

2006 QUEENSLAND AT A GLANCE

Situated generally between 10° and 29° south latitude and between 138° and 154° east longitude, Queensland occupies the north-eastern portion of the Australian continent. Of the total area — 1,734,157 square kilometres — just over half is north of the Tropic of Capricorn. Of the six states of Australia, Queensland ranks second in area and third in population.

Queensland is a constituent state of the Commonwealth of Australia, and observes the Australian Constitution. While returning elected members to both upper and lower houses of the Federal Parliament, Queensland is unique in that its own State Parliament has only one house — the House of Representatives. Local government derives its powers from Acts passed by the State Parliament. The capital city is Brisbane.

Figures in this publication are subject to revision.

ACKNOWLEDGMENTS

ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated; without it the wide range of statistics published by the ABS would not be available for general use by the community. Information received by the ABS is treated in strict confidence as required by the Census and Statistics Act 1905.
