- (a) Includes refinancing.
- (b) Excludes revolving credit.

## KEY POINTS

### TREND ESTIMATES

- Total value of dwelling finance commitments excluding alterations and additions increased by 0.8% in April 2005, the ninth consecutive monthly increase. Owner occupied housing increased by 1.2%, while investment housing rose by 0.1%.
- The number of commitments for owner occupation increased by 1.2% in April 2005, while the number excluding refinancing rose by 0.7%.

### SEASONALLY ADJUSTED ESTIMATES

- Total value of dwelling finance commitments excluding alterations and additions rose by 0.4% in April 2005.
- Investment housing commitments increased by 1.9%, driven primarily by a large increase in construction of dwellings for rent or resale (up \$103m, 19.9%). This increase in investment housing commitments more than offset the slight fall in owner occupied housing commitments (down 0.3%).
- The number of commitments for owner occupied housing increased by 0.6% in April 2005, while the number excluding refinancing decreased by 1.8%.

### ORIGINAL ESTIMATES

■ The percentage of the number of commitments for owner-occupied housing at a fixed rate of interest (for at least two years) decreased from 14.6% in March to 13.4% in April, but remains at a relatively high proportion of total commitments.

### CHANGES IN THIS ISSUE

The ABS now has a sufficient time series of observations for a number of housing finance component series to improve their seasonal adjustment and the associated trend estimates, by more fully accounting for the impact of Easter.

The improved seasonal adjustment method has been applied to:

- Owner Occupied Refinancing, both number and value
- Owner Occupied Wholesale lenders, both number and value

Seasonal series whose derivation includes one of those four series have also been improved, as have the associated trend estimates. Series impacted include:

• Owner Occupied Total less Refinancing, both number and value.

For further information, users may wish to refer to Working Papers in Econometrics and Applied Statistics: No 99/3 Adjusting for an Easter Proximity Effect (ABS Cat. No. 1351.0).

Data quality assurance procedures identified misreporting of the number of loans for April, which the relevant data provider was not able to correct in the time available. As a result, the ABS has imputed the number of loans based on the movement in loan value from March to April for this provider.

Estimates of the number of dwellings refinanced for March, February and January 2005 have been revised due to a provider correcting errors in previously provided data.

  - 14 Housing Finance Seasonal Factors, By Purpose and Lender: Australia, October 1975 to April 2006
  - 15 Housing Finance Seasonal Factors, By State, October 1975 to April 2006

### SUMMARY OF FINDINGS

DWELLINGS FINANCED

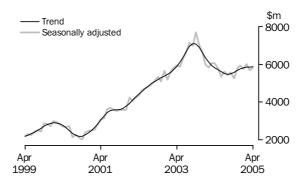

Value of Dwellings

Financed

The total value of dwelling commitments excluding alterations and additions (seasonally adjusted) increased by 0.4% in April 2005. The total housing finance trend increased by 0.8%, the ninth consecutive monthly increase.

The total value of owner occupied commitments (seasonally adjusted) decreased by 0.3% (down \$33m) in April 2005, following an increase of 0.5% in March. The decrease in purchase of established dwellings excluding refinancing (down \$162m, -2.3%) more than offset increases in refinancing of established dwellings (up \$116m, 3.6%), purchase of new dwellings (up \$9m, 1.9%) and construction of dwellings (up \$4m, 0.4%). The trend series in the value of owner occupied commitments rose by 1.2% in April.

The seasonally adjusted series for value of investment housing commitments (including finance for construction and finance for rent or resale) increased by 1.9% (up \$111m) in April 2005, following a fall of 5.1% in March. The increase this month was due to increases in the construction of dwellings for rent or resale (up \$103m, 19.9%) and purchase of dwellings for rent or resale by individuals (up \$13m, 0.3%) more than offsetting a decrease in purchase of dwellings for rent or resale by others (down \$6m, -1.3%). The trend series in total value of investment commitments rose by 0.1%.

