

**LIVESTOCK PRODUCTS, AUSTRALIA  
OCTOBER 1995**

**MAIN FEATURES**

**Livestock Slaughtering**

The trend estimate for cattle slaughtering fell for the fourth consecutive month by 1.4 per cent in October 1995 and since the last peak in June 1995 has fallen 3.8 per cent. The trend estimate for calves rose marginally from the previous month.

**CATTLE SLAUGHTERINGS  
AUSTRALIA  
Trend Series**

Sheep slaughtering continued to fall, down 22.4 per cent since the last peak in September 1994. However, the rate of decline has fallen since February 1995. The trend estimate for lamb slaughtering rose 2.0 per cent in October 1995, and is 4.7 per cent higher than the last trough in July 1995.

The trend estimate for pig slaughtering fell 0.4 per cent in October 1995 to record its lowest level since

**SHEEP AND LAMB SLAUGHTERINGS,  
AUSTRALIA  
Trend Series**

June 1991. The estimate is 5.1 per cent below the last peak which occurred in November 1994.

**Red Meat**

The trend estimate for red meat recorded a slight fall in October 1995, continuing a general decline in production since October 1994. The trend estimate for beef fell 1.1 per cent, and has fallen 3.0 per cent since the last peak in June 1995. Reduced slaughtering in NSW and Queensland (where some abattoirs have closed or reduced operating levels recently) have contributed to these falls. The trend estimate for lamb rose by 3.3 per cent in September 1995 and has risen 11.0 per cent since the last trough in June 1995. Pig meat fell 1.0 per cent compared with September and has fallen 4.1 per cent since the last peak in May 1995.

**Chicken Meat**

The trend estimate for chicken meat production rose 0.9 per cent in October, and has risen 3.1 per cent since the last trough in May 1995.

**Whole Milk Intake**

The trend estimate for whole milk intake by factories for September 1995 rose 1.0 per cent. Since the last trough in February 1995 it has risen by 9.8 per cent. However, the rate of growth has slowed in recent months.

**Wool Receivals by Brokers and Dealers**

The trend estimate for wool receivals by brokers and dealers rose marginally between September and October, 1995. This was the first increase since February 1995.

**Live Exports**

The number of live sheep exported in September fell by 16.6 per cent to 413,400. The unit value (\$40.08) fell 5.2 per cent and the gross value (\$16.6 million) fell 21.0 per cent.

Although the number of live cattle exports fell 22.8 per cent in September 1995, exports for September quarter 1995 increased 68.4 per cent on the corresponding quarter in 1994. The gross value (\$20.3 million) fell 24.1 per cent and the unit value (\$550.73) fell 1.7 per cent.

**INQUIRIES**

(a) Red meat is shown in carcass weight and excludes offal. (b) Trend estimates for the most recent months are subject to revision when data for subsequent months become available. (c) Buffalo meat produced in the Northern Territory is included in Australian totals.

**RELIABILITY OF OCTOBER TREND ESTIMATES  
FOR PRODUCTION OF RED MEAT**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of November.

The table below shows, for red meat production for the six months ended September:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for November of 3% on the October figure;
- trend estimates assuming a decrease in seasonally adjusted data for November of 3% on the October figure.

The percentage change of 3% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 3.24%.

(a) Excludes offal. (b) Factors can be applied to beef, veal, mutton and lamb bone-out figures to derive bone-in carcass weight which, when added to bone-in figures, shows total exports in carcass weight. The factor for beef and veal is 1.5 and for mutton and lamb is 2.0 (Source: Australian Meat and Livestock Corporation). (c) Includes buffalo meat. (d) Cured carcass weight of smoked or cooked bacon and ham. Includes stated net weight of packs of canned bacon and ham. (e) Canned weight. Excludes canned bacon and ham.

(a) Chicken meat is shown in dressed weight of whole birds, pieces and giblets. (b) Excludes Tasmania, the Northern Territory and the Australian Capital Territory.

(c) Trend estimates for the most recent months are subject to revision when data for subsequent months become available.

Note: Some slaughtering and meat production statistics for 'Ducks and Drakes' and 'Other Fowls and Turkeys' are available by contacting the ABS on Canberra 252 5337 or by writing to PO Box 10, Belconnen ACT 2616 (Attention: Agriculture Section).

**RELIABILITY OF OCTOBER TREND ESTIMATES  
FOR CHICKEN MEAT PRODUCTION**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of November.

The table below shows, for chicken meat production for the six months ended October:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for November of 4% on the October figure;
- trend estimates assuming a decrease in seasonally adjusted data for November of 4% on the October figure.

