Statistics**

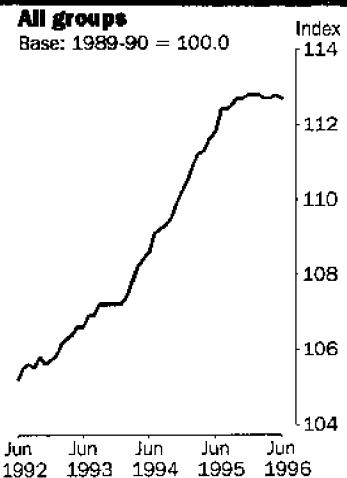

JUNE 1996

6407.0

PRICE INDEX OF MATERIALS USED IN BUILDING OTHER THAN HOUSE BUILDING¹

EMBARGOED UNTIL 11:30AM MON 5 AUGUST 1996

JUNE KEY FIGURES

| | % change May 96 to Jun 96 | % change Jun 95 to Jun 96 |
|--|---------------------------------|---------------------------------|
| Weighted average of six State capital cities | -0.1 | 0.8 |
| Sydney | -0.1 | 0.5 |
| Melbourne | 0.1 | 1.5 |
| Brisbane | 0.0 | 0.1 |
| Adelaide | 0.0 | 0.7 |
| Perth | -0.1 | 1.3 |
| Hobart | 0.1 | 1.0 |

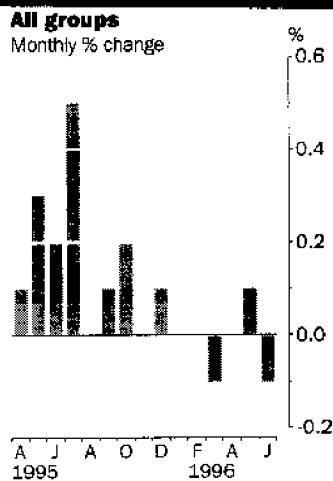

JUNE KEY POINTS

WEIGHTED AVERAGE INDEX

- A small decrease in ready mixed concrete prices was mostly offset by an increase in prices for paint and other coatings.

CAPITAL CITIES INDEXES

- Prices for ductwork used in air conditioning decreased in Sydney.
- Aluminium windows prices decreased in Perth.
- Prices for ready mixed concrete decreased in all cities except Sydney and Perth while paint and other coatings prices increased in all cities except Brisbane.

INQUIRIES

- For further information about these and related statistics, contact Robert Adams on 06 252 6198, or any ABS Office.

PRICE INDEX NOTES

| FORTHCOMING ISSUES | ISSUE | RELEASE DATE |
|--------------------|----------------|------------------|
| | July 1996 | 6 September 1996 |
| | August 1996 | 7 October 1996 |
| | September 1996 | 4 November 1996 |

CHANGES IN THIS ISSUE There are no changes in this issue.

EXPLANATORY NOTES

INTRODUCTION

1 This publication presents index numbers measuring changes in prices of selected materials used in the construction of buildings other than houses — the Price Index of Materials Used in Building Other than House Building. It is calculated on the reference base 1989-90 = 100.0 for the six State capital cities.

2 Index numbers for the current month and the previous three months are preliminary and subject to revision.

SCOPE

3 The index includes 63 items which are combined into 10 industry of origin groups and an 'All groups' total. Table 1 presents 'All groups' index numbers for the weighted average of the six State capital cities, for each of the cities separately. Although many of the selected materials are also used in house building, in building repair, maintenance and alteration work and in engineering construction work (e.g. projects such as roads, dams, bridges and the like), the weighting pattern of the index is not applicable to these other activities of the construction industry. In addition, since the weights are based on an average materials usage over a range of types of building within the defined area (building other than house building), the index is not necessarily applicable to any specific building or type of building.

CLASSIFICATION

4 For the weighted average of the six State capital cities the selected materials have been combined into broad groups on an industry of origin basis. Table 4 presents index numbers for groups defined in terms of the Groups (3 digit level) of the 1993 *Australian and New Zealand Standard Industrial Classification* (ANZSIC); the percentage contributions for individual materials and groups are shown in Table A1 of the Appendix of the October 1993 issue of this publication. The 'industry of origin' is not necessarily identical to the industry which supplies the materials to builders. The 'industry of origin' is the industry in which the material is *primarily produced*, determined in accordance with the classification rules of the ANZSIC. For instance, many of the materials are classified to the appropriate producing industries, rather than the wholesale trading industries. Some materials used in constructing buildings in Australia are imported. Imported materials are allocated to the similar industry of origin as Australian produced materials.

