NOTES

ABOUT THIS PUBLICATION

This publication contains estimates of the resident population of Local Government Areas (LGAs), Statistical Local Areas (SLAs), Statistical Subdivisions (SSDs), Statistical Divisions (SDs), States, Territories and Australia at 30 June 1993, 1997 and 1998. Annual and five-yearly growth rates for these areas are also provided.

MAIN FEATURES

LGA POPULATION INCREASES

- In the 12 months to 1998, around 60% of Australia's 636 LGAs experienced some population increase.
- LGAs in State capitals produced 17 out of the 20 largest population increases. Seven were in Sydney, five were in Melbourne, three in Perth, and two in Brisbane.
- The south-east of Queensland (Qld) had Australia's two largest LGA increases — Brisbane City, the most populous Australian LGA added 16,600 people (2.0%), while the Gold Coast (C) grew by 11,200 or 3.0%. Also in south-east Qld, Maroochy (S) ranked seventh nationally, increasing by 3,700 (4.5%) and Caboolture (S) which increased by 3,300 (3.1%) was 10th.
- In Melbourne, the City of Casey had Australia's third largest LGA increase — 6,800 people or 4.4% in the year to June 1998. Also in Melbourne, Melton (S) was up by 3,600 people or 8.3% (ranking eighth), while Whittlesea (C) increased by 3,100 or 2.8% (12th).
- Liverpool (C), in Sydney, had the fourth largest population increase with 6,600 additional people (up 5.0%). Also in Sydney, Blacktown (C) had an increase of 4,400 or 1.8% (ranking fifth), while Sydney City, which had Australia's fastest growth at 25% (up 4,000 to 19,900 people), ranked sixth.
- In Perth, Joondalup (C) had the ninth largest increase, up 3,500 (2.3%), while the adjacent Waneroo (S) increased by 3,100 (4.6%) ranking 11th.

LGA POPULATION DECREASES

- Marrickville (A) in Sydney had the largest decline nationally, losing 820 people or 1.0% of the population. Waverley (A), also in Sydney, had the second largest decline, down 730 people or 1.1%.
- The third largest decline was Darwin City, down 480 people or 0.7%, while in Tasmania (Tas), the City of Launceston declined by 370 people or 0.6% (fifth largest decline) and Clarence (C) in Hobart which declined by 250 or 0.5%, ranked ninth.
- Several other major declines were from regional mining areas such as the Shires of Ashburton (fourth) and Coolgardie (eighth) in Western Australia (WA), and the City of Broken Hill (sixth) and Cobar (A) (seventh) in New South Wales (NSW).

CAPITAL CITY POPULATION GROWTH

- Capital City SDs experienced 71% of the total population growth of Australia in 1997–98. The total Australian capital city population grew by 1.4%, compared to the State and Territory balance which grew by 1.0%.
- Darwin SD had the fastest capital city population growth (2.3%), followed by Brisbane and Perth (1.8%), Melbourne (1.5%) and Sydney (1.3%).
- Hobart was the only capital city to record a decline, down –0.3% or 500 people.

NEW ZEALAND'S POPULATION

- in the year to June 1998, New Zealand's total population grew by 30,900 (0.8%), to 3.8 million people, compared to the Australian increase of 226,800 (1.2%) to 18.8 million people.
- Auckland, New Zealand's largest and fastest growing city, with 1.2 million people, grew by 20,800 (1.8%) in 1997–98. This was similar to Perth's increase of 23,100 people (1.8%). Perth's population was 1.3 million in June 1998.

POPULATION CHANGE AUSTRALIA

NATIONAL GROWTH STEADY

At June 1998, Australia's estimated resident population (ERP) was 18,751,000, an increase of 226,800 (1.2%) on the June 1997 ERP. This level of growth also equalled the average growth rate for the period 1993–97, indicating the consistency of the national population increase. In comparison, New Zealand grew by 0.8% in the year to June 1998.

MOST GROWTH IN NEW SOUTH WALES, FASTEST GROWTH IN WESTERN AUSTRALIA

NSW had the greatest population growth in the year to June 1998 with 68,800 additional people. Qld had the second highest growth with an additional 59,300 people, followed by Victoria (Vic.) (55,700), WA (33,500) and South Australia (SA) (7,600). In the five years to June 1998 however, Qld led Australian population growth with 346,600 additional people, followed by NSW with 336,700.

WA experienced the highest population growth rate in the year to June 1998 with 1.9%. The Northern Territory (NT) and Qld both followed with growth of 1.7% each. Over the five years to June 1998 however, the NT has grown fastest with an average annual growth rate of 2.2%, followed by Qld (2.1%), and WA (1.8%).

Tas. was the only State or Territory to record a population decline, losing 1,600 people (-0.3%) in the year to June 1998. The Australian Capital Territory (ACT) had the second slowest growth rate with a 0.1% increase (400 people), while SA had the third lowest growth rate, increasing by 0.5%.

CAPITAL CITIES GROW FASTER THAN BALANCE OF STATES

Capital City SDs experienced 71% of the total population growth of Australia in 1997–98, proportionally more than the population who reside in the Capital City SDs (64%). The 1997–98 growth in Capital City SDs (1.4%) was slightly higher than the average annual Capital City SDs growth of 1993–98 (1.3%), and considerably higher than the Balance of State growth in 1997–98 (1.0%).

Sydney had the largest Capital City SD population increase with 53,000 additional people (up 1.3%). While Melbourne's population increase was slightly lower (49,500 people), the rate of Melbourne's growth (1.5%) was higher than Sydney's (1.3%). Melbourne's relatively high growth rate was contrasted by the balance of Vic. which grew by 6,200 (0.5%), contributing just 11% of Vic's total growth in 1997–98.

Darwin had the fastest Capital City SD growth with a 2.3% increase (2,000) in the year to June 1998. The balance of the NT was comparatively slow with a 1.1% increase, and was considerably less than the rate for the balance of the NT for the five years to June 1998 (2.3%).

WA had the fastest growing State or Territory balance in the year to June 1998, with a 2.2% increase. This is significantly above the 1993–98 annual average growth of the WA balance (1.6%).

POPULATION CHANGE LOCAL GOVERNMENT AREAS

LARGEST POPULATION CHANGES

POPULATION INCREASES

Of the top twenty LGAs with the largest population increases in the year to June 1998, 17 were in Capital City SDs. Seven were in Sydney, five were in Melbourne, three in Perth, and two in Brisbane. Most of the largest LGA growth occurred in LGAs with relatively large populations.