The percentage change of 4% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 4.14%.

**RELIABILITY OF SEPTEMBER TREND ESTIMATES  
FOR WHOLE MILK INTAKE BY FACTORIES**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of October.

The table below shows, for whole milk intake by factories for the six months ended September:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for October of 2% on the September figure;
- trend estimates assuming a decrease in seasonally adjusted data for October of 2% on the September figure.

The percentage change of 2% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 1.97%.

(a) Trend estimates for the most recent months are subject to revision when data for the subsequent months become available.

**RELIABILITY OF OCTOBER TREND ESTIMATES  
FOR WOOL RECEIVALS**

Readers should exercise care in the interpretation of trend data as the last six observations, in particular, are likely to be revised with either revisions to the underlying data or the addition of data for the month of November.

The table below shows, for receivals of taxable wool for the six months ended October:

- trend estimates as published;
- trend estimates assuming an increase in seasonally adjusted data for November of 9% on the October figure;
- trend estimates assuming a decrease in seasonally adjusted data for November of 9% on the October figure.

The percentage change of 9% was chosen because the average absolute monthly percentage change in the seasonally adjusted data since the inception of the series has been 9.40%

## EXPLANATORY NOTES

**Introduction**

This publication contains information (preliminary where indicated) on livestock slaughterings, meat production, stocks of frozen meat, exports of live sheep and live cattle, exports of fresh, frozen and processed meat, and whole milk intake by factories, market milk sales by factories and receivals of taxable wool by wool brokers and dealers.

**Livestock slaughterings and meat production**

2. The statistics on slaughterings and meat production are based on a monthly collection from abattoirs and other major slaughtering establishments and include estimates of animals slaughtered on farms and by country butchers and other small slaughtering establishments.

3. Care should be taken when using this information as the figures only relate to slaughterings for human consumption and do not include animals condemned or those killed for boiling down. Since July 1994 the definition of livestock categories between States has been standardised.

4. Poultry slaughterings statistics have been compiled from returns supplied by commercial poultry slaughtering establishments. Producers in the Northern Territory and the Australian Capital Territory and the many very small producers are excluded from the collection; however, the statistics represent a high level of coverage.

**Live sheep and cattle exports**

5. These tables contain statistics of the number of live sheep and cattle exported, the gross weight, gross value and unit value. Sheep or cattle exported for breeding are excluded.

**Milk**

6. Tables 9 and 10 contain statistics collected by the Australian Dairy Corporation (ADC) on whole milk intake and market milk sales by factories.

**Wool receivals**

7. The statistics in Table 11 show the amount of taxable wool received by brokers and dealers from wool producers. It excludes wool received by brokers on which tax has already been paid by other dealers (private buyers) or brokers.

8. The information shown is on the basis of the State in which wool has actually been received and does not necessarily reflect the production of wool in that State.

**Seasonal adjustment**

9. Details of seasonally adjusted figures for livestock slaughterings, red meat, milk and wool are shown in Tables 1, 2, 9 and 11 respectively. Information on the methods used in seasonally adjusting these series is available on request.

**Trend Estimates and Sensitivity Analysis**

10. A trend estimate is obtained by reducing the irregular component from the seasonally adjusted series. In this publication trend estimates are

generally derived by applying a 13 term Henderson moving average to the seasonally adjusted series. The 13 term Henderson, (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. While the asymmetric weights enable the trend to be calculated for the latest month, it does result in revisions to the last six estimates as additional observations become available.

11. Sensitivity analysis indicates the potential magnitude and direction of revisions created to the last six estimates. It aims to show how a specified movement in the seasonally adjusted data in the next period will affect the trend path of the time series. By showing how sensitive the trend estimates are to the addition of new data, the analysis provides information which can be used in the assessment of the trend's stability. For further information, see *A Guide to Interpreting Time Series - Monitoring "Trends", an Overview* (1348.0) or contact the Assistant Director, Time Series Analysis on (06) 252 6345.

**Related publications**

12. Users may also wish to refer to the following priced publication which is available on request:

*Livestock and Livestock Products, Australia* (7221.0)

13. Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publication Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

**Next release date**

14. The expected release date for the November 1995 issue of this publication is 9 January 1996. The date can be confirmed a few days prior to release by telephoning (06) 252 5226.

**Symbols and other usages**

p preliminary  
 . . not applicable  
 — nil or rounded to zero

15. The figures shown in this publication have been revised where necessary and as a consequence may not agree with similar data shown in previous publications.

16. Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

17. Unless indicated otherwise, Australian totals include data for all States and both Territories.
