## INTRODUCTION

*Regional Statistics, New South Wales* contains principal statistics for areas of the State.

The publication presents data for statistical areas based on the Australian Standard Geographical Classification, 2001 edition. Labour force status of the population is classified into statistical regions of the state in table 1. Labour force data relating to non-school qualifications is presented in table 2. Table 3 is a social indicators table which will change annually as new survey data is released. Demographic and economic statistics are contained in tables 4–16. Data for the State and its component statistical divisions is presented in table 4, whilst tables 5–16 contain data for each statistical division with its component local government areas arranged alphabetically.

Australian Bureau of Statistics (ABS) publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated; without it, the wide range of statistics published by the ABS would not be available for general use by the community. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

I would encourage users of this publication to write to me with comments on its usefulness and with any suggested improvements to its content and presentation.

The data contained in this publication represent only a sample of the full range of statistics available from the ABS. For further information about ABS statistics and services, refer to the back of this publication.

John Struik

New South Wales  
May 2003

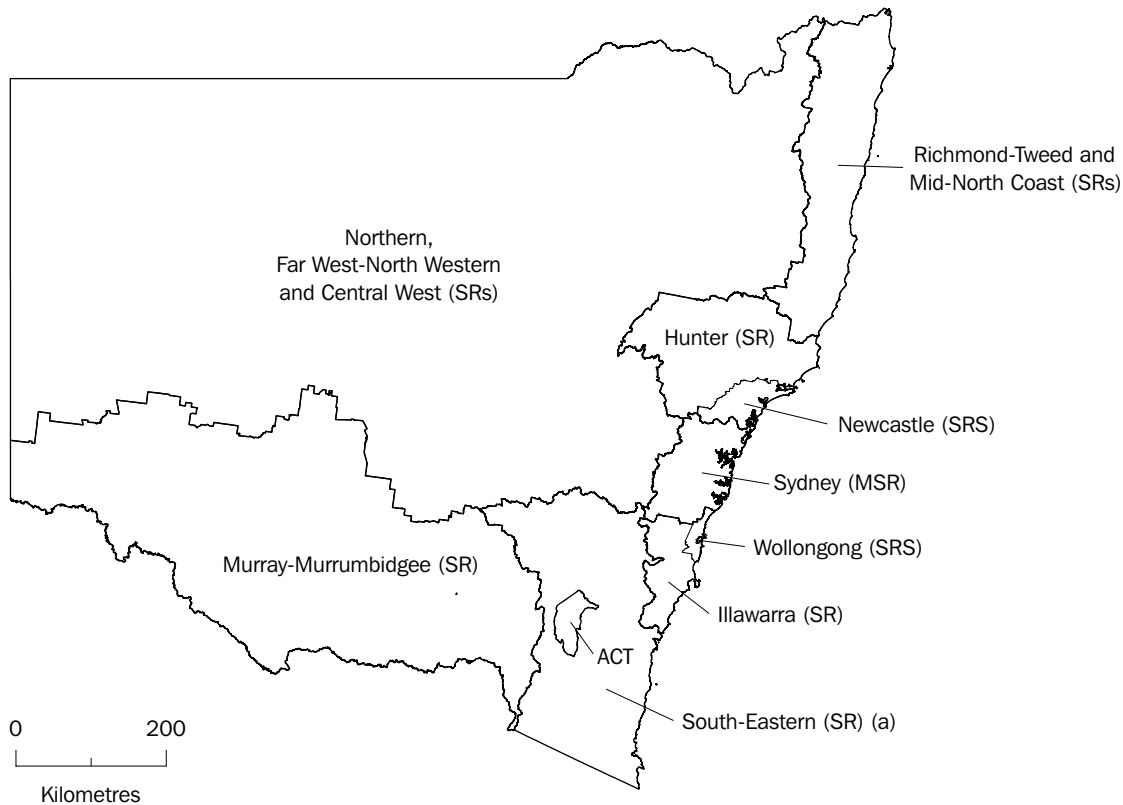

ABBREVIATIONS, SYMBOLS  
AND OTHER USAGES

A	Area (See Explanatory Notes for full details)
ABS	Australian Bureau of Statistics
ABSCQ	ABS Classification of Qualifications
ACT	Australian Capital Territory
ARIA	Accessibility/Remoteness Index of Australia
ASCED	Australian Standard Classification of Education
ASGC	Australian Standard Geographical Classification
C	City (See Explanatory Notes for full details)
CD	Collection District
ERP	Estimated Resident Population
GFS	Government Finance Statistics
LGA	Local Government Area (See Explanatory Notes for full details)
MPS	Monthly Population Survey
MSR	Major Statistical Region (See Explanatory Notes for full details)
n.a.	not available
NSW	New South Wales
n.p.	not available for separate publication (but included in totals where applicable)
p	preliminary — figure subject to revision
SD	Statistical Division (See Explanatory Notes for full details)
SLA	Statistical Local Area (See Explanatory Notes for full details)
STA	Survey of Tourist Accommodation
sq km	Square kilometres
SR	Statistical Region (See Explanatory Notes for full details)
SRS	Statistical Region Sector (See Explanatory Notes for full details)
SSD	Statistical Subdivision (See Explanatory Notes for full details)
. .	not applicable
—	nil or rounded to zero (including null cells)
*	this estimate has a relative standard error between 25% and 50% and should be used with caution
**	this estimate has a relative standard error greater than 50% and is considered too unreliable for general use.

(a) In 2001, the ABS Classification of Qualifications (ABSCQ) was replaced by the Australian Standard Classification of Education (ASCED). See Explanatory Note 17 for more details. Under the new classification some levels of education are regarded as qualifications that were not regarded as "post-school qualifications" under ABSCQ. Data for 2001 is therefore not directly comparable with previous years.

(b) The number of unemployed expressed as a percentage of the labour force.

(c) The labour force expressed as a percentage of the civilian population aged 15–64 years.

(d) Prior to July 2001 North Western Sydney (SR) was named Outer Western Sydney (SR) and Blacktown (C).

(e) Prior to July 2001 Central Northern Sydney (SR) was named Hornsby-Ku-ring-gai (SR) and Baulkham Hills (A).

NOTE: Regional estimates other than those above are not sufficiently reliable for publication and should not be derived by subtraction.

Source: ABS data available on request, *Survey on Education and Work, 2002*.