Brisbane City, the most populous Australian LGA, was also the LGA with the largest population increase in the year to June 1998, adding 16,600 people (up 2.0%) to produce a population of 848,700. The second largest population growth occurred in the Gold Coast (C) which grew by 11,200 or 3.0%, 1.2 percentage points lower than the average annual growth rate from June 1993 to June 1998. Also in south-east Qld were the seventh and 10th ranking Maroochy (S) and Caboolture (S), with increases of 3,700 and 3,300 respectively.

The City of Casey in South Eastern Outer Melbourne experienced the third largest population growth, increasing by 6,800 people or 4.4% in the year to June 1998. Also in Melbourne SD, Melton (S) in the outer west (ranked eighth) and Whittlesea (C) (12th) in the outer north experienced high growth with population increases of 3,600 and 3,100 respectively.

Liverpool (C) in Sydney, had the fourth largest population increase in the year to June 1998 with 6,600 additional people (up 5.0%). Blacktown (C) (also in Sydney), was fifth with an increase of 4,400 (1.8%) while Sydney (C) ranked sixth with a gain of 4,000 people — a 25.5% increase on the 1997 population.

In Northern Metropolitan Perth, Joondalup (C) ranked ninth (increasing by 3,500 people), while Wanneroo (S) was 11th, up 3,100.

POPULATION DECLINES

The largest population declines in the year to June 1998 were of a much smaller magnitude than the population increases. The largest decrease was for the LGA of Marrickville (A) in Sydney, which lost 820 of the 80,000 residents estimated at June 1997. Also in Sydney, Waverley (A) lost 730 people or 1.1% of the population. Of the remaining eight (out of the top 10) LGAs with the largest declines, all but two were from State balances. The exceptions were Darwin (C) which declined by 480 people, and Clarence (C) (in the Hobart SD) which lost 250 people.

The mining Shire of Ashburton in WA had the fourth largest decline losing 440 people or 6.0% of the population in the year to June 1998, while Coolgardie (S), another WA mining district, lost 270 people or 4.8% of the population. Mining district declines were also felt in NSW with Broken Hill (C) and Cobar (A) both losing 300 people, while in Vic., the coal mining Shire of La Trobe lost 200 people.

Other affected regional areas include the City of Launceston in Tas. which lost 370 people, and Goulburn (C) in the Southern Tablelands of the NSW, lost 240 people.

(a) Average annual growth rate.

FASTEST POPULATION CHANGES

POPULATION INCREASES

While the largest population increases in LGAs generally occurred in the more heavily populated LGAs, the fastest LGA growth was distributed among LGAs with both large and small populations. Of the top 20 growing LGAs, 10 had populations greater than 5,000 people, six of which were in Capital City SDs.

The fastest growing LGA in the year to June 1998 was Sydney (C) which increased by 25.5% or 4,050 people. Also in the Sydney SD, Camden (A) ranked 11th fastest, growing 7.2% (2,500 people).

WA had 12 of the 20 fastest growing LGAs. Unlike the other States and Territories however, all of WA's fastest growing LGAs were outside the Capital City SD. These included smaller regional LGAs such as the number two ranked Upper Gascoyne (S), which increased by 23.8% or 60 people, the sixth and seventh ranking Woodanilling (S) (up 9.0% with 30 people) and Shark Bay (S) (up 8.5% with 80 people). The fast growing LGAs in the south-west of WA generally had higher populations. Dardanup (S) was the fifth fastest growing LGA, increasing 11.1% (up 780 persons), while Busselton (S) ranked 16th with 6.3% (1,200 persons).

The mining area of Roxby Downs (M) in SA was the third fastest growing LGA in the year to June 1998, increasing by 19.8% (570 people), while Palmerston (T) in the Darwin SD was the fourth fastest growing LGA, increasing by 16.9% or 2,500 people.

The Shire of Melton in the outer west of Melbourne was the fastest growing Vic. LGA and the eighth fastest in Australia, increasing by 8.3% or 3,600 people.

POPULATION DECLINES

The fastest population declines, unlike the greatest population declines, were generally from less populated areas. Only four of the 20 fastest declining areas had populations over 5,000.

Seven out of the 10 fastest declining LGA populations were located in mining districts, and six of these were in WA. These included the fastest declining LGA of Cue (S), down 13.0% (60 persons); the second fastest declining Mount Magnet (S), down 9.7% (80 persons); the third fastest declining Yalgoo (S), down 7.4% (30 persons); and fourth fastest Ashburton (S), down 6.0% (440 persons). The fifth fastest decline was Cobar (A) (NSW), which was down by 5.3% (300 persons). The fastest declining non-mining LGA was Bingara (A) (also in NSW), ranked seventh overall, losing 3.7% of its population in the year to June 1998 (down 80 people).

In SA, Southern Mallee (DC) and Northern Areas (DC) had the 10th and 11th fastest declines, losing 80 and 160 people respectively. In Tas., West Coast (M) ranked 15th with a 3.1% decline (190 people) and Flinders (M) declined by 3.0% (30 people), ranking 18th.

(a) Average annual growth rate.

POPULATION CHANGE NEW SOUTH WALES

STATE SUMMARY

The ERP of NSW at June 1998 was 6,341,600, an increase of 336,700 since June 1993 and 68,800 since June 1997. This represents an average annual growth rate of 1.1% for both periods. Population growth was recorded in 105 out of NSW's 178 LGAs in the year to June 1998. Of the LGAs which experienced growth, 70% were either in the Sydney SD or on the NSW coast.

LARGE GROWTH IN SYDNEY

While the Sydney SD was home to 63% of the NSW population in June 1998, it accounted for 77% (53,000) of the total NSW population growth. During the five years to June 1998, Sydney grew an average of 1.3% per year compared to 0.7% per year in the balance of NSW. As a result of the faster growth of Sydney compared to the balance of NSW, Sydney's share of the NSW population increased slightly from 62.2% in 1993 to 62.9% in 1998.

All ten of NSW's largest LGA population increases occurred within the Sydney SD. Liverpool (C), in Sydney's south-west had the largest population increase in the year to June 1998 with 6,600 more people (up 5.0%). In the central west of Sydney, Blacktown (C) had the second largest population increase, up 4,400 (1.8%). This high rank was partly produced by the population size — 248,500 people, making Blacktown (C) the largest NSW LGA. Just north of Blacktown, Baulkham Hills (A) increased by 3,100 people or 2.4%, making it the fourth largest increase. Further north, Wyong (A) increased by 3,000 or 2.4%.

