survey of Balance Sheet Information and approximates 95 per cent of the total assets of friendly societies as at June 1992.

Further information is available through subscription to a special data service.

### Common Funds

Common funds are operated by Trustee Companies under the relevant State Trustee Companies Act. They permit trustee companies to combine depositors' funds and other funds held in trust in an investment pool, and invest the funds in specific types of securities and/or assets. Common funds have the same investment strategy and economic functions as cash management trusts and public unit trusts. However they do not operate in the same manner, in that they do not issue units, nor do they necessarily issue prospectuses.

The table below is compiled using data supplied from all 14 trustee companies operating in Australia as part of the ABS Survey of Balance Sheet Information. At the end of June 1995, trustee companies were managing 85 common funds throughout Australia.

Further information is available through subscription to a special data service.

### Cash Management Trusts

A cash management trust is a unit trust which is governed by a trust deed, is open to the general public and which generally confines its investments (as authorised by the trust deed) to financial securities available through the short term money market. Cash management trusts issue units in the trust that are redeemable by the unit holder on demand.

The information in the table below is compiled from data supplied to the ABS in the monthly Cash Management Trusts Survey. Currently there are 20 trusts in this survey.

Further information is available through subscription to a special data service.

## PART THREE: PROFESSIONAL FUND MANAGERS

### Professional Fund Managers

A considerable proportion of the assets of managed funds in Australia (particularly the statutory funds of life insurance offices and superannuation funds) is invested through *Professional Fund Managers*. The amount the various types of managed and other funds have invested through professional fund managers is shown in the table below.

Professional fund managers act as investment managers and often as administrators for smaller funds, and as agents for other financial entities, on a fee for service basis. Whilst they accept individual portfolios for management they typically manage pooled funds, providing a sophisticated level of service, including matching return and risk, on behalf of their clients. Professional fund managers are generally life insurance offices, subsidiaries of banks, merchant banks, or organisations related to these types of institutions. They

can either be separately constituted legal entities or form a segment of a particular financial institution.

The funds professional fund managers invest remain the asset of their clients and are not brought to account on the balance sheet of the professional fund manager. The ultimate responsibility for the investment remains with the client. For example, if a superannuation fund had all or part of its assets invested through professional fund managers the trustees of the superannuation fund remain responsible for the investments, not the professional fund manager.

The information presented in the table below is compiled using data from the ABS Survey of Balance Sheet Information and includes all significant professional fund managers operating within Australia. The information has been shown separately for amounts managed by professional fund managers on behalf of managed funds and on behalf of other funds.

## EXPLANATORY NOTES

### Introduction

The statistics presented in this publication on managed funds in Australia have been compiled from the quarterly Survey of Balance Sheet Information conducted by the ABS.

### Scope and coverage

2. The scope of the statistics presented in this publication relates to the assets of all managed funds operating in Australia. The term *Managed Funds* has been used to denote any fund whereby the monies of a number of investors are pooled together for the purpose of investing in a particular type or mix of assets, with a view to receiving an on-going return. However, funds of a speculative nature that do not offer redemption facilities (e.g. agriculture and film trusts) and funds not established for investment purposes (e.g. health funds and general insurance funds) are excluded. The types of managed funds covered by the statistics in this publication are:

- Statutory Funds of Life Insurance Offices,
- Superannuation Funds and Approved Deposit Funds,
- Public Unit Trusts,
- Friendly Societies,
- Common Funds, and
- Cash Management Trusts.

3. Statistics in this publication relating to the *Statutory Funds of Life Insurance Offices* are derived from the ABS Survey of Balance Sheet Information. This survey receives returns from 25 of the 50 registered life insurance offices operating in Australia, representing approximately 97 per cent of the total assets of statutory funds. Data have been extrapolated to provide 100 per cent coverage.

4. For *Superannuation Funds and Approved Deposit Funds* (ADFs) the information in this publication is derived from the ABS Surveys of Balance Sheet Information which receives returns from:

- Superannuation funds and ADFs that directly invest their assets on their own behalf, and
- Fund managers who invest the monies on behalf of superannuation funds and ADFs.

5. The number of superannuation funds, ADFs and fund managers may vary from quarter to quarter due to an ongoing process of rationalisation within the superannuation industry. These changes normally result in small movements which are not statistically significant.

6. For all other types of managed funds all registered organisations are covered by the ABS Survey of Balance Sheet Information, except the following:

- Public Unit Trusts: Information is obtained from data supplied in the quarterly ABS Public Unit

Trusts Survey. Trusts which are exempted under Section 1069(3) of the Corporation Act from providing redemption facilities (e.g. film and agriculture trusts), trusts which do not seek funds from the general public, and some small trusts, are all excluded from managed funds statistics.

- Cash Management Trusts: Information is obtained from data supplied in the monthly ABS Cash Management Trusts Survey.

7. While friendly societies are covered by the Survey of Balance Sheet Information, data are only collected from the 28 largest friendly societies. This provides coverage of approximately 95 per cent of the total assets of friendly societies.

### Basis of valuation

8. Respondents to the quarterly ABS Survey of Balance Sheet Information are requested to report assets at their market value.

### Assets in Australia/Overseas

9. Assets in Australia include land and buildings located in Australia and financial claims on residents; assets overseas include land and buildings located overseas and financial claims on non-residents. A resident is any person, corporation or other entity ordinarily domiciled in Australia, except foreign embassies, consulates and military establishments located in Australia, which are classified as non-resident. Non-residents also include any persons, corporations or other entities ordinarily domiciled overseas. Entities located in Australia which are owned by non-residents are classified as resident of Australia (e.g. a branch or subsidiary of an overseas company). Overseas branches or subsidiaries of Australian companies are non-resident.