ITEMS AND WEIGHTS

5 The index is a fixed weights index. The items were selected and allocated weights in accordance with the estimated average values of materials used in the construction of buildings other than houses completed in each of the seven capital cities in the five years ended June 1992. This same weighting pattern is used for each of the seven capital cities. The weighting pattern for the 'All groups' index is set out in Appendix A of the October 1993 issue of this publication.

PRICE MEASUREMENT

6 Prices are collected at the mid point of the month to which the index refers, or the nearest trading day. They relate to specific standards of each material and are obtained from representative suppliers of materials used in building. In general, the point of pricing is 'delivered on site' but in some cases it has been necessary to use the nearest realistic price available e.g. 'delivered to electrical contractor's store'. Local prices are used in the indexes for each capital city.

PRICE MEASUREMENT (continued)

7 As far as possible, actual transactions prices are used in this index — that is, prices actually paid by building contractors or subcontractors to suppliers for materials delivered on building sites. The actual price paid for anything can be described in various ways. Instead of being described as a single price (as usually happens in retail shops) a price for a building material may be described in terms of the components which make up the price — for instance 'list price plus sales tax', 'suppliers price plus freight', 'basic price less (particular types of) discount' and so on. It is these *net* prices that buyers pay to sellers for materials that the ABS aims to use in compiling this index.

8 The ABS asks respondent businesses to report details of the discounts they offer so that actual transactions prices can be calculated. However, as building material suppliers offer many different types of discounts to buyers (e.g. trade discounts, settlement discounts, quantity discounts, competitive discounts), the identification of the discounts and the way in which they are applied by sellers pose considerable problems for the ABS. To the extent that discounts are identified and measured, their effects are taken into account in calculating the index. Sometimes new discounts, or changes in the way discounts are applied by sellers, are identified only after index numbers for a particular period have been published. In such cases, or in any other case where it is discovered that incorrect prices have been used in compiling the indexes, revisions to index numbers may occur in subsequent issues of this publication.

9 To minimise the incidence of revisions, the ABS has stringent procedures to verify that prices reported in its mail collections are transactions prices net of discounts.

10 Sales taxes levied on building materials are included in the prices used to compile the index. Materials used in the construction of Commonwealth, State and Local Government owned buildings are exempt from sales tax; materials used in most non-government 'health' and 'education' buildings and buildings for non-profit organisations such as religious and charitable institutions are also exempt. At any particular time, when there is a change in the rate of sales tax on building materials, the movement in the index takes into account the proportion of materials sold subject to sales tax and the proportion of materials exempt from sales tax.

11 On request, the ABS can provide further information on the treatment of sales tax in the index including details of factors to either include the full effects of sales tax changes or exclude entirely the effects of sales tax changes.

INDEX NUMBERS

12 Index numbers for financial years are simple averages of monthly index numbers.

Selected Materials

13 Table 5 contains index numbers for selected materials used in constructing buildings other than houses for the weighted average of the six State capital cities. In general these indexes relate to either single items or combinations of items as shown in the weighting pattern published in Table A1 of the Appendix to the October 1993 issue of this publication. Tables 6 to 9 contain index numbers for selected major materials for each State capital city.

INDEX NUMBERS (continued)

Special Combinations of
Materials

14 Tables 10 to 12 contain index numbers for the following special combinations of materials, for the weighted average of the six State capital cities and each State capital city:

- All groups excluding electrical materials and mechanical services components
- Electrical materials
- Mechanical services components
- Plumbing materials

REVISIONS

15 Index numbers for the current month and the previous three months are preliminary and subject to revision. From time to time index numbers for earlier months may also be revised. This will occur whenever the ABS obtains more complete information or discovers that incorrect prices have been used.

ANALYSIS OF INDEX CHANGES

16 Care should be exercised when interpreting month-to-month movements in the indexes as short-term movements do not necessarily indicate changes in trend.

17 The separate city indexes measure price movements over time in each capital city individually. They do not measure differences in price levels between cities.

18 Movements in indexes from one period to another can be expressed either as changes in 'index points' or as percentage changes. The following example illustrates the method of calculating index points changes and percentage changes between any two periods:

Weighted average of six State
capital cities index numbers —

| | | |
|------------------------|--------------------------------------|---------------|
| June 1996 | 112.7 | (see Table 1) |
| less June 1995 | 111.8 | (see Table 1) |
| Change in index points | 0.9 | |
| Percentage change | $\frac{0.9}{111.8} \times 100 = 0.8$ | |

19 Table 3 provides an analysis of the contribution which selected major building materials make to the All groups index for the weighted average of the six State capital cities. For example, Ready mixed concrete contributed 9.98 index points to the All groups index number of 112.7 for June 1996 and -0.05 index points to the net change of -0.1 index points.

FURTHER INFORMATION

20 Further information on the index is presented in the publication *Producer and Foreign Trade Price Indexes: Concepts, Sources and Methods* (6419.0).