The third largest increase in the 1997–98 year occurred in Sydney City with 4,000 more people or a 25.5% increase — the fastest growing LGA in NSW. Most of this growth (83%) was centred in the constituent SLA, Sydney (C) - Remainder. Other LGAs in the Sydney SD that experienced high levels of growth were: Sutherland Shire (A) (up 3,000 people), Auburn (A) (2,900), Camden (A) (2,500), Gosford (C) (2,100) and Hornsby (A) (2,000).

Two Sydney LGAs also featured among the largest declines in NSW, although the declines were quite small compared to the increases noted above. Marrickville (A) (the sixth most densely populated LGA in NSW) lost 820 people or 1.0%, and Waverley (A) (the most densely populated) lost 730 people or 1.1%.

COASTAL GROWTH IN NSW BALANCE

Within NSW Balance of State, the largest population increases also tended to be from the more populated areas — and nearly all coastal. Lake Macquarie (C) had the largest increase outside Sydney, increasing by 1,900 people (1.1%). North of Newcastle, Port Stephens (A) increased by 1,300 (2.4%) and Great Lakes (A) increased by 600 (2.0%). On the Mid North Coast, Hastings (A) increased by 1,700 people (2.9%), Coffs Harbour (C) increased by 940 people (1.6%) and Maclean (A) by 500 people (3.3%).

In the Richmond-Tweed SD on the northern NSW coast, Tweed (A) increased by 1,700 (2.6%), while Byron (C) and Ballina (A) both increased by 700 (2.5% and 2.1% respectively).

South of Sydney, the Cities of Wollongong and Shellharbour increased by 970 (0.5%) and 910 (1.6%) people respectively, while the City of Shoalhaven grew by 920 people (1.1%).

POPULATION CHANGE NEW SOUTH WALES *continued*

LGAS WITH LARGEST AND FASTEST POPULATION GROWTH, NSW

1997–98.....			1997–98.....

LARGEST GROWTH			FASTEST GROWTH		
Liverpool (C)	6 576	5.0	Sydney (C)	4 048	25.5
Blacktown (C)	4 410	1.8	Camden (A)	2 527	7.2
Sydney (C)	4 048	25.5	Auburn (A)	2 899	5.3
Baulkham Hills (A)	3 062	2.4	Liverpool (C)	6 576	5.0
Wyong (A)	2 999	2.4	Murray (A)	227	4.2

INLAND POPULATION GROWTH

The fastest growing NSW LGA outside the Sydney SD was Murray (A) in the southern NSW Central Murray district, (increasing 4.2% in the year to June 1998). However, this growth rate involved only 230 people. The next fastest growing inland LGA was Mulwaree (A) in the Southern Tablelands (up 3.0%). This was followed by Wingecarribee (A), Albury (C) and Yarrowlumla (A), all growing by 1.7%.

Growth in NSW inland LGAs with populations over 20,000 was also recorded in the Cities of Orange, (up 1.5%), Griffith (1.4%), Bathurst (1.1%), Dubbo (0.9%), Wagga Wagga (0.7%) and Queanbeyan (0.9%).

INLAND POPULATION DECLINE

The third and fourth largest NSW population declines (following those of Marrickville (A) and Waverley (A)) occurred in two mining districts, Broken Hill (C) and Cobar (A), which both lost 300 people each. In percentage terms however, the loss was more significant than the population loss in the two Sydney LGAs, with Broken Hill (C) down 1.4% and Cobar (A) down 5.3% — the fastest population decline in NSW. The fifth largest decline occurred in Goulburn (C) (down 240 people or 1.1%), while Gunnedah (A) had the sixth largest decline (down 230 people or 1.7%).

In the Northern Slopes of NSW, Bingara (A) recorded the second fastest population decline (down 3.7%), while Lockhart (A) and Windouran (A) in the south of the State both declined by 2.8% over the year to June 1998. Bourke (A) and Brewarrina (A) in the Upper Darling had the fifth and sixth fastest declines respectively, both decreasing by 2.6%.

POPULATION CHANGE VICTORIA

STATE SUMMARY

The ERP of Vic. at June 1998 was 4,660,900, an increase of 55,700 or 1.2% since June 1997. Vic.'s growth rate has continued to rise since 1993–94, and has averaged 0.8% annual growth rate over the five years since 1993.

HIGH GROWTH FOR MELBOURNE

At June 1998 there were an estimated 3,371,300 people resident in the Melbourne SD. Melbourne grew by 1.5% (an increase of 49,500) between June 1997 and June 1998, compared with an average annual growth of 1.1% for the five years to 1998. Melbourne's share of Vic.'s population has increased over the last five years, from 71.5% in June 1993 to 72.3% in June 1998.

SLOWER GROWTH IN THE BALANCE OF STATE

At June 1998, there were an estimated 1,289,600 people resident in the balance of Vic. While the growth rate of the balance of Vic. continued to rise in 1997–98, as in previous years it continued to grow more slowly than Melbourne. In the five years since 1993, the population of the balance of Vic. grew by an average of just 0.2% each year. In contrast, in 1997–98, the population grew by 0.5%.

Within the Vic. balance, the SD of Loddon experienced the fastest growth (0.9%) between 1997 and 1998. In contrast, the Wimmera and Western District SDs in western Vic. experienced continued population decline (−0.6% and −0.3%, respectively) over the same period.

GROWTH IN THE OUTER SUBURBS AND INNER CITY

The LGAs which saw the largest increases in population in 1997–98 were generally located on the outer suburban fringes of Melbourne. In particular, LGAs located on Melbourne's south-eastern outskirts continued to experience some of the largest population increases in Australia.

LGAS WITH LARGEST AND FASTEST POPULATION GROWTH, Vic.

