## KEY POINTS

International reports of an atypical pneumonia known as Severe Acute Respiratory Syndrome (SARS) in several Asian Countries (and subsequently other countries) leading to a World Health Organisation emergency travel advisory on 15 March 2003, and the anticipation and commencement of military action in Iraq on 20 March 2003, have had a significant impact on overseas arrivals and departures, particularly short-term movements.

- For further information about these and related statistics, contact the National Information and Referral Service on 1300 135 070, or Olivia Agius on Canberra 02 6252 5640.
- The preliminary estimate of short-term visitor arrivals to Australia for May 2003 was 255,700. The trend estimate for short-term visitor arrivals for May was 336,800 continuing the decline in the trend since the revised series peaked in November 2002 (19% lower).
- The seasonally adjusted estimate of short-term visitor arrivals for May (327,600) represents a decrease of 3% compared to the previous month. This monthly decline was lower than April (down 9%) and March (down 7%).
- There were 232,100 short-term departures of Australian residents during April 2003. The trend estimate for short-term resident departures in April 2003 (252,500) indicates a continuing down-turn in the revised series since October 2002.
- The seasonally adjusted estimate for short-term resident departures for April 2003 (235,500) represents a 6% decrease from the previous month. This monthly decline is lower than March (down 12%) and higher than February (down 2%).

# NOTES

FORTHCOMING ISSUES	ISSUE	EXPECTED RELEASE DATE
	May (final) 2003	24 July 2003
	June (preliminary) 2003	24 July 2003 (Electronic release)
	June (final) 2003	11 August 2003

This issue will be the last to contain both final and preliminary data for short-term visitor arrivals. See paragraph 26 of Explanatory Notes.

**DATA NOTES** For data quality and revision issues see Appendix 2 on page 21.

Caution must be exercised when assessing trend estimates for recent months. For further information see paragraph 19 of the Explanatory Notes.

**CHANGES IN THIS ISSUE** A three page article *Australian Visitors to Fiji* is included in this issue.

**TREND REVISIONS** Each time new seasonally adjusted estimates become available, trend estimates of short-term arrivals are revised (see paragraphs 15 to 18 of Explanatory Notes).

The examples in the graphs below shows an illustrative scenario and the consequent revision to previous trend estimates of visitor arrivals and resident departures.

- 1 The seasonally adjusted estimate for:
  - June visitor arrivals is 3.30% higher than May.
  - May resident departures is 3.30% higher than April.
  
- 2 The seasonally adjusted estimate for:
  - June visitor arrivals is 3.30% lower than May.
  - May resident departures is 3.30% lower than April.

**VISITOR ARRIVALS(p)**

**RESIDENT DEPARTURES**

The percentage change of 3.30 was chosen because it represents the average absolute monthly percentage change for visitor arrivals and resident departures over the last ten years.

R. W. Edwards  
Acting Australian Statistician

## MAIN FEATURES

### SHORT-TERM MOVEMENTS

#### VISITOR ARRIVALS

There were 321,500 short-term visitor arrivals to Australia during April 2003. This brought the total for the ten months to April 2003 to 4,086,600, a slight decrease compared to the corresponding period to April 2002.

Of the top ten source countries for the ten months to April 2003, there was an increase in the number of short-term visitors from China (up 14%), Korea (up 9%), Japan (up 7%) and the United Kingdom (up 3%), compared to the same period in 2002. There was a decrease in the number of short-term visitors from Singapore (down 9%), Hong Kong (down 6%), Germany (down 2%) and Malaysia (down 1%).

#### VISITOR DEPARTURES

Compared to the ten months to April 2002, there was an increase in the number of visitors who indicated that their main state of stay was Queensland (up 52,200 or 5%). New South Wales experienced the largest decline (down 43,700) and the Australian Capital Territory experienced the fastest decline (down 19%).

#### RESIDENT DEPARTURES

During April 2003 there were 232,100 short-term departures of Australian residents, bringing the total for the ten months to April 2003 to 2,781,400, an increase of 1% from the corresponding period to April 2002.

Of the top 10 destinations for short-term departures of Australian residents for the ten months to April 2003, there was an increase in the number of residents departures to Fiji (up 16%), China (up 11%) and the United States (up 6%), compared to the same period in 2002. There was a decrease in the number of resident departures to Indonesia (down 26%), Singapore (down 21%) and Hong Kong (down 12%).

### PERMANENT AND LONG-TERM MOVEMENTS

There were 8,200 permanent (settler) arrivals in Australia during April 2003. This brought the total for the ten months to April 2003 to 76,400, an increase of 4% compared to the corresponding period in 2002. New Zealand was the main source country for settler arrivals in the ten months to April 2003, accounting for 14% of all permanent arrivals. The United Kingdom was the second largest source country (13%).

During April 2003 there were 4,200 permanent departures from Australia. This brought the total number of permanent departures to 42,900 for the ten months to April 2003. This was 3% higher than in the corresponding period in 2002. The net gain from permanent and long-term migration during the ten months to April 2003 was 138,000 people. This was 15% higher than the net gain for the ten months to April in 2002 (120,400 people).