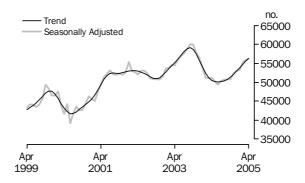

Number of Owner
Occupied Dwellings
Financed

The number of owner occupied dwelling commitments (seasonally adjusted) increased by 0.6% (up 350) in April 2005, the ninth increase in the past ten months. Increases in the refinancing of established dwellings (up 1050, 6.4%), purchase of new dwellings (up 110, 5.2%) and construction of dwellings (up 21, 0.5%) more than offset the decrease in purchase of established dwellings excluding refinancing (down 831, -2.5%). The total owner occupied housing finance trend rose by 1.2% in April 2005, the tenth consecutive monthly increase.

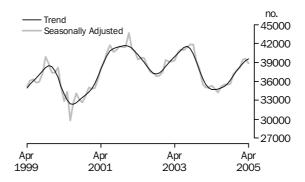

Increases were recorded in seasonally adjusted terms in Victoria (up 171, 1.3%), Tasmania (up 132, 13.0%), South Australia (up 82, 1.7%), Northern Territory (up 50, 9.9%), Queensland (up 49, 0.4%) and Australian Capital Territory (up 26, 4.4%). These increases were partially offset by a falls in New South Wales (down 300, -1.8%) and Western Australia (down 140, -1.8%). The trend increased in all states and territories except Northern Territory.

In original terms, first home buyer commitments as a percentage of total owner occupied housing commitments increased to 16.1% in April 2005. The percentage of commitments at a fixed rate of interest (for at least two years) decreased from 14.6% in March to 13.4% in April.

Number of Owner
Occupied Dwellings
Financed continued

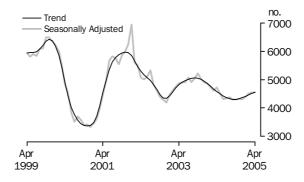

Number of Owner Occupied Dwellings Financed Excluding Refinancing The number of owner occupied dwellings financed excluding refinancing (seasonally adjusted) decreased by 1.8% in April 2005, the first decrease since June 2004. The trend increased by 0.7% in April 2005, the eleventh consecutive monthly increase but at a decelerating rate for the fifth successive month.

PURPOSE OF FINANCE
(OWNER OCCUPATION)

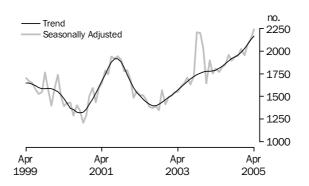

Construction of dwellings

The seasonally adjusted number of construction commitments for owner occupation rose by 0.5% in April 2005, following an increase of 0.4% in March. The trend series increased by 0.9% in April 2005.

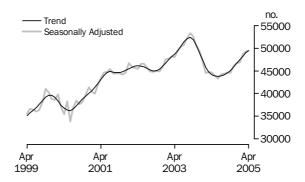

Purchase of new dwellings

The number of finance commitments for the purchase of new dwellings for owner occupation (seasonally adjusted) rose by 5.2% in April 2005, following a rise of 2.8% in March. The trend series rose by 2.1% in April 2005.

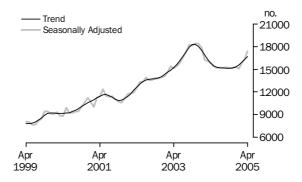

Purchase of established dwellings

The seasonally adjusted established dwelling for owner occupation series increased by 0.4% (up 219) in April 2005, the sixth successive month of increasing commitments. The increase was due mainly to the strength in refinancing of established dwellings (up 1050, 6.4%). The trend rose by 1.2% in April 2005, the tenth consecutive monthly increase.

Refinancing

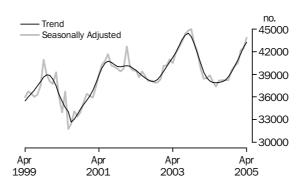

The number of refinancing commitments for owner occupied housing (seasonally adjusted) rose by 6.4% in April 2005. Trend series rose by 2.3% in April 2005.