LGA name	1997–98.....		LGA name	1997–98.....		
	no.	%		no.	%	
<hr/>						
LARGEST GROWTH						
Casey (C)	6 775	4.4	Melton (S)	3 601	8.3	
Melton (S)	3 601	8.3	Melbourne (C)	2 509	6.0	
Whittlesea (C)	3 064	2.8	Casey (C)	6 775	4.4	
Hume (C)	3 030	2.5	Wyndham (C)	2 613	3.3	
Knox (C)	2 752	2.0	Surf Coast (S)	523	2.9	
<hr/>						
FASTEST GROWTH						

In the year ending June 1998, the City of Casey had the greatest increase in population of any LGA in Vic. (6,800 people or 4.4%) and the third largest increase in Australia. Much of the growth in the City of Casey was due to a large population gain in the SLA of Casey (C) - Berwick, which grew by 4,570 people (9.4%) in 1997–98. The City of Knox ranked twentieth nationally in population increase, growing by 2,800 people (2.0%) in 1997–98, with most of this growth occurring in the SLA of Knox (C) - South, which grew by 1,700 people (6.1%) in the same period.

POPULATION CHANGE VICTORIA *continued*

.....

GROWTH IN THE OUTER SUBURBS AND INNER CITY *continued*

The Shire of Melton, on the western fringe of Melbourne, had the second largest population increase in Vic. (3,600 people) and grew at the fastest rate (8.3%). Almost all of the gain in population in the Shire of Melton was due to growth in the SLA of Melton (C) - East. This SLA had the second largest increase in population of all SLAs in Vic. (3,380) and the second fastest growth (47.5%).

While much of the population growth in Vic. in 1997–98 took place in Melbourne's outer suburbs, large population gains were also made in Melbourne's inner city which has undergone repopulation in recent years. In the year ending June 1998, the City of Melbourne grew by 2,500 people (6.0%), with most of the increase occurring in the SLA of Melbourne (C) - Inner which grew by 75% (1,700 people), making this the fastest growing SLA in Vic. This reflects the development of residential properties and the increasing popularity of the inner city with young adults, in particular, as a place to work and live.

RURAL AND INDUSTRY RELATED POPULATION DECLINE

In 1997–98, only one LGA in the Melbourne SD experienced a decline (Maribyrnong (C), -0.3%). In contrast, more than half of the LGAs in the balance of Vic. experienced population decline over the same period, continuing the trend of previous years. The LGAs experiencing the largest and fastest declines were generally shires located in the wheat producing areas of far western and north-western Vic. Population loss in rural areas of Australia has been occurring for some time and is largely the result of net migration.

The regional mining Shire of La Trobe also lost population in 1997–98, although the rate of decline (-0.3%) was slower than the annual average growth rate over 1993–98.

POPULATION CHANGE QUEENSLAND

STATE SUMMARY

The ERP of Qld at June 1998 was 3,456,300, representing an increase of 59,300 people since June 1997. Qld's population growth in 1997–98 (1.7%) was lower than the average annual growth rate of 2.1% for the five years ending June 1998.

FASTEST GROWTH IN BRISBANE

At June 1998 there were an estimated 1,574,600 people resident in Brisbane (SD).

Brisbane grew by 1.8% between June 1997 and June 1998 (an increase of 28,400 people), a slightly lower rate than that for the five years to June 1998, where the average annual growth rate was 2.0%. Brisbane's share of the population has remained relatively stable, representing 45.6% of Qld's June 1998 population.

LARGEST GROWTH IN QUEENSLAND BALANCE

In June 1998, the ERP of the balance of Qld was 1,881,700, representing an increase of 30,900 people (1.7%). Since June 1997, Qld was one of three States and Territories in Australia where the population in the State balance is larger than that in the State capital (the others being Tas. and the NT). While the Qld balance had a greater population increase than Brisbane, it experienced a slightly lower growth rate due to its relatively large population base.

Within Qld's balance Moreton SD, which is adjacent to the Brisbane SD, continued to experience the largest and fastest population gains, increasing by 18,900 people (3.0%) in 1997–98. Three rural Qld SDs (South West SD, Central West SD and North West SD) recorded continuing declines in population, although the rates of decline were less in 1997–98 than in 1993–98.

HIGH GROWTH CONTINUES IN THE SOUTH-EAST

In 1997–98, most of Qld's growth was concentrated on the east coast around large urban centres, particularly in the Sunshine and Gold Coasts, and in the new and outer suburbs of Brisbane. Not surprisingly, the largest increases in population occurred in the two largest LGAs in Australia, the City of Brisbane (an increase of 16,600 people) and the City of Gold Coast (an increase of 11,200). In 1997–98, the growth rate for the City of Gold Coast remained higher (3.0%) than that of the City of Brisbane (2.0%). However, the rate of growth for the City of Gold Coast was less in the past year than the average annual growth rate for the five years to 1993–98 (4.2%), while the 1997–98 growth rate for the City of Brisbane was higher than the 1993–98 average annual rate (1.7%).

Within the City of Brisbane, most growth has been concentrated in the newer, outer suburbs such as the SLA of Doolandella-Forest Lake in Brisbane's south-west. This SLA had an average annual growth rate of 44.2% in the five years 1993–98, the highest of any SLA in Qld. In 1993, the population was 1,570, but by 1998 it had increased to 9,800.

Within the City of Gold Coast, the largest population increase was recorded in the SLA of Guanaba-Currumbin Valley. This SLA had the largest increase in population (2,300 people) of all SLAs in Qld and the highest growth rate (14.5%) of all SLAs outside of Brisbane.

POPULATION CHANGE QUEENSLAND *continued*

LGAS WITH LARGEST AND FASTEST POPULATION GROWTH, Qld

1997–98.....			1997–98.....		
LGA name	no.	%	LGA name	no.	%
LARGEST GROWTH			FASTEST GROWTH		
Brisbane (C)	16 586	2.0	Noosa (S)	1 773	4.7
Gold Coast (C)	11 177	3.0	Kolan (S)	179	4.0
Maroochy (S)	3 696	3.3	Miriam Vale (S)	160	3.8
Caboolture (S)	3 266	3.1	Maroochy (S)	3 696	3.3
Pine Rivers (S)	2 924	2.7	Whitsunday (S)	471	3.3

In the year ending June 1998, the Sunshine Coast Shires of Maroochy and Noosa continued to experience high population gains (3,700 and 1800 people, respectively) and some of the highest growth rates in Qld (3.3% and 4.7%, respectively).

DECLINING LGAS

The LGAs which underwent the largest declines in Qld in 1997–98 were all located away from the south-eastern corner of the State. The neighbouring Shires of Burdekin and Bowen in the Northern SD and the Shires of Broadsound and Duaringa in the Mackay and Fitzroy SDs had some of the largest declines in population in the State. These population losses continued the trend of previous years, although the rate of decline for Burdekin (S) and Bowen (S) was higher in 1997–98 than the decline experienced in 1993–98. In contrast, the rate of population decline in the Shires of Broadsound and Duaringa slowed in 1997–98 compared to previous years.

