KEY POINTS

TREND ESTIMATES

- The housing finance trend series for June 2003 recorded a monthly increase of 1.5% and a 6.9% increase compared with June 2002.
- The construction finance trend series eased to a 1.6% increase in June 2003, while the newly erected dwelling trend rose by 1.4%.
- The established dwelling finance trend increased by 1.5% in June 2003.

SEASONALLY ADJUSTED ESTIMATES

- The seasonally adjusted total housing finance series rose 4.1% in June 2003 (8.8% increase compared with June 2002), with refinancing rising by 2.0% for the month. Newly erected dwelling finance rose by 0.6% in June 2003.
- Construction finance grew by 3.6%, after a 1.8% fall the previous month.
- Established dwelling finance increased by 4.3% in June 2003.

ORIGINAL ESTIMATES

■ First home buyer commitments as a percentage of total commitments continued to fall to 13.9% in June 2003. This percentage represents a new series low after last month's record low of 14.2%. Just on 6.4% of all loans were fixed for two years or longer (down from 7.0% in May 2003).

HOUSING FINANCE SUMMARY OF FINDINGS

DWELLINGS FINANCED

Number financed including refinancing

The seasonally adjusted housing finance series continued its recent growth, increasing by 4.1% in June 2003 following a 5.2% increase in May 2003. The increase for the year compared with June 2002 was 8.8%. The trend series increased by 1.5% in June 2003, continuing the increases of the past year (6.9% increase compared with June 2002).

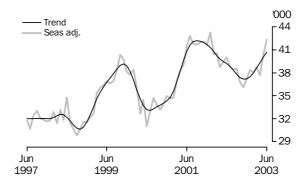

Increases were recorded in seasonally adjusted terms for Queensland (777,7.0), Victoria (673, 5.5%), NSW (517, 3.0), WA (302, 4.3%) and Tasmania (162, 14.1%). However, there were decreases in South Australia (-333, -6.8%), NT (-26, -5.4%) and ACT (-1, -0.1%). In trend terms, most States increased steadily, with the ACT being the exception (down 0.3%).

In the original series, the percentage of commitments to first home buyers fell again in June 2003, to 13.9% of all commitments. This percentage is at a new series low from last month's record low of 14.2%.

Number financed excluding refinancing

The seasonally adjusted series increased by 4.9% in June 2003, following a 7.1% increase in May. The trend series increased by 1.6%, continuing the run of steady increases since December 2002.

Value of commitments

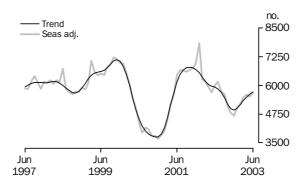

The seasonally adjusted series for the total value of commitments grew by 5.1% in June 2003, continuing the growth from December 2002 (up 23.1% compared with June 2002).

The trend series grew by 2.5% in June 2003 (up 20.2% compared with June 2002).

PURPOSE OF FINANCE

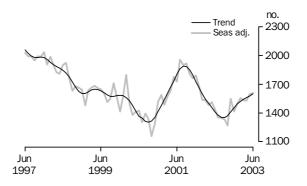

Construction of dwellings

The seasonally adjusted construction finance series climbed by 3.6% in June 2003. The trend series increased by 1.6% in June, continuing the increase evident so far in 2003.

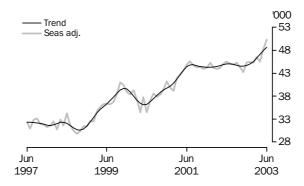

Purchase of new dwellings

Newly erected dwelling finance increased 0.6% (seasonally adjusted) in June 2003, while the trend increased by 1.4%. The trend figure for June 2003 was 13.1% higher than the level of June 2002.

Purchase of established dwellings

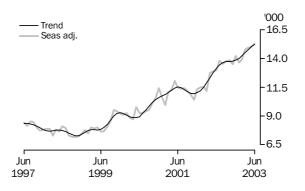

The seasonally adjusted established dwelling finance series increased by 4.3% in June 2003. The trend series grew by 1.5% in June 2003 (8.1% compared with June 2002).

HOUSING FINANCE SUMMARY OF FINDINGS continued

Refinancing

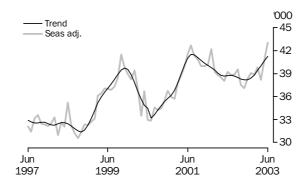

The number of seasonally adjusted refinancing commitments rose by 2.0% in June 2003, making June the fifth month of growth. Trend growth in June 2003 was 1.2% (15.9% increase since June 2002).