## ANALYSES AND COMMENTS

### AUSTRALIAN VISITORS TO FIJI

#### TOTAL VISITOR ARRIVALS TO FIJI

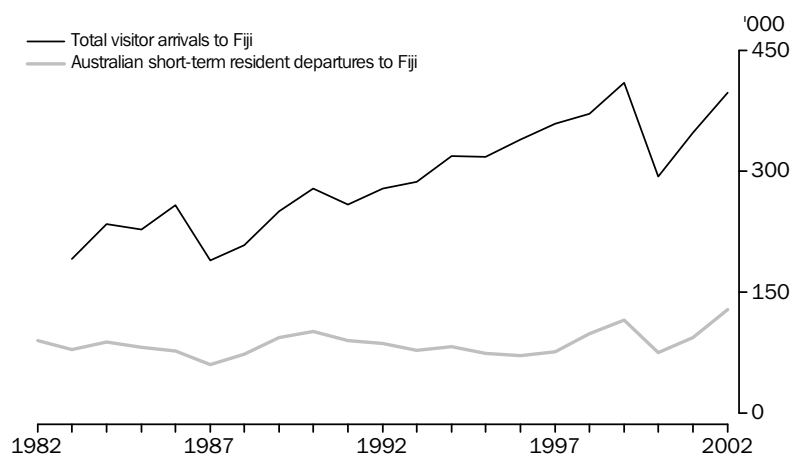

Fiji is a popular holiday destination for Australians, as well as for residents of New Zealand and the United States of America. Since the early 1980s the international tourism market to Fiji has experienced strong and consistent growth, despite a number of interruptions attributed to natural causes and other disturbances within the country.

Fluctuations in visitor numbers to Fiji during the 1980s have been attributed to the effects of cyclones (Fiji Tourism and Migration Statistics, 1989), while the large decrease in visitor numbers in 1987 (down 26.4% on the previous year) was attributed to the coup d'etats in May and September of that year (Fiji Tourism and Migration Statistics, 1987).

Over the twelve years following 1987 the number of visitors to Fiji more than doubled (increasing by an average 6.6% per year), reaching 410,000 visitors in 1999.

The sudden decrease in visitor arrivals to Fiji that occurred in 2000 (a drop of around 116,000 persons, or 28.3%, compared to 1999) was due to the May 2000 coup (Fiji Tourism and Migration Report, 2000). In the two years since 2000, numbers of visitors have recovered to a level slightly less than that of 1999.

#### ANNUAL VISITOR ARRIVALS TO FIJI

Source: Fiji Tourism and Migration Statistics, 1987, 1992; Fiji Tourism and Migration Report, 1995-1996, 2001; Fiji Islands Bureau of Statistics web site.

#### VISITORS FROM AUSTRALIA

Over the past twenty years an average of around 90,000 Australians have travelled to Fiji per year. The number of Australians departing for short-term trips to Fiji decreased in 1987 to 60,500 (down 21.6% compared to the previous year) as a result of the May and September 1987 coups, but quickly returned to previous levels. Numbers of departures over the following decade were relatively stable.

In the late 1990s numbers of Australian departures to Fiji began to rise compared to previous years, but decreased suddenly in 2000 as a result of the May 2000 coup. In 1999 a record 115,300 Australians departed for Fiji, however in 2000 this number had fallen to just 75,100, a decrease of around 40,000 people (or 34.8%).

## ANALYSES AND COMMENTS

### AUSTRALIAN VISITORS TO FIJI *continued*

Despite the effects of the May 2000 coup, Australian departures to Fiji have rapidly recovered, with a record high number of departures recorded in 2002 of 128,300 people.

In terms of market share, Australia contributes the largest proportion of visitor arrivals to Fiji of any source country. In 1982, Australia accounted for 46.9% of total visitor arrivals (Fiji Tourism and Migration Report, 2001). By 1997 this proportion had declined to 22.4%, and has since risen to 31.1% in 2002 (Fiji Islands Bureau of Statistics web site).

### VISITORS FROM OTHER COUNTRIES

Since the mid-1990s, New Zealand has provided the second largest number of visitors to Fiji (68,300 visitors in 2002, or 17.2% of total visitors), while the United States of America has generally been the third largest contributor (58,800 visitors in 2002, or 14.8% of total visitors). Recent exceptions to this pattern have been 2000 and 2001 when visitors from the United States of America outnumbered those from New Zealand, due to a decrease in the number of visitors from New Zealand in those years.

#### ANNUAL VISITOR ARRIVALS TO FIJI, Source country

Source: Fiji Tourism and Migration Statistics, 1992, 1993-1994; Fiji Islands Bureau of Statistics web site.

### REASON FOR JOURNEY

The main reason for short-term departures of Australian residents to Fiji is 'holiday', which accounted for 73.5% of total Australian short-term departures to Fiji in 2002. 'Visiting friends/relatives' was the second most popular reason, accounting for 10.0% of Australian departures to Fiji, followed by 'business' (6.1%). These proportions are similar for New Zealand visitors to Fiji, while visitors from the United Kingdom and Japan are predominantly 'holiday' arrivals (Fiji Tourism and Migration Report, 2001).

## ANALYSES AND COMMENTS

### AUSTRALIAN VISITORS TO FIJI *continued*

PROPORTION OF VISITORS TO FIJI, Reason for journey by source country—2001(a)

<i>Main reason for journey</i>	<i>Australia</i>	<i>New Zealand</i>	<i>United States of America</i>	<i>United Kingdom</i>	<i>Japan</i>	<i>All countries</i>
	%	%	%	%	%	%
Holiday	73.5	79.3	77.7	91.0	92.1	75.1
Business	10.0	5.8	1.8	1.1	2.0	4.2
Visiting friends/relatives	6.1	8.5	6.8	2.5	1.2	8.8
Other	10.4	6.4	13.6	5.4	4.7	11.9

(a) Figures for Australia are short-term departures of Australian residents to Fiji for the calendar year 2002. Data for other countries are sourced from the 2001 issue of the Fiji Islands Bureau of Statistics' Tourism and Migration Report.

