SEASONALLY ADJUSTED

| | Aug 97 | Sep 97 | monthly change |
|---------------------------|---------|---------|----------------|
| Employed persons ('000) | 8 375.9 | 8 450.6 | 74.7 |
| Unemployed persons ('000) | 798.7 | 791.5 | -7.2 |
| Unemployment rate (%) | 8.7 | 8.6 | -0.1 pts |
| Participation rate (%) | 62.9 | 63.3 | 0.4 pts |

SEPTEMBER KEY POINTS

TREND ESTIMATES

EMPLOYMENT

- rose to 8,415,400 in September 1997.

UNEMPLOYMENT

- remained relatively steady at 793,300 in September 1997.

UNEMPLOYMENT RATE

- remained at 8.6% in September 1997.

PARTICIPATION RATE

- fell to 63.0%.

SEASONALLY ADJUSTED ESTIMATES

EMPLOYMENT

- rose by 74,700 to 8,450,600 with a rise of 54,700 in full-time employment, and strong rises in both male and female employment.

UNEMPLOYMENT

- fell by 7,200 to 791,500, with a fall of 16,900 females looking for work, partially offset by a rise of 9,700 unemployed males.

UNEMPLOYMENT RATE

- fell to 8.6%. The male rate rose by 0.1 points to 9.0% and the female rate fell by 0.5 points to 8.1%.
- NSW 7.8% (8.0% last month); Vic 9.0% (9.3%); Qld 9.4% (9.8%); SA 9.8% (9.5%); WA 7.0% (7.2%); Tas 11.5% (11.0%).

PARTICIPATION RATE

- rose by 0.4 percentage points to 63.3% (with rounding).

| March 1998 | 9 April 1998 |

CHANGES THIS MONTH

Following each Census of Population and Housing, the ABS selects a new sample for the Labour Force Survey. This is done to ensure that the sample continues to accurately represent the distribution of the Australian population. A new sample has recently been selected based on the 1996 Census. The bulk of the new sample is being phased in over the period September 1997 to April 1998, with one eighth of this portion of the sample being introduced every month. The remainder of the sample (about 15% of the total), which covers less settled areas of Australia and non-private dwellings, has been rotated in fully this month (September 1997) for New South Wales, Victoria, Tasmania, Northern Territory and Australian Capital Territory. This part of the sample will be rotated in for Queensland, South Australia, and Western Australia next month (October 1997).

Detailed information about the new sample is provided in *Information Paper: Labour Force Survey Sample Design* (cat. no 6269.0), which was released on 2 September 1997.

ROUNDING

Estimates of monthly change shown on page 1 have been calculated using unrounded estimates, and may be different from, but are more accurate than, movements obtained from the rounded estimates. The graphs on page 1 also depict movements calculated from unrounded estimates.

SAMPLING ERRORS

The estimates in this publication are based on a sample survey. Because the entire population is not enumerated, the published estimates and the movements derived from them are subject to sampling variability. Standard errors give a measure of this variability and appear on pages 30 and 31.

W. McLennan
Australian Statistician

PRINCIPAL LABOUR FORCE SERIES: Trend estimates

EMPLOYED PERSONS

Trend estimates for employed persons rose steadily from 7,616,200 in January 1993 until mid 1995. After a small period of decline in early 1996, the trend then continued to rise more slowly, reaching 8,408,900 in February 1997. The trend estimate then fell slightly, but in recent months has resumed rising to 8,415,400 in September 1997.

UNEMPLOYED PERSONS

The trend estimate of unemployment peaked at 947,800 in September 1993, before falling rapidly to 755,400 in June 1995. The trend then rose slowly and in April 1997 reached 801,900. The trend has since fallen, to 793,300, in September 1997.

UNEMPLOYMENT RATE

From a high of 11.0% for most of late 1992 and 1993, the trend unemployment rate fell steadily to a low of 8.4% in May 1995. The trend then rose slowly to reach 8.7% in September 1996. The rate has remained relatively steady since, and stood at 8.6% in September 1997.

UNEMPLOYED PERSONS: Trend estimates

UNEMPLOYED MALES LOOKING FOR FULL TIME WORK

TOTAL

The trend estimate of unemployed males looking for full-time work rose to a peak of 533,500 in December 1992, before falling to 399,400 in May 1995. The trend estimate has since been relatively steady and in September 1997 stood at 406,900.