(a) The levels of education are not necessarily listed in order from highest to lowest.

(b) Includes boarding school pupils and persons who never attended school.

(c) Includes level not determined.

(d) Includes employees who work for a business based in their own home and employees not based at a fixed workplace.

(e) Prior to July 2001 North Western Sydney (SR) was named Outer Western Sydney (SR) and Blacktown (C).

(f) Prior to July 2001 Central Northern Sydney (SR) was named Hornsby-Ku-ring-gai (SR) and Baulkham Hills (A).

## NEW SOUTH WALES

### GEOGRAPHY AND STATISTICAL DIVISIONS

For the purpose of presenting the principal series of official statistics for the state, New South Wales is divided into a number of geographical areas. These areas consist, for the most part, of aggregations of Local Government Areas.

The primary division of the state is into 12 Statistical Divisions. These are intended to represent 'regions' of the state which are characterised by discernible social and/or economic links between the inhabitants and economic units within them, under the unifying influence of one or more major cities or towns. The boundaries of the divisions have accordingly been delineated on the basic criterion that the degree of economic and/or social contact and interaction within each division should be maximised. It should be emphasised that the boundaries of the divisions cannot be regarded as sharp lines of demarcation—they may, of necessity, be positioned within peripheral zones in which the influence of two or more 'focal' cities or towns overlap in varying degrees.

# SYDNEY STATISTICAL DIVISION

## GEOGRAPHY AND LOCAL GOVERNMENT AREAS

The Division consists broadly of the Cumberland Plain. To the north of the Plain, it includes the moderately elevated Hornsby plateau and, beyond the Hawkesbury River, the coastal lowland plains containing Gosford and Wyong. To the north-west, north and south-west of the Cumberland Plain, the Division comprises the Blue Mountains and other associated ranges. The southern part of the Division is mainly composed of the moderately elevated Woronora Plateau. The region has a warm, humid climate, except for the higher parts of the mountain ranges where temperatures are cooler, with heaviest rainfall normally occurring in summer and autumn. Rainfall is markedly irregular and declines from east to west. Sydney is the focal point of the state's rail, road and air services. It also provides port facilities for overseas, interstate and intrastate shipping. It is the seat of public administration for the state, and the leading commercial, industrial, financial, educational and cultural centre.

# HUNTER STATISTICAL DIVISION

## GEOGRAPHY AND STATISTICAL DIVISIONS

The Hunter River and its tributaries in this Division form one of the largest river valleys on the New South Wales coast. To the north and south the area is enclosed by rugged highlands, while to the west less rugged highlands give easy access to the New England areas. The climate is generally of the warm, humid type, with heaviest rainfall normally occurring in summer and autumn. Rainfall decreases markedly in amount and reliability from the coast inland. Railways traverse the region, linking the most important towns, and a highway closely follows the main northern rail route.

## ILLAWARRA STATISTICAL DIVISION

### GEOGRAPHY AND STATISTICAL DIVISIONS

The coastal portion of the Division consists of a discontinuous coastal plain where a series of river valleys (Minnamurra and Shoalhaven) alternate with spurs of more elevated land extending eastwards from the tablelands. To the west of this coastal plain is a long escarpment which gives way to exceedingly rugged terrain in the Shoalhaven area, while the land in the north-western part of the Division consists of undulating tablelands. The climate is generally of the warm, humid type, with heaviest rainfall occurring in summer and autumn. Rail communication in the Division comprises the Illawarra line extending through the coastal belt and terminating at Nowra; the main southern line passing through Bowral; and a connecting link (Unanderra — Moss Vale), which is used mainly for goods traffic. Highway communication follows a similar pattern, with a coastal road, a tablelands road, and several roads linking the Bowral area with the Illawarra Plains districts.

## RICHMOND-TWEED STATISTICAL DIVISION

### GEOGRAPHY AND STATISTICAL DIVISIONS

The Division consists of two major coastal river basins (of the Richmond and Tweed rivers) and a river valley (of the Upper Clarence River). It is enclosed on the north by the rugged McPherson Range, on the west by the more easterly extensions of the New England Plateau, and on the south by the less rugged Richmond Range. The Richmond Range extends northerly into the Division and separates the river valley from the coastal basins. The climate of the region is humid sub-tropical. The rainfall varies in intensity and occasional severe flooding occurs. The area has a rail and road system cutting the river system at right angles, and a highway linking the coast to the hinterland.

## MID-NORTH COAST STATISTICAL DIVISION

### GEOGRAPHY AND STATISTICAL DIVISIONS

This Division covers the coastal strip extending from Wallis Lake in the south to the Richmond Range in the north, and comprises a series of valleys running generally east to west (valleys of the Clarence, Maclean, Hastings and Manning Rivers). The valleys have generally been intensively developed for agriculture, while the hills separating the valleys have seen little development. The region has a warm and humid to sub-humid climate. Rainfall is high; occasional severe flooding is a feature of the river valleys. The main road and rail system cuts across the river system and provides a link between areas to the north and south of the Division (e.g. Brisbane to Sydney). Other major roads run from the coast to the hinterland — Grafton to Glen Innes, Kempsey to Armidale, Port Macquarie to Tamworth, etc.

(a) Lord Howe Island is self-governed by the Lord Howe Island Board. It is not a Local Government Area, however it has been included for completeness.

# NORTHERN STATISTICAL DIVISION

## GEOGRAPHY AND STATISTICAL DIVISIONS

There are three identifiable regions in this Division — the northern tablelands (mainly undulating hill lands generally over 1,000 metres above sea level), the northern slopes to the west of the tablelands, and the flat north central plains, watered by the Macintyre, Gwydir and Namoi Rivers. The tablelands is an area with mild summers and cold winters and a moderate rainfall, with the heaviest rainfall occurring in summer. West of the tablelands the summers are warm to hot, with a similar rainfall pattern. Tamworth is the principal city of the Division, and the centre of rail and road systems and air services. The main northern rail line from Newcastle passes through Quirindi, Tamworth, Armidale, Glen Innes and Tenterfield. There is an extensive road system linking all of the major towns and cities in the Division.