### AVERAGE LENGTH OF STAY AND EXPENDITURE

In 2002 the average intended length of stay abroad for Australians departing for short-term trips to Fiji was 14 days, while in 1999, the latest year for which expenditure data is available, Australians spent on average \$2,466 per trip (Bureau of Tourism Research, 2003).

### MONTH OF TRAVEL

Winter to early spring is the most popular time of year for Australians to visit Fiji. In 2002 the highest number of departures occurred in October, September and June, while February was the least popular month of departure. The graph below shows monthly departures for 2000, illustrating the drop in Australian short-term departures to Fiji immediately following the May 2000 coup, as well as 2002.

AUSTRALIAN SHORT-TERM RESIDENT DEPARTURES TO FIJI, Month of departure

## EXPLANATORY NOTES

### INTRODUCTION

**1** This publication contains statistics of persons arriving in, and departing from, Australia, together with the major characteristics of travellers. More detailed statistics can be made available on request (see paragraph 24).

### SOURCE OF THE STATISTICS

**2** Persons arriving in, or departing from, Australia provide information in the form of incoming and outgoing passenger cards (see Appendix 1). Incoming persons also provide information in visa applications, apart from people travelling as Australian and New Zealand citizens. These and other information available to the Department of Immigration and Multicultural and Indigenous Affairs (DIMIA) serve as a source for statistics of overseas arrivals and departures.

**3** In July 1998, DIMIA revised the incoming and outgoing passenger cards and associated procedures as well as computer systems. Following these changes, some questions on the passenger cards were not compulsory and answers to these questions were not checked by Customs officers. The question on marital status was deleted. Data on marital status is now derived from visa applications (only for certain visa classes) and is therefore not available for Australian or New Zealand citizens. The changes also affect the data for 'previous country of residence' which is imputed for Australian and New Zealand citizens. For more information see the May 1998 issue of this publication. Since July 1998, there have been additional minor changes to both incoming and outgoing passenger cards.

**4** From July 2001, DIMIA adopted a new passenger card processing system which involved electronic imaging of passenger cards and intelligent character recognition of the data stored in the images. This process has yielded several improvements to the processing of passenger card data, most notably the detailed information about missing values. There have also been several changes to data quality. Information on these changes appears in Appendix 2.

**5** The preliminary estimates of visitor arrivals by country of residence (see table 6, page 10) are based on data from DIMIA's Travel and Immigration Processing System (TRIPS). The TRIPS system produces a limited range of data, including country of citizenship, which is used by ABS to produce preliminary estimates by country of usual residence. These preliminary estimates will be revised in the next issue of this publication, when final data is available. For more information see pages 3 and 4 of the June 1997 and the September 1998 issues of this publication.

### SCOPE

**6** The statistics in this publication relate to the number of movements of travellers rather than the number of travellers (i.e. multiple movements of individual persons during a given reference period are each counted separately). The statistics exclude the movements of operational air and ships' crew, of transit passengers who pass through Australia but are not cleared for entry, and of passengers on pleasure cruises commencing and finishing in Australia aboard ships not then engaged on regular voyages. Similarly, these statistics exclude those persons not travelling under standard visa conditions, such as 'boat people' and the 1999 intake of Kosovo refugees.

### STATE AND TERRITORY CLASSIFICATION

**7** Following the 1992 amendment to the *Acts Interpretation Act* to include the Indian Ocean Territories of Christmas Island and the Cocos (Keeling) Islands as part of geographic Australia, population estimates commencing with the September quarter 1993 include estimates for these two territories. To reflect this change, another category of the state/territory classification has been created, known as Other Territories. Other Territories includes Jervis Bay Territory, Christmas Island and the Cocos (Keeling) Islands.

## EXPLANATORY NOTES

### COUNTRY CLASSIFICATION

**8** The classification of countries in this publication is the Australian Standard Classification of Countries for Social Statistics (ASCCSS). For more detailed information refer to the ABS publication *Australian Standard Classification of Countries for Social Statistics* (cat. no. 1269.0).

**9** The statistics on country of birth, citizenship, residence or main destination have certain limitations because of reporting on passenger cards. For instance, United Kingdom includes England, Scotland and Wales. Similarly Korea includes both the Republic of Korea and the Democratic People's Republic of Korea.

### ESTIMATION METHOD

**10** Overseas arrival and departure statistics are derived from a combination of full enumeration and sampling. All permanent movements and all movements with a duration of stay of one year or more are fully enumerated. All movements with a duration of stay of less than one year are sampled. Statistics relating to these movements are therefore estimates which may differ from statistics which would have been obtained if details of all these movements had been processed.

**11** Since January 1997 variable sample skips have been used in the selection of records to be sampled. Separate skips are applied for each country of citizenship and the skips may vary for each processing month. Over a year about 3.5% of all short term movements are selected for sampling.

**12** The statistics in this publication have been rounded to the nearest 100 for short-term movements and to the nearest 10 for permanent and long-term movements. The sums of the components may, due to rounding, not add exactly to totals.

### CORRECTIONS AND IMPUTATIONS

**13** The imprecision due to sampling errors should not be confused with errors arising from imperfections in reporting, which may occur in any data collection, whether sampled or not. Every effort is made to minimise such errors, both through careful design of the passenger cards and through checks on the information once it is received. During the edit process some items are corrected where they conflict with other known information. Missing replies to certain items such as age and country of birth are also imputed by reference to other related items. Information on non-response rates and data imputation appears in Appendix 2.

**14** Errors of this kind differ from discrepancies arising from the fact that certain information reflects the travellers' intentions at the time the passenger cards were completed. These intentions are, of course, subject to change. Particularly affected is the distinction between permanent and temporary movement and in the latter case, length of intended stay, country in which most time will be spent and main reason for journey.

