⁽a) State estimates are not comparable to national estimates from the June quarter 1995 due to revised methodology used in Australian National Accounts, State Accounts (Cat. no. 5242.0).

⁽b) Experimental series. Users are cautioned these estimates are derived indirectly by calculating a deflator from the expenditure components of the state series concerned. Therefore, in general, the sum of the state estimates does not equal the estimates for Australia.

⁽b) Experimental series. Users are cautioned these estimates are derived indirectly by calculating a deflator from the expenditure components of the state series concerned. Therefore, in general, the sum of the state estimates does not equal the estimates for Australia.

⁽c) Reference year for chain volume measures is 1996-97.

⁽d) Base year: 1989-90 = 100.0.