# NORTH WESTERN STATISTICAL DIVISION

## GEOGRAPHY AND STATISTICAL DIVISIONS

There is a diversity of topography in the Division, with elevated lands extending from the central tablelands in the east; gently undulating slopes in the river basins of the Macquarie, Castlereagh and Bogan Rivers in the central areas; and flat plains in the far west. Climatically this region is also diverse but is mostly semi-arid, particularly in the westerly and northerly parts. It has a hot summer and a fairly wide range between summer and winter temperatures. The eastern parts receive about 650 millimetres of rainfall per annum but only half this amount is received in the western portion. The area is well served by railways, with several lines, for example from Cobar, Bourke, Brewarrina and Coonamble, focusing on Dubbo — the main economic centre of the region. Other lines connect Dubbo to Parkes, Molong and Orange. At Dubbo the Mitchell Highway, which runs parallel to the railway line to Bourke, intersects the Newell Highway which traverses New South Wales from the Queensland border to the Victorian border.

## CENTRAL WEST STATISTICAL DIVISION

### GEOGRAPHY AND STATISTICAL DIVISIONS

The Division lies to the west of the Blue Mountains and extends to beyond Condobolin. The eastern parts are made up of a number of discontinuous highland areas which contain the source of the Macquarie River, while the western parts — watered by the Lachlan River — are undulating at first, giving way to flat plains. The Bathurst–Orange growth centre is the focal centre of the region. In the cool highland region, rainfall is fairly evenly distributed throughout the year, while in the plains areas the summers are warm to hot, and rainfall is moderate on the slopes, tapering off to light in the west. The Sydney–Broken Hill railway line traverses the region, connecting the cities of Lithgow, Bathurst and Orange. The Mid Western, Newell and Mitchell Highways cross the Division, linking these cities and the urban areas of Cowra, West Wyalong, Forbes and Parkes.

## SOUTH EASTERN STATISTICAL DIVISION

### GEOGRAPHY AND STATISTICAL DIVISIONS

The South Eastern Division comprises the lower south coast, the Snowy Mountains and the southern tablelands (excluding the ACT). The coastal strip consists of a discontinuous coastal plain where a series of river valleys (of the Clyde, Moruya, Tuross and Bega Rivers) alternate with spurs of more elevated land extending eastwards from the tablelands. The mountainous Snowy region lies in the south-west corner contiguous to the Victorian border and reaches elevations of over 2,200 metres, the highest in Australia. Snowfields in this area are a major tourist attraction. The tablelands are gently undulating, with elevations of about 750 metres above sea level. The narrow south coast area has a humid, cool to temperate climate and an average yearly rainfall of about 900 millimetres. Much cooler temperatures are experienced on the more elevated tablelands, and very cold temperatures occur on the Alps. Average annual rainfall on the tablelands ranges between 500 and 700 millimetres, but in the mountains exceeds 1,400 millimetres. The Division is served by the main southern railway line and branch lines from Goulburn, and by an extensive highway system linking the major population centres in the Division.

# MURRUMBIDGEE STATISTICAL DIVISION

## GEOGRAPHY AND STATISTICAL DIVISIONS

The Murrumbidgee River traverses the Division from east to west, with the area west of Narrandera containing the Murrumbidgee and other irrigation areas. Wagga Wagga, the major centre of regional significance, is located in the eastern portion of the Division. The region is characterised by cold temperatures in winter in the hilly eastern region, and warm to hot summers and cool winters in the western region. Average annual rainfall (in millimetres) varies from 1,360 at Batlow and 880 at Tumut, to 550 at Wagga Wagga, 620 at Cootamundra, and 330 to 450 in the irrigation areas and more westerly parts. Railway communication is widespread in the Division. The main southern line passes through the eastern section linking Cootamundra, Junee and Wagga Wagga to Albury, and from it many branch lines serve other areas. The branch lines are of particular importance to the wheat industry. Three highways run north to south across the Division, meeting three other highways crossing the Division in an east-west direction.

# MURRAY STATISTICAL DIVISION

## GEOGRAPHY AND STATISTICAL DIVISIONS

The entire length of the Murray River on the New South Wales border marks the southern boundary of this Division. The terrain in the western and central parts of the Division is flat, becoming undulating and finally very rugged on the eastern border. The temperature is generally warm to hot in summer and mild in winter. The average annual rainfall (in millimetres) declines from 980 at Tumbarumba in the eastern sector to 700 at Albury and Holbrook, 392 at Deniliquin, 330 at Balranald, and 263 at Wentworth. The main southern railway line and the Hume highway from Sydney to Melbourne pass through Albury, the main centre of population in the Division. The other urban areas in the Division are adequately served by highways passing through the Division and/or extensions of the broad-gauge Victorian railway system.

## FAR WEST STATISTICAL DIVISION

### GEOGRAPHY AND STATISTICAL DIVISIONS

The Division comprises the City of Broken Hill, the Shire of Central Darling, and all of the unincorporated area of New South Wales other than Lord Howe Island. It is bounded by the Queensland and South Australian borders in the north and the west, and by the boundaries of the Shires of Wentworth and Balranald in the south, and the shires of Bourke, Cobar and Carrathool in the east. The Darling River passes through the region from the north-east to the south. To the west of the river, the extremely flat plains give way to gentle slopes reaching the low, geologically ancient Barrier Range on which stands Broken Hill, the only sizeable city in the far west. The climate is of the semi-arid desert type. Temperatures range from hot in summer to cool and mild in winter. The average annual rainfall is in the range of 200 to 250 millimetres, with maximum rainfall occurring in the summer. The western railway line, which is part of the Sydney–Perth standard gauge line, passes through Broken Hill. The two highways traversing the Division focus on Broken Hill, with the Silver City Highway from Wentworth to Broken Hill and the Barrier Highway from Nyngan through Broken Hill to Gawler (near Adelaide) both being sealed.

(a) Unincorporated Far West is not a Local Government Area, however it has been included for completeness.

## EXPLANATORY NOTES

### CHANGES IN THIS ISSUE

**1** This latest edition of *Regional Statistics, New South Wales* includes data on Work in Selected Culture and Leisure Activities, Carers who are Employees, Teleworkers and Source of Energy Used in Dwellings in the Social Indicator tables.

**2** There is no Socio-Economic Indexes for Areas (SEIFA) data in this edition.

**3** Agriculture data by Statistical Division and Local Government Area is included.

**4** As a result of Local Government Area amalgamations, Windouran LGA has now become part of Conargo LGA and data is presented for Canada Bay LGA (previously the LGAs of Concord and Drummoyne).