TYPE OF LENDER (OWNER OCCUPATION)

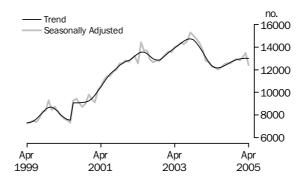

Banks

The number of owner occupied dwellings financed by banks (seasonally adjusted) increased by 3.4% in April 2005, the sixth consecutive monthly increase. The trend series increased by 1.6% in April.

Non-banks

Non-bank commitments for owner occupied housing (seasonally adjusted) fell by 8.1% in April 2005, following an increase of 3.0% in March. This decrease was primarily driven by the seasonally adjusted decrease for permanent building society (down 20.0%) while wholesale lenders increased by 0.1%. The non-bank trend series decreased by 0.2% in April 2005.

HOUSING LOAN
OUTSTANDINGS

At the end of April 2005, housing loans outstanding of authorised deposit-taking institutions was \$511,008m, up \$7,078m (1.4%) from March's closing balance. Owner occupied housing loans increased by \$5,070m (1.5%) to close at \$340,504m, while investment housing loans outstanding increased by \$2,008m (1.2%) to reach a closing balance of \$170,504m.

Bank loans increased by \$6,816m (1.4%) during April to a closing stock of \$480,740m. Owner occupied housing loans of banks increased by \$4,798m (1.5%) to \$316,233m, while investment housing loans increased \$2,018m (1.2%) to \$164,507m.

### EFFECT OF NEW SEASONALLY ADJUSTED ESTIMATES ON TREND ESTIMATES

### SENSITIVITY ANALYSIS

Readers should exercise care when interpreting the trend estimates of recent months because they will be revised when next month's seasonally adjusted estimates become available. For further information, see paragraphs 29 and 30 in the Explanatory Notes.

The graph below presents the effect of two possible scenarios on the previous trend estimates:

1 The May 2005 seasonally adjusted estimate of number of dwellings financed is higher than the April 2005 seasonally adjusted estimate by 3.0%.

2 The May 2005 seasonally adjusted estimate of number of dwellings financed is lower than the April 2005 seasonally adjusted estimate by 3.0%.

The percentage change of 3.0% was chosen because the average absolute percentage change of the seasonally adjusted series, based on the last 10 years of data, has been 3.0%.

WHAT IF NEXT MONTH'S

### **EXPLANATORY NOTES**

INTRODUCTION

SCOPE

- 1 This publication presents statistics of housing finance commitments made by significant lenders. This includes secured finance commitments for the construction or purchase of owner occupied dwellings and finance commitments for the construction or purchase of dwellings for rent or resale (investment housing). Also included are the outstanding values of housing loan assets to individuals held by lenders at the end of each reference month.
- **2** Finance commitments made by the following types of lenders are included:
  - Banks
  - Permanent building societies
  - Credit unions/cooperative credit societies
  - Life or general insurance companies
  - General government enterprises
  - Superannuation funds
  - Securitisers of mortgage assets (wholesale lenders) which provide funds to borrowers through a retail intermediary (e.g. mortgage originators)
  - Other Registered Financial Corporations (RFCs).
- **3** All lending commitments are classified to the lender type which is (or will be) the legal lender on the corresponding loan contract. Commitments are published for two broad groupings of lender type: Banks and Non-Banks; the Non-Bank grouping also has the components Permanent Building Societies and Wholesale Lenders n.e.c. published.
- **4** Housing loan outstandings are classified to the following lender types: Banks; Permanent Building societies; Credit unions/cooperative credit societies; Securitisation vehicles; and Other lenders n.e.c.. The first three of these types are components of the grouping Authorised Deposit-taking Institutions (ADIs). Loan outstanding for the ADI lender types are published monthly, and are classified by purpose (owner occupied housing or investment housing). All other institutions, including securitisation vehicles, are only available on a quarterly basis. The release of loan outstandings data for those lenders reporting on a quarterly basis will be lagged by one month for example March outstandings for securitisation vehicles and other lenders n.e.c. will be released from the April publication onwards.
- **5** The statistics of housing finance commitments cover all banks and permanent building societies. The largest of the remaining lenders of secured housing finance for owner occupation are included so that, together with banks and building societies, at least 95% of the Australian total of finance commitments is covered, and at least 90% of each state total is covered. While many smaller contributors to the Non-Banks series are excluded under these coverage criteria, at least 70% of finance commitments by wholesale contributors are covered.
- **6** An annual collection is conducted to maintain and update the survey coverage of housing finance commitments. New lenders are included as their lending for housing becomes sufficiently large.
- **7** From June 2001, the collection of housing finance commitments covers all commitments by banks and permanent building societies, all other lenders providing funds of more than \$50m in 2000, and some additional smaller other lenders where necessary to maintain collection coverage (as specified in paragraph 5).
- **8** The statistics of housing loan outstandings cover all lenders included in the scope of paragraph 2 that have been identified as holding residential loan assets on their balance sheet as at the end of a particular reference month.