Similarly, while Mount Isa (C) in Qld's far west experienced one of the largest declines in 1997–98, the rate of population decline in this LGA (−0.6%) was less than the average of the five years to 1998 years (−1.5%).

POPULATION CHANGE SOUTH AUSTRALIA

STATE SUMMARY

The ERP of SA at June 1998 was 1,487,300, representing an increase of 7,600 since June 1997. SA's growth rate in 1997–98 (0.5%) was higher than the average annual growth rate for the five years ending June 1998 (0.4%).

INCREASING POPULATION GROWTH IN ADELAIDE

Between June 1997 and June 1998, the population of the Adelaide SD grew by 5,900 (0.5%) to 1,088,300 people. This growth rate (0.5%) was slightly higher than the average annual rate of the past five years (0.4%). Much of the growth in Adelaide was due to the Northern SSD which grew by 3,200 persons (0.9%) between 30 June 1997 and 30 June 1998. In recent years this area has had consistently high growth in comparison to other parts of the Adelaide SD. The growth rate in the formerly high growth Southern SSD has come closer to those of the more 'established' Eastern and Western SSDs in recent years. Adelaide's share of SA's population has remained constant over the past five years at 73.2%.

BALANCE OF STATE

In 1997–98, the population in the balance of SA grew by 1,700 to 398,900. Growth in 1997–98 (0.4%) was higher than the average annual rate of 0.3% for the years 1993–98. Much of this growth was due to population gains made in the Outer Adelaide SD which continued to have the highest growth rate of all SDs in the State (1.7%). Within the Outer Adelaide SD every LGA and SLA increased in population in 1997–98.

LARGER INCREASES IN ADELAIDE, FASTER GROWTH IN OUTER ADELAIDE

Most of the LGAs that had the largest increases in population in 1997–98 were located in the Adelaide metropolitan area. Not surprisingly, the top four LGAs, in terms of the largest population growth, were also some of the largest LGAs in SA. Playford (C), Tea Tree Gully (C) and Port Adelaide Enfield (C) are all located in the relatively fast growing Northern SSD.

The population of Playford (C), in the north of the Adelaide metropolitan area, increased by 980 people in 1997–98. The growth rate in this LGA, the seventh largest in SA, was 1.5% in 1997–98, higher than the average annual rate of growth of 1.0% over the period 1993–98.

POPULATION CHANGE SOUTH AUSTRALIA *continued*

LARGER INCREASES IN ADELAIDE, FASTER GROWTH IN OUTER ADELAIDE *continued*

The LGAs that experienced the highest rates of growth were generally smaller LGAs (Victor Harbor (DC), Alexandrina (DC), Mallala (DC) and Kapunda and Light (DC)) located in a belt around the Adelaide metropolitan area in the Outer Adelaide SD. In 1997–98, Victor Harbour (DC), a popular retirement area, had the second highest growth rate of all LGAs in SA (3.0%).

While most population growth in 1997–98 was centred in and around the Adelaide metropolitan area, Roxby Downs (M), located in the State's far north, was the exception to this pattern. In 1997–98, this relatively small LGA, with an ERP population of 3,400 at 30 June 1998, grew by 570. In 1997–98, Roxby Downs (M) continued to have the highest growth rate (19.8%) of all LGAs in SA and was the third fastest growing LGA nationally.

DECLINE IN THE STATE'S NORTH AND WEST

SA's largest population losses were experienced in LGAs located in the more remote rural areas in the State's north and west. The LGAs of Whyalla (C) and Northern Areas (DC) underwent the largest population losses in SA in 1997–98. Whilst these losses are relatively small in numeric terms, they may translate into considerable percentage declines in areas where there is a small population base. For example, in 1997–98, Northern Areas (DC) had a population loss of 160 people, which in percentage terms resulted in a population decline of 3.3% of its population in one year.

BOUNDARY CHANGES

In the 1998 edition of the Australian Standard Geographical Classification (ASGC), SLA boundaries in SA underwent a major overhaul. In general, rural SLAs were amalgamated while metropolitan SLAs were split. This means that in metropolitan areas, SLAs may no longer be equivalent to LGAs — which had generally been the case in the past.

POPULATION CHANGE WESTERN AUSTRALIA

STATE SUMMARY

The ERP for WA in the year ending June 1998 was 1,831,400, an increase of 33,500 or 1.9% since June 1997. Over the five years since 1993, WA has had an annual average growth rate of 1.8%.

In 1997–98 there were an estimated 1,341,900 people resident in the Perth SD, comprising nearly three-quarters (73.3%) of the total State population. Perth grew by 1.8% (an increase of 23,100) between June 1997 and June 1998, which accounted for 69% of WA's total growth. Over the five years to 1998, Perth's annual average growth was also 1.8%, indicating the consistency of this growth.

The WA Balance of State grew by 2.2% (10,400 people) in 1997–98, producing a total population of 489,500. This growth rate was considerably faster than for the five years to 1998 when the average annual growth was 1.6%.

The South West SD contributed 55% (5,700) of the population growth of WA's balance with a growth rate of 3.3% in 1997–98. The Kimberley SD was the fastest growing SD in the State with 4.6% growth which contributed 1,200 people or 12% to WA's balance growth.

HIGHEST GROWTH IN OUTER PERTH SUBURBS

The WA LGAs which experienced the greatest growth in the year to June 1998 were generally situated on Perth's newly developed fringe suburbs of the north and south-west. The five LGAs with the greatest growth accounted for almost 60% of all growth in the Perth SD.

The City of Joondalup in the north experienced the largest population increase of any LGA in WA, with an increase of 3,500 people (2.3%) in the year to June 1998. More than three-quarters (77%) of this growth was from the SLA of Joondalup (C) - North. The Shire of Wanneroo, which lies adjacent to Joondalup (C), had the second greatest LGA growth with an increase of 3,100 people (4.6%). More than half (52%) of this growth was contributed from the SLA of Wanneroo (S) - North-West. The Shire of Swan, in the north-east, had the third highest population increase with 2,900 people (3.9%) in the year to June 1998.