### STATISTICAL AREAS OF NEW SOUTH WALES

**5** This publication contains data presented according to the Australian Standard Geographical Classification (ASGC) 2002 edition. Under this classification, statistical areas are defined as follows:

#### Legal Local Government Areas (LGAs)

**6** Legal Local Government Areas (LGAs) as defined under the (State) *Local Government Act 1993*, comprise cities (C) and areas (A). The LGA structure covers only incorporated areas of Australia. Incorporated areas are legally designated areas over which incorporated local governments have responsibility. Two cases — Unincorporated Far West and Lord Howe Island — represent areas which are unincorporated under the Act, but have been included in this publication for completeness.

#### Statistical Subdivisions (SSDs)

**7** These consist of one or more LGAs and form the intermediate size spatial unit for the presentation of regional data.

#### Statistical Divisions (SDs)

**8** These consist of one or more SSDs. Where SSDs are not shown, LGAs are ordered alphabetically within SDs. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.

#### Statistical Regions (SRs)

**9** These consist of aggregates of LGAs and Statistical Region Sectors (SRSs). They can be whole SSDs or SDs, or aggregates of SSDs or SDs. SRs aggregate to Major Statistical Regions (MSRs).

**10** Further information concerning statistical areas is contained in the publication *Australian Standard Geographical Classification (ASGC)* (cat. no. 1216.0).

### AMALGAMATIONS AND BOUNDARY CHANGES TO LEGAL LOCAL GOVERNMENT AREAS (LGAs)

**11** Where amalgamations of legal LGAs have occurred, figures shown in this publication relate to the new areas formed by the amalgamations.

AMALGAMATIONS AND  
BOUNDARY CHANGES TO  
LEGAL LOCAL GOVERNMENT  
AREAS (LGAs) *continued*

**12** Where boundary changes between legal LGAs have occurred, the figures shown for each legal LGA (or statistical area) generally relate to its boundaries as at the end of the year shown (usually 30 June). However,

- the estimated resident population figures for 1997 to 2002 have been adjusted for the boundary changes that occurred up to and including 1 July 2002
- building approvals are allocated to the legal LGA in which the building was situated at the time of approval.

LABOUR FORCE STATUS OF  
THE CIVILIAN POPULATION

**13** Estimates of the civilian labour force are derived from the labour force component of the monthly population survey (MPS), which is conducted on a sample basis throughout Australia. While the Labour Force Survey is designed primarily to produce reliable estimates at the national and state/territory level, it also delivers estimates for a number of regions within states. As with national and state estimates, regional labour force estimates are subject to sampling error. Since estimates for regions are components of corresponding estimates at the state level — and are thus based on a considerably smaller sample size — they are subject to higher relative standard errors. Care should therefore be taken in interpretation of regional estimates.

Monthly population survey  
(MPS)

**14** The MPS consists of the labour force survey and, in most months, one or more supplementary topics. The survey is based on a multistage area sample of private dwellings (houses, flats, etc.) and non-private dwellings (hotels, motels, etc.) and covers one in three hundred of the population of NSW. The information is obtained from the occupants of selected dwellings by carefully chosen and specially trained interviewers. The interviews are generally conducted during the two weeks beginning on the Monday between the 6th and 12th of each month. The information obtained relates to the week before the interview (i.e. the reference week).

Scope

**15** The labour force survey includes all persons aged 15 years and over except:

- members of the permanent defence forces
- certain diplomatic personnel of overseas governments, customarily excluded from census and estimated populations
- overseas residents in Australia
- members of non-Australian defence forces (and their dependants) stationed in Australia.

The labour force

**16** The labour force comprises all persons in scope of the survey who were employed or unemployed as defined in the Glossary.

## EDUCATION AND WORK

**17** The Survey of Education and Work is a supplementary survey to the MPS. The scope of the survey was defined as those who were in scope for the LFS, with the following additional restrictions:

- includes persons aged 15–64 years only
- excludes persons permanently unable to work, some patients in hospitals and sanatoriums and inmates of reformatories, gaols, etc.
- Respondents to the MPS who fell within the scope of the survey were asked additional questions.

**19** The survey provides selected information on participation in education, highest educational attainment, transition from education to work and current labour force and demographic characteristics for the civilian population aged 15–64 years.

## NSW CRIME AND SAFETY SURVEY

**20** The 2001 NSW Crime and Safety Survey was conducted as a supplement to the MPS. The scope of the survey was defined as those who were in scope for the LFS, with the following additional restriction:

- residents of non-private dwellings such as hospitals, motels, and jails were excluded from this survey
- people living in remote and sparsely settled areas of NSW were excluded from this survey.

**21** The purpose of the survey was to obtain information on the perception of crime problems in the neighbourhood, the incidence of selected categories of crime and reporting behaviour from persons aged 15 years and over.

## WORK IN SELECTED CULTURE AND LEISURE ACTIVITIES

**22** The 2001 Survey of Work in Selected Culture and Leisure Activities is a supplement to the MPS. The scope of the survey was defined as those who were in scope for the LFS, with the following additional restrictions:

- residents of non-private dwellings such as hospitals, motels, and jails were excluded from this survey
- people living in remote and sparsely settled areas of Australia were excluded from this survey.

**23** The survey provides estimates of the number of persons who were involved in selected culture and leisure activities classified by type of activity. It also provides details on the characteristics of persons involved, the nature of work (whether paid or unpaid) and whether involvement was part of their main job. These work involvements exclude those activities undertaken only for a person's own or family use — these activities were classed as hobbies.

CARERS WHO ARE EMPLOYEES

**24** The 2000 Managing Caring and Paid Employment survey was conducted as a supplement to the MPS. The scope of the survey was defined as those who were in scope for the LFS, with the following additional restrictions:

- the survey covers people aged 18 years and over
- residents of non-private dwellings such as hospitals, motels, and jails were excluded from this survey
- people living in remote and sparsely settled areas of Australia were excluded from this survey.

**25** The purpose of the survey is to investigate the labour force experience of those who currently have or have had caring responsibilities, including peoples' use of maternity leave and other working arrangements.

TELEWORKING

**26** The 2001 Teleworking survey was conducted as a supplement to the MPS. Information was collected from one responsible adult per household. The scope of the survey was defined as those who were in scope for the LFS, with the following additional restrictions:

- the survey covers people aged 15 years and over
- residents of non-private dwellings such as hospitals, motels, and jails were excluded from this survey
- people living in remote and sparsely settled areas of Australia were excluded from this survey.

