KEY POINTS

SUMMARY

- Total credit market outstanding of the domestic non-financial sectors at 31 December 2010 was \$3,877.8b, an increase of \$107.6b from the previous quarter. Demand for credit during the quarter was \$51.4b and valuation increases were \$56.2b.
- Demand for credit was down \$4.1b from the previous quarter, driven by decreased demand by state and local general government (down \$5.9b) state and local public non-financial corporations (down \$4.9b) and private non-financial investment funds (down \$1.8b). This was offset by an increase in demand by Households (up \$8.2b).

NON-FINANCIAL CORPORATIONS

- Private non-financial investment funds raised a net \$1.3b during the December quarter 2010. Other private non-financial corporations raised a net \$17.1b, mostly funded from issuance of shares, \$21.4b and loans and placements, \$2.4b. This was offset by net redemptions of bills of exchange \$4.4b and one name paper \$2.3b.

GENERAL GOVERNMENT

- National general government issued bonds of \$13.2b and state and local general government repaid \$1.7b of loans during the quarter.

HOUSEHOLDS

- Households raised a net \$22.6b during the December quarter 2010, up \$8.2b from the September quarter 2010 estimate of \$14.4b.

CHANGES TO THIS ISSUE

Following ongoing quality assurance work a number of data quality issues have been identified with table 37 - National capital accounts by sector and subsector. This table will be unavailable until further notice. However, capital accounts by sector will continue to be published as part of table 22 - flow of funds matrix.

SIGNIFICANT EVENTS

The Central bank, banks, securitisers and bond market tables include estimates for internally securitised paper. Please refer to page 6 of the December quarter 2008 release for the ABS treatment of these securities.

During the December quarter 2010 a Government enterprise was privatised and listed on the Australian Stock Exchange (ASX). Statistics published in this issue reflect these changes.

There are a number of series breaks between June quarter 2005 and September quarter 2005 as a result of revisions undertaken during the September 2009 release of the Financial Accounts. These series have yet to be backcasted to June quarter 1988, the beginning of the time-series. If you would like more details regarding these series, please contact us on our inquiries line.

REVISIONS IN THIS ISSUE

There have been revisions back to March 2009 to previously published aggregates due to quality assurance work undertaken with data providers to the ABS Survey of Financial Information, ABS Survey of International Investment and APRA administrative data sets.

IMPACT OF THE FLOODS

Flooding in Queensland began in late December 2010. Data collection and processing for the data in this publication were not disrupted. It is expected that the economic impact of floods/cyclones in Queensland and other states will be reflected in forthcoming issues of this publication.

EXPLANATORY NOTES

INTRODUCTION

1 The Australian Financial Accounts (ABS Cat. No. 5232.0) contains financial profiles of each subsector of the economy and the market for each conventional financial instrument. There are also tables showing inter-sectoral financial transactions and measures of sectoral financial surpluses and deficits.

2 Financial accounts of various types – which are also called flow of funds statistics – are published by many Organisation for Economic Cooperation and Development (OECD) countries, including the United States of America (from 1945), the United Kingdom (from 1952) and Canada (from 1962). In Australia, the Reserve Bank produced annual flow of funds accounts for the reference years 1953-54 to 1988-89. The final edition of these was published in the Reserve Bank's Bulletin for November 1989. The Australian Bureau of Statistics (ABS) has published quarterly estimates commencing with experimental estimates of inter-sectoral financial transactions for the March and June quarters 1989. From the June 1998 reference quarter, the financial accounts dataset was produced according to a revised international standard, the System of National Accounts, released in 1993 (SNA93) under the auspices of five international organisations: Commission of the European Communities – Eurostat, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations, and World Bank.

CONCEPTS, SOURCES AND METHODS

3 From the September 2009 reference quarter the financial accounts dataset has been produced according to the SNA08. There are significant conceptual differences between the SNA93-based ABS Financial Accounts and the SNA08 Financial Accounts (see Information Paper: cat. no. 5232.0.55.003). The dataset prior to September 2009 has been converted to the revised standard and backcast to June 1988 (stocks data) and September quarter 1988 (transactions data).

4 Australian National Accounts: Concepts, Sources and Methods (cat. no. 5216.0) provides detailed descriptions of the concepts, data sources and methodologies used in compiling the Australian national accounts, including the financial accounts, on an SNA93 basis. More detailed explanations can be obtained from the contact on the front cover of this publication. An updated version (SNA08) is due out in 2010.

STOCK AND FLOW CONCEPTS

5 Tables 1 to 21 and 23 to 33 present balance sheet data at market prices at the end of each calendar quarter. Balance sheet data are also known as stock, level or position data. These tables also now show net inter-sectoral financial transactions during the quarters. These are flow data. In this publication, the net transactions or flows are defined as active dealing in a financial instrument.

THE CLASSIFICATION OF INSTITUTIONAL SECTORS AND SUBSECTORS

6 The institutional sectors are based on the Standard Economic Sector Classifications of Australia, 2008 (cat.no. 1218.0) and are the same as the sectors used in national income and expenditure accounts.

7 The basic unit that is classified by sector is the institutional unit, which is defined as an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and transactions with other entities.

SOURCES OF DATA

8 Most of the financial data in this publication are derived from statistical surveys conducted by the ABS and from information collected by the Australian Prudential Regulation Authority (APRA). Some other data sources are used, particularly for valuation adjustments.

9 The quarterly sectoral capital accounts in the flow of funds matrices are prepared using a variety of indicators to dissect annual estimates based on survey data. Some of the indicators used are known to be of poor quality; these are footnoted in tables to note the quality concerns and should be used with caution.

COMPILATION METHODS

10 The levels (stock) tables are prepared by gathering together balance sheet information from various sources and selecting the better estimates. A choice is often possible because different data sources provide alternative or counterpart measures of the same item. For example, borrowing by state owned non-financial corporations will be reported by the state central borrowing authorities or Treasuries as assets and by the non-financial corporations as liabilities. The subsector aggregates derived from these data do not agree because the ABS does not survey all state owned non-financial corporations. In this case, the data from the central borrowing authorities and Treasuries are therefore used to estimate both the asset and liability aspects of these borrowings.

11 In some cases, transactions data are directly collected. In other cases transactions must be derived from the difference in consecutive levels. These net financial transactions are derived by taking the difference between closing and opening levels of balance sheet items and, where possible, eliminating changes on the balance sheet caused by valuation effects such as exchange rate movements.

ACCOUNTING BASIS

12 SNA08 states explicitly that the national accounts should record transactions on an accrual basis (as opposed to a cash or 'due for payment' basis), to reflect the time when economic value is transferred rather than when cash relating to the transaction is paid or falls due for payment. For practical reasons complete implementation of accrual accounting throughout the national accounts is not yet possible. Some areas where accrual accounting has not been adopted include:

- accrual of household income tax; and
- accrual of certain employee entitlements, including recreation and long service leave.

13 In these statistics tradeable securities, which include shares listed on the Australian Stock Exchange (ASX) and debt securities traded on organised markets, are valued at market prices.

14 Other securities are assigned estimated market values. For example, equity not listed on ASX is valued on the basis of value of total assets of the enterprise in question less the value of any repayable liabilities.

15 Deposits, loans and other accounts payable/receivable are recorded at their face value.

16 Net equity of pension funds in life office reserves are valued on the basis of market value of total assets (including non financial assets) of the funds less any repayable liabilities..