In the south-west of Perth, the Cities of Rockingham and Cockburn had the fourth and fifth largest population increases respectively among WA's LGAs. Rockingham (C) increased by 2,300 people in the year to 30 June 1998 (3.6%), while Cockburn (C) increased by 1,900 people (3.0%).

LGAs of the established areas of inner Perth generally had considerably less growth than those in the outer areas. The City of Perth was the only exception, growing by 180 people (3.2%) over the 1997–98 year. Vincent (T) was the only Perth LGA to undergo population decline, losing 20 people over the year to June 1998.

HIGH GROWTH CONTINUES IN SOUTH WEST

The South West SD contained some of the highest growth LGAs in the State, following those in outer Perth. Mandurah (C) recorded growth of 1,400 (3.4%) for the year to June 1998, although this was a slower rate of growth than for the five years to 1998 when it averaged 5.5%. Busselton (S) grew by 1,200 people (6.3%), 0.4 of a percentage point higher than the average annual growth for the five years to 1998 (5.9%).

POPULATION CHANGE WESTERN AUSTRALIA *continued*

LGAS WITH LARGEST AND FASTEST POPULATION GROWTH, WA

1997–98.....			1997–9		
LGA name	no.	%	LGA name	no.	%
LARGEST GROWTH			FASTEST GROWTH		
Joondalup (C)	3 539	2.3	Upper Gascoyne (S)	63	23.8
Wanneroo (S)	3 136	4.6	Dardanup (S)	783	11.1
Swan (S)	2 904	3.9	Woodanilling (S)	32	9.0
Rockingham (C)	2 296	3.6	Shark Bay (S)	75	8.5
Cockburn (C)	1 868	3.0	Halls Creek (S)	257	8.3

The adjacent shire of Augusta-Margaret River grew by 500 people (5.8%) in 1997–98. Adjoining the regional centre of Bunbury are two other leading growth areas, Harvey (S) with 850 more people (5.2%), and Dardanup (S) with 780 additional people (11.1%).

GROWING LGAS ELSEWHERE IN WA

Much of the growth throughout the remainder of the State occurred in regional centres. In the Kimberley SD, Halls Creek (S) had the fastest growth with 8.3% (260 people), while Derby-West Kimberley (S) had the largest growth of 420 people (6.4%). Growth in the Pilbara SD came mainly from the Town of Port Hedland (470 people or 3.6%), and the Shire of Roebourne (450 people or 3.2%).

In the Central SD, most growth was in the Shires of Greenough (350) and Irwin (180) with growth rates of 3.2% and 6.7% respectively, while in the South Eastern SD, Kalgoorlie/Boulder (C) gained 910 people (3.0%) and Esperance (S) gained 310 people (2.5%). In the Lower Great Southern SD, Albany (C) increased by 520 people (1.8%), and Denmark (S) increased by 150 people (3.8%).

DECLINING LGAS

Population decreases were recorded in 46 LGAs, many of the largest declines occurring in predominantly mining areas. Ashburton (S) had the largest decline, down 440 people or 6% in the year ended June 1998. Coolgardie (S) declined by 270 people or 4.8%, while Leonora (S) was down 90 people (3.3%), and Mount Magnet (S) declined by 80 people or 9.7%. The fastest decline was experienced in Cue (S) which declined by 13.0%.

POPULATION CHANGE TASMANIA

POPULATION DECLINE CONTINUES

At June 1998 the ERP of Tas. was 471,900. For the second year in a row, Tas. was the only State in Australia to experience a decline in population. Although Tas. experienced negative population growth in 1996–97 (−0.2%), this decline was faster during 1997–98 (−0.3%), with a loss in population of 1,600 people. Population decline in Tas. is largely a result of negative net interstate migration.

HOW THE REGIONS FARED

In 1997–98, the Southern SD was the only region in Tas. whose population remained stable. In recent years, Southern SD has had consistently higher population growth than all other Tas. SDs, with an average annual growth rate of 0.5% in the years 1993–98. All other Tas. SDs experienced continued decline in 1997–98. Greater Hobart's population decreased by 490 in 1997–98, representing a negative growth rate of −0.3%, while the Mersey-Lyell region continued to experience the fastest rate of population decline (−0.6%).

GROWTH IN ONLY ONE-THIRD OF TAS. LGAS

In the year to June 1998, only one-third (10 out of 29) of Tas.'s LGAs increased their population. Their rates of growth were considerably lower than the national rate of 1.2%.

In 1997–98, the municipality of Sorell had the largest population increase in Tas., (gaining 90 people) and the second highest growth rate (0.8%). This is considerably less than its average annual growth rate for the five years ending June 1998 (3.1%).

POPULATION CHANGE TASMANIA *continued*

WEST COAST'S DECLINE

Although only a relatively small LGA, West Coast (M) recorded one of the largest population losses and fastest population declines in Australia in 1997–98. The population of this mining area decreased by 190 in 1997–98. The rate of population decline in this LGA however, was less in the year June 1998 than for the five years to June 1998. In 1997–98, the population growth rate was -3.1%, compared with an average annual growth rate of -3.9% for the five years ending June 1998.

Not surprisingly, some of the largest population losses in Tas. were recorded by the largest LGAs. In 1997–98, the City of Launceston experienced the fifth largest decline of all LGAs in Australia. The population decline for the City of Launceston in 1997–98 (-0.6%) was faster than the average annual growth rate of -0.4% for the five years ending June 1998.

POPULATION CHANGE NORTHERN TERRITORY

SUMMARY

The ERP of the NT in June 1998 was 190,000, an increase of 3,100 (1.7%) since June 1997. The 1997–98 growth rate of 1.7% was lower than the average annual growth rate for the 1993–98 period of 2.2%.

POPULATION GROWTH IN DARWIN SD

Population grew much faster in Darwin SD in 1997–98 (2.3%) than it did in the Balance of the Territory (1.1%). Despite this positive population growth in Darwin SD, the population of Darwin City SSD itself experienced negative growth, declining from 69,800 in 1997 to 69,300 in 1998 (-0.7%). The population grew much more slowly in 1997–98 in most areas of the Territory than it did on average in 1993–98. Almost three-quarters of SLAs in Darwin City SSD experienced negative growth in 1997–98, ranging from -0.2% for Nightcliff to -2.9% for Wulagi. In contrast, City - Inner and Coconut Grove SLAs recorded high growth of 10.6% and 6.5%, respectively, between 1997 and 1998.

