environment

Australia comprises a land area of almost 7.7 million square kilometres. The bulk of the Australian land mass lies between latitudes 10 degrees 41 minutes (10° 41') south (Cape York, Queensland) and 43° 38' south (South East Cape, Tasmania) and between longitudes 113° 09' east (Steep Point, Western Australia) and 153° 38' east (Cape Byron, New South Wales).

The land area of Australia is almost as great as that of the United States of America (excluding Alaska and Hawaii), about twice the size of the European Union, and 32 times greater than the United Kingdom.

Australia is composed of six states: New South Wales (NSW), Victoria (Vic.), Queensland (Qld), South Australia (SA), Western Australia (WA), Tasmania (Tas.) and two territories: Northern Territory (NT) and Australian Capital Territory (ACT). The longest river in Australia is the Murray River (2,520 kilometres), which forms a natural border between NSW and Vic. The highest mountain in Australia is Mt Kosciuszko, 2,228 metres, which is situated in NSW.