**27** The survey examined the frequency of people teleworking and the travel distance savings of employees through teleworking. By linking teleworking to travel distance savings the survey examines the impact that teleworking has on reducing traffic congestion and the costs of delays to business. It also examines savings to the community through decreased pollution.

SOURCES OF ENERGY USED IN DWELLINGS

**28** Information on the sources of energy used in dwellings was collected as a supplement to the MPS. The survey was conducted in both rural and urban areas in all states and territories of Australia. It excluded dwellings in remote and sparsely settled parts of Australia. The scope of the survey was defined as those who were in scope for the LFS, with the following additional restrictions:

- the survey includes information on people aged 18 years and over
- non-private dwellings such as hospitals, motels, and jails were excluded from this survey
- dwellings in remote and sparsely settled areas of Australia were excluded from this survey.

SOURCES OF ENERGY USED IN DWELLINGS <i>continued</i>	<b>29</b> The March 2002 supplementary survey contains information on household practices and behaviour with regard to household energy use and conservation. It examines a number of issues including insulation, energy sources, cooking, heating, household appliances, green power and electricity and gas costs.
ESTIMATED RESIDENT POPULATION (ERP)	<b>30</b> This publication contains final estimates of the resident population for the LGAs of NSW for 1997, 1998, 1999, 2000 and 2001 and preliminary estimates for 2002, as well as estimates of the age structure of the population in 2001. Population estimates are based on the Censuses of Population and Housing. These are shown to the nearest unit.
VITAL STATISTICS	<b>31</b> Statistics on births and deaths are collected by the Registry of Births, Deaths and Marriages and processed and published by the ABS. The statistics relate to all occurrences of births and deaths in the reference period, which occurred within Australia (irrespective of state of registration) where the state of usual residence was NSW. Births are allocated to a Statistical Local Area (SLA) of the state according to the usual residence of the mother, and deaths are allocated according to the usual residence of the deceased. Infant deaths are generally assigned to the usual residence of the mother.
BUILDING STATISTICS	<p><b>32</b> Statistics of building work approved are compiled from:</p> <ul style="list-style-type: none"> <li>■ permits issued by local government authorities in areas subject to building control by those authorities</li> <li>■ permits issued by licensed building surveyors</li> <li>■ contracts let or day labour work authorised by Commonwealth, State, semi-government and local government authorities</li> <li>■ major building activity in areas not subject to the normal administrative approval (e.g. building on remote mine sites)</li> <li>■ all approved new residential building valued at \$10,000 or more</li> <li>■ approved alterations and additions to residential building valued at \$10,000 or more</li> <li>■ all approved non-residential building jobs valued at \$50,000 or more.</li> </ul>
HOTELS AND MOTELS WITH FACILITIES	<b>33</b> The Survey of Tourist Accommodation (STA) is a quarterly census of accommodation establishments which covers the following types of establishment: hotels, resorts, motels, private hotels, guest houses and serviced apartments with 15 or more rooms/units. The purpose of the STA is to measure activity in short-term commercial accommodation in Australia.

## LOCAL COUNCILS

**34** The statistics on selected financial aggregates relating to the activities of local councils are compiled from councils' annual statements of account for the year ended 30 June 2002. Total expenses and operating revenues are shown in councils' Statements of Financial Performance, and total assets and total liabilities are shown in their Statements of Financial Position. Detailed data for each council are available as a standard data service *Local Government and Finance, New South Wales* (cat. no. 5502.1.40.001).

## AGRICULTURE

**35** Estimates of the number of establishments with agricultural activity and the area of the establishments are sourced from the Agricultural Census conducted on 30 June 2001. The Census scope included establishments undertaking agricultural activity whose estimated value of agricultural operations was \$5,000 or more.

## REMOTENESS AREAS

**36** The Remoteness Structure is designed to provide statistics which compare all types of areas, from major cities to very remote areas. The Remoteness Structure is based on the Accessibility/Remoteness Index of Australia (ARIA) index. The underlying concept of ARIA is the measurement of the physical road distance between where people live and where they travel to obtain goods and services and to enjoy opportunities of social interaction. ARIA assumes that the number and range of goods, services and social interaction opportunities increase as Service Centre (town) population size increases.

**37** The ARIA methodology produces a score of between 0 and 15 by calculating the distance from a point to the nearest of each of five classes of Service Centre. The five categories of Service Centre are urban centres with:

- greater than 250,000 population
- between 48,000 and 249,999 population
- between 18,000 and 47,999 population
- between 5,000 and 17,999 population
- between 1,000 and 4,999 population.

**38** The Remoteness Structure uses the ARIA scores of 7.7 million points across Australia to calculate an average score for each Census Collection District (CD). The CDs are then grouped together to form five Remoteness Areas within each state or territory. The Remoteness Areas are:

- Major Cities of Australia (CDs with an average ARIA index of 0 to 0.2)
- Inner Regional Australia (CDs with an average ARIA index between 0.2 and 2.4)
- Outer Regional Australia (CDs with an average ARIA index between 2.4 and 5.92)
- Remote Australia (CDs with an average ARIA index between 5.92 and 10.53) and
- Very Remote Australia (CDs with an average ARIA index greater than 10.53)

## REMOTENESS AREAS

*continued*

**39** An LGA can contain parts of more than one Remoteness Area. To describe the relative Remoteness of an LGA the population of the CDs in each category of Remoteness are summed for each LGA and expressed as a percentage of the total population of the LGA. The population counts are those at the 2001 Census.

**40** Detailed explanations of ARIA and the Remoteness Structure can be found in *Information Paper: ABS Views on Remoteness, 2001* (cat. no. 1244.0) and *Information Paper: Outcomes of ABS Views on Remoteness Consultation, Australia, 2001* (cat. no. 1244.0.00.001).

## ROUNDING

**41** Where figures have been rounded, discrepancies may occur between sums of the component items and the totals shown.

(b) Consists of Murray and Murrumbidgee SDs.