### SEASONAL ADJUSTMENT AND TREND ESTIMATES

**15** Original and seasonally adjusted short-term overseas visitor arrivals and short-term Australian resident departures are shown in tables 1 and 2 respectively. In the seasonally adjusted series, account has been taken of normal seasonal factors and trading day effects (arising from the varying numbers of Sundays, Mondays, Tuesdays etc. in the month) and the effect of movement in the date of Easter which may, in successive years, affect figures for different months.

## EXPLANATORY NOTES

### SEASONAL ADJUSTMENT AND TREND ESTIMATES continued

**16** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series may be more clearly recognised. Seasonal adjustment procedures do not aim to remove the irregular or non-seasonal influences which may be present in any particular month, such as the effect of major sporting and cultural events, changes in airfares and the fluctuation of the Australian dollar relative to other currencies. Irregular influences that are highly volatile can make it difficult to interpret the movement of the series even after adjustment for seasonal variation.

**17** The trend estimates for short-term overseas visitor arrivals and short-term Australian resident departures are shown in tables 1 and 2 respectively. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months of the respective seasonally adjusted series except the first and last six months. Trend series are created for the last six months by applying surrogates of the Henderson weighted moving average to the seasonally adjusted series.

**18** While this technique enables smoothed data for the latest period to be produced, it does result in revisions to the smoothed series, principally of recent months, as additional observations become available. There may also be revisions as a result of the re-estimation of the seasonal factors. For further information, see *A Guide to Interpreting Time Series—Monitoring 'Trends', an Overview* (cat. no. 1348.0).

**19** The trend estimates are a measure of underlying behaviour and, in the short term, may be adversely affected by unusual influences recorded in the original data. As the March and April 2003 original and seasonally adjusted estimates include the effect of international reports of SARS, and the anticipation and commencement of military action in Iraq, users are advised to exercise caution when assessing the most recent trend estimates, which will be revised in future publications, as new monthly data become available.

### RELATED PUBLICATIONS

**20** Users of these statistics may also wish to refer to the following ABS publications:

- *Australian Demographic Statistics* (cat. no. 3101.0)—issued quarterly
- *Migration, Australia* (cat. no. 3412.0)—issued annually

**21** Related statistics are also published by the Department of Immigration and Multicultural and Indigenous Affairs, the Department of Transport and Regional Services and the Bureau of Tourism Research.

**22** Current publications and other products produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (cat. no. 1101.0). The Catalogue is available from any ABS office or the ABS web site <[www.abs.gov.au](http://www.abs.gov.au)>. The ABS also issues a daily *Release Advice* on the web site which details the products to be released in the week ahead.

### SPECIAL ARTICLE REFERENCES

**23** References used in the compilation of the three page article called *Australian Visitors to Fiji* on page 4 of this issue are as follows:

- Bureau of Tourism Research (2003), Unpublished data, *National Visitor Survey, 1999*, BTR, Canberra.
- Fiji Islands Bureau of Statistics web site, <http://www.stats.fiji.gov.fj>, accessed June 6, 2003.

## E X P L A N A T O R Y   N O T E S

### ADDITIONAL STATISTICS AVAILABLE

**24** As well as the statistics included in this and related publications, other relevant unpublished data are available for the following variables:

- Citizenship (Nationality)
- Country of birth
- Age (Date of birth)
- Sex
- Marital status (not available for Australian or New Zealand citizens)
- Category of travel
- Permanent migrant
  - Previous/future country of residence
  - State of intended address/lived
- Overseas visitor
  - Intended/actual length of stay
  - Main reason for journey
  - Country of residence
  - State of intended address/in which most time spent
- Australian residents
  - Intended/actual length of stay overseas
  - Country spent/intend to spend most time abroad
  - State or territory of intended address/state or territory lived
- Occupation (not available for short-term movements)
- Country of embarkation/disembarkation
- Airport/Port of arrival/departure
- Arrival/departure date
- Intention to live in Australia for next 12 months (not available for short-term movements)

**25** This publication draws extensively on information provided by DIMIA. This continued cooperation is very much appreciated; without it, the statistics published would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

### CHANGES TO UPCOMING RELEASE SCHEDULE

**26** From June 2003, preliminary estimates of short-term visitor arrivals will be released electronically on the ABS website <http://www.abs.gov.au>. Instructions on how to access this website release will be provided in the second May issue of this publication (May (final 2003) — expected to be release on 24 July 2003). The second May issue was necessary to facilitate the separation of preliminary and final data. Currently, the month of 'issue' refers to the month of preliminary data.