### Financial instruments

10. The classification of financial instruments in this publication follows that contained in the ABS publication *Australian National Accounts, Financial Accounts* (5232.0). Definitions of the various types of instrument are given below.

#### *Cash and deposits*

11. *Cash* covers notes and coin on hand. *Deposits* are credit account balances with *deposit-taking institutions* as defined by the Reserve Bank. These are Banks and Cash Management Trusts and all corporations registered under the *Financial Corporations Act* except for Intra-group Financiers and Retailers. Bonds, debentures, notes and transferable certificates of deposit issued by deposit-taking institutions are classified as *long term assets* and negotiable certificates of deposit issued by banks as *Bank certificates of deposit*.

#### *Loans and placements*

12. *Loans* are intermediated borrowings which are not evidenced by the issue of debt securities. An example of

this would be money borrowed from a Life Office with a mortgage over property as collateral.

13. *Placements* are account balances with entities not regarded as deposit-taking institutions (see paragraph 10). Examples of these are account balances of funds with State governments' central borrowing authorities.

#### *Short term securities*

14. Debt securities are divided into short term and long term using *original* term to maturity as the classificatory criterion. Short term securities are those with an original term to maturity of one year or less. Issuers of promissory notes and bills of exchange do negotiate rollover facilities which allow them to use these instruments as sources of floating-rate long term funds. However, in these statistics the existence of rollover facilities does not convert what are legally short term instruments into long term ones.

15. There are four types of short term securities shown in this publication: bills of exchange, promissory notes, Treasury notes and bank certificates of deposit. All of these are issued at a discount to face value and are traded on well-established secondary markets with bills of exchange and certificates of deposit being the most actively traded. Professional traders call these short term instruments *money market securities*. Treasury notes are inscribed stock but the others are bearer securities, that is the owner of the assets is not registered with the issuer but physically holds the documents. Bearer securities are payable to the holder on maturity and transferable by delivery. Ownership of inscribed stock is recorded in a register and a non-transferable certificate of ownership is issued but the owner of the asset does not physically hold the documents.

16. *Bills of exchange*. A bill of exchange is an unconditional order drawn (issued) by one party, sent to another party for acceptance and made out to, or to the order of, a third party, or to bearer. It is a negotiable instrument with an original term to maturity of 180 days or less. Although merchant banks were the promoters of the bill market in Australia, today almost all bills are bank accepted. Acceptance of a bill obliges the acceptor to pay the face value of the bill to the holder upon maturity.

17. *Promissory notes*. A promissory note is a written promise to pay a specified sum of money to the bearer at an agreed date. It is usually issued for terms ranging from 30 to 180 days and is sold to an investor at a simple discount to the face value. A promissory note is different to a bill of exchange in that it is not 'accepted' by a bank and is not endorsed by the parties which sell it in the market place.

18. *Treasury notes*. These are inscribed instruments issued by the Commonwealth Government with original maturity terms of five, thirteen or twenty-six weeks. Treasury notes are included in these statistics as *other short term assets*.

19. *Bank certificates of deposit*. A certificate of deposit is similar to a promissory note except that the drawer is a bank. Most bank-issued certificates of deposit with an original term to maturity of one year or less are *negotiable* certificates of deposit or NCD's. *Transferable* certificates of deposit with an original term to maturity greater than one year are included in *long term assets*.

#### *Long term securities*

20. A long term security is a document which represents the issuer's pledge to pay the holder, on a date which, at the time of issue, is more than one year in the future, the sum of money shown on the face of the document. Until that future date the issuer usually promises to pay coupon interest to the holder quarterly or half-yearly at a rate which is fixed at the time the security is issued. These securities are therefore known as *fixed interest securities* in the professional market.

21. The following types of securities make up the category called 'long term securities' in this publication.

- Treasury Bonds and Australian Savings Bonds. These are issued to corporations and the general public by the Commonwealth Government.
- Various series of inscribed stock which are issued by State government owned borrowing authorities and enterprises. These are known as *state and local general government (or semi-government) securities by professional traders*.
- Debentures, transferable certificates of deposit and unsecured notes, which are collectively called *corporate securities* or *medium term notes* by brokers.
- Asset-backed bonds, such as mortgage backed securities.
- Convertible notes, prior to conversion.

22. The first two of these are published separately in this publication. The last three types are combined together as *other long term securities*.

#### *Equities and units in trusts*

23. This category comprises shares traded on an organised stock exchange, shares in unlisted companies, convertible notes after conversion, preference shares and units issued by both listed and unlisted unit trusts. Trust units are included in this classification because they have important characteristics of equities, such as entitlement to a share of the profits and of (on liquidation) the residual assets of the trust.

#### *Other financial assets*

24. This covers any other financial claims on residents that do not fit into the foregoing categories, such as trade credit, interest accruals and other derivative (but not synthetic) financial products. Synthetic financial products combine a primary financial instrument with a derivative financial instrument and are classified to the category appropriate to the primary instrument used.

*Non-financial assets*

25. Non-financial assets comprise all those assets which are not financial in nature: i.e. physical assets. For the purposes of these statistics they are broken down into only two categories; land and buildings, and other types of non-financial asset.

26. *Land and buildings* refers to land and buildings held and the value of units in unitised buildings. New acquisitions are reported at acquisition cost and existing assets are reported at the latest available market valuation.

27. *Other non-financial assets* refers to all assets not classified elsewhere except for overseas assets (see below).

*Assets overseas*

28. Assets overseas include physical assets located overseas and financial claims on non-residents. See paragraph 8 for definition.

**Revisions**

29. Revisions to previously published statistics are included in this publication.

**Related publications**
