MAIN FEATURES

	Change	between
	June qtr 1985 and	Sept. qtr 1984 and
	Sept. qtr	Sept. qtr
All groups	1985	1985
index	%	%
Sydney	+2.1	+7.5
Melbourne	+2.0	+7.7
Brisbane	+2.6	+7.0
Adelaide	+2.1	+8.4
Perth	+2.1	+7.3
Hobart	+2.6	+8.7
Canberra	+2.4	+8.1
Darwin	+3.5	+7.9
Weighted average of		
eight capital cities	+2.2	+7.6

Main price changes between June quarter 1985 and September quarter 1985 were as follows:

Food: +1.8%

Prices of meals out and take-away foods increased in all

Bread prices increased in all cities.

Prices of fresh fruit and vegetables increased in all cities except Perth.

Fish prices increased in all cities.

Prices of soft drinks, ice cream and confectionery increased in all cities.

Clothing: +1.2%

Prices of men's and boys' clothing increased in all cities except Perth.

Prices of women's and girls' clothing increased in all cities.

Footwear prices increased in all cities.

Housing: +2.3%

House prices increased in all cities.

Privately-owned dwelling rents increased in all cities. Government-owned dwelling rents increased in Sydney, Melbourne and Darwin.

Local government rates and charges increased in Brisbane.

Household equipment and operation: +2.0%

Prices of furniture and and floorcoverings increased in all

Prices of household utensils and tools increased in all cities.

Electricity charges increased in Melbourne, Brisbane, Perth and Darwin.

Prices of household paper products increased in all cities. Prices of household cleaning agents increased in all cities except Melbourne.

Transportation: +2.1%

Petrol prices increased in all cities except Sydney.

Motor vehicle prices increased in all cities.

Motor vehicle service and repair costs increased in all cities.

Urban transport fares increased in Sydney, Brisbane, Adelaide, Hobart, Canberra and Darwin.

Tobacco and alcohol: +2.8%

Beer and cigarette prices increased in all cities.

Health and personal care: +2.8%

Prices for pharmaceuticals increased in all cities.

Prices for toiletries and other personal care products increased in all cities.

Medical insurance contributions increased in all cities except Hobart. These increases were partly offset by reductions in net medical charges in Melbourne, Brisbane, Hobart and Darwin, while in Sydney, Adelaide, Perth and Canberra, net medical charges increased.

Recreation and education: +2.8%

Prices for holiday travel and accommodation, both in Australia and overseas, increased for all cities.

Prices of books, newspapers and magazines increased in

Prices for other recreational goods increased in all cities. Entertainment charges increased in all cities except Hobart.

> A. R. BAGNALL Acting Australian Statistician

EXPLANATORY NOTES

Brief description of the CPI

- 1. The CPI measures quarterly changes in the price of a 'basket' of goods and services which account for a high proportion of expenditures by metropolitan wage and salary earner households. This 'basket' covers a wide range of goods and services, arranged in the following eight groups: food; clothing; housing; household equipment and operation; transportation; tobacco and alcohol; health and personal care; and recreation and education. Each group is in turn divided into sub-groups. Index numbers at the group and All Groups levels are published for each State capital city, Canberra, Darwin, and for the weighted average of eight capital cities. Index numbers for All Groups are also published for the weighted average of six State capital cities. Subgroup index numbers are published for the weighted average of eight capital cities.
- 2. It is important to note that the capital city indexes measure price movements over time in each city individually. They do not measure differences in retail price levels between cities.
- 3. Further information about the CPI is contained in a booklet entitled A Guide to the Consumer Price Index (6440.0) which is available from the ABS on request. For a more detailed account, The Australian Consumer Price Index, Concepts, Sources and Methods (6461.0) describes what the index measures, the goods and services included in it, and how the index is produced; it also describes the problems encountered in compiling the CPI and how those are dealt with.

Prices

- 4. Prices of goods and services included in the CPI are generally collected quarterly. However, some important items are priced monthly or more frequently (e.g. bread, fresh meat and fish, fresh fruit and vegetables, petrol, alcohol and tobacco) and a small number annually (e.g. seasonal clothing, local government rates and charges).
- 5. The bulk of items for which prices are collected quarterly are priced at the middle of the mid-month of the quarter (i.e. in August, November, February and May), but, to facilitate a more even spread of the field collection workload, some goods and services are priced in the first and third months of each quarter. Items priced in the third month are generally those subject to price changes at discrete points of time (e.g. electricity and postal charges, milk); in these cases information is obtained of any changes in price during the quarter so that a weighted average price for the whole quarter can be calculated.

Weighting pattern

- 6. There are 105 expenditure classes (that is, groupings of like items) in the tenth series CPI and each expenditure class has its own weight, or measure of relative importance. In calculating the index, price changes for the various expenditure classes are combined using these weights.
- 7. Changes in the weighting pattern have been made at approximately five-yearly intervals to take account of changes in household spending patterns. The CPI now comprises ten series of price indexes which have been linked to form a continuous series. The tenth series (that is, the current series), which was introduced in the June quarter 1982, has a weighting pattern based, in general, on estimated household expenditure in 1979-80.

Index points and percentage changes

8. Movements in indexes from one period to another can be expressed either as percentage changes, or as changes in 'index points'. The difference between these two methods of describing movements in indexes is shown by the following example:

All Groups CPI: Weighted average of eight capital cities Index numbers:

Sept. quarter 1985:	144.2
Less: June quarter 1985:	141.1
Change in index points:	+3.1

Percentage change =
$$\frac{+3.1}{141.1} \times 100 = +2.2\%$$

The index number of 144.2 for September quarter 1985 indicates an increase of 44.2% since the reference base year (1980-81).

9. Most of the tables in this publication show index numbers or percentage changes calculated from index numbers. However, Table 3 shows the main changes between June quarter 1985 and September quarter 1985, in terms of All Groups index points, for each capital city.

Special tables and groupings

- 10. Table 7 provides a detailed analysis, for the weighted average of eight capital cities, of movements in the CPI since the previous quarter, including information on movements for subgroups and for some special series. It also shows the contribution which each group and subgroup makes to the total CPI. For instance, the dairy produce subgroup contributed 2.72 index points to the total All Groups index number of 144.2 for September quarter 1985. The final column shows contributions to the change in All Groups index points by each group and subgroup.
- 11. The All Groups index includes the effects of changes in prices for hospital and medical services. To facilitate analysis of trends in retail prices without the effects of these changes, Table 5 shows index numbers and percentage changes for a special series All Groups excluding hospital and medical services, and compares these with changes in the All Groups index.

State and local government charges

12. Information on the impact of changes in selected State and local government charges on the CPI is included in Tables 3 and 7. Table 3 shows the contribution made by changes in these charges to the CPI for each capital city, while Table 7 shows index numbers for two special groupings 'Selected State and local government charges' and 'All Groups excluding selected State and local government charges'. For information on the derivation and limitations of these figures, see the Appendix to the December quarter 1982 issue of this publication.

Symbols and other usages

— nil or rounded to zero

n.a. not available

NOTE. Any discrepancies between totals and sums of components in this publication are due to rounding. For similar reasons quarterly movements shown by subgroup or group index numbers in Table 7 do not necessarily correspond exactly with those shown by the relevant index points.