COVERAGE

SOURCES

- **9** For banks, credit cooperatives, building societies and RFCs, the statistics in this publication are currently derived from returns submitted to the Australian Prudential Regulation Authority (APRA). The *Financial Sector (Collection of Data) Act 2001* facilitates the collection of statistical data from the financial sector, with APRA established as the central point for collection of both prudential and statistical data. In October 2001, APRA implemented new reporting forms for building societies and credit cooperatives. New reporting forms were implemented for banks in March 2002, and for RFCs in March 2003. APRA commenced collecting loan commitments data from banks, credit cooperatives, building societies in July 2002 and from RFCs in March 2003.
- **10** Housing finance commitments for owner occupied housing from banks, building societies and credit cooperatives are derived from form *ARF 392.0 Housing Finance* collected by APRA. Housing finance commitments for investor housing from these lenders are sourced from the *ARF 394.0 Personal Finance*. Housing finance commitments for RFCs are collected on the *RRF 392.0 Housing Finance* and *RRF 394.0 Personal Finance* for owner occupied housing and investor housing respectively.
- **11** Statistics on loan outstandings in table 12 are sourced from banks on form ARF 320.0 Statement of Financial Position (Domestic Books), with lending by building societies and credit cooperatives derived from form *ARF 323.0: Statement of Financial Position (Licensed ADI)*. While building societies and credit cooperatives with total assets greater than or equal to \$50 million are required to report this APRA return on a monthly basis, those institutions with total assets less than this threshold are only required to submit this return on a quarterly basis. An undercoverage adjustment is made in deriving table 12 in the intervening two months between each quarter ending month to derive estimates for the complete population on a monthly basis.
- **12** Electronic versions of the forms and instructions for ADIs are available on the APRA web site at
- <a href="http://www.apra.gov.au/Statistics/Revised-Authorised-Deposit-taking-Institution-ADI-re">http://www.apra.gov.au/Statistics/Revised-Authorised-Deposit-taking-Institution-ADI-re</a> porting-requirements.cfm>. For RFCs, these are available at: <a href="http://www.apra.gov.au/rfc/">http://www.apra.gov.au/rfc/</a>.
- **13** All other institutions, including securitisation vehicles, are collected directly by the ABS. Data on loan outstandings to households for housing purposes for these lender types are only available on a quarterly basis. The data for Other lenders n.e.c. is compiled from a range of other data sources collected by the Australian Bureau of Statistics.
- **14** Revisions to previously published statistics are included in the publication as they occur.
- **15** Changes in the classification of lenders (e.g. the conversion of a permanent building society to a bank) are reflected in the Lender series from the month of such change. Data for earlier periods for such lenders are not reclassified. Details of the establishment of new banks are published in the Reserve Bank of Australia's monthly *Bulletin* in the section on Technical Notes to Tables.
- **16** A wholesale lender provides funds to borrowers through a retail intermediary which may then also be responsible for the ongoing relationship with the borrower.
- 17 The Wholesale Lenders n.e.c. series almost exclusively comprises securitisation vehicles (typically special purpose trusts), established to issue mortgage backed securities. It excludes commitments where a bank or permanent building society, acting as a wholesale provider of funds, is the lender on the loan contract. Those commitments are published as bank or permanent building society commitments.