## G L O S S A R Y

<b>Australian resident</b>	Australian residence is self-defined as reported by travellers when completing Incoming and Outgoing Passenger Cards.
<b>Category of movement</b>	<p>Overseas Arrivals and Departures are classified according to length of stay (in Australia or overseas), recorded in months and days by travellers on passenger cards. There are three main <i>categories of movement</i>:</p> <ul style="list-style-type: none"><li>▪ permanent movements</li><li>▪ long-term movements</li><li>▪ short-term movements.</li></ul> <p>A significant number of travellers (i.e. overseas visitors to Australia on arrival and Australian residents going abroad) state exactly 12 months or one year as their intended period of stay. Many of them stay for less than that period and on their departure from, or return to, Australia are therefore classified as short-term. Accordingly in an attempt to maintain consistency between arrivals and departures, movements of travellers who report their actual or intended period of stay as being one year exactly are randomly allocated to long-term or short-term, in proportion to the number of movements of travellers who report their actual length of stay as up to one month more, or one month less, than one year.</p>
<b>Country of residence</b>	Country of residence refers to the country in which travellers regard themselves as living or as last having lived.
<b>Intended length of stay</b>	On arrival in Australia, all overseas visitors are asked to state their 'Intended length of stay in Australia'. On departure from Australia, all Australian residents are asked to state their 'Intended length of stay abroad'.
<b>Long-term arrivals</b>	Long-term arrivals comprise: <ul style="list-style-type: none"><li>▪ overseas visitors who intend to stay in Australia for 12 months or more (but not permanently); and</li><li>▪ Australian residents returning after an absence of 12 months or more overseas.</li></ul>
<b>Long-term departures</b>	Long-term departures comprise: <ul style="list-style-type: none"><li>▪ Australian residents who intend to stay abroad for 12 months or more (but not permanently); and</li><li>▪ overseas visitors departing who stayed 12 months or more in Australia.</li></ul>
<b>Main destination</b>	Australian residents travelling overseas are asked on departure for the name of the country in which they intend to spend most time.

## G L O S S A R Y

**Main reason for journey** On arrival in, or departure from, Australia all overseas visitors and Australian residents are asked to state their purpose of journey. From September 1994, all statistics relating to *main reason for journey* have been published using the following categories:

- convention/conference
- business
- visiting friends/relatives
- holiday
- employment
- education
- other

In tabulations of data collected before September 1994, the 'Other' category includes 'In transit' and the 'Holiday' category includes both 'Student vacation' and 'Accompanying business visitor'.

**Main state/territory of stay** Overseas visitors are asked on departure for the name of the state or territory in which they spent the most time.

**Overseas Arrivals and Departures (OAD)** Overseas Arrivals and Departures refer to the arrival or departure of Australian residents or overseas visitors, through Australian airports (or sea ports), which have been recorded on Incoming or Outgoing Passenger Cards. Statistics on Overseas Arrivals and Departures relate to the number of movements of travellers rather than the number of travellers (i.e. the multiple movements of individual persons during a given reference period are all counted).

**Permanent arrivals** Permanent arrivals (settlers) comprise:

- travellers who hold migrant visas (regardless of stated intended period of stay);
- New Zealand citizens who indicate an intention to settle; and
- those who are otherwise eligible to settle (e.g. overseas born children of Australian citizens).

This definition of settlers is used by the Department of Immigration and Multicultural and Indigenous Affairs (DIMIA). Prior to 1985 the definition of settlers used by the ABS was the stated intention of the traveller only. Numerically the effect of the change in definition is insignificant. The change was made to avoid the confusion caused by minor differences between data on settlers published separately by the ABS and DIMIA.

**Permanent departures** Permanent departures are Australian residents (including former settlers) who on departure state that they intend to settle permanently in another country.

**Short-term arrivals** Short-term arrivals comprise:

- overseas visitors whose intended stay in Australia is less than 12 months; and
- Australian residents returning after an absence of less than 12 months overseas.

**Short-term departure** Short-term departures comprise:

- Australian residents who intend to stay abroad for less than 12 months; and
- overseas visitors departing who stayed less than 12 months in Australia.

# S T A N D A R D   E R R O R S

## RELIABILITY OF ESTIMATES

**1** Estimates based on a sample are subject to sampling variability i.e. they may differ from those that would be obtained from full enumeration.

**2** The sampling error associated with any estimate can be estimated from the sample results and one measure so derived is the standard error. Given an estimate and the standard error on that estimate, there are about two chances in three that the sample estimate will differ by less than one standard error from the figure that would have been obtained from full enumeration, and about nineteen chances in twenty that the difference will be less than two standard errors. The relative standard error is the standard error on the estimate expressed as a percentage of the estimate.

**3** It would be impractical to publish estimates of standard errors for all figures in individual tables. However, the following table of standard errors and relative standard errors gives an indication of the magnitude of the sampling error associated with any estimate of a particular size for short-term and total movement.

### APPROXIMATE STANDARD ERRORS ON ESTIMATES FOR STRATIFIED SAMPLE

<i>Estimated number of persons</i>	SHORT-TERM DEPARTURE OR ARRIVAL OF AUSTRALIAN RESIDENTS		SHORT-TERM ARRIVAL OR DEPARTURE OF OVERSEAS VISITORS		TOTAL ARRIVALS OR DEPARTURES.....	
	<i>Standard error</i>	<i>Relative standard error</i>	<i>Standard error</i>	<i>Relative standard error</i>	<i>Standard error</i>	<i>Relative standard error</i>
	no.	%	no.	%	no.	%
10 000	550	6	490	5	550	6
5 000	450	9	330	7	410	8
2 000	280	14	230	11	250	13
1 000	200	20	150	15	170	17
750	180	24	140	19	150	20
500	130	26	110	22	125	25
400	120	30	100	25	115	29
300	110	36	84	28	97	32
200	90	45	70	35	80	40
100	63	63	49	49	56	56

**4** An example of the use of this table is as follows. If the estimate of the number of Australian resident departures for short-term visits abroad is 500, then the standard error on this estimate is 130 i.e. there are two chances in three that the actual number of Australian resident departures for short-term visits abroad will lie between 370 and 630 and nineteen chances in twenty that it will lie between 240 and 760.

**5** The larger the size of an estimate the smaller the relative standard error. For any estimate of greater than 10,000 the relative standard error will be less than 6%.

**6** The estimate of the difference between an estimate in two different periods or between different estimates from the same period is also subject to sampling error. The standard error on the difference between any two estimates which are subject to sampling error can be approximated by using the larger standard error of the estimates inflated by a factor of 1.4.