MALES AGED 15-19

From a peak of 71,900 in July 1992, the trend estimate of junior males looking for full-time work fell to 48,600 in March 1995. The trend then rose to 55,300 in September 1996 before falling over the next year. In September 1997, the trend estimate stood at 50,100.

MALES AGED 20 AND OVER

The trend estimate of the number of adult males looking for full-time work fell rapidly from a peak of 468,500 in January 1993, to 349,100 in June 1995. The trend then remained relatively steady until December 1996. In 1997, the trend estimate rose slightly and was 356,700 in September 1997.

UNEMPLOYED PERSONS: Trend estimates

UNEMPLOYED FEMALES LOOKING FOR FULL TIME WORK

TOTAL

After peaking at 273,800 in October 1993, the trend estimate of females looking for full-time work fell rapidly to 208,400 in July 1995. The trend then rose to 228,400 in March 1997. The trend estimate has since fallen, and was 219,700 in September 1997.

FEMALES AGED 15-19

Since reaching a high of 58,800 in May 1992, the trend estimate of junior females looking for full-time work has been generally falling. The trend estimate recorded a short sharp rise from 39,500 in June 1996 to 40,600 in November 1996. Since then it has been falling strongly, and was at 31,900 in September 1997.

FEMALES AGED 20 AND OVER

The trend estimate of adult females looking for full-time work fell rapidly from a peak of 224,000 in October 1993 to 166,900 in June 1995. The trend estimate rose steadily over the next two years to 193,600 in April 1997. In more recent months, the trend has fallen, to 187,800 in September 1997.

(a) Trend estimates for March 1997 to August 1997 have been revised.

Estimates for the most recent three months may be subject to significant revisions as data for later months become available.

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains preliminary estimates of the civilian labour force derived from the Labour Force Survey component of the monthly population survey. Estimates for the current month are preliminary and subject to revision. Revised estimates for the current month and more detailed estimates will be published in *Labour Force, Australia* (6203.0).

MONTHLY POPULATION SURVEY

2 The population survey is based on a multi-stage area sample of private dwellings (currently about 30,000 houses, flats, etc.) and a list sample of non-private dwellings (hotels, motels, etc.), and covers about 0.5% of the population of Australia. The information is obtained from the occupants of selected dwellings by specially trained interviewers. The interviews are generally conducted during the two weeks beginning on the Monday between the 6th and 12th of each month. The information obtained relates to the week before the interview (i.e. the reference week).

TELEPHONE INTERVIEWING

3 The ABS has introduced the use of telephone interviewing into the Labour Force Survey. Households selected for the Labour Force Survey are interviewed each month for 8 months, with one eighth of the sample being replaced each month. The first interview will continue to be conducted face-to-face. Subsequent interviews will then be conducted by telephone (if acceptable to the respondent). Telephone interviewing was phased in for each new sample group from August 1996 to February 1997.

4 During the period of implementation, the new method produced different estimates than would have been obtained under the old methodology. The effect peaked in November 1996, when it is estimated that the published estimate of total employment was about 36,000 to 48,000 lower than would have been measured under the old methodology. The effect dissipated over the final months of implementation and was no longer discernible from February 1997. Therefore, the estimates for February 1997 and onwards are directly comparable to estimates for periods prior to August 1996.

SCOPE OF SURVEY

5 The Labour Force Survey includes all persons aged 15 and over except members of the permanent defence forces, certain diplomatic personnel of overseas governments customarily excluded from census and estimated populations, overseas residents in Australia, and members of non-Australian defence forces (and their dependants) stationed in Australia.

COVERAGE

6 In the Labour Force Survey, coverage rules are applied which aim to ensure that each person is associated with only one dwelling, and hence has only one chance of selection. The coverage rules are necessarily a balance between theoretical and operational considerations. Nevertheless, the chance of a person being enumerated at two separate dwellings in the survey is considered to be negligible.

POPULATION BENCHMARKS

7 Labour Force Survey estimates are calculated in such a way as to add up to independent estimates of the civilian population aged 15 and over (population benchmarks). From February 1994, labour force estimates have been compiled using benchmarks based on the results of the 1991 Census of Population and Housing. Small revisions were made to many of the historical estimates from January 1989 to January 1994.

REVISION OF SERIES

8 From April 1986, the definition of employed persons was changed to include persons who worked without pay between 1 and 14 hours per week in a family business or on a farm (i.e. contributing family workers). For further information, see paragraphs 36 and 37 of the Explanatory Notes to the February 1987 issue of *Labour Force, Australia* (6203.0).