REVISIONS

WHOLESALE LENDERS

WHOLESALE LENDERS continued

- **18** From July 1995 to July 2000, mortgage managers reported housing finance commitments on behalf of wholesale lenders. The introduction of wholesale lenders as the reporting unit does not change the scope of the collection, but has increased its coverage. This, along with the reclassification of some lending activity, increased the level of the Wholesale Lenders n.e.c. series for owner occupied housing by \$249m in July 2000.
- **19** Wholesale lenders contribute to the Non-Banks series for owner occupied housing, which is seasonally adjusted in table 3. A trend break was added to the Non-Banks series, shifting the trend up by 1,579 commitments and \$178m in July 2000. Revisions related to the introduction of wholesale lenders also resulted in a downward shift in the Banks' trend for owner occupied housing of 1,256 commitments and \$167m. Consequential breaks in the finance purpose trend series for owner occupied housing at July 2000 were:
  - construction finance trend shifted down 16 commitments (\$3m)
  - new dwelling finance trend shifted up 26 commitments (\$1m)
  - established dwelling finance trend shifted up 313 commitments (\$13m)
  - refinancing trend shifted up 177 commitments (\$17m)
  - total finance trend shifted up 323 commitments (\$11m).
- **20** Because of difficulties experienced by Wholesale Lenders n.e.c. in accurately identifying first home buyers in their commitments, these data are not used in estimating first home buyer commitments (table 9). Instead, from July 2000, the percentage of first home buyer commitments made by all banks and permanent building societies is applied to total Wholesale Lenders n.e.c. commitments to calculate their contribution to the First Home Buyers series. As a result, first home buyer commitments were revised upwards by 0.8 percentage points in July 2000.
- **21** An article on the introduction of the Wholesale Lenders n.e.c. series (including implications for the First Home Buyers series) featured in the October 2000 issue of this publication. A copy of the article is available from the contact person listed on the front of the publication.

SEASONAL ADJUSTMENT

- 22 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation and 'trading day effects'. A 'trading day effect' reflects the varying amounts of activity on different days of the week and the different number of days of the week in any month (i.e. the number of Sundays, Mondays, etc.). This effect may be partly caused by the reporting practices of the lenders. Adjustment is also made for Easter which may affect the March and April estimates differently. Trading day effects are removed from the original estimates prior to the seasonal adjustment process. Seasonal adjustment does not remove the effect of irregular or non-seasonal influences (e.g. a change in interest rates) from the series.
- **23** Over the period from early 1990 to April 1995, four of the major banks changed from reporting for the four or five weeks ending on the last Wednesday of each month to reporting on a calendar month basis. The published seasonally adjusted data take account of this change in pattern.
- **24** Rapid change in the financial sector, and particularly developments in the provision of housing finance, may cause changes in the seasonal and trading day patterns of the housing finance data. Examples include changes in the classification of financial institutions (particularly the reclassification of non-bank financial institutions to banks) and the increased use of mortgage securitisation.
- **25** Estimation of seasonal adjustment and trading day factors that reflect the full effect of recent developments is not possible until a sufficient number of years of data have been collected. When changes are occurring in the seasonal patterns, larger revisions to the seasonally adjusted series can be expected at the time of the annual seasonal re-analysis. Accordingly, the trend estimate data provide a more reliable indicator of

SEASONAL ADJUSTMENT continued

underlying movement in housing finance commitments. (See paragraphs 29 and 30 for further information on trend estimates).

