KEY POINTS

SUMMARY

- Total demand for credit by the non-financial domestic sectors for the June quarter 2007 was \$97.5b, an increase of \$32.4b on the previous quarter estimate. Increased borrowing by households (up \$30.2b) was the major contributor to the increase.

NON-FINANCIAL CORPORATIONS

- Private non-financial corporations raised a net \$42.7b (down \$1.5b), with equity raisings of \$26.1b (up \$10.8b) and loans of \$20.3b (up \$3.9b).

GENERAL GOVERNMENT

- National general government raised a net \$0.7b by issuing bonds worth \$0.8b during the quarter. State and local general government raised a net \$1.7b through loan issuance.

HOUSEHOLDS

- Households raised a net \$51.4b during the June quarter 2007, up from the March quarter estimate of \$21.2b. Households borrowed \$21.4b from banks (of which \$4.0b was for owner-occupied housing and \$5.3b for investment housing) and \$25.3b from Financial intermediaries n.e.c. (up \$19.6b).

FORTHCOMING ISSUES

<i>ISSUE (Quarter)</i>	<i>RELEASE DATE</i>
September 2007	21 December 2007
December 2007	28 March 2008

CHANGES TO THIS ISSUE

There are no significant changes in this issue.

SIGNIFICANT EVENTS

The impact of legislative changes announced in 2006 that provided incentives for people to make voluntary contributions to their superannuation before 1 July 2007 are reflected in this quarter's estimates of the financial assets of pension funds and their corresponding liability to households. These estimates are preliminary and are subject to revision in future quarters.

There were no significant privatisations impacting the aggregates this quarter.

REVISIONS IN THIS ISSUE

There have been significant revisions back to September quarter 2003 to previously published aggregates due to:

- quality assurance work undertaken with data providers to the ABS Survey of Financial Information, ABS Survey of International Investment and APRA administration data sets
- a review of data sources and the application of various methods used in the compilation of the unlisted equity market have resulted in large revisions to the estimated values in these markets
- investigations into the intra-group positions of banks and other depository corporations have resulted in revisions in the currency and deposits and loans markets.

CONFIDENTIALITY OF FUTURE FUND

During the June quarter, the Future Fund commenced investment activity. The Future Fund is a National General Government (NGG) unit and thus the investment activity and associated holdings of assets are recorded as part of the NGG sector. In order to maximise the availability of information about the activities of the NGG sector, ABS legislation allows the publication of identifiable information about this sector except where a request for confidentiality has been received from the relevant Minister. A request has been received and the relevant estimates have been confidentialised in this publication. The estimates will remain confidential in all future releases published up to and including 30 June 2008. As a consequence of suppressing estimates concerning the Future Funds investment activity, it has been necessary to consequentially suppress other series in the affected tables to preserve confidentiality.

HOUSEHOLDS

Summary

Households change in financial position was \$3.2b during the June quarter 2007. During the quarter, households borrowed a total of \$49.6b in the form of loans. Bank loans were \$21.4b and borrowing from financial intermediaries n.e.c. was \$25.3b. Of the bank loans, \$4.0b was borrowed for owner occupied housing and \$5.3b for investment housing. The significant increase in household loan liabilities in the June quarter has coincided with a significant increase in household contributions to life insurance and pension fund reserves of \$47.7b, which possibly reflects an outcome of the legislative changes to superannuation (see Notes, pg. 2).

On the asset side, householders' transactions in currency and deposits were \$6.0b, of which \$3.9b were other depository corporations deposits. Households purchased a net \$5.3b in equities during the June quarter 2007, the major contributors being purchases of \$3.6b of private non-financial corporations, \$2.7b of financial intermediaries n.e.c and, \$0.7b of bank shares. These were offset by the sale of other insurance corporation and life insurance shares, \$1.3b and \$0.5b respectively.

At the close of the quarter, households' stock of financial assets was \$2,357.5b. This was an increase of \$111.8b from the revised previous quarter number, following net transactions of \$59.2b and valuation increases of \$52.6b. Major asset holdings were net equity in reserves of life insurance corporations and pension funds of \$1166.0b, equities of \$452.4b, currency and deposits of \$448.9b and unfunded superannuation claims of \$181.1b.

Household net borrowing and debt to liquid asset ratio

The graph below illustrates that the debt to liquid assets ratio at the end of June 2007 was at 122.5%, an increase of 1.3 percentage points from the revised March quarter 2007 ratio. The ratio was influenced by an increase from the previous quarter of 4.7% in total outstanding household borrowings and an increase in total liquid assets of 3.5%. Major contributors to liquid assets were holdings of equities (up 5.7%) and currency and deposits (up 1.3%).

Insurance and pension claims

During the June quarter 2007, households' net equity in reserves of pension funds increased \$77.1b, made up of \$48.7b transactions and \$28.4b valuation increases, bringing household net equity in pension funds to \$1,108.3b. Net equity in reserves of life insurance corporations increased \$0.1b, made up of -\$1.0b transactions and \$1.1b valuation increases, bringing the household net equity in life insurance to \$57.8b. Net transactions in households' unfunded superannuation claims were \$3.0b and prepayments of premiums and claims against reserves in general insurance corporations was \$1.0b during the quarter.