EXPLANATORY NOTES

SURVEY SAMPLE REDESIGN

9 The Labour Force Survey sample has been reselected using information collected in the 1996 Census of Population and Housing.

10 The bulk of the new sample will be phased in over the period September 1997 to April 1998, with one eighth of this portion of the sample being introduced every month. The remainder of the sample (about 15% of the total), which covers less settled areas of Australia and non-private dwellings, will be rotated in fully for New South Wales, Victoria, Tasmania, Northern Territory and Australian Capital Territory in September, and for Queensland, South Australia, and Western Australia in October 1997. Such a pattern of implementation means that any changes to labour force estimates due to differences between the two samples, or any other influences, will be spread over the eight months.

11 For further details, see *Information Paper: Labour Force Survey Sample Design* (6269.0).

RELIABILITY OF ESTIMATES

12 Two types of error are possible in an estimate based on a sample survey: sampling error and non-sampling error.

Sampling error occurs because a sample, rather than the entire population, is surveyed. One measure of the likely difference resulting from not including all dwellings in the survey is given by the standard error. There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained if all dwellings had been included in the survey, and about nineteen chances in twenty that the difference will be less than two standard errors. Standard errors of estimates for the latest month and of estimates of movements since the previous month are shown on pages 30 and 31. Standard errors of other estimates and other movements may be determined by using information in the Technical Notes in *Labour Force, Australia* (6203.0).

Non sampling error arises from inaccuracies in collecting, recording and processing the data. Every effort is made to minimise reporting error by the careful design of questionnaires, intensive training and supervision of interviewers, and efficient data processing procedures.

SEASONAL ADJUSTMENT AND TREND ESTIMATION

13 Seasonally adjusted series are published in Tables 2, 5 and 12 to 17. Seasonal factors are reviewed annually to take account of each additional year's original data. The results of the latest review were used to compile the revised seasonally adjusted and trend estimates given in this publication. Information about the method of adjustment was published in an article in the February 1997 issue of *Labour Force, Australia* (6203.0).

14 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour. For example, irregular factors unrelated to the trend account for more than half the seasonally adjusted movement with the following frequency:

Employment: 5 in 10 monthly movements

Unemployment: 7 in 10 monthly movements

Unemployment rate: 7 in 10 monthly movements

Participation rate: 9 in 10 monthly movements.

EXPLANATORY NOTES

SEASONAL ADJUSTMENT AND TREND ESTIMATION continued

15 The smoothing of seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series, and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series. Trend series are used to analyse the underlying behaviour of the series over time. These are published in tables 3, 6 and 12 to 19.

16 While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller, and after three months have a negligible impact on the series. There will also be revisions as a result of the annual review of seasonal factors.

17 Trend estimates are published for the Northern Territory in table 18 and for the Australian Capital Territory in table 19. Unadjusted series for the two Territories have shown, historically, a high degree of variability, which can lead to considerable revisions to the seasonally adjusted estimates after each annual seasonal factor re-analysis. Seasonally adjusted estimates are not currently published for the two Territories. The most recent six months trend estimates are subject to revision. For the three most recent months, the revision may be relatively large. Inferences about trends drawn from smoothed seasonally adjusted (trend) estimates for months earlier than the latest three months are unlikely to be affected by month to month revisions. They may be affected by revision resulting from the annual re-analysis of seasonal factors.

18 For further information, see *A Guide to Interpreting Time Series — Monitoring 'Trends': an Overview* (1348.0) or contact the Assistant Director, Time Series Analysis on (02) 6252 6345.

RELATED PUBLICATIONS

19 Users may also wish to refer to *Labour Force, Australia* (6203.0). This publication contains a detailed list of related publications which are available from ABS Bookshops.

20 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

UNPUBLISHED STATISTICS

21 As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Donna Maurer on 02 6252 6525 or to any ABS office.

EFFECTS OF ROUNDING

22 Estimates have been rounded and discrepancies may occur between sums of the component items and totals.

23 Estimates of movement shown in this publication are obtained by taking the difference of unrounded estimates. The movement estimate is then rounded to one decimal place. Therefore where a discrepancy occurs between the reported movement and the difference of the rounded estimates, the reported movement will be more accurate.