- **26** State component series have been seasonally adjusted independently of the Australian series. The sum of the state components is therefore unlikely to equal the corresponding Australian total. State component series are also affected by the changes mentioned in paragraphs 22 to 25.
- 27 The housing finance series uses a concurrent seasonal adjustment methodology to derive the seasonal adjustment factors. This means that original estimates available at the current reference month are used to estimate seasonal factors for the current and previous months. As a result of this methodology, the seasonally adjusted and trend estimates for earlier periods can be revised each month. However, in most instances, the only noticeable revisions will be to the previous month and the same month a year ago.
- 28 The best seasonally adjusted estimates are achieved only some years after corresponding original estimates have been released. However, this does not satisfy the demand for timely seasonally adjusted estimates. The ABS advises users that while every effort is made to achieve the highest possible quality of seasonally adjusted estimates, given the available original estimates and preset publication deadlines, revisions to these seasonally adjusted estimates are inevitable and generally indicate improvements to those estimates. The use of the concurrent seasonal adjustment approach means that revisions, and therefore quality improvements, are identified earlier than under the previously used forward factor method. Under the concurrent approach, revisions are made up to one year earlier than under the forward factor approach.
- 29 Smoothing seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all but the last six months of the respective seasonally adjusted series. Trend series are created for the last six months by applying surrogates of the Henderson moving average to the seasonally adjusted series. For further information, refer to *Information Paper: A Guide to Interpreting Time Series—Monitoring Trends: An Overview* (cat. no. 1349.0) or contact the Assistant Director, Time Series Analysis on Canberra (02) 6252 6345 or by email at <timeseries@abs.gov.au>.
- **30** While the smoothing technique described in paragraph 29 enables trend estimates to be produced for the latest few months, it does result in revisions to the trend estimates as new data become available. Generally, revisions become smaller over time and, after three months, usually have a negligible impact on the series. Changes in the original data and re-estimation of seasonal factors may also lead to revisions to the trend.
- **31** Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Percentage changes in this publication have been derived from unrounded data.
- **32** Estimates for months prior to those shown in this publication and more detailed series can be purchased in spreadsheet format from the ABS web site see listing on pages 3 and 4. For more information, contact the ABS National Information and Referral Service on 1300 135 070.
- **33** Other ABS publications which may be of interest are outlined below. Please note, older publications may no longer be available through ABS bookshops but are available through ABS libraries. All publications released from 1998 onwards are available on the ABS web site <a href="http://www.abs.gov.au">http://www.abs.gov.au</a> (charge apply):

RELATED PRODUCTS continued

- Assets and Liabilities of Australian Securitisers (cat. no. 5232.0.55.001) issued quarterly
- Buildings Approvals, Australia (cat. no. 8731.0) issued monthly
- Dwelling Unit Commencements, Australia, Preliminary (cat. no. 8750.0) issued monthly.
- **34** Quarterly data prior to the March 2002 for housing loan outstandings by type of lending institution are available as a priced special data report related to the *Australian National Accounts: Financial Accounts* (cat. no. 5232.0). Inquiries regarding this special data report should be made to the contact on the front cover of this publication.
- **35** In addition, the Reserve Bank of Australia produces the monthly *Reserve Bank of Australia Bulletin* as well as data on its web site. *Bulletin* tables D1 & D2 contain statistics on lending and credit aggregates (including the housing credit aggregate), which contain lending and credit to the private non-financial sector. Table D5 Bank Lending Classified by Sector contains statistics on lending to persons for the purpose of housing, also classified by owner-occupiers and investors with statistics available from January 1990.
- **36** Residential lending by building societies and credit cooperatives is also published in *Bulletin* tables B7 and B8. These statistics are also sourced from APRA collected data, although this will differ to statistics in table 12 of this publication since the *Bulletin* tables only include data for building societies and credit cooperatives with total assets greater than or equal to \$50 million. *Bulletin* table B.19 Securitisation Vehicles contains outstandings information for mortgage held, which includes both residential and non-residential mortgages.
- **37** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products*, *Australia* (cat. no. 1101.0). The *Catalogue* is available from any ABS office or the ABS web site <a href="http://www.abs.gov.au">http://www.abs.gov.au</a>. The ABS also issues a daily Release Advice on the web site which details products to be released in the week ahead.

### GLOSSARY

Alterations and additions

Alterations and additions cover all structural and non-structural changes which are integral to the functional and structural design of a dwelling. Examples are garages, carports, pergolas, reroofing, recladding, etc. Alterations and additions do not include swimming pools, ongoing repairs, or maintenance and home improvements which do not involve building work.

Average loan

The Average Loan series is calculated as follows:

Total value of lending commitments per month

Total number of dwellings financed per month

The Average Loan series does not necessarily represent the average loan size per dwelling. For instance, the average separately reflects first and second mortgages, committed in separate months, which apply to the same dwelling.

Commitment

A lending commitment is a firm offer of housing finance. It either has been, or is normally expected to be, accepted. Included are commitments to provide housing finance to employees and commitments accepted and cancelled in the same month.

Commitments not advanced

Commitments not advanced at the end of the month are calculated as follows:

Balance of unadvanced commitments at the end of the previous month

- + Total new housing commitments (including refinancing)
- + Alterations and additions
- = Total commitments
- Cancellations of commitments
- Commitments advanced during the month
- = Commitments not advanced at the end of the month

Commitment value

The commitment value for a contract of sale is the dwelling's sale value less any deposit.

Construction of dwellings

Construction of dwellings represents commitments made to individuals to finance, by way of progress payments, the construction of owner occupied dwellings.

Dwelling

A dwelling is a single self-contained place of residence such as a detached or semidetached house, a terrace house, a flat, home unit, town house, etc.

**Dwellings** units

Dwelling units refer to the number of single self-contained residences for which commitments have been made, either on the security of first mortgage or on contract of sale.

Established dwelling

An established dwelling is one which has been completed for 12 months or more prior to the lodgement of a loan application, or which has been previously occupied.

First home buyers

First home buyers are persons entering the home ownership market for the first time.

Fixed loans

Generally involve:

- a commitment for a fixed amount for a fixed period for a specific purpose
- a schedule of repayments over a fixed period and
- repayments which reduce the liability of the borrower but do not act to make further finance available.

Fixed rate loan

Fixed rate loans have a set interest rate which cannot be varied, either upward or downward, for a minimum period of two years. Capped loans are not categorised as fixed rate loans because their interest rate can vary within a two year period.

**Housing Loan Outstandings** 

The value of outstanding housing loans to Australian households as at a particular point in time (for statistics in this publication this refers to the end of the reference month). A loan is a defined as an asset of a lending institution, which is not evidenced by the issuing of a security by the borrower.

### **GLOSSARY** continued

New dwelling

A new dwelling is one that has been completed within 12 months of the lodgement of a loan application, and the borrower will be the first occupant.

Other lenders n.e.c.

Comprises all lenders that are not banks, permanent building societies, credit cooperatives or securitisation vehicles. Includes life or general insurance companies, superannuation funds, government housing schemes, housing cooperatives, registered financial corporations and other financial institutions.

Refinancing

For investment housing finance, it represents a commitment to refinance an existing loan. For secured housing finance for owner occupation, only those loans where the refinancing lender is not the original lender and the security is unchanged are included. The refinancing of a loan to fund a change of residence is treated as a new lending commitment.

Revolving credit

Generally has the following characteristics:

- a commitment for a credit or borrowing limit is given for a specific period after which the commitment is reviewed
- the extent of the borrowing used at any time during the period may be for any amount up to the authorised limit; and
- repayments (other than of charges and interest) made during the period reduce the extent of the borrowing used and thereby increase the amount of unused credit available up to the authorised limit. Examples include credit cards, lines of credit and approved overdrafts.

Secured housing finance

This is all secured commitments to individuals for the construction or purchase of dwellings for owner occupation, regardless of type of security. Commitments for dwellings that will be occupied by persons other than the owner(s) are excluded.

Securitisation vehicle

Special purpose vehicles (generally trusts) that issue mortgage backed securities, which are debt securities secured by specific pools of mortgages and repaid from the cash flows (principal and interest payments) of the specific mortgage pool.

Self-contained

The dwelling includes bathing and cooking facilities.

Wholesale lenders

A wholesale lender provides funds to borrowers through a retail intermediary which may then also be responsible for the ongoing relationship with the borrower. The Wholesale Lenders n.e.c. (not elsewhere classified) series almost exclusively comprises securitisation vehicles (typically special purpose trusts) established to issue mortgage backed securities. It excludes funds provided where a bank or permanent building society, acting as a wholesale provider of funds, remains the lender on the contract. Those commitments are published as bank or permanent building society commitments.

## FOR MORE INFORMATION

INTERNET www.abs.gov.au the ABS web site is the best place to

start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a

statistical profile.