## APPENDIX 3

### A3 STATISTICAL AREA CHANGES(a)

<i>Statistical local areas</i>	<i>Date</i>	<i>Nature of change</i>	<i>Net change in area (hectares)</i>	<i>Estimated population transferred</i>	<i>Estimated stock of dwellings transferred</i>
Bathurst (C)	1.7.2002	Gained from Evans (A) - Pt B	58	..	..
Concord (A)(b)	1.7.2002	Renamed Canada Bay - Concord (A)	—	..	..
Drummoyne (A)(b)	1.7.2002	Renamed Canada Bay - Drummoyne (A)	—	..	..
Coolah (A)	1.7.2002	Gained from Mudgee (A)	—	..	..
Conargo (A)(c)	1.7.2002	Gained Windouran (A)	506 300	..	..
Evans (A) - Pt B	1.7.2002	Lost to Bathurst (C)	-58	..	..
Gosford (C)	1.7.2002	Lost to Wyong (A)	—	..	..
Goulburn	1.7.2002	Gained from Mulwaree (A)	90	..	..
Greater Lithgow (C)	1.7.2002	Renamed Lithgow (C)	—	..	..
Guyra (A)	1.7.2002	Lost to Inverell (A) - Pt B	-1 294	..	..
Inverell (A) - Pt B	1.7.2002	Gained from Guyra (A)	1 294	..	..
Mudgee (A)	1.7.2002	Lost to Coolah	—	..	..
Mulwaree (A)	1.7.2002	Lost to Goulburn (C)	-90	..	..
Windouran (A)(c)	1.7.2002	Abolished; area transferred to Conargo (A)	-506 300	..	..
Wyong (A)	1.7.2002	Gained from Gosford (C)	—	..	..

(a) Name changes, amalgamations, split LGAs and boundary changes of statistical areas in NSW from 1 July 2001 to 1 July 2002.

(b) The LGAs Concord (A) and Drummoyne (A) amalgamated to form the LGA of Canada Bay (A). The SLA names shown are as the ASGC Edition 2002, effective from 1 July 2002.

(c) The LGA Windouran (A) was abolished and its area was transferred to Conargo (A). The SLA names shown are as the ASGC Edition 2002, effective from 1 July 2002.

## GLOSSARY

- Age dependency ratio** The dependency ratio measures the apparent burden of non-workers on workers. It is the sum of people aged 0–14 years and 65 years or more as a ratio of the number of people aged 15–64 years.
- Average annual rate of change** The average annual rate of change in population during the intercensal period 1996 to 2001 has been calculated for the estimated resident population on the basis of boundaries as defined at 30 June 2002; in some instances this has involved a measure of estimation where boundary changes have occurred.
- Bed spaces** Refers to the maximum number of beds available (excluding cots) to accommodate paying guests as at 30 June 2002. Three-quarter beds are classified as single beds, and double beds are counted as two bed spaces.
- Carers** A person aged 18 years or over, who in the last six months:
- had a child under 15 years of age, or
  - a person aged 18 years or over, who in the last six months, cared for someone else, including:
    - any other child under 15 years of age
    - an elderly person
    - any person with a short or long term sickness, injury or condition.
- It is possible for a carer to provide care to more than one person.
- Caring arrangement** Refers to the various work arrangements and types of leave used for caring. These include flexitime; rostered day off; working from home; time off in lieu; shift work; part-time work; casual work; informal arrangements with employer; paid leave; and unpaid leave.
- Dwelling units approved** A dwelling unit is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for long-term residential use. The statistics shown represent council approval of such units.
- Educational attainment** Level of educational attainment identifies the highest achievement a person has attained in any area of study. It is not a measurement of the relative importance of different fields of study but a ranking of qualifications and other educational attainments regardless of the particular area of study or the type of institution in which the study was undertaken.
- Employed persons** All civilians aged 15 years and over who, during the reference week:
- worked for one hour or more for pay, profit, commission or payment in kind (including employees, employers and own account workers) in a job or business, or on a farm
  - worked for one hour or more without pay in a family business or on a farm (i.e. contributing family workers)

**Employed persons***continued*

- were employees who had a job but were not at work and were: on paid leave; on leave without pay for less than four weeks up to the end of the reference week; stood down without pay because of bad weather or plant breakdown at their place of employment for less than four weeks up to the end of the reference week; on strike or locked out; on workers' compensation and expected to be returning to their job; or receiving wages or salary while undertaking full-time study
- were employers, own account workers or contributing family workers who had a job, business or farm, but were not at work.

These employed persons can be classified into:

- *full-time workers*, i.e. those who usually worked 35 hours or more a week (in all jobs) and those who, although usually part-time workers, worked 35 hours or more during the reference week
- *part-time workers*, i.e. those who usually worked less than 35 hours a week and who did so during the reference week.

**Employee**

A person who works for a public or private employer and receives remuneration in wages, salary, a retainer fee by their employer while working on a commission basis, tips, piece-rates or payment in kind, or a person who operates his or her own incorporated enterprise with or without hiring employees.

**Employment at end of June**

The number of working proprietors, working partners, permanent, full-time, part-time, temporary and casual employees, and managerial and executive employees working for a location during the last pay period ending in June each year. Employees absent on paid or prepaid leave are included, as are employees on workers' compensation who continue to be paid through the payroll system. Non-salaried directors, self-employed persons such as consultants, contractors and persons paid solely by commission without a retainer, and volunteer workers are excluded.

**Establishment**

The establishment is the smallest accounting unit of a business, within a state or territory, controlling its productive activities and maintaining a specified range of detailed data enabling value added to be calculated. In general, an establishment covers all operations at a physical location, but may consist of a group of locations provided they are within the same state or territory. The majority of establishments operate at one location only.

**Estimated resident population (ERP)**

The estimated resident population (ERP) is the official ABS estimate of the population within Australia. The ERP is based on results of the latest population census, and updated for subsequent births, deaths, and overseas and internal migration. Population estimates are based on the final 2001 Census results. Estimates for periods after 30 June 2001 will be subject to revision when the results of the 2006 Census become available. A description of the conceptual basis of the estimated resident population is contained in *Population Estimates: Concepts, Sources and Methods* (cat. no. 3228.0), published in June 1995.