**7** An example of the use of this procedure is as follows. Assume the estimates of the number of arrivals to Australia from Taiwan during January 1994 and January 1995 are 1,500 and 750 respectively. The difference between the 1994 and 1995 figures is 750 and the standard errors on these estimates are approximately 190 and 140. The standard error on the difference is approximately 266 (1.4 x 190), and there are nineteen chances in twenty that the estimate of the difference between the two years will lie between 218 and 1,282.

# APPENDIX 1 — PASSENGER CARDS (a)

## INCOMING CARD - FRONT

**Incoming passenger card • Australia**  
PLEASE COMPLETE IN ENGLISH WITH A BLUE OR BLACK PEN

▶ Family/surname  
▶ Given names  
▶ Passport number

◆ Flight number or name of ship  
▶ Intended address in Australia  
State

▶ Do you intend to live in Australia for the next 12 months? Yes  No

▶ If you are NOT an Australian citizen:  
Do you suffer from tuberculosis? Yes  No   
Do you have any criminal conviction/s? Yes  No

**DECLARATION**  
The information I have given is true, correct and complete. I understand failure to answer any questions may have serious consequences.

**YOU MUST ANSWER EVERY QUESTION – IF UNSURE, X Yes**

▶ Are you bringing into Australia:

- Goods that may be prohibited or subject to restrictions, such as medicines, steroids, firearms, weapons of any kind or illicit drugs? Yes  No
- More than 1125mL of alcohol or 250 cigarettes or 250g of tobacco products? Yes  No
- Goods obtained overseas or purchased duty and/or tax free in Australia with a combined total price of more than AUD\$400, including gifts? Yes  No
- Goods/samples for business/commercial use? Yes  No
- AUD\$10,000 or more in Australian or foreign currency equivalent? Yes  No
- Any food - includes dried, fresh, preserved, cooked, uncooked? Yes  No
- Wooden articles, plants, parts of plants, traditional medicines or herbs, seeds, bulbs, straw, nuts? Yes  No
- Animals, parts of animals and animal products including equipment, eggs, biologicals, specimens, birds, fish, insects, shells, bee products, pet food? Yes  No
- Soil, or articles with soil attached, ie. sporting equipment, shoes, etc? Yes  No
- Have you visited a rural area or been in contact with, or near, farm animals outside Australia in the past 30 days? Yes  No
- Have you been in Africa or South America in the last 6 days? Yes  No

**YOUR SIGNATURE** Day Month Year

**TURN OVER THE CARD**  
English

## INCOMING CARD - BACK

**PLEASE COMPLETE IN ENGLISH**

▶ In which country did you board this flight or ship?  
◆ What is your usual occupation?  
▶ Nationality as shown on passport  
▶ Date of birth Day Month Year

**PLEASE X AND ANSWER A OR B OR C**

**A Migrating permanently to Australia**

**B Visitor or temporary entrant**  
▶ Your intended length of stay in Australia Years Months Days  
▶ Your country of residence  
▶ Your main reason for coming to Australia (X one only)  
Convention/conference  1 Employment  4 Holiday  7  
Business  2 Education  5 Other  8  
Visiting friends or relatives  3 Exhibition  6

**C Resident returning to Australia**  
▶ Country where you spent most time abroad

**MAKE SURE YOU HAVE COMPLETED BOTH SIDES OF THIS CARD. PRESENT THIS CARD ON ARRIVAL WITH YOUR PASSPORT.**

Information sought on this form is required to administer immigration, customs, quarantine, statistical, health, wildlife and currency laws of Australia and its collection is authorised by legislation. It will be disclosed only to agencies administering these areas and those entitled to receive it under Australian law. The leaflet *Safeguarding your personal information* is available at Australian ports and airports.

## OUTGOING CARD

**Outgoing passenger card • Australia**  
PLEASE COMPLETE IN ENGLISH WITH A BLUE OR BLACK PEN

▶ Family/surname  
▶ Given names  
▶ Passport number  
▶ Flight number or name of ship  
▶ Country where you will get off this flight  
▶ What is your usual occupation?  
◆ Nationality as shown on passport  
▶ Date of birth Day Month Year

**PLEASE X AND ANSWER D OR E OR F**

**D Visitor or temporary entrant departing**  
▶ City or State where you spent most time  
▶ Country of Residence

**E Australian resident departing temporarily**  
▶ In which State do you live? NSW  Vic  Qld   
SA  WA  Tas   
NT  ACT  Other   
▶ Intended length of stay overseas Years Months Days  
▶ Country where you will spend most time abroad  
▶ Main reason for overseas travel (X one only):  
Convention/conference  1 Employment  5  
Business  2 Education  6  
Visiting friends or relatives  3 Exhibition  7  
Holiday  4 Other  8

**F Australian resident departing permanently**  
▶ In which State did you live?  
NSW  Vic   
Qld  SA   
WA  Tas   
NT  ACT   
Other   
▶ What is your country of future residence?

**DECLARATION** The information I have given is true, correct and complete.  
**YOUR SIGNATURE** Day Month Year

**TURN OVER THE CARD**

(a) Incoming card used from November 1999. Outgoing card used from July 2000 when a new question on currency was added to the reverse side. See paragraph 3 of the Explanatory Notes for information on passenger card changes

## APPENDIX 2 — DATA QUALITY ISSUES

### SCANNING AND IMAGING

The introduction of a new passenger card processing system from July 2001 has meant that information is now available on the frequency and impact of data item imputation. Much of this information has not been available previously. Additionally, the move to a new processing system has also given rise to new data quality issues directly associated with scanning and imaging.