HIGH POPULATION IN PALMERSTON AREA

Palmerston-East Arm SSD was the largest growth area in the Territory, which alone contributed 80% (2,500) of the 3,100 increase in population in the Territory in 1997–98 and 38% (7,200) of the 19,300 total increase in population in 1993–98. The SLA of Palmerston (T) Balance (which includes Bakewell, Rosebery, Marlow Lagoon and Durack) continued to grow strongly, increasing from 1,600 to 3,800 (135%) in 1997–98. The second highest population increase in the Palmerston area was Woodroffe SLA which grew from 3,200 to 3,400 (6.3%). Overall the Palmerston-East Arm SSD averaged a growth rate of 16.7% between 1997 and 1998 and 11.4% in 1993–98. The SLAs comprising Darwin Rural SSD continued to grow strongly between 1997 and 1998 with increases ranging from 3.1% for Litchfield (S) - Pt B SLA to 8.0% for Cox-Finniss. Between June 1993 and June 1998 Darwin Rural SSD increased by an annual average rate of 5.7% from 12,900 to 17,000, compared to 3.7% growth in 1997–98.

The total population of Alice Springs (T) (Charles, Heavitree, Larapinta, Ross and Stuart) increased marginally from 25,400 to 25,500 in the year to June 1998 (0.5%). Tennant Creek (T) also continued to grow, increasing from 3,800 to 3,900 (1.4%) in 1997–98. Some of the biggest population declines were in the Darwin SD and included Karama, Leanyer, Malak and Wulagi. Outside the Darwin SD, the biggest population declines were in the SLAs of Petermann and Tennant Creek Balance.

POPULATION CHANGE AUSTRALIAN CAPITAL TERRITORY

ACT GROWTH SLOWS

The ACT's ERP in June 1998 was 308,400, an increase of 400 or 0.1% over the year before. This low level of growth follows annual average growth of 0.6% in the five years to 1998, and 1.9% annual growth in the five years before then (1988–93).

In the year to June 1998, population declines were experienced in all but one of Canberra's seven SSDs. The recently developed SSD of Gungahlin-Hall in the north of the ACT recorded a 1,600 person increase (10.8%), more than offsetting the population declines recorded in the remaining SSDs. The Weston Creek-Stromlo SSD had the largest and fastest decline, losing 340 people (-1.4%), continuing the trend of the previous five years (-1.6% per year). The Belconnen SSD declined by 210 people (-0.3%), while Canberra's most populous SSD of Tuggeranong (89,400) lost 200 people (-0.2%), a reversal of the average growth which had occurred in the five years to 1998 (0.9%).

SLAS

Population increases were experienced in only 22 of the ACT's 106 SLAs (21%). Most of these SLAs comprised the new suburbs of the Gungahlin-Hall and Tuggeranong SSDs, and urban infill of some of the more established areas.

The largest population increases in the year to June 1998 were recorded for the new northern suburbs of Ngunnawal (up 700 persons), Amaroo (480), Nicholls (410) and Dunlop (200). In the south of Canberra, Conder added 470 people, while Gordon was up by 100. Meanwhile, medium density housing developments were associated with an increase of 180 people in Belconnen Town Centre, 140 people in Mawson and 70 people in Braddon.

The largest population decreases in the year to 1998 were generally recorded in the SLAs with the largest populations. Kambah, the largest SLA in Canberra, decreased by 240 people, while Wanniassa and Kaleen (the second and third largest SLAs respectively) both lost 90 people.

The largest relative declines (in SLAs of more than 1,000 people) were recorded in the suburbs of Reid (-2.7%), Campbell (-2.5), Lyons (-2.1%), Fisher (-2.1%) and O'Connor (-1.7%).

POPULATION CHANGE NEW ZEALAND

POPULATION GROWTH

New Zealand's resident population at June 1998 totalled 3,792,000 people. The population growth rate for the year ending June 1998 was 0.8%, compared to an increase of 1.3% for the previous year. This 1997–98 growth was 0.3 percentage points less than the population growth rate recorded for Australia in 1997–98 (1.2%).

(a) The population base for these estimates is the number of New Zealand residents in New Zealand on census night, 5 March 1996, adjusted for the estimated undercount at the 1996 Census (45,000) and for the estimated number of New Zealand residents temporarily overseas on 5 March 1996 (40,000).

(b) Revised.

(c) Includes the population of Kermadec Island and people on oil rigs.

(d) Includes the population of Chatham Islands District and Campbell Island.

The Auckland and Bay of Plenty Regions resident population was estimated to have grown faster than the rest of the country in the year to June 1998. The Auckland Region had an estimated 1,159,400 people at June 1998, and the Bay of Plenty Region 238,300 people, both increasing by 1.8% since June 1997. With an estimated population of 1,159,400 people at June 1998, the Auckland Region is home to almost 31 out of every 100 New Zealanders and 40 out of every 100 people living in the North Island.

POPULATION CHANGE NEW ZEALAND *continued*

POPULATION GROWTH *continued*

Three other regions (Tasman, Northland and Waikato) also recorded growth rates exceeding the national average of 0.8% in 1997–98. The Tasman Region recorded an estimated increase in population of 1.5%, followed by Northland (1.2%) and Waikato (0.9%). Marlborough's growth was the same as the national average at 0.8%. Both Canterbury (0.7%) and Wellington (0.4%), showed growth below the national average, while the population of Nelson did not change. The Canterbury Region is home to almost 53 out of every 100 South Island residents.

The four northern-most regions (Northland, Auckland, Waikato and Bay of Plenty) together contain just over half (50.3%) of New Zealand's resident population, with the remainder being spread between the southern-North Island (25.3%) and the South Island (24.4%).

EXPLANATORY NOTES

INTRODUCTION

- 1** This publication contains estimates of the resident population of LGAs, SLAs, SSDs, SDs, Statistical Districts, States, Territories and Australia.
- 2** LGAs are ranked according to both absolute change and percentage growth between 1997 and 1998, allowing this publication to identify, in two ways, areas in Australia with the largest and fastest increase and decreases in population.
- 3** Following the 1992 amendment to the Acts Interpretation Act to include the Indian Ocean Territories of Christmas Island and Cocos (Keeling) Islands as part of geographic Australia, population estimates at dates commencing from July 1993 include estimates for these two Territories. To reflect this change, another category of the State/Territory classification was created, known as Other Territories. Other Territories include Jervis Bay Territory as well as Christmas Island and the Cocos (Keeling) Islands. Data for Other Territories are included in tables where specifically noted. Prior to July 1993, Jervis Bay Territory was included in estimates for the Australian Capital Territory.

