\* This column presents a statement of the average numbers attending at one service only on the Sabbath, and it has been pointed out that this mode of calculating the attendance does not render the returns of the different denominations strictly comparable, inasmuch as, in connection with some religious bodies, there are several services held on the same day, at each of which an entirely distinct set of worshippers attends, whilst, in the case of other denominations, the attendance at subsequent services always consists, to a greater or less extent, of the same individuals as were comprised in the first congregation.

† The returns of the Baptist Church were furnished in so imperfect a state that it has been found necessary to ignore them altogether and to substitute those for 1867.

WILLIAM HENRY ARCHER, Registrar-General.

\* These figures (77,210) represent the average monthly number on the rolls, and not the total number of distinct children who have received the benefits of instruction during the year, which amounted to 101,925 scholars, as returned by the Board in their Report for 1868.

The Report for the Year 1868 presented to Parliament showed that 798 schools were in operation, with 77,113 children on the rolls. The present return shows 801 schools in operation for 1868, with 77,210 children on the rolls. The difference is caused by the addition of three new schools, from which returns have been received since the return for the Report was compiled, and by a slight difference in the averages, resulting from the receipt of returns from schools which were not rendered when the Report was published.

B. F. KANE, Secretary.

NOTE.—The amounts received from Government and other sources in each district have not yet been made up at the Education Office. Should they be supplied in time they will be published in an appendix.

\* These institutions are also Benevolent Asylums. —† The Melbourne Lying-in Hospital is also an Infirmary for Diseases peculiar to Women and Children; the totals therefore include several male infants.  
NOTE.—The returns of some of the Hospitals do not distinguish the sexes of the persons relieved, and hence the sum of males and females on the total line does not agree with the total of both sexes.