EXPLANATORY NOTES

INTRODUCTION

1 This publication contains financial profiles of each subsector of the economy and the market for each conventional financial instrument. There are also tables showing inter-sectoral financial transactions and measures of sectoral financial surpluses and deficits.

2 Financial accounts of various types – which are also called flow of funds statistics – are published by many Organisation for Economic Co-operation and Development (OECD) countries, including the United States of America (from 1945), the United Kingdom (from 1952) and Canada (from 1962). In Australia, the Reserve Bank produced annual flow of funds accounts for the reference years 1953–54 to 1988–89. The final edition of these was published in the Reserve Bank's Bulletin for November 1989. The Australian Bureau of Statistics (ABS) has published quarterly estimates commencing with experimental estimates of inter-sectoral financial transactions for the March and June quarters 1989.

CONCEPTS, SOURCES AND METHODS

3 From the September quarter 1998 the ABS financial accounts are compiled in accordance with international standards contained in the *System of National Accounts, 1993* (SNA93). There are significant conceptual differences between the SNA93-based ABS Financial Accounts and the previous Financial Accounts. For further information, see ABS Information Paper: *Upgraded Australian National Accounts: Financial Accounts* (cat. no. 5254.0).

4 *Australian National Accounts: Concepts, Sources and Methods* (cat. no. 5216.0) provides detailed descriptions of the concepts, data sources and methodologies used in compiling the Australian national accounts, including the financial accounts, on an SNA93 basis. Selected concepts, sources and methods are outlined below. More detailed explanations can be obtained from the contact on the front cover of this publication.

STOCK AND FLOW CONCEPTS

5 Tables 1 to 16 and 34 to 41 present balance sheet data at market prices at the end of each calendar quarter. Balance sheet data are also known as stock, level or position data. In contrast, tables 17 to 33 show net inter-sectoral financial transactions during the quarters. These are flow data. In this publication, the net transactions or flows are defined as active dealing in a financial instrument.

THE CLASSIFICATION OF INSTITUTIONAL SECTORS AND SUBSECTORS

6 The institutional sectors are based on the *Standard Economic Sector Classifications of Australia, 2002* (cat. no. 1218.0) and are the same as the sectors used in national income and expenditure accounts.

7 The basic unit that is classified by sector is the institutional unit, which is defined as an economic entity that is capable, in its own right, of owning assets, incurring liabilities and engaging in economic activities and transactions with other entities.

SOURCES OF DATA

8 Most of the financial data in this publication are derived from statistical surveys conducted by the ABS and from information collected by the Australian Prudential Regulation Authority (APRA). Some other data sources are used, particularly for valuation adjustments.

9 The quarterly sectoral capital accounts in the flow of funds matrices are prepared using a variety of indicators to dissect annual estimates based on survey data. Some of the indicators used are known to be of poor quality; these are footnoted in tables to note the quality concerns and should be used with caution.

COMPILATION METHODS

10 The levels (stock) tables are prepared by gathering together balance sheet information from various sources and selecting the better estimates. A choice is often possible because different data sources provide alternative or counterpart measures of the same item. For example, borrowing by state owned non-financial corporations will be reported by the state central borrowing authorities or Treasuries as assets and by the non-financial corporations as liabilities. The subsector aggregates derived from these data do not agree because the ABS does not survey all state owned non-financial corporations. In this case, the data from the central borrowing authorities and Treasuries are therefore used to estimate both the asset and liability aspects of these borrowings.

11 In some cases, transactions data are directly collected. In other cases transactions must be derived from the difference in consecutive levels. These net financial transactions are derived by taking the difference between closing and opening levels of balance sheet items and, where possible, eliminating changes on the balance sheet caused by valuation effects such as exchange rate movements.

ACCOUNTING BASIS

12 SNA93 states explicitly that the national accounts should record transactions on an accrual basis (as opposed to a cash or 'due for payment' basis), to reflect the time when economic value is transferred rather than when cash relating to the transaction is paid or falls due for payment. For practical reasons complete implementation of accrual accounting throughout the national accounts is not yet possible. Some areas where accrual accounting has not been adopted include:

- accrual of household income tax; and
- accrual of certain employee entitlements, including recreation and long service leave.

13 In these statistics tradeable securities, which include shares listed on the Australian Stock Exchange (ASX) and debt securities traded on organised markets, are valued at market prices.

14 Other securities are assigned estimated market values. For example, equity not listed on ASX is valued on the basis of value of total assets of the enterprise in question less the value of any repayable liabilities.

15 Deposits, loans and other accounts payable/receivable are recorded at their face value.

16 Net equity of pension funds in life office reserves are valued on the basis of market value of total assets (including non financial assets) of the funds less any repayable liabilities.

DATA AVAILABLE ON REQUEST

18 The ABS has available on request stock data back to the December quarter 1988 and transactions flow data back to the March Quarter 1989. Also, different views of the data are available.

19 In addition to catalogued products, some priced special data reports are available covering bank lending to households and unincorporated businesses, public sector debt and net financing requirement, detailed sectoral capital account data, housing loans outstanding by type of lending institution, and details of households' deposits with banks.

20 A more extensive set of Explanatory Notes and a Glossary relevant to the financial accounts are available on the ABS web site <<http://www.abs.gov.au>>.

21 Inquiries should be made to the contact on the front cover of this publication.

EFFECTS OF ROUNDING

22 Any discrepancies between totals and sums of components in the tables are caused by rounding.