ACCURACY

- 4** To meet the conflicting demand for accuracy and timeliness there are three estimates of sub-State populations. Preliminary estimates are available seven months after the reference date, revised estimates are available a year later and final estimates after the following census. The estimates in this publication are preliminary for 1998, revised for 1997 and final for 1993. In recognition of the inherent inaccuracy involved in population estimation, population figures over 1,000 in the text are rounded to the nearest hundred, and figures less than 1,000 are rounded to the nearest ten. While unrounded figures are provided in tables, accuracy to the last digit is not claimed and should not be assumed.

ESTIMATED RESIDENT POPULATION

- 5** The estimated resident population (ERP) of an area is the estimate of the number of persons who usually reside in that area irrespective of where they were on the date of the estimate.
- 6** The ERPs contained in this publication are the official Australian Bureau of Statistics (ABS) population estimates. They are derived from 1996 Census population counts by making the following adjustments:
 - Census counts on a place of usual residence basis are obtained by counting each person in their stated SLA of usual residence, rather than where they were counted on census night. Persons who do not state their address of usual residence on the census form are proportionally allocated across all SLAs in the State or Territory. Overseas visitors are excluded from these counts.
 - These usual residence census counts are then adjusted for census net undercount, by applying net undercount rates derived from the 1996 Post Enumeration Survey. These rates take into account differences in undercount according to a person's age, sex and geographic location.

EXPLANATORY NOTES *continued*

ESTIMATED RESIDENT POPULATION *continued*

- Australian residents temporarily overseas on census night, excluded from census counts, are added back into the population. Estimates of Australians temporarily overseas on census night are obtained from passenger card data for persons returning to Australia in the year following the Census.
 - The above three adjustments result in the ERP for each SLA as at census date, 6 August 1996. To obtain the ERP as at 30 June 1996, the estimated increase in the population of each SLA due to natural increase and net migration between 30 June 1996 and 6 August 1996 is subtracted from the 6 August 1996 population estimates.
- 7** Although natural increase data are available for SLAs, the absence of reliable migration data for non-census years means that it is not possible to use the component method to update SLA population totals. Thus the 1993, 1997 and 1998 estimates in this publication have been produced using regression techniques.
- 8** A detailed explanation of the concept of ERP, as adopted by the ABS for official population estimates, is contained in the ABS publication *Information Paper: Population Estimates — Concepts, Sources and Methods, 1995* (Cat. no. 3228.0).

STATISTICAL AREAS

- 9** This publication contains data presented according to the Australian Standard Geographical Classification 1998 Edition (ASGC). Under this classification, statistical areas are defined as follows:
- *Legal Local Government Areas (LGAs)*. These areas are the spatial units which represent the geographical areas of incorporated local government councils and incorporated Community Government Councils (CGCs) where the CGC is of sufficient size and statistical significance. The various types of LGAs are cities (C), areas (A), rural cities (RC), towns (T), shires (S), district councils (DC) and municipalities (M).
 - *Statistical Local Areas (SLAs)*. These geographical areas are, in most cases, identical with, or have been formed from a division of, whole LGAs. In other cases, they represent unincorporated areas. In aggregate, SLAs cover the whole of a State or Territory without gaps or overlaps. In some cases legal LGAs overlap statistical subdivision boundaries and therefore comprise two or three SLAs (Part A, Part B and, if necessary, Part C).
 - *Statistical Subdivisions (SSDs)*. These are of intermediate size, between SLAs and SDs. In aggregate, they cover the whole of Australia without gaps or overlaps. They are defined as socially and economically homogeneous regions characterised by identifiable links between the inhabitants. In the non-urban areas an SSD is characterised by identifiable links between the economic units within the region, under the unifying influence of one or more major towns or cities.
 - *Statistical Divisions (SDs)*. These consist of one or more SSDs. The divisions are designed to be relatively homogeneous regions characterised by identifiable social and economic units within the region, under the unifying influence of one or more major towns or cities.
 - *Statistical Districts (SDists)*. These consist of selected, significant, predominantly urban areas in Australia which are not located within a Capital City SD. S Dists enable comparable statistics to be produced about these selected urban areas.
- 10** Further information concerning statistical areas is contained in *Australian Standard Geographical Classification (ASGC), 1998* (Cat. no. 1216.0).

EXPLANATORY NOTES *continued*

STATISTICAL AREAS *continued*

11 For the purposes of this publication, all data refer to bounded areas as defined at 1 July 1998, and as incorporated in the 1998 ASGC. The ASGC used for 1997 estimates and the last ASGC available was ASGC 1996 which included LGA boundaries that were gazetted prior to 5 August 1995 (the cut-off date for the 1996 ASGC edition) and SLA boundaries notified prior to 30 June 1996. Changes to LGA boundaries that have occurred between 5 August 1995 and 1 July 1998 are documented in Appendix A. Appendix B contains SLA changes incorporated in ASGC 1998, not included in Appendix A.

MAPS

12 A complete series of maps showing the SLAs mentioned in this publication is available in *Australian Standard Geographical Classification (ASGC), July 1998* (Cat. no. 1216.0)

AVERAGE ANNUAL RATE OF GROWTH

13 The average annual rate of population growth, r , is calculated as a percentage using the formula:

$$r = \left(5 \sqrt{\frac{P_{98}}{P_{93}}} - 1 \right) \times 100$$

where P_{93} is the ERP at 30 June 1993 and P_{98} is the ERP at 30 June 1998.

CALCULATION OF AREAS

14 The area figures quoted in this publication are calculated from the 1996 Census Collection District Record Database. Large water areas have been excluded. Where necessary, adjustments have been made to reflect changes that have occurred in spatial unit boundaries between 1996 and 1998.

ELECTRONIC DATA

15 Annual population estimates at 30 June for all SLAs in Australia are available electronically. This information can be customised to provide data for any choice of years, and any combination of States and Territories. Telephone inquiries should be made initially to Information Services (see the back cover of this publication for telephone numbers). For further information about related unpublished statistics or data concepts, contact Sue Taylor on Canberra 02 62526141.

ACKNOWLEDGMENT

16 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

EXPLANATORY NOTES *continued*