<b>Guest rooms</b>	Refers to the maximum number of rooms, units, suites, etc. available for accommodating short-term paying guests at the establishment.
<b>Hotels, motels with facilities</b>	Defined as establishments which provide predominantly short-term accommodation (i.e. for periods of less than two months) available to the general public. The tourist accommodation establishments for which statistics are included in this publication are licensed hotels, motels and guest houses with facilities and serviced apartments with 15 or more rooms or units.
<b>Household crime victims</b>	The number of households in which a break and enter, attempted break and enter, or motor vehicle theft occurred in the last twelve months.
<b>Level of Education</b>	Level of education is a function of the quality and quantity of learning involved in an educational activity. It is categorised according to the Australian Standard Classification of Education (ASCED), Level of Education classification.
<b>Level not determined</b>	Level not determined includes inadequately described responses or where no responses were given.
<b>Net debt</b>	The difference between selected liabilities (deposits held, advances received, and borrowing) and selected financial assets (cash and deposits, advances paid, and investments, loans and placements). A negative figure indicates that a council is in a net lending position.
<b>Net worth</b>	Comprises total assets less total liabilities.
<b>Non-school qualifications</b>	Non-school qualifications are awarded for educational attainments other than those of pre-primary, primary or secondary education. They include qualifications at the Post Graduate Degree Level, Master Degree Level, Graduate Diploma and Graduate Certificate Level, Bachelor Degree Level, Advanced Diploma and Diploma Level, and Certificates I, II, III and IV levels. Non-school qualifications may be obtained concurrently with school qualifications.
<b>Non-residential building</b>	Classified according to its intended major function. Examples of the types of individual building jobs included under each main functional heading are shown in the following list: <ul style="list-style-type: none"> <li>■ <i>Educational</i>: includes schools, colleges, kindergartens, libraries, museums and universities.</li> <li>■ <i>Factories</i>: includes paper mills, oil refinery buildings, brickworks and powerhouses.</li> <li>■ <i>Health</i>: includes hospitals, nursing homes, surgeries, clinics and medical centres.</li> <li>■ <i>Offices</i>: includes banks, post offices and council chambers.</li> <li>■ <i>Other business premises</i>: includes warehouses, service stations, transport depots and terminals, electricity substation buildings, telephone exchanges, broadcasting and film studios.</li> <li>■ <i>Shops</i>: includes retail shops, restaurants, taverns and shopping arcades.</li> </ul>

<b>Offence</b>	Crimes which households or persons indicated as having been committed against them.
<b>Operating revenues</b>	Refers to the total of those items of Revenue, shown in the Operating Statements of councils' Statements of Accounts, which are defined within the ABS' Government Finance Statistics (GFS) framework as GFS Revenues. For details see <i>Information Paper: Accruals-based Government Finance Statistics</i> (cat. no. 5517.0).
<b>Paid involvement</b>	This includes a person's involvement for which payment had already been received as well as a person's involvement where payment has not yet been received but was expected.
<b>Participation rate</b>	The labour force expressed as a percentage of the civilian population aged 15 years and over.
<b>Personal crime victims</b>	The number of people over 15 years of age, who were victims of a robbery, assault or sexual assault in the last 12 months.
<b>Persons in the labour force</b>	The sum of employed persons and unemployed persons.
<b>Residential building</b>	<ul style="list-style-type: none"> <li>▪ <i>House</i>: defined as a detached building predominantly used for long-term residential purposes and consisting of only one dwelling unit.</li> <li>▪ <i>Other</i>: defined as a building which is predominantly used for long-term residential purposes and which contains (or has attached to it) more than one dwelling unit.</li> </ul>
<b>Selected culture and leisure activities</b>	The activities included in the survey were: art or craft; art and craft show organising; public art galleries; botanic gardens; cinema and video distribution; computer art; design; drawing; festival organising; fete organising; film production; furniture-making and wood crafts; glass crafts; government arts organisations and agencies; heritage organisations; interactive content creation; jewellery; libraries and archives; museums; music; national parks and reserves; other art activities; other craft activities; painting; performing arts; photography; pottery and ceramics; print-making; publishing; radio; sculpture; teaching; television; textiles; writing; zoos and aquaria.
<b>Takings from accommodation</b>	Refers to revenue received from the provision of both short-term and long-term accommodation at the accommodation establishment. Takings from meals are excluded.
<b>Teleworker</b>	Any employed person who worked at a fixed workplace for a business that was not based at their own home and in the last three months worked at home during normal business hours for a full or part day. Respondents who were not based anywhere or who worked at an alternate location to their regular business premises are not included.
<b>Total assets</b>	Refers to the total of financial and non-financial assets held by councils at 30 June.

<b>Total expenses</b>	Refers to the total of those items of Expense, shown in the Operating Statements of councils' Statements of Accounts, which are defined within the ABS' Government Finance Statistics (GFS) framework as GFS Expenses. For details see the <i>Information Paper: Accruals-based Government Finance Statistics</i> (cat. no. 5517.0).
<b>Total liabilities</b>	Refers to deposits held, advances received, borrowing, employee entitlements and provisions, and other non-equity liabilities of councils at 30 June.
<b>Unemployed persons</b>	<p>All those aged 15 years and over who were not employed during the reference week, and:</p> <ul style="list-style-type: none"> <li>■ had actively looked for full-time or part-time work at any time in the four weeks up to the end of the reference week</li> <li>■ were available for work in the reference week, or would have been available except for temporary illness (i.e. lasting for less than four weeks to the end of the reference week)</li> <li>■ were waiting to start a new job within four weeks from the end of the reference week and would have started in the reference week if the job had been available then</li> <li>■ were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the reference week (including the whole of the reference week) for reasons other than bad weather or plant breakdown.</li> </ul> <p><i>Actively looking for work</i> includes writing, telephoning or applying in person to an employer for work; answering a newspaper advertisement for a job; checking factory notice-boards or the touch screens at Centrelink's offices; being registered with Centrelink as a jobseeker; checking or registering with any other employment agency; advertising or tendering for work; and contacting friends or relatives.</p>
<b>Unpaid involvement</b>	Comprises all persons who received no financial or in-kind payment for their involvement.
<b>Value of building</b>	Derived by the aggregation of the estimated value (when completed) of building work (excluding the value of land and landscaping but including site preparation) as reported on approval documents.
<b>Victim</b>	A household or person reporting at least one of the offences surveyed. Victims were counted only once for each type of offence, regardless of the number of incidents of that type.
<b>Victimisation rate</b>	The number of victims of an offence in a given population expressed as a percentage of that population.

