EMBARGO: 11:30 AM (CANBERRA TIME) MON 11 AUG 1997

**PRICE INDEXES OF MATERIALS USED IN  
COAL MINING, AUSTRALIA  
JUNE 1997**

---

**Planned changes to this publication**

- *As a result of measures in the 1997/98 Federal Budget to reduce ABS running costs, the frequency of the compilation and publication of the producer and international trade price indexes will be reduced from monthly to quarterly, thereby putting the statistics on the same frequency as the Consumer Price Index. This issue is the last monthly release of this publication. Commencing with the September quarter 1997, the publication will be released on a quarterly basis.*
  - *Subscriptions will be automatically extended to compensate for the reduced frequency of publication. This will be reflected on 1998 renewal notices. If you wish to make other arrangements please call our toll free number, 1800 020 608.*
- 

**EXPLANATORY NOTES**

**Introduction**

This publication contains price indexes relating to materials used in the mining of coal in Australia. Separate indexes show movements in prices of materials used in open cut and underground coal mining operations. Each index is presented on *reference base: Year 1987-88 = 100.0*. The indexes are compiled for each month from July 1987.

2. The Appendix to the November 1988 issue of this publication contains a more detailed description of the indexes and the weights used to compile each index.

**Scope and composition**

3. For the purposes of these indexes, coal mining operations encompass the removal of overburden, the extraction, washing and preparation of the coal, and transportation of the coal to the rail head. Materials are defined as those consumables and replacement parts normally used up in these activities. Items of capital equipment are not included within the scope of these indexes.

**Items and weights**

4. These indexes are *fixed weights indexes*. The items included in the indexes were selected on the basis of the estimated average values of materials used in the operation of open cut and underground coal mines in Australia during the three years ended June 1987.

**Prices**

5. The point of pricing is delivered on mine site or to the primary storage area for a group of mines. Prices are obtained from representative suppliers of the materials used in coal mining. In the main, prices are collected at the mid-point of each month.

6. As far as possible, actual transactions prices are used – that is, the prices actually paid by coal mines to suppliers for materials delivered on mine sites. The actual price paid for anything can, of course, be described in various ways. Instead of being described as a single price (as usually happens in retail shops), a price for a mining material may be described in terms of the

**INQUIRIES**

- *for further information about statistics in this publication and the availability of related unpublished statistics contact Jenny Ciceran on Canberra (06) 252 6217 or any ABS State office.*
  - *for information about other ABS statistics and services please contact Information Services on Canberra (06) 252 6627, 252 6007 or any ABS State office.*
-

components that make up the price – for instance, 'list price plus sales tax', 'supplier's price plus freight', 'basic price less (particular types of) discount', and so on. It is these net prices that buyers pay to sellers in exchange for materials that the ABS aims to use in compiling these indexes.

7. The ABS asks respondents to report details of the discounts they offer so that actual transactions prices can be calculated. However, as coal mining materials suppliers offer different discounts to buyers (for example, quantity discounts and competitive discounts), the identification of the discounts and the way in which they are applied by sellers pose considerable problems for the ABS. To the extent that discounts are identified and can be measured, their effects are taken into account in calculating these indexes.

8. Sometimes new discounts, or changes in the way that discounts are applied by sellers, are identified only after index numbers for a period have been published. In such cases revisions to index numbers will occur.

9. The prices used relate to specific standards or grades of materials with the aim of incorporating in the indexes price changes for representative materials of constant quality.

#### Index numbers

10. Index numbers for financial years are simple averages of the monthly index numbers.

11. Index numbers for the latest month and the previous month are preliminary and subject to revision. However, it may be necessary to revise index numbers for earlier periods, from time to time, where incorrect prices for those periods are detected later on.

12. The Open cut and Underground indexes enable comparisons to be drawn between them as to the *differences in degree of price movement* from period to period. They do not measure differences in price levels between the two methods of mining.

13. Since the weights of the indexes are based on an average materials usage from a range of coal mines with particular characteristics, the indexes are not necessarily representative of the price movements for materials used in any particular mine.

#### Analysis of index changes

14. Care should be exercised when interpreting month to month movements in the indexes as short term movements do not necessarily indicate changes in trend.

15. Movements in indexes from one period to another can be expressed either as changes in 'index points' or as percentage changes. The following example illustrates the method of calculating index points changes and percentage changes between any two periods:

#### Open cut index numbers –

June 1997	120.0	(see Table 1)
less June 1996	120.2	(see Table 1)
Change in index points	-0.2	

$$\text{Percentage change} = -0.2 / 120.2 \times 100 = -0.2$$

16. In this publication percentage changes are shown in respect of movements between:

- consecutive financial years
- corresponding months of consecutive years
- consecutive months.

#### Related publications

17. Users may also wish to refer to the following publications which are available on request:

*Price Index of Materials Used in Building Other than House Building, Six State Capital Cities* (6407.0)

*Price Indexes of Copper Materials, Australia* (6410.0)

*Price Indexes of Materials Used in Manufacturing Industries, Australia* (6411.0)

*Price Indexes of Articles Produced by Manufacturing Industry, Australia* (6412.0)

*Export Price Index, Australia* (6405.0)

*Import Price Index, Australia* (6414.0)

18. Other ABS publications that may be of interest include:

*Award Rates of Pay Indexes, Australia* (6312.0) – issued monthly.

19. Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

**Unpublished statistics**

20. As well as the statistics included in this and related publications, the ABS has a large range of other relevant unpublished data available. Inquiries should be directed to the contact in the phone inquiries box at the front of this publication.

**Symbols and other usages**

- p preliminary – figures subject to revision.
- r figure or series revised since previous issue.
- nil or rounded to zero.

**Electronic services**

21. A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office.

## For more information . . .

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available from all ABS Offices.

### ABS Products and Services

Many standard products are available from ABS bookshops located in each State and Territory. In addition to these products, information tailored to the needs of clients can be obtained on a wide range of media by contacting your nearest ABS Office. The ABS also provides a Subscription Service for standard products and some tailored information services.

### National Dial-a-Statistic Line

0055 86 400

*Steadycom P/L: premium rate 25c/20 secs.*

This number gives 24-hour access, 365 days a year, for a range of important economic statistics including the CPI.

### Internet

<http://www.abs.gov.au>

A wide range of ABS information is available via the Internet, with basic statistics available for each State, Territory and Australia. We also have Key National Indicators, ABS product release details and other information of general interest.