### DEFECTIVE CARDS

There are a small number of unreadable or damaged passenger cards for each month. ABS receives the count of these cards from the Department of Immigration and Multicultural and Indigenous Affairs (DIMIA) by movement direction, box type and port of clearance. The information on these cards is then physically processed by the ABS and included in the estimates presented here.

### DURATION OF STAY

From July 1998 DIMIA are able to determine the actual length of stay for departing overseas visitors and arriving Australian residents which was previously collected from information on intended length of stay supplied on the arrival and departure card by the passenger. This new method had resulted in a change in data distribution with the number of passengers staying for one year exactly declining significantly when compared with movements prior to July 1998.

The introduction of the new passenger card processing system from July 2001 has shown further evidence of rounding to exactly one year in intended duration of stay/travel as reported by visitors arriving in Australia and Australian residents departing the country. To reflect the historical movement patterns, the records with a reported duration of exactly one year are allocated to short-term and long-term. For visitors, 75% of such records are allocated to short-term and 25% to long-term. The ratio is 67:33 for residents departing Australia.

### TRIPS AND MATCHING OF MOVEMENTS ON THE SECOND LEG OF TRAVEL

Each month there are records for long-term residents returning to Australia and long-term visitors departing Australia which could not be matched with DIMIA's Travel and Immigration Processing System (TRIPS) records. Records have been created directly from TRIPS for records that did not match with a passenger card and then added to the ABS processing system.

### NEW ZEALAND CITIZENS

Travellers on New Zealand (NZ) passports do not need a visa to enter Australia. As a result, on arrival in Australia their visa documentation cannot be used to determine whether they are either a permanent migrant or a temporary visitor, or an Australian resident returning from New Zealand. DIMIA believes that a substantial proportion of holders of NZ passports tick Box A (migrating to Australia) each time they arrive in the country, causing an overcount of NZ migrants entering Australia. To correct the overcounting of NZ migrants, with the introduction of the new processing system from July 2001, DIMIA coded all NZ citizen arrivals who had ticked Box A and had been to Australia previously (based on immigration records) to resident returning (Box C). If these people were visitors previously, this recoding had the effect of incorrectly reducing the number of NZ migrants whilst at the same time incorrectly increasing the number of NZ citizen returning residents. This problem was overcome by moving the NZ citizens that have been changed by DIMIA from Box A to Box C back to Box A. DIMIA are currently investigating methods to allocate NZ citizens to the correct category of travel.

## APPENDIX 2 — DATA QUALITY ISSUES

### NON-RESPONSE

#### A1. NON-RESPONSE RATES PRIOR TO IMPUTATION, APRIL 2003(a)

.....

*April.....*

<i>OAD variables</i>	<i>Incoming</i>	<i>Outgoing</i>
	%	%
Citizenship (Nationality)	0.1	—
Country of birth	0.5	0.8
Age (Date of birth)	—	—
Sex	—	—
Marital Status(b)	37.7	54.7
Category of travel	1.9	1.2
Permanent migrant		
Previous/future country of residence	19.8	7.4
Overseas visitor		
Intended/actual length of stay	4.4	1.4
Main reason for journey	6.6	..
Australian residents		
Actual/intended time away from		
Australia	1.2	4.1
Main reason for journey	..	5.1
Occupation(c)	6.7	5.1
Country of		
embarkation/disembarkation	3.2	2.3
Whether intend to live in Australia for		
next 12 months	31.2	..

.....

(a) Non-response rates are unweighted.

(b) Not available for Australian or New Zealand citizens.

(c) Not available for short-term movements.

### INTENDED LENGTH OF STAY / TIME AWAY FROM AUSTRALIA

Non-response rates are available for these data items from November 1998. For data prior to November 1998, imputation carried out as part of processing by DIMIA has prevented reliable estimation of non-response rates for these two data items.

### MAIN REASON FOR JOURNEY

Before the introduction of the redesigned passenger card in July 1998, 5% of short-term visitor arrivals, on average, were recorded as having a reason for journey of 'Other' or 'Not Stated'. This percentage rose to 14% for July, 16% in August and 29% in September 1998 as a result of processing problems. These problems have now been addressed by DIMIA, with the percentage of 'Other' and 'Not Stated' dropping in October 1998 to 8% and 7% in November 1998.

From the January 1999 issue of this publication, published figures (table 3 in this publication) referencing these three months have been revised. The revised data were calculated by estimating the number of persons responding 'Other / Not Stated' using past trends for each country of citizenship and proportionally allocating any persons in excess of the estimated 'Other / Not Stated' total amongst the remaining categories. 'Not Stated' rates are now separately available from February 1999 onwards.

## APPENDIX 2 — DATA QUALITY ISSUES

STATE IN WHICH MOST TIME  
WAS SPENT

For the months of August 1998, September 1998 and October 1998, data entry problems experienced by DIMIA caused an overstatement of the Northern Territory as the main state of stay with a corresponding understatement for the remaining states and territories. These numbers have returned in November 1998 to levels more comparable with previous years, with DIMIA indicating that they have instigated data quality procedures to address this issue.

From the January 1999 issue of this publication, published figures (table 8 in this publication) referencing these months have been revised. The revised data were calculated by estimating the number of persons indicating the Northern Territory as their main state of stay using past trends and proportionally allocating any persons in excess of these estimates amongst the remaining states and territories.

With the introduction of the new processing system from July 2001, DIMIA have provided the ABS with data on all missing values of state of stay and state of usual residence. These missing values are now imputed.

