CONSUMER PRICE INDEX - DECEMBER QUARTER 1972

Variations in retail prices as measured by the Consumer Price Index for the six State capital cities and Canberra are shown herein.

- 2. Compared with the previous quarter, the All Groups Consumer Price Index for December quarter 1972 increased by 1.2% for the weighted average of the six State capital cities. Changes in individual cities were: Sydney +1.3%, Melbourne +1.1%, Brisbane +1.6%, Adelaide +1.1%, Perth +0.4%, Hobart +1.4%, Canberra +1.6%.
- 3. Recent quarterly changes in the All Groups index have been as follows:

- The Consumer Price Index measures quarterly variations in prices of commodities and services as affecting a high proportion of the expenditure of wage-earner households in the aggregate. Changes in the pattern of this expenditure since 1950 have been such as to render it necessary to construct the index with additional items and changes in weighting patterns at intervals (rather than on the basis of a list of items and set of weights which remained unchanged throughout the period). Six series for short periods, viz., September quarter 1948 to June quarter 1952; June quarter 1952 to June quarter 1956; June quarter 1956 to March quarter 1960; March quarter 1960 to December quarter 1963; December quarter 1963 to December quarter 1968; and from December quarter 1968 have therefore been constructed and linked to form a continuous retail price index series published herein as the Consumer Price Index. At times of linking the weighting pattern was altered and, in addition, new items (mainly ones that had become significant in household expenditure) were introduced. In each period between links the items and weighting have remained unchanged.
- 8. The quarterly prices for food items used in the index are the averages of prices normally collected as at the middle of each of the three months of the quarter. However, for potatoes and for onions from December quarter 1968, weekly prices are averaged to arrive at monthly prices. Prices of all non-food items are collected at regular quarterly intervals (or at annual intervals with items such as local government rates and seasonal clothing) normally as at the middle of the mid-month of each quarter. However, for furniture, major household appliances and motoring items (other than motor car) the collection is made during the first month of each quarter to facilitate field collection arrangements.
- 9. The indexes measure price movements in each city individually. They do not provide a comparison of the retail price level in any city with the retail price level of any other city.
- Table 1 on page 4 of this Bulletin shows Consumer Price Index numbers for each fiscal year from 1961-62 to 1971-72 and for each quarter from September quarter 1967. Table 2 on pages 5 and 6 shows Group Index numbers quarterly from September quarter 1970 to December quarter 1972.
- 11. Table 3 on page 7 shows index numbers for September quarter 1972 and December quarter 1972 for groups and sub-groups of the index and for some special groupings. It also contains information of contributions by index sub-groups to the total index in terms of All Groups Index Points for these two quarters.
- Users of figures in Table 3 should bear in mind that the Consumer Price Index is designed to measure the proportionate change in retail prices as combined in the five major groups and more particularly the total of the groups. For sub-groups or particular items, the index does not necessarily provide comprehensive and valid measures of price changes in those particular fields. Nor does it necessarily measure the relative influences of those classes of items in aggregate variations in prices. The Consumer Price Index is essentially a combination of selected items under various headings and not a dissection of total household expenditure into its component parts.
- Major changes in the composition of the sub-group indexes published in Table 3 resulting from the latest link in the Consumer Price Index (December quarter 1968), have been indicated in the footnotes on page 8. The old and new combinations have been linked to provide continuous series of index numbers across this point of time (December quarter 1968), but it should be remembered that all sub-groupings were affected by changes at the link and some significantly so. Each series of index numbers links the average price movement shown by one combination of items up to December quarter 1968 to that shown by a different combination from December quarter 1968.
- Movements of the indexes from one date to another are usually expressed as percentage changes rather than changes in the "index points" because "index point" changes are affected by the level of the index in relation to its base period while percentage changes are not. In this bulletin details are given in terms of percentage changes in paragraphs 2-5. However, the analysis in paragraph 15 shows movements in terms of All Groups "index points". This analysis shows the contribution of selected items and of the five groups to movements in the total indexes. Table 3 on page 7 shows movements expressed as both percentage changes and changes in "index points". The following example illustrates the computation of "index point" and percentage changes:

All Groups: Weighted Average of Six State Capital Cities

Index Point Change		Percentage Change
December quarter 1972 CPI (1966-67 ≈ 100.0	0) 127.6	Index points difference divided by the index for the previous period

15. The following analysis and Table 3 on page 7 are provided to assist interpretation of movements shown by the Consumer Price Index from September quarter 1972 to December quarter 1972.

16. A summary of the movements of the various group indexes, together with the *main quarterly* price changes which affected the index between September Quarter 1972 and December Quarter 1972 is shown below:

Food Group. Changes in meat and potato prices are frequently the major cause of movements in the total index and of disparate movements between cities. The effects of changes in the prices of these items in each city for this quarter are shown in the table above. The price of bread increased in Hobart.

The group index for the weighted average of the six State capital cities showed a quarterly increase of 1.2%.

Clothing and Drapery Group. There were increases in all sections of the group with about two thirds of the increase being contributed by summer seasonal items.

The group index for the weighted average of the six State capital cities showed a quarterly increase of 1.7%.

Housing Group. Local government rates and charges increased in six capital cities. There were increases in all capital cities in all other sections of the group.

The group index for the weighted average of the six State capital cities showed a quarterly increase of 2.0%.

Household Supplies and Equipment Group. The price of electricity increased in Brisbane.

The group index for the weighted average of the six State capital cities showed a quarterly increase of 0.7%.

Miscellaneous Group. The price of beer increased in Sydney, Brisbane and Canberra. The cost of third party insurance increased in Melbourne. There were small increases in most other sections of the group. In contrast to the December quarters of 1970 and 1971 there were no significant effects associated with changes announced in the Commonwealth or State government budgets.

The group index for the weighted average of the six State capital cities showed a quarterly increase of 0.7%.

FOOTNOTES TO TABLES

- (a) Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted to avoid the distortions that would occur in rounding off the figures to the nearest whole number.
- (b) Weighted average of six State capital cities.
- (c) Any discrepancies between totals and sums of components in this table are due to rounding. For similar reasons quarterly movements shown by sub-group or group index numbers do not necessarily correspond exactly with those shown by the relevant index points.
- (d) See paragraph 14 on page 2.
- (e) Includes poultry as from December quarter 1968.
- (f) Men's, women's, boys' and girls' summerweight outerwear and women's and girls' summerweight underwear.
- (g) Men's, women's, boys' and girls' winterweight outerwear and underwear, and blankets.
- (h) Includes flats as from December quarter 1968.
- (i) Does not include cost of land or interest charges on house purchase.
- (j) Firewood and kerosene. Includes heating oil and briquettes as from December quarter 1968.
- (k) City and suburban rail, bus and tram.
- (1) Motor car, petrol, oil, tyres, tubes, tyre retreading and battery.
- (m) Lubrication service, repairs, registrations, third party insurance and driver's licence.
- (n) Hairdressing, drycleaning, shoe repairs and cinema admission. Includes health services from December quarter 1968.