**Vital statistics** Births and deaths relate to all occurrences of such events in the reference period, which occurred within Australia, irrespective of state of registration, where the usual residence was within New South Wales. Births are allocated to a statistical local area of the State according to the usual residence of the mother, and deaths are allocated according to the usual residence of the deceased. Infant deaths are generally assigned to the usual residence of the mother.

**Work in selected culture and leisure activities** This consists of any participation, paid or unpaid, in any of the selected culture and leisure activities in the survey. Involvement only as a hobby is excluded.

**Worked at home after hours only** Any employed person who, in the last three months, worked at home on weekends or took work home after normal business hours.

## BIBLIOGRAPHY

### AGRICULTURE

*Agricultural Commodities, Australia* (cat. no. 7121.0)

Provides final estimates for major agriculture outputs and activity. Contains tables and commentary on agriculture industry structure, area and production of crops, livestock numbers, livestock products, value of commodities produced, land management and trade.

### CONSTRUCTION

*Building Approvals, New South Wales and Australian Capital Territory* (cat. no. 8731.1)

Number of dwelling units and value of residential buildings approved for private sector and public sector; value of alterations and additions to residential buildings and value of non-residential building by class of building approved.

*Building Activity, New South Wales* (cat. no. 8752.1)

Number of dwelling units and value of residential buildings, value of alterations and additions to residential buildings and value of non-residential building by class of building; private sector/public sector ownership; stage of construction; value of work done during period, value of work yet to be done; number of new houses by class of builder.

### CARING

*Managing Caring Responsibility and Paid Employment, New South Wales, 2000* (cat. no. 4903.1)

Contains data on different working arrangements residents of NSW use in order to manage their caring responsibilities and paid employment, including the different working arrangements they would have liked to have used more and the reasons why they could not. Other information includes whether people have changed jobs, quit their job or permanently changed other working arrangements in order to care for someone; become self employed to make it easier to meet their caring responsibilities; and whether caring responsibilities have prevented people from seeking employment. Additionally, for females with dependent children under 15 years, information on the use of maternity leave in the last five years was collected.

### CRIME

*Crime and Safety, New South Wales* (cat. no. 4509.1)

Summarises details on household break-ins and attempted break-ins, and personal robberies and assaults, motor vehicle thefts and some data on sexual assault in the 12 months prior to the survey, as well as whether the last incident was reported to the police. Also contains details of perceptions of crime problems. Data are classified by selected demographic characteristics.

## DEMOGRAPHY

### *Regional Population Growth, Australia and New Zealand* (cat. no. 3218.0)

Highlights Local Government Areas (LGAs) with highest and lowest total population change. Commentary for each state and territory is provided, examining population change at the Capital City/Balance of State or Territory, LGA and Statistical Local Area (SLA) levels. Annual and five-yearly growth rates for each LGA, SLA and Statistical District in Australia are included. Details of regional population changes in New Zealand are also provided.

### *Population by Age and Sex, New South Wales* (cat. no. 3235.1.0.55.001)

Contains the estimated resident population by age (in 5 year age groupings) and sex for each statistical local area, statistical subdivision and statistical division at 30 June.

### *Demography, New South Wales* (cat. no. 3311.1)

Contains tables and commentary on State trends in population, births, deaths, marriages, divorces and migration. Data includes population estimates, demographic events cross-classified by socio-economic characteristics and various demographic rates. Small area data on births and deaths are also included.

## ENVIRONMENT

### *Environmental Issues: People's Views and Practices* (cat. no. 4602.0)

Contains information on household practices and behaviour with regard to environmental issues. The March 2002 issue presents data on energy sources, aspects of dwelling materials and fixtures that impact on energy use, and also energy-using household appliances. These are important determinants of energy use and have implications for greenhouse gas emissions, pollution and resource depletion.

## FINANCE

### *Local Government Finance, New South Wales* (cat. no. 5502.1.40.001)

Provides additional detail from councils' Financial Statements.

## LABOUR FORCE & EDUCATION

### *Education and Work, Australia* (cat. no. 6227.0)

Provides selected information on study in the previous year and at May in the survey year, and current labour force and demographic characteristics for the civilian population aged 15–64 years. Characteristics reported on include: type of educational institution attended or attending; level of course studied; highest and/or most recent level of educational attainment, and the year and country in which they were attained. Information on unsuccessful enrolment and deferment of study is included for persons not studying in the survey year. Data on apprenticeships is also provided.

RE MOTENESS	<p><i>Information Paper: ABS Views on Remoteness</i> (cat. no. 1244.0)</p> <p>This Information Paper deals with the concept of 'remoteness' in Australia and details options for the introduction of a classification of remoteness into the <i>Australian Standard Geographical Classification (ASGC)</i> (cat. no. 1216.0)</p> <p><i>Information Paper: Outcomes of ABS Views on Remoteness Consultation, Australia</i> (cat. no. 1244.0.00.001)</p> <p>This paper summarises the feed back received from the <i>Information paper: ABS Views on Remoteness</i> (cat. no. 1244.0) and responds to some commonly asked questions and suggestions. The paper also describes the changes which ABS will make in response to that feedback and further clarifies the purposes for which the new Remoteness classification should be used.</p>
TELEWORKING	<p><i>Teleworking, New South Wales, 2001</i> (cat. no. 1373.1)</p> <p>Contains data on the frequency and characteristics of teleworking in NSW. Includes data on location of the employer, travel mode to and from the usual workplace, distance from home to work, portion of the trip which is by car, whether any part of the car trip is shared with others and whether people make use of a car on days when they are working at home. The linking of data on usual travel distance to work with information on teleworking can be used to examine the impact that teleworking may have on traffic congestion.</p>
TOURISM	<p><i>Tourist Accommodation, Small Area Data, New South Wales</i> (cat. no. 8635.1.40.001)</p> <p>Contains results from the on-going quarterly Survey of Tourist Accommodation. Data provide information on the supply of, and demand for, tourist accommodation facilities. Data items include the number of establishments, capacity and employment for the quarter and occupancy and takings from accommodation for each month, by type of establishment and star grading. Data for selected small areas and for Tourism Regions is included.</p>
WORK IN CULTURE AND LEISURE ACTIVITIES	<p><i>Work in Selected Culture and Leisure Activities, Australia</i> (cat. no. 6281.0)</p> <p>Contains data on the number of people working in selected culture/leisure activities, classified by type of activity. It provides details on the characteristics of people involved, the nature of that work, whether paid or unpaid, and details of other jobs held.</p>