SYMBOLS AND OTHER USAGES

GLOSSARY

| | |
|---|--|
| Actively looking for work | Includes writing, telephoning or applying in person to an employer for work; answering a newspaper advertisement for a job; checking factory or Commonwealth Employment Service noticeboards; being registered with the Commonwealth Employment Service; checking or registering with any other employment agency; advertising or tendering for work; and contacting friends or relatives. |
| Attending school | Persons aged 15 to 19 enrolled full time at secondary or high schools in the reference week. |
| Attending tertiary educational institution full time | Persons aged 15 to 24 enrolled full time at a TAFE college, university, or other educational institution in the reference week. |
| Employed | Persons aged 15 and over who, during the reference week: <ul style="list-style-type: none">■ worked for one hour or more for pay, profit, commission or payment in kind in a job or business, or on a farm (comprising employees, employers and own account workers); or■ worked for one hour or more without pay in a family business or on a farm (i.e. contributing family workers); or■ were employees who had a job but were not at work and were:<ul style="list-style-type: none">■ on paid leave, on leave without pay for less than four weeks up to the end of the reference week,■ stood down without pay because of bad weather or plant breakdown at their place of employment for less than four weeks up to the end of the reference week,■ on strike or locked out,■ on workers' compensation and expected to be returning to their job, or■ receiving wages or salary while undertaking full-time study; or■ were employers, own account workers or contributing family workers who had a job, business or farm, but were not at work. |
| Full-time workers | Employed persons who usually worked 35 hours or more a week (in all jobs) and those who, although usually working less than 35 hours a week, worked 35 hours or more during the reference week |
| Labour force | For any group, persons who were employed or unemployed, as defined. |
| Labour force status | A classification of the civilian population aged 15 and over into employed, unemployed or not in the labour force, as defined. The definitions conform closely to the international standard definitions adopted by the International Conferences of Labour Statisticians. |
| Not in the labour force | Persons who were not in the categories employed or unemployed as defined. |
| Participation rate | For any group, the labour force expressed as a percentage of the civilian population aged 15 and over in the same group. |
| Part-time workers | Employed persons who usually worked less than 35 hours a week and who did so during the reference week. |
| Seasonally adjusted series | A time series of estimates with the estimated effects of normal seasonal variation removed. See Explanatory Notes 13 to 14 for more detail. |
| Trend series | A smoothed seasonally adjusted series of estimates. See Explanatory Notes 15 to 17 for more detail. |

G L O S S A R Y

| | |
|---|--|
| Unemployed | Persons aged 15 and over who were not employed during the reference week, and: <ul style="list-style-type: none">■ had actively looked for full-time or part-time work at any time in the four weeks up to the end of the reference week and:<ul style="list-style-type: none">* were available for work in the reference week, or would have been available except for temporary illness (i.e. lasting for less than four weeks to the end of the reference week), or* were waiting to start a new job within four weeks from the end of the reference week and would have started in the reference week if the job had been available then; or■ were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the reference week (including the whole of the reference week) for reasons other than bad weather or plant breakdown. |
| Unemployed looking for first full-time job | Unemployed persons looking for full-time work (as defined above) who had never worked full time for two weeks or more |
| Unemployed looking for full-time work | Unemployed persons who actively looked for full-time work, or were to resume a full-time job from which they had been stood down. |
| Unemployed looking for part-time work | Unemployed persons who had actively looked for part-time work only, or were to resume a part-time job from which they had been stood down. |
| Unemployment rate | For any group, the number of unemployed persons expressed as a percentage of the labour force in the same group. |
| Unemployment to population ratio | For any group, the number of unemployed persons expressed as a percentage of the civilian population in the same group. |

STANDARD ERRORS

The estimates in this publication are based on information gained from the occupants of a sample survey of dwellings. Because the entire population is not surveyed, the published estimates are subject to sampling error. The most common way of quantifying such sampling error is to calculate the standard error for the published estimate or statistic.

LEVEL ESTIMATES

To illustrate, let us say the published level estimate for employed persons aged 15 to 19 is 500,000. The calculated standard error in this case is 9,000. The standard error is then used to interpret the level estimate of 500,000. For instance, the standard error of 9,000 indicates that:

- There are approximately two chances in three that the real value falls within the range 491,000 to 509,000 ($500,000 + \text{or} - 9,000$)
- There are approximately nineteen chances in twenty that the real value falls within the range 482,000 to 518,000 ($500,000 + \text{or} - 18,000$).

