MAIN FEATURES

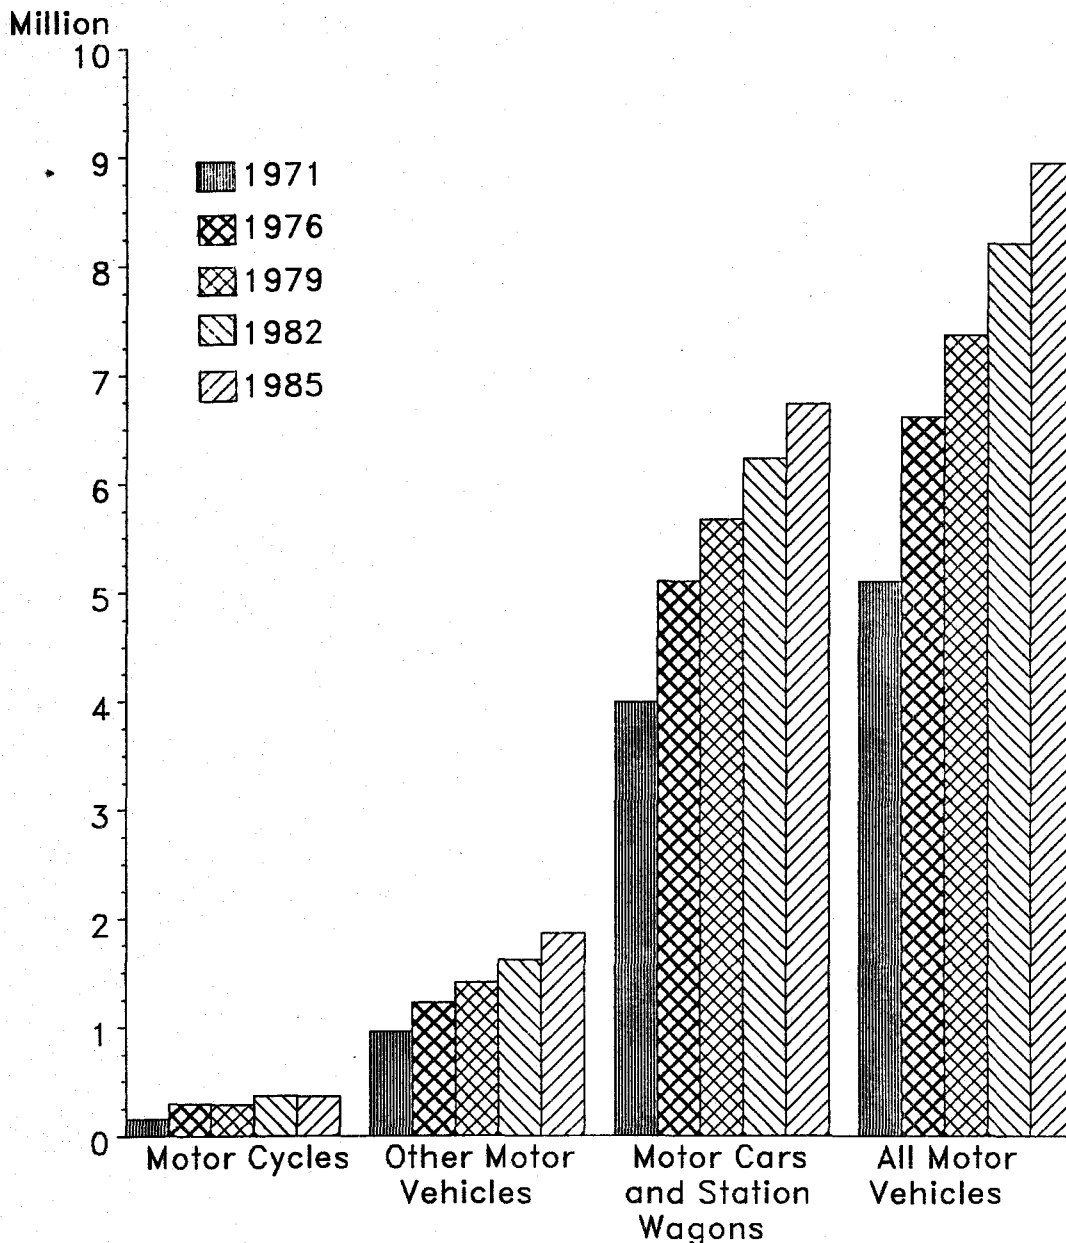

There were 8,959,729 motor vehicles (excluding tractors, plant, caravans and trailers) on register in Australia at 30 September 1985. This is an increase of 685,416 motor vehicles, or 8.3 per cent, since 30 September 1982 and represents 567 motor vehicles on register for every 1,000 persons in Australia.

Motor cars and station wagons accounted for 75 per cent of the number of motor vehicles with 6,734,202

being on register at 30 September 1985. Of these around one in five was manufactured after 1982. There were 426 motor cars and station wagons for every 1,000 persons in Australia, compared with 409 at 30 September 1982.

The number of motor cycles on register at 30 September 1985 was 361,625 which represents around 23 motor cycles for every 1,000 persons in Australia.

MOTOR VEHICLES ON REGISTER, AUSTRALIA.

EXPLANATORY NOTES

Introduction

This publication contains statistics relating to vehicles which were 'on register', at 30 September 1985, with a motor vehicle registration authority. Similar statistics have been published periodically since the first motor vehicle census was conducted in 1971.

2. Previous census results have been published in separate State, Territory and Australia publications. For 1985 there will be no State and Territory publications and all major results are contained in this publication. Some additional tables can be made available on request (See page 99).

Scope and coverage

3. Motor vehicle registration statistics are derived from data made available by the motor vehicle registration authorities in each State and Territory and reflect the information as recorded in registration documents.

4. The statistics include vehicles with diplomatic and consular plates and State and Commonwealth Government owned vehicles other than those belonging to the defence services. Commonwealth Government owned vehicles were excluded from the motor vehicle census in 1982. The numbers of Commonwealth Government owned vehicles on register at 30 September 1985 for each State and Territory are shown in Table 16 so that broad comparisons between the 1982 and 1985 census results can be derived on a consistent basis.

5. The motor vehicle census covers all vehicles which were on register at 30 September 1985. It should be noted however that many vehicles, including tractors etc. (particularly the agricultural types), plant and equipment, and motor vehicles used solely on farms, in mines, etc., are not used on public roads and are therefore not required to be registered. Such vehicles are accordingly excluded from these statistics. Certain vehicles which do use public roads but are exempt from normal registration requirements, e.g. fire engines in certain States and Territories, are also excluded from these statistics. The extent to which they are excluded varies between the States and Territories.

Definition

6. For census purposes, vehicles on register at 30 September 1985 have been defined as those vehicles for which registration was effective for a period including 30 September 1985, the registration fees being paid either in advance or on that date, or retrospectively. Since registration authorities can process renewals of registrations some time after the due date, registration transactions were analysed for about four months after 30 September 1985 to ensure that most retrospective transactions were taken into account.

7. Difficulties were encountered in applying this definition to source data for Western Australia. As a result, statistics for the number of vehicles on register at 30 September 1985 in Western Australia are slightly overstated (estimated at less than 1 per cent) with consequential effects on Australia figures.

Classification

8. The classification of vehicles reflect the information as recorded on motor registry files. Vehicles are classified to type of vehicle and, for the major vehicle types, to make

of vehicle and year of manufacture. As well, cars and station wagons, utilities and panel vans are classified to categories of tare weight.

9. As the registration documents used by the various motor vehicle registry systems are not uniform, either in the data that are available or in the definition of common data items, care must be taken when making comparisons between data from different systems. For example, it is possible for identical vehicles to be described differently in different States and Territories, e.g. a four wheel drive vehicle may be registered as a car, station wagon, panel van or rigid truck. Similarly a hatchback vehicle may be registered as either a car or station wagon. It is for this reason cars and station wagons have been amalgamated in census results. In addition, in a relatively small number of cases the characteristics used to classify vehicles for the purposes of this publication may be inconsistently recorded within a particular registration system.

10. A threshold limit has been applied for tables providing details by make. For cars and station wagons, and utilities and panel vans, makes with less than 100 vehicles in total are not shown separately, being included in 'Other and unknown'. For rigid trucks, articulated trucks, buses, other truck type vehicles and motor cycles, makes with less than 25 vehicles in total are not shown separately, being included in 'Other and unknown'. For this reason it may not be possible to derive Australian totals for individual makes by aggregating State/Territory figures.

Related publications

11. Users may also wish to refer to the following publications containing statistics of new motor vehicle registrations.

Motor Vehicle Registrations—issued monthly

Australia (9303.0)

Victoria (9303.2)

Queensland (9303.3)

Western Australia (9303.5)

Tasmania (9303.6)

Motor Vehicle Registrations, Australia, 1984-85 (9304.0)

12. The above publications also contain annual statistics of vehicles on register at 30 June. As well as referring to a different reference date the annual statistics may differ from the motor vehicle census results mainly because, in the census, more time and resources are devoted to examining data from registration authorities and to treating retrospective transactions.

13. Current publications produced by the ABS are listed in the *Catalogue of Publications, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Publications Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.
