OVERVIEW

Under the Australian Constitution, the Commonwealth Government is responsible for legislation relating to trade and commerce with other countries. The Department of Foreign Affairs and Trade is in turn responsible for developing and maintaining Australia's position as a world trading nation through international trade and commodity commitments and agreements, developing export markets, and formulating proposals for the Government on Australia's international trade policy and trading objectives. It is also responsible for matters relating to the commercial development, marketing, and export of minerals and fuels. It employs Trade Commissioners at many overseas centres.

The statistics in this chapter are recorded on a general trade basis, i.e. total exports include both Australian produce and re-exports; total imports comprise goods entered directly for domestic consumption, together with goods imported into customs warehouses.

State statistics for exports comprise State of origin. 'State of origin' is defined as the State in which the final stage of production or manufacture occurs. For imports, the State is that in which the import entry was lodged with the Australian Customs Service.

Both imports to, and exports from Victoria increased in 1996–97, continuing the trend since the 1990-91 recession. Between 1995-96 and 1996-97, imports increased by 2% to \$25,190 million, whilst exports increased by 6% to \$16,288 million. Imports into Victoria in 1996–97 accounted for 32% of Australia's total imports of \$78,977 million, whilst exports from Victoria amounted to 21% of Australia's total exports of \$78,885 million.