The real value in this case is the result we would obtain if we could enumerate the total population.

The following tables show the standard errors for this month's level estimates.

STANDARD ERRORS *continued*

MOVEMENT ESTIMATES

The following example illustrates how to use the standard error to interpret a movement estimate. Let us say that one month the published level estimate for females employed part time in Australia is 1,387,000; the next month the published level estimate is 1,400,000. The calculated standard error for the movement estimate is 11,600. The standard error is then used to interpret the published movement estimate of 13,000. For instance, the standard error of 11,600 indicates that:

- * There are approximately two chances in three that the real movement over the two month period falls within the range 1,400 to 24,600 ($13,000 + \text{or} - 11,600$)
- * There are approximately nineteen chances in twenty that the real movement falls within the range $-10,200$ to $36,200$ ($13,000 + \text{or} - 23,200$).

The following tables show the standard errors for this month's movement estimates.

| | EMPLOYED..... | | | UNEMPLOYED..... | | | Labour force | Not in labour force | '000 | Unemployment rate | Participation rate |
|---------|---------------|-----------|-------|----------------------|----------------------|-------|--------------|---------------------|------|-------------------|--------------------|

WHAT IF...? REVISIONS TO TREND ESTIMATES

EFFECT OF NEW SEASONALLY ADJUSTED ESTIMATES ON TREND ESTIMATES

Each time new seasonally adjusted estimates become available, trend estimates are revised (see paragraphs 13 and 14 of Explanatory Notes).

TREND REVISIONS

The examples in the tables below show four illustrative scenarios and the consequent revisions to previous trend estimates of employment and unemployment rate.

- 1** The October seasonally adjusted estimate is the same as the September estimate.
- 2** The October seasonally adjusted estimate is higher than the September estimate by:
 - +0.33% for employment
 - +2.2% for the unemployment rate
- 3** The October seasonally adjusted estimate is lower than the September estimate by:
 - -0.33% for employment
 - -2.2% for the unemployment rate
- 4** The October seasonally adjusted estimate results in a revised September trend estimate which is identical to the new October trend estimate.

The percentage changes of 0.33% and 2.2% were chosen because they represent the average absolute monthly percentage changes in employment and the unemployment rate respectively.

EMPLOYMENT ('000)

WHAT IF NEXT MONTH'S SEASONALLY ADJUSTED ESTIMATE IS:

| | 1 TREND as PUBLISHED | 2 i.e. the same as Sep 1997 | 3 i.e. rises by 0.33% | 4 i.e. falls by 0.33% | 4 i.e. same trend for Sep & Oct |
|------------------|-----------------------------------|--|------------------------------------|------------------------------------|--|
| 1997 | 8 450.6 | 8 478.7 | 8 422.6 | 8 383.1 | |
| July | 8 401.8 | 8 403.8 | 8 405.0 | 8 402.5 | 8 400.7 |
| August | 8 407.7 | 8 413.4 | 8 417.5 | 8 409.2 | 8 403.4 |
| September | 8 415.4 | 8 424.5 | 8 432.3 | 8 416.6 | 8 405.6 |
| October (new) | — | 8 434.1 | 8 445.9 | 8 422.3 | 8 405.6 |

UNEMPLOYMENT RATE (%)

WHAT IF NEXT MONTH'S SEASONALLY ADJUSTED ESTIMATE IS:

| | 1 TREND as PUBLISHED | 2 i.e. the same as Sep 1997 | 3 i.e. rises by 2.2% | 4 i.e. falls by 2.2% | 4 i.e. same trend for Sep & Oct |
|------------------|-----------------------------------|--|-----------------------------------|-----------------------------------|--|
| 1997 | 8.6 | 8.8 | 8.4 | 8.7 | |
| July | 8.6 | 8.7 | 8.7 | 8.6 | 8.7 |
| August | 8.6 | 8.6 | 8.7 | 8.6 | 8.6 |
| September | 8.6 | 8.6 | 8.7 | 8.6 | 8.6 |
| October (new) | — | 8.6 | 8.7 | 8.5 | 8.6 |

FOR MORE INFORMATION . . .

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

INFORMATION CONSULTANCY SERVICES

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see below).

ABS PRODUCTS

A large number of ABS products is available from the ABS Bookshops (see below). The ABS also provides a subscription service – you can telephone the ABS Subscription Service Australia wide toll free on 1300 3663 23.

ELECTRONIC SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below) or e-mail us at:
