## PREFACE

---

This publication presents a range of family, household and labour force statistics produced from the 1996 Census of Population and Housing for Queensland. Detailed characteristics from the 1996 Census have been released in two stages. The first release, published in July 1996, consisted of demographic, social and housing data (*Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas* (Cat. nos 2015.0–2015.8)). This publication contains second release data comprising family and labour force characteristics. Similar publications are available for each State and Territory, and nationally.

The data presented in the publications relate to where people were enumerated on census night and therefore data for each geographical area include visitors to that area but exclude those people who were away on census night. They are not to be confused with the official estimated resident population (ERP) figures, which are based on census counts by place of usual residence (UR) and relate to 30 June. ERP figures are derived by including in the census UR counts the following:

- estimates of Australians overseas;
- an adjustment of estimated underenumeration; and
- adjustments for births, deaths and migration, between 30 June and 6 August 1996.

For comparative purposes, this publication includes summary information relating to 1991. This information is presented on 1996 geographic boundaries.

Census data presented in this publication represent only a selection of the full range of statistics that can be derived from the Census. For further information about other census or Australian Bureau of Statistics (ABS) data refer to the Appendix or the *Directory of Census Statistics, 1996* (Cat. no. 2910.0). Concepts and definitions used in this publication are explained in the Glossary and more detailed information is available in the *Census Dictionary, 1996* (Cat. no. 2901.0).

ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

# SUMMARY OF FINDINGS

---

## HOUSEHOLD CHARACTERISTICS

### HOUSEHOLD TYPE

There were 1,204,074 households in occupied private dwellings in Queensland (Qld) in 1996, an increase of 18.3% since 1991 (1,017,800). Over two-thirds (69.9%) of these were family households. Another 20.6% (248,336) were lone person households, and 4.8% were group households.

#### Family households

Between 1991 and 1996, the number of family households in Qld increased by 14.1%, from 737,035 to 841,200. However, family households decreased by 2.3 percentage points as a proportion of all households.

In 1996 at least four out of every five households in the Statistical Subdivisions (SSDs) of Beaudesert Shire Part A (86.9%), Thuringowa City Part A (84.1%) and Pine Rivers Shire (83.8%) were family households.

At the Statistical Local Area (SLA) level, Windaroo-Bannockburn (92.8%) on the Gold Coast recorded the highest proportion of family households. The Brisbane SLAs of Parkinson-Drewvale (92.7%), Mount Ommaney (92.2%), Stretton (91.6%), Pullenvale (91.1%), Westlake (90.7%) and Bellbowrie (90.6%) also recorded high levels.

#### Lone person households

There was a marked increase (36.2%) between 1991 and 1996 in the number of lone person households in Qld.

Particularly high proportions of lone person households were recorded in the SSDs of Redcliffe City (28.3%), Toowoomba City (25.1%) and Brisbane City (24.9%), where findings were much higher than the proportion for the State (20.6%).

High concentrations of lone person households were recorded in a north-south band of SLAs within Brisbane from Nundah (42.2%), through New Farm (48.3%), Fortitude Valley - Remainder (45.6%) and South Brisbane (42.2%) to Annerley (37.1%).

#### Group households

In 1996 there were 57,424 group households in Qld, compared to 47,018 in 1991, representing an increase of 22.1%. SLAs with comparatively high levels of group households formed a continuous arc around central Brisbane from City - Remainder (24.3%) and Herston (21.4%), through Toowong (18.3%) to the university suburb of St Lucia (19.6%).

### HOUSEHOLD SIZE

There was a mean (average) of 2.7 people per household in 1996, compared with 2.8 in 1991. At the SLA level, the findings ranged from 1.5 people per household in Moreton Island to 5.2 and 6.4 in Mornington and Aurukun respectively. It should be noted that this average excluded visitors to households and included usual residents who were absent on census night.

## SUMMARY OF FINDINGS *continued*

---

### HOUSEHOLD INCOME

In Qld the median household income in 1996 was \$618 per week, representing a 17.3% increase over 1991 (\$527). SSDs with the highest medians were North West (\$864 per week) and Pine Rivers Shire (\$826). At the SLA level, median household incomes ranged from \$312 in Perry, inland from Bundaberg, to \$1,460 in Pullenvale, in Brisbane's west.

### FAMILY CHARACTERISTICS

In the 1996 Census, 853,165 families were counted in occupied private dwellings in Qld, an increase of 15.0% over 1991 (741,650). Of these, almost half (47.7%) were couples with children, 35.9% were couples without children, and 14.6% were one parent families. The proportion of couple families with children had decreased since 1991 (from 52.5%), but there were increases in couples without children (increased from 33.0%) and one parent families (increased from 12.7%).

#### COUPLE FAMILIES WITH CHILDREN

##### With dependent children

Between 1991 and 1996 couple families with dependent children increased in number (from 325,832 to 339,682 respectively), but decreased as a proportion of all families (from 43.9% to 39.8%).

The majority (65.5%) of SSDs registered percentages above that for Qld as a whole (39.8%), Thuringowa City Part A (51.5%) and Beaudesert Shire Part A (51.0%) recording the highest. However, the more populous SSDs recorded proportions below the State average — Brisbane City (37.0%), Gold Coast City Part B (33.2%), Wide Bay-Burnett (38.1%), and Sunshine Coast (33.6%). These four areas combined accounted for 43.5% of families in Qld.

The SLAs of Diamantina (64.2%) and Isisford (61.6%) in the central-west of the State, Cook-Weipa (61.9%) in the far north, as well as several in south-western Brisbane e.g. Mount Ommaney (62.6%), shared high proportions of couple families with dependent children.

##### With non-dependent children only

In Qld the proportion of couple families, with non-dependent children only, declined from 8.6% in 1991 (63,526 families) to 7.9% in 1996 (67,297).

Couple families with non-dependent children only were especially concentrated in two SLAs on the outskirts of Brisbane City: Berrinba-Karawatha (22.0%) and Upper Kedron (21.8%).

## SUMMARY OF FINDINGS *continued*

---

### COUPLE FAMILIES WITHOUT CHILDREN

The number of couple families without children increased from 244,409 in 1991 (33.0% of all families) to 306,260 in 1996 (35.9%). These families represented more than two-fifths of all families in the SSDs of Sunshine Coast (43.5%), Gold Coast City Part B (42.1%) and Wide Bay-Burnett SD Balance (41.2%).

SLAs in which these families comprised half or more of all families were mainly on the coast in the south-east or clustered in the inner areas of the major cities. Examples of the former were Moreton Island (83.3%), Main Beach-Broadwater (63.3%), Broadbeach (62.2%) and Surfers Paradise (60.5%). Examples of the latter were City (Townsville) (57.2%), and City-Remainder (57.0%) in Brisbane.

### ONE PARENT FAMILIES

Between 1991 and 1996 the number of one parent families counted in Qld increased by 32.0%, from 94,184 to 124,294.

In 15 SLAs over one-quarter of families were one parent families. They included Aurukun (46.3%), Mornington (35.6%) and Torres (30.4%) in the far north of the State, and Inala (32.6%) in Brisbane's south.

## LABOUR FORCE CHARACTERISTICS (Persons Aged 15 Years and Over)

### LABOUR FORCE

The labour force increased by 14.1% since 1991, from 1,378,467 to 1,572,386. This increase represented an increase in the number of employed people, partly offset by a decline in the number of unemployed people.

### EMPLOYMENT

In 1996 there were 1,420,668 employed people in Qld, representing a 16.2% increase since 1991 (1,222,133). In both 1996 and 1991, the majority of employed people were counted in the Statistical Divisions (SDs) of Brisbane and surrounding Moreton combined (64.1% and 62.5% respectively).

#### Full-time

Although the number of employed people in the State had increased, the percentage of employed people who worked full-time decreased (67.7% in 1996 and 69.4% in 1991). Proportionally, full-time employment was concentrated in the western parts of the State: South West SSD (74.5% of employed people), Central West (74.2%) and North West (73.4%), findings which were similar to the 1991 situation.

Similarly, at the SLA level, full-time employment was more marked in regional areas e.g. Jericho (83.9%) west of Rockhampton, and Quilpie (81.3%) in the south-west.

### Part-time

The number of people employed part-time increased considerably (37.1%) between 1991 and 1996, from 312,043 to 427,793. Moreover, the proportion of all employed people who were part-timers also increased from 25.5% in 1991 to 30.1% in 1996. The SDs of Moreton (34.7%) and Wide Bay-Burnett (31.7%) exceeded the finding for the State as a whole.

The proportion of workers who were part-time increased in every SSD, indicating that the trend towards part-time employment occurred right across the State.

Particularly high numbers and proportions of people employed part-time were noted in the SLAs of the Sunshine Coast (e.g. Noosa - Noosa-Noosaville — 1,743 and 41.7%) and the Gold Coast (e.g. Burleigh Heads — 1,006 and 36.9%). St Lucia (1,890 and 46.6%), location of Queensland University, also recorded a high level.

### Occupation

In 1996 the top four employing occupations in the State were Intermediate clerical, sales and service workers (16.3%), Professionals (15.1%), Tradespersons and related workers (13.6%) and Associate professionals (11.5%). Since 1991, while there had been proportional increases in Intermediate clerical, sales and service workers (11.7% in 1991), Professionals (12.9% in 1991) and Associate professionals (7.6% in 1991), the percentage employed as Tradespersons and related workers (14.1% in 1991) declined.

All of the 14 SSDs in which the proportion of Intermediate clerical, sales and service workers exceeded the finding for the State as a whole were on the coast (e.g. Thuringowa City Part A — 19.9%) or nearby (e.g. Ipswich City (Part in BSD) — 17.9%). However, in only three SSDs was the level of Professionals above that of the State: Brisbane City (22.3%), Townsville City Part A (17.9%) and Toowoomba City (17.6%). On the other hand, Brisbane City (10.4%), Darling Downs SD Balance and South West (both 12.0%), recorded the lowest proportions of Tradespersons and related workers.

Interestingly, the Qld trend towards a greater proportion of Associate professionals occurred in all SSDs.

### Industry

In 1996 the top four industry Divisions in terms of employment in Qld were Retail trade (14.2% of employed people), Manufacturing (10.5%), Health and community services (9.3%), and Property and business services (9.3%). These were also the top four Divisions in 1991. Since then, there had been some growth in the service industries — Health and community services, and Property and business services increased by 1.5 percentage points and 2.2 percentage points respectively. Retail trade (14.2%) and Manufacturing (10.6%) remained virtually unchanged.

## SUMMARY OF FINDINGS *continued*

---

### Industry *continued*

The proportion of workers in Retail trade varied across the State, from 8.5% in Central West SSD, to 18.1% in Sunshine Coast SSD. Manufacturing varied more widely, ranging from 2.4% in Central West SSD to 19.9% in Gladstone SSD.

As noted at the State level, the proportion employed in Health and community services in 1996 was higher than in 1991 and this occurred for all SSDs. A similar rise was noted for Property and business services.

### UNEMPLOYMENT

In 1996, 151,718 people were unemployed in Qld, a decrease of 3.0% from 1991 (156,334). In that period the unemployment rate also declined from 11.3% to 9.6%. Likewise the unemployment rate for people aged between 15 and 24 years declined from 18.7% to 16.4%.

High unemployment rates were recorded in the SSDs of Sunshine Coast (15.1% of the labour force), Wide Bay-Burnett SD Bal (14.9%), Bundaberg (14.8%) and Gold Coast City Part A (13.0%). These four areas also had the highest rates in 1991, as well as the highest rates for people aged 15–24 years in both 1991 and 1996.

At the SLA level, several areas recorded very high rates overall as well as high rates for young people. Examples were Miriam Vale (23.6% and 31.6% respectively) and Mount Morgan (23.0% and 45.3%).

### NOT IN THE LABOUR FORCE

Between 1991 and 1996 the proportion of the Qld adult population (15 years and over) not in the labour force declined slightly from 37.1% to 36.9%.

However, in 15 of the State's SLAs at least half of all adults were not in the labour force. These areas were situated mainly along the coast, such as Coolangatta (63.7%), Bilinga (62.7%) and Bribie Island (62.1%), and the northern suburbs of Brisbane, such as Herston (54.6%). In all of these areas except for Inala, the proportion of people aged 65 years or more was well over the Qld figure of 12.0%.

### POST-SCHOOL QUALIFICATIONS

Since 1991, the proportion of the population aged 15 years and over with Basic vocational or higher level qualifications increased from 24.1% to 27.6%. The findings, by level of attainment, were:

- Bachelor degree or higher — 8.6% (6.0% in 1991);
- Undergraduate or Associate diploma — 5.4% (4.9% in 1991);
- Skilled vocational — 11.3% (10.6% in 1991); and
- Basic vocational — 2.3% (2.6% in 1991).

## SUMMARY OF FINDINGS *continued*

---

### POST-SCHOOL QUALIFICATIONS *continued*

People with Bachelor degrees or higher level qualifications were most concentrated in western and inner Brisbane, the SLAs of Taringa (36.4%), Chapel Hill (32.5%) and St Lucia (31.6%) recording the highest levels. Other SLAs in these parts of Brisbane, such as Fig Tree Pocket (10.3%), Bellbowrie (10.2%) and Kenmore (10.1%), also recorded above average proportions of people with Undergraduate or Associate diplomas. SLAs in other areas such as Nudgee Beach (10.2%) in Brisbane's north-east, and Isisford (8.9%) in the central west of the State, also had high proportions of people with Undergraduate or Associate diplomas

In contrast to the State level, the mining centres of Cook - Weipa (21.7%) and Mount Isa (16.5%) recorded high levels of people with Skilled vocational qualifications, as did Nebo (19.0%) and Broadsound (16.9%), both near Mackay.

## BASIC COMMUNITY PROFILE

---

The key characteristics from the Census are summarised in a set of 32 standard tables which make up the Basic Community Profile (BCP). The first 16 tables (B01 – B16), which provided a range of social, demographic and housing characteristics, were published in *Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas* (Cat. nos. 2015.0–8).

In the following pages, the BCP is completed by the inclusion of BCP tables B17 – B32, which provide family, household and labour force characteristics from the Census. Similar BCP tables are available for other geographic areas, including Local Government Areas, Postal Areas and Collection Districts.

For further information about the Community Profile Series, please refer to the Appendix — Census Products and Services.

(a) Comprises households where at least one, but not all, member(s) aged 15 years and over did not state an income and/or at least one spouse, child or co-tenant was temporarily absent

(b) Comprises households where no members present stated an income.

### SELECTED MEDIANS

Median age	33 years
Median weekly individual income	\$200-\$299
Median weekly household income	\$500-\$699
Average household size	2.7

## EXPLANATORY NOTES

---

### SCOPE AND COVERAGE

**1** The 1996 Census of Population and Housing was held on 6 August 1996. The first census was held in 1911 and since 1961 a census has been taken every five years, a frequency which is specified in the *Census and Statistics Act 1905*. The objective of the Census is to measure accurately the number and key characteristics of people in Australia on census night, and the dwellings in which they live.

**2** The Census aims to count every person who spends census night in Australia. This includes Australian residents in Antarctica and people in the Territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External Territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only people who spend census night in Australia but are excluded from the Census are foreign diplomats and their families.

**3** The Census includes people on vessels in or between Australian ports, on board long-distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on census night are counted while people leaving an Australian port for an overseas destination before midnight on census night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than six months only basic demographic data are available. The Census includes people camping out and the homeless.

**4** All private dwellings, except diplomatic dwellings, are included in the Census, whether occupied or unoccupied. Caravans in caravan parks, manufactured homes in manufactured home estates and self-care units in accommodation for the retired or aged are counted only if occupied. Occupied non-private dwellings, such as hospitals, prisons, hotels, etc. are also included.

**5** Details about the 1996 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *1996 Census – Nature and Content* (Cat. no. 2008.0).

### STATISTICAL LOCAL AREA BOUNDARIES

**6** The boundaries of SLAs are revised from time to time to accord with changes to Local Government Area (LGA) boundaries and to meet needs for small area information. The boundaries shown in this publication are those applying at the time of the 1996 Census. Further information on geographic classifications is contained in *Statistical Geography: Volume 1 – Australian Standard Geographical Classification (ASGC), July 1996* (Cat. no. 1216.0)

**7** Where necessary 1991 statistics in this publication have been recalculated to conform with the 1996 boundaries.

### BASIC COMMUNITY PROFILE TABLES B17 TO B32

**8** Tables numbered B17 to B32 contained in this publication are from *Census of Population and Housing: Community Profiles, Australia 1996* (Cat. no. 2020.0). These tables are available in hardcopy or electronic format for all standard census geographic areas. For more information about the Community Profiles please refer to the Appendix.

### ABS POPULATION ESTIMATES

**9** This publication contains population counts based on where people were counted on census night, which may not have been where they usually lived. The Census can provide person counts based on place of usual residence at the geographic level of SLA.

**10** Official ABS population estimates (estimated resident population) are also separately available from the ABS. The estimates are based on census counts which have been adjusted to:

- include people who were in Australia on census night but were missed in the census;
- include Australian residents who were temporarily overseas on census night (these people were not within scope of the Census); and
- exclude overseas visitors counted in the Census who were not usual residents of Australia.

**11** The adjusted census count is updated quarterly using demographic statistics. These are statistics on births, deaths, and overseas and internal migration.

**12** ABS population estimates are published in *Australian Demographic Statistics* (Cat. no. 3101.0), produced quarterly, and in *Population by Age and Sex, Australian States and Territories* (Cat. no. 3201.0), produced annually.

**13** The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration) of the resident population of Australia, States and Territories. These projections are published biennially in *Population Projections* (Cat. no. 3222.0).

### DATA LIMITATIONS

**14** Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:

- *Partial non-response*: In some cases where an answer is not provided to a question an answer is imputed (often from other information on the form). In other cases a 'Not stated' code is allocated.
- *Processing error*: While such errors can occur in any processing system, quality management is used continuously to improve the quality of processed data, and to identify and correct data of unacceptable quality.
- *Random adjustment*: Table cells containing small values are randomly adjusted or suppressed to avoid releasing information about particular individuals, families or households. The effects of these adjustments are statistically insignificant.
- *Respondent error*: Because processing procedures cannot detect or repair all errors made by people in completing the forms, some remain in final data.
- *Undercount*: Although the Census aims to count each person, there are some people who are missed and others are counted more than once. The data in this publication are not adjusted for the net undercount.

**15** Further information on data quality is provided progressively in *Census Update* and in *1996 Census Data Quality Working Papers*.

## EXPLANATORY NOTES *continued*

---

### OVERSEAS VISITORS

**16** Census data for overseas visitors (who intended to be in Australia for less than six months) are restricted to age, sex and marital status. In this publication overseas visitors do not contribute to any tables, with the exception of B22.

### LABOUR FORCE STATISTICS

**17** The labour force statistics collected from the Census are valuable in providing data for small groups of the population. They are not to be confused with the statistics from the monthly Labour Force Survey, which are only available at State, Territory and capital city level.

**18** Census figures differ from the survey figures because of differences in scope, questionnaire design and collection procedures. For more information refer to Census Working Paper 94/1: *1991 Census Data Quality — Labour Force Statistics*.

**19** Official monthly labour force statistics are published in *Labour Force, Australia* (Cat. no. 6203.0), produced monthly.

### CALCULATION OF PROPORTIONS

**20** When calculating the proportion of the population with a particular characteristic, 'Not stated' responses are included in the denominator. For example, in the Summary of Findings, the proportion of family households was calculated by dividing the number of households which stated a form of family relationship by the total number of households (including those which did not report any relationship details) and expressing the result as a percentage.

### CALCULATION OF MEDIANS

**21** A median is a measure of central tendency. It is a mid-value which divides a population distribution into two, with half the observations falling below it and half above. Unlike averages (means), medians are not usually skewed by extreme observations.

**22** There are several issues to be aware of:

- The categories 'Partial income stated', 'All incomes not stated', 'Overseas visitor', and 'Not applicable' are not included in the calculation of median household income.
- If a median falls into a category that has a text only label then the median is set to 0. This is only relevant to the calculation of median household income, as the income classification includes categories 'Nil income' and 'Negative income'.
- If the median is calculated on a classification containing an open-ended range and the median falls within that range, the median is set to the number in the label. For example, in the calculation of median household income, if the median falls in the last range \$2,000 or more, \$2,000 is allocated as the median.

### UNADJUSTED DOLLARS

**23** The 1991 Census dollar values for median household income have not been adjusted into 1996 dollars.

## EXPLANATORY NOTES *continued*

### SYMBOLS AND OTHER USAGES

**24** The following abbreviations and symbols are used in this publication:

#### Spatial units

CD	Census Collection District
CGC	Community Government Council
LGA	Local Government Area
SD	Statistical Division
SIA	Statistical Local Area
SSD	Statistical Subdivision

#### LGA Type

(C)	City
(S)	Shire
(T)	Town

#### Miscellaneous

ABS	Australian Bureau of Statistics
ASGC	Australian Standard Geographical Classification
Bal	Balance
BCP	Basic Community Profile
BSD	Brisbane Statistical Division
ERP	estimated resident population
Pt	Part
Qld	Queensland
UR	usual residence
—	nil or rounded to zero

## APPENDIX CENSUS PRODUCTS AND SERVICES

---

There is a wide range of products and services developed from the 1996 Census of Population and Housing, details of which are listed in brief below. For more detailed information on the 1996 Census range of products and services, please refer to the *Directory of Census Statistics, 1996* (Cat. no. 2910.0), or call our Client Services Officers in your State or Territory (refer to the telephone numbers listed on the back page of this publication). Information is also available on the Internet, at <http://www.abs.gov.au>

### CENSUS REFERENCE PRODUCTS

#### Census Dictionary

The *Census Dictionary, 1996* (Cat. no. 2901.0) is a comprehensive reference guide to the concepts and terms used in the 1996 Census of Population and Housing. It includes a complete listing of the 1996 Census classifications and a glossary of census terms.

#### How Australia Takes a Census

*How Australia Takes a Census, 1996* (Cat. no. 2903.0) provides information about the history of the Census, the planning process and the way in which the census is conducted.

#### Geographic classifications and codes

*Statistical Geography: Volume 1 – Australian Standard Geographical Classification (ASGC)* (Cat. no. 1216.0) provides information about the names and codes of the geographic areas used in the 1996 Census.

#### 1996 Census Statistical Local Area maps

These reference maps show the SLAs from the 1996 Census. Each map shows the boundary of an SLA and the Collection District (CD) boundaries contained within.

#### Digital Boundaries

All of the census boundaries are available electronically in industry formats through a range of secondary providers.

### CENSUS DATA PRODUCTS

#### Estimated Resident Population (ERP)

The ERP is the official population figure and is based on adjusting the results of the Census to provide more accurately the numbers of people usually living in an area.

The publication series *Population by Age and Sex* (Cat. nos 3235.1–8) contains ERP data, based on 1996 Census figures.

#### Selected characteristics

This series of publications contains data and commentary on various characteristics from the 1996 Census at selected geographic levels. There are three sets of publications in the series:

- *Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas, 1996* (Cat. nos 2015.0–8);
- *Census of Population and Housing: Selected Characteristics for Urban Centres and Localities, 1996* (Cat. nos 2016.0–7); and
- *Census of Population and Housing: Selected Family and Labour Force Characteristics for Statistical Local Areas, 1996* (Cat. nos 2017.0–8).

## Community Profile Series

The *Census of Population and Housing: Community Profiles, Australia, 1996* (Cat. no. 2020.0) provides detailed and comprehensive census characteristics of people, families and dwellings for small areas. This series is available for all standard census geographic areas, and is available in hardcopy and electronic formats.

The series comprises six community profiles:

- *Basic Community Profile (BCP)* contains 32 tables of detailed data covering dwelling, household and family topics. This profile is available for all standard census geographic areas, Commonwealth and State Electoral Divisions, Postal Areas, and Suburbs, for the States, Territories and Australia.
- *Time Series Community Profile* contains 21 tables of variables from the BCP comparing data from the 1986, 1991 and 1996 Censuses where the classifications are comparable.
- *Usual Residents Profile* contains 25 tables based on the usual residents of SLAs. This is the only community profile based on place of usual residence.
- *Expanded Community Profile* contains 41 tables available for SLAs and larger areas, comprising more detailed versions of some of the basic profile tables, plus new tables.
- *Working Population Profile* contains 17 tables of labour force and related characteristics of people who work and are counted in SLAs within the journey to work study areas — usually capital cities.
- *Indigenous Profile (IP)* is available in two formats. The *Summary Indigenous Profile* contains selected characteristics of Indigenous people in three tables which are available at the Indigenous Location level. The *Detailed Indigenous Profile* provides 26 tables available for Indigenous Areas, Aboriginal and Torres Strait Islander Commission Regions, States and Territories.

## CDATA96

*Census of Population and Housing: CDATA96* (Cat. nos 2019.0–8) is a CD-ROM product which provides a large volume of tabulated census data, digital boundaries and base map data. It includes software capable of producing tables, maps and graphs of the data.

## KEYDATA

*Census of Population and Housing, Australia, 1996: CENSUS KEYDATA* (Cat. no. 2023.0.30.001) is a CD-ROM product which provides access to 1996 Census Community Profiles, Classification Counts data and Digital Boundaries, using a specially encrypted CD-ROM.

## SEIFA

*Census of Population and Housing: Socio-Economic Indexes for Areas (SEIFA), August 1996* (Cat. no. 2033.0) are lifestyle groupings of Australia's communities. They provide information and rankings for a wide range of geographic areas based on five indexes which group Australians according to their social and economic conditions.

### Classification Counts

*Census of Population and Housing: Classification Counts, Australia, 1996* (Cat. no. 2022.0) provides frequency counts for 1996 Census variables in complete classificatory detail, for every State and capital city.

### Census Household Sample File

The *Census of Population and Housing: Household Sample File, 1996* (Cat. no. 2037.0) is a CD-ROM product which will provide a comprehensive unit record database of census characteristics, containing a sample of private households and associated persons, and persons in non-private dwellings.

### Social Atlas Series

The *Social Atlas, 1996* (Cat. nos 2030.1–8) publications feature colour maps of the key social, demographic and economic characteristics of each capital city.

### Australia in Profile — A Regional Analysis

*Census of Population and Housing: Australia in Profile — A Regional Analysis, 1996* (Cat. no. 2032.0) provides commentary and data on a number of key social indicators from the 1996 Census, with the focus on regional distributions and comparisons.

## CONSULTANCY SERVICES

The following census specific services are available:

### Thematic Profile Service

The *Thematic Profiles Service* provides profiles on request, covering the themes of the Family, Young People, Older People and Ethnicity, on a variety of media.

### Customised Profile Service

The *Customised Profiles Service* provides community profile data tailored to your needs, on a variety of media.

### Customised Tables Service

The *Customised Tables (Matrix) Service* provides detailed cross-classified tables tailored to your needs, on a variety of media.

### Customised Geographic Data Reports Service

The *Customised Geographic Data Reports Service* provides tabular geographic data which relate specifically to the census Geographic Areas and their characteristics (e.g. area).

### Customised Mapping Service

Through the *Customised Mapping Service* you are able to purchase both Customised Thematic Maps and Customised Reference Maps on request.

## GLOSSARY

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the *Census Dictionary, 1996* (Cat. no. 2901.0).

**Couple family** This is a family based on two persons who are in a registered or de facto marriage and who are usually resident in the same household. The family may include any number of dependants, non-dependants and/or other related individuals. As it is not necessary for a parent-child relationship to be formed, a couple family can consist of a couple without children.

**Dependent child** A dependent child is an individual who is either a child aged less than 15 years or a dependent student. To be regarded as a child the individual can have no partner or child of his/her own usually resident in the same household.

A dependent child must be attached to a nominal parent with whom he/she usually resides. This parent must be over 15 years of age.

**Dependent student** A dependent student is defined as a natural, adopted, step or foster child who is 15–24 years of age and who attends an educational institution as a full-time student, and who has no partner or child of his/her own usually resident in the same household.

Boarders and lodgers living with a family are automatically excluded from all family coding once they are 15 years or older unless some familial relationship is also present. The family relationship then takes precedence over the fact they are boarders or lodgers.

**Dwelling** A dwelling is a building or structure in which people live. This can be a building, such as a house; part of a building, such as a flat; or it can be a caravan or tent, humpy or park bench. Houses under construction, derelict houses, vacant tents, or converted garages are not counted in the Census.

There are private and non-private dwellings.

A *private dwelling* is normally a house, flat, part of a house, or even a room; but can also be a house attached to, or rooms above, shops or offices; an occupied caravan or unit in a caravan park or craft in a marina; an occupied dwelling in a Manufactured Home Estate; an occupied self-care unit in Accommodation for the Retired or Aged; a houseboat; or tent if it is standing on its own block of land.

An occupied caravan situated on a residential allotment is also classed as a private dwelling. Private dwellings can be either occupied or unoccupied.

*Non-private dwellings* are those dwellings not included above, which provide a communal or transitory type of accommodation. These dwellings include hotels, motels, guest houses, prisons, religious and charitable institutions, defence establishments, hospitals and other communal dwellings. Only occupied non-private dwellings are included in the Census.

**Family** A family is defined by the ABS as two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household.

Non-related persons living in the same household are not counted as family members (unless under 15 years of age).

**Geographic areas** The tables in this publication are at the levels of Statistical Local Area, Statistical Subdivision and Statistical Division, as defined by the 1996 Census edition of the Australian Standard Geographical Classification (ASGC).

*Statistical Local Area (SLA)*: These areas consist of one or more whole Census Collection Districts (CDs) and cover, in aggregate, the whole of Australia without gaps or overlaps.

SLAs correspond in many cases to Local Government Areas (LGAs). The main exceptions are:

- where the boundaries of one or more Statistical Subdivisions (SSDs) cut across an LGA, the LGA is split into two or more parts, each of which forms a separate SLA;
- where a particular LGA is substantially different from other LGAs in terms of size and economic significance, or in terms of user needs for statistics, the LGA may be split into two or more SLAs. For example, the City of Brisbane covers a large area and is split into 163 SLAs while most LGAs in Victoria are split into two or more SLAs following the recent restructuring of local government in that State;
- where an area is unincorporated (i.e. not part of an LGA) an SLA is created.

*Local Government Area (LGA)*: LGAs are spatial units which represent the whole undivided geographic area of responsibility of either:

- an incorporated local government council; or
- an incorporated community government council (CGC) where the CGC is of sufficient size and statistical significance.

LGAs cover only part of Australia. The major areas not covered by LGAs are the large northern parts of South Australia, most of the Northern Territory, and all of the Australian Capital Territory and Other Territories. For the 1996 Census, LGA boundaries are as defined on 5 August 1995 and included in the 1996 Edition of the ASGC (effective 1 July 1996).

*Statistical Subdivision (SSD)*: These areas consist of one or more SLAs and cover, in aggregate, the whole of Australia without gaps or overlaps.

*Statistical Division (SD)*: These areas consist of one or more SSDs and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries. However, the three Territories of Jarvis Bay, Christmas Island and Cocos (Keeling) Islands together form the single SD of Other Territories. Capital city SDs are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated urban centres) for a period of at least 20 years.

SDs outside the capital city are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and the economic units in the region, under the unifying influence of one or more major towns or cities.

*State/Territory*: States and Territories consist of one or more SDs and are the largest type of spatial unit in the ASGC. The six Australian States and five Territories which are part of geographic Australia and included in the 1996 ASGC are New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, Northern Territory, the Australian Capital Territory, Jarvis Bay Territory and the external Territories of Christmas Island and Cocos (Keeling) Islands.

**Geographic areas** *continued* In the ASGC, the Territories of Jervis Bay, Christmas Island and Cocos (Keeling) Islands are combined to form Other Territories.

Codes for States and Territories are as follows:

- 1 – New South Wales
- 2 – Victoria
- 3 – Queensland
- 4 – South Australia
- 5 – Western Australia
- 6 – Tasmania
- 7 – Northern Territory
- 8 – Australian Capital Territory
- 9 – Other Territories

More information about definitions, and lists of codes and names of the geographic areas can be found in *Statistical Geography: Volume 1 – Australian Standard Geographical Classification (ASGC), July 1996* (Cat. no. 1216.0) effective date 1 July 1996.

**Household** A household is a group of people who usually reside in the same private dwelling. In this publication, households are classified to three main types:

*Family Household* - a household consisting of two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household.

A household can contain one or more families. Thus the number of families living in occupied private dwellings may be more than the number of family households.

*Lone person household* - a person who makes provision for his/her own food and other essentials in living, without combining with any other person to form part of a multi-person household. He/she may live in a dwelling on his/her own or share a dwelling with another individual or family.

*Group household* - a household consisting of two or more unrelated people where all persons are aged 15 years or over. There are no reported couple relationships, parent-child relationships or other blood relationships in these households.

**Household income** Household income is the sum of the personal incomes of each resident aged 15 years or more present in the household. Persons who were temporarily absent on census night, or had nil or negative income, or did not state their income, do not contribute to household income.

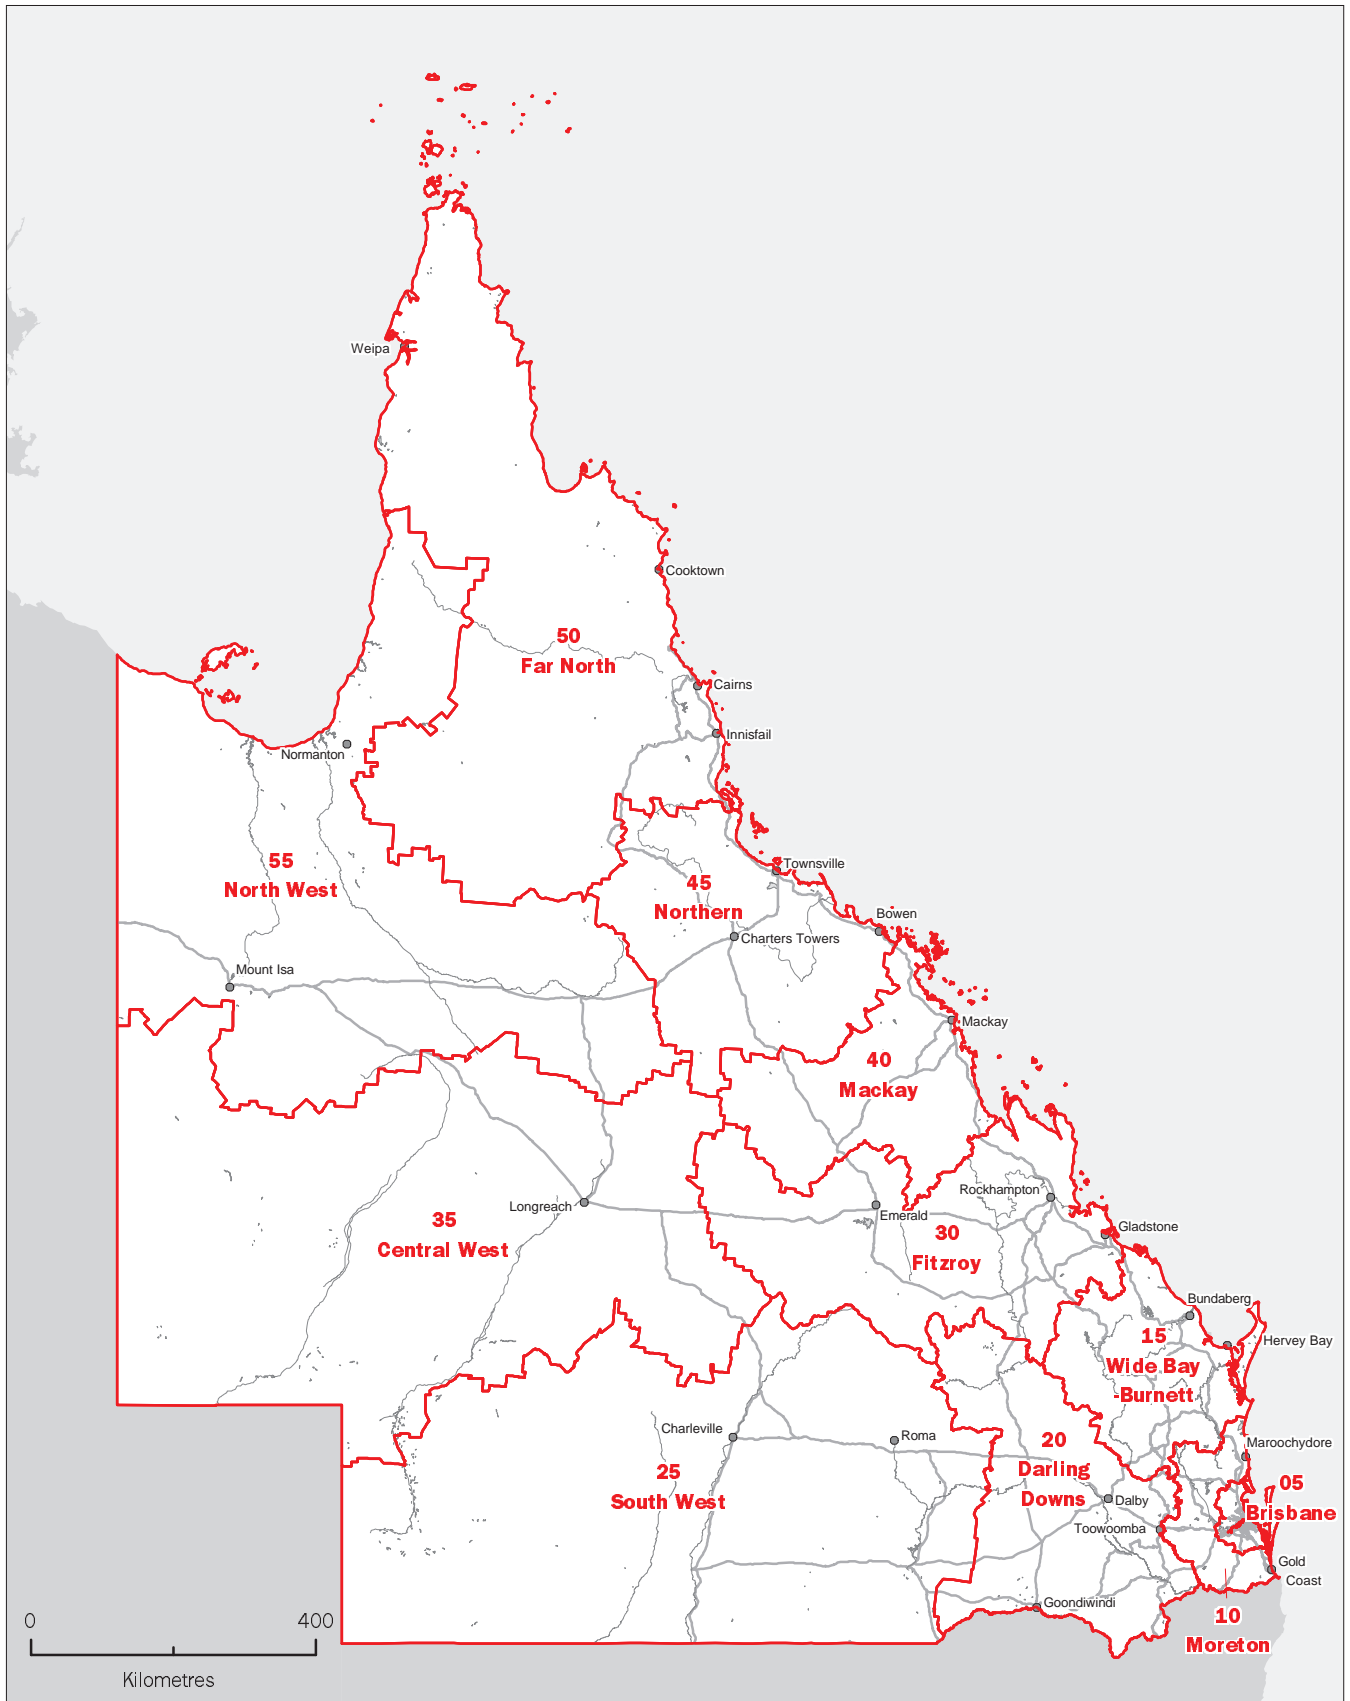

Although visitors' incomes are excluded in the calculation of household income, household income is still calculated for households that comprise only visitors, in order to collect data on household incomes in holiday resorts.

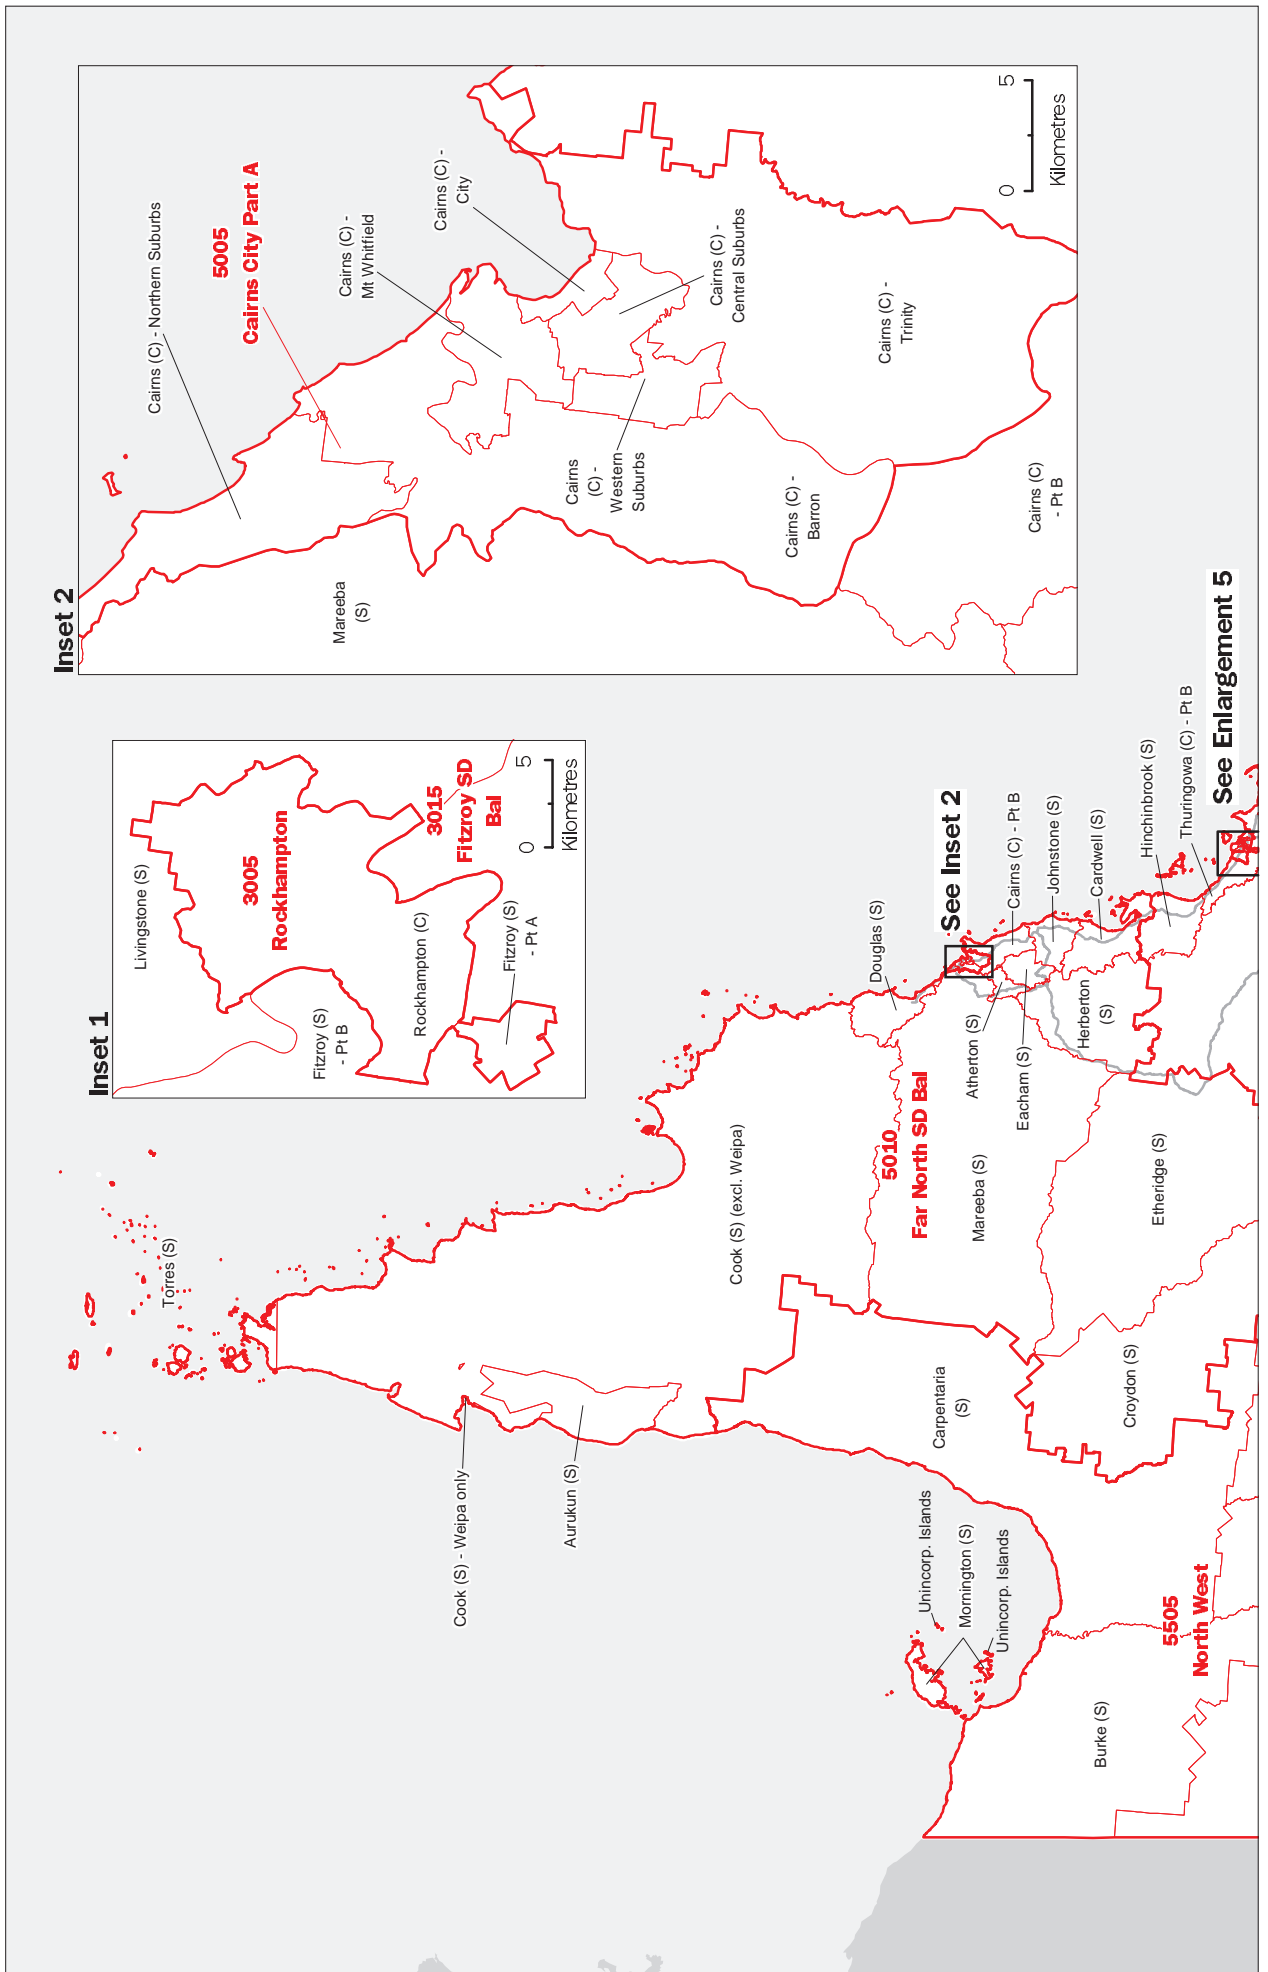

**Household size** Mean (average) household size is the average number of persons usually resident in a private dwelling. Therefore, the number of usual residents in a household excludes visitors on census night, and includes people usually present but temporarily absent.

<b>Income</b>	People aged 15 years or more were asked to state their usual gross weekly income, which is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes family allowance, family allowance supplement, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, overtime, dividends, rents received, interest received, business or farm income (less operation expenses) and worker's compensation received.
<b>Industry (of employment)</b>	This variable describes the industries in which employed people (aged 15 years and over) work, and is coded to the <i>Australian and New Zealand Standard Industrial Classification (ANZSIC), 1993</i> (Cat. no. 1292.0). The 1991 data have been adjusted to conform with the categories used in 1996.
<b>Labour force</b>	The labour force is made up of employed and unemployed people aged 15 years and over.
<b>Labour force status</b>	Labour force status identifies whether a person aged 15 years or over is employed, unemployed or not in the labour force.  <i>Employed</i> — includes those people who, during the week prior to census night, worked for payment or profit; who had a job from which they were on leave or otherwise temporarily absent; were on strike or stood down temporarily; or worked as unpaid helpers in a family business.  <i>Unemployed</i> — includes people who, during the week prior to census night, did not have a job but were actively looking for work (either full-time or part-time) and were available to start work.  <i>Not in the labour force</i> — includes people aged 15 years or more who were not employed or unemployed as defined above. This category includes people who were retired, pensioners and people engaged in home duties.
<b>Occupation (of main job)</b>	This variable describes the main job held by employed people (aged 15 years and over) during the week prior to census night, and is coded using the <i>ASCO — Australian Standard Classification of Occupations, Second Edition, 1996</i> (Cat. no. 1220.0). The 1991 data have been adjusted to conform with the categories used in 1996.
<b>One parent family</b>	A one parent family consists of a lone parent with at least one child (regardless of age) who is usually resident in the household. The family may also include any number of other related individuals.
<b>Post-school qualifications</b>	In all censuses since 1966, people aged 15 years and over have been asked to describe their post-school qualifications. In 1996, these responses were coded according to the <i>ABS Classification of Qualifications (ABSCQ), 1993</i> (Cat. no. 1262.0).
<b>Student</b>	A student is an individual who attends a secondary or tertiary educational institution on a full/part-time basis.
<b>Unemployment rate</b>	The unemployment rate is the number of unemployed people expressed as a percentage of the labour force.