SEPTEMBER 1998 PROCESSING

A problem was experienced in the processing of OAD data for movement dates between 6 September 1998 and 16 September 1998, following the introduction of changes to DIMIA's input processing system. This problem may affect in the order of 10% of all September records used in estimation and result in incorrect details for citizenship, date of birth, sex and country of birth.

DATA IMPUTATIONS

Data was imputed for non-response for state of stay/residence. For state of stay, non-responses were imputed at the category of traveller and state of clearance level. Non-response rates for state of stay are presented in the table below:

### A2. DISTRIBUTION OF NON-RESPONSE RATES FOR STATE OF STAY BY CATEGORY OF TRAVELLER, APRIL 2003(a)

<i>Category of traveller</i>	<i>April</i>
	%
Permanent arrivals—Settlers	5.5
Long-term residents returning	1.1
Long-term visitors arriving	4.0
Short-term residents returning	0.5
Short-term visitors arriving	6.8
Residents departing permanently	4.5
Long-term residents departing	3.2
Long-term visitors departing	27.9
Short-term residents departing	2.3
Short-term visitors departing	7.8

(a) Non-response rates are weighted.

Non-responses for country of stay and country of usual residence were imputed in two stages. In the first stage, records with country of stay/residence missing were set to country of disembarkation/embarkation if a response was available. In the second stage, for remaining records where country of stay/residence was missing, values were imputed at the category of traveller, reason for journey and country of citizenship level based on responses to other cards within each subgroup. Accordingly, the level of records with data for country of stay/residence not stated has been minimised.

## APPENDIX 2 — DATA QUALITY ISSUES

### DATA IMPUTATIONS CONTINUED

Table A3 below presents the percentage of records with country of stay/residence missing as supplied by DIMIA and prior to imputation.

A3. COUNTRY OF STAY/RESIDENCE NON-RESPONSE RATES BY PASSENGER CARD BOX TYPE, APRIL 2003(a)

Box type	April
	%
A: Migrating permanently to Australia	19.8
B: Visitor or temporary entrant	11.0
C: Resident returning to Australia	7.7
D: Visitor or temporary entrant departing	13.5
E: Australian resident departing temporarily	1.4
F: Australian resident departing permanently	7.4

(a) As on initial data supplied by DIMIA.

Table A4 shows the non-response rates for country of stay/residence following the application of the first stage of imputation.

A4. COUNTRY OF STAY/RESIDENCE NON-RESPONSE RATES BY CATEGORY OF TRAVELLER, APRIL 2003(a)(b)

Category of traveller	April
	%
Permanent arrivals—Settlers	5.0
Long-term residents returning	0.8
Long-term visitors arriving	1.1
Short-term residents returning	1.0
Short-term visitors arriving	0.7
Residents departing permanently	0.5
Long-term residents departing	—
Long-term visitors departing	0.7
Short-term residents departing	0.4
Short-term visitors departing	0.4

(a) Following imputation based on country of disembarkation/embarkation.

(b) Non-response rates are weighted.

### SEPTEMBER 1999 PROCESSING

September 1999 overseas arrivals and departures data are revised for movements from, and to, China (excl. SARs and Taiwan) and Hong Kong (SAR of China) in respect of three variables: country of birth, country of citizenship and country of residence/stay. Changes to 'country of birth' and 'country of citizenship' have been made from data supplied by DIMIA. Changes to 'country of residence/stay' have been made by assuming the average proportion of country of birth to country of residence/stay for migrants from China (excl. SARs and Taiwan) and Hong Kong (SAR of China) in September 1995 to September 1998.

### PERMANENT ARRIVALS DURING 1999

The number of permanent arrivals during July to December 1999 were revised in October 2000, as advised by DIMIA.

### SEPTEMBER QUARTER 2000 PROCESSING

A processing error has been identified which affected the distribution of short-term resident departures by reason for journey for the months of August and September 2000. Affected data have been re-processed, and a revised copy of table 3 for the September quarter 2000 has been reissued in the October to December 2000 edition of this publication.

## APPENDIX 2 — DATA QUALITY ISSUES

---

**CHANGES TO NEW ZEALAND PASSPORT FORMAT DECEMBER 2000** The format of New Zealand passport numbers changed in December 2000 causing a recent decline in preliminary estimates of short-term visitor arrivals from New Zealand and subsequent increasing discrepancy between preliminary and final data. As the number of new and renewed passports issued to New Zealanders increased, the number of New Zealand movements as recorded by TRIPS, declined.

To resolve the problem, DIMIA has modified the reporting system to identify both kinds of passports. DIMIA have supplied the ABS with correct New Zealand TRIPS backdated to December 2000. The correct data supplied by DIMIA was used in the TRIPS model by the ABS in March 2003, with the updated preliminary estimates of New Zealand visitors published in the February 2003 issue.

## FOR MORE INFORMATION...

- INTERNET* **www.abs.gov.au** the ABS web site is the best place to start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a statistical profile.
- LIBRARY* A range of ABS publications is available from public and tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require, or visit our web site for a list of libraries.
- CPI INFOLINE* For current and historical Consumer Price Index data, call 1902 981 074 (call cost 77c per minute).
- DIAL-A-STATISTIC* For the latest figures for National Accounts, Balance of Payments, Labour Force, Average Weekly Earnings, Estimated Resident Population and the Consumer Price Index call 1900 986 400 (call cost 77c per minute).

## INFORMATION SERVICE

Data which have been published and can be provided within five minutes are free of charge. Our information consultants can also help you to access the full range of ABS information—ABS user-pays services can be tailored to your needs, time frame and budget. Publications may be purchased. Specialists are on hand to help you with analytical or methodological advice.