TYPE OF LENDER

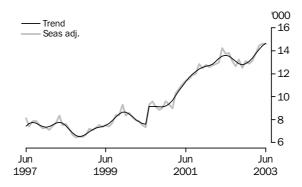

Banks

Bank activity strengthened in June 2003 for the second month in a row. The seasonally adjusted series for banks increased by 5.6% in June (after an increase of 6.6% in May 2003), while the trend series increased by 1.5%.

Non-banks

Seasonally adjusted non-bank commitments fell by 0.1% in June 2003 after rising by 1.3% in May. Permanent building society commitments rose by 10.3%, or 224 commitments, while other non-bank lending activity rose by 209 (or 2.4%). The non-bank trend series grew by 1.7% in June 2003.

EFFECT OF NEW SEASONALLY ADJUSTED ESTIMATES ON TREND ESTIMATES

SENSITIVITY ANALYSIS

Readers should exercise care when interpreting the trend estimates of recent months because they will be revised when next month's seasonally adjusted estimates become available. For further information, see paragraphs 20 to 21 in the Explanatory Notes.

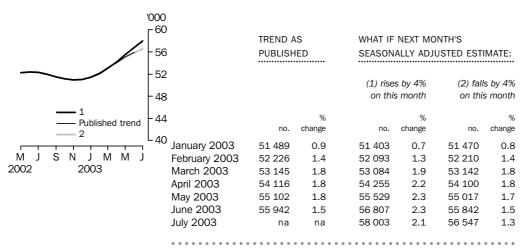

The graph below presents the effect of two possible scenarios on the previous trend estimates:

1 The July 2003 seasonally adjusted estimate of number of dwellings financed is higher than the June 2003 seasonally adjusted estimate by 4.0%.

2 The July 2003 seasonally adjusted estimate of number of dwellings financed is lower than the June 2003 seasonally adjusted estimate by 4.0%.

The percentage change of 4.0% was chosen because the average absolute percentage change of the seasonally adjusted series, based on the last 10 years of data, has been 4.0%.

NUMBER OF DWELLINGS FINANCED

na not available

EXPLANATORY NOTES

INTRODUCTION

1 This publication presents statistics of secured housing finance commitments made by significant lenders to individuals. The commitments are for the construction or purchase of owner occupied dwellings. Commitments for the purchase of land, or for the construction or purchase of dwellings for rent or resale, are excluded and shown in *Lending Finance, Australia* (cat. no. 5671.0).

SCOPE

- **2** Finance commitments made by the following types of lenders are included:
- Banks
- Permanent building societies
- Credit unions/co-operative credit societies
- Life or general insurance companies
- General government enterprises
- Superannuation funds
- Securitisers of mortgage assets (wholesale lenders) which provide funds to borrowers through a retail intermediary (e.g. mortgage originators)
- Other Registered Financial Corporations.
- **3** All lending commitments are classified to the lender type which is (or will be) the legal lender on the corresponding loan contract. Commitments are published for four lender types: Banks, Non-Banks, Permanent Building Societies and Wholesale Lenders n.e.c. (not elsewhere classified).
- 4 The statistics cover all banks and permanent building societies. The largest of the remaining lenders of secured housing finance for owner occupation are included so that, together with banks and building societies, at least 95% of the Australian total of finance commitments for owner occupied housing is covered, and at least 90% of each state total is covered. While many smaller contributors to the Non-Banks series are excluded under these coverage criteria, at least 70% of finance commitments by wholesale contributors are covered.
- **5** An annual collection is conducted to maintain and update the survey coverage. New lenders are included as their lending for owner occupied housing becomes sufficiently large.
- **6** From June 2001, the collection covers all commitments by banks and permanent building societies, all other lenders providing funds of more than \$50m in 2000, and some additional smaller other lenders where necessary to maintain collection coverage (as specified in paragraph 4).
- **7** Revisions to previously published statistics are included in the publication as they occur.
- **8** Changes in the classification of lenders (e.g. the conversion of a permanent building society to a bank) are reflected in the Lender series from the month of such change. Data for earlier periods for such lenders are not reclassified. Details of the establishment of new banks are published in the Reserve Bank of Australia's monthly *Bulletin* in the section on Technical Notes to Tables.
- **9** A wholesale lender provides funds to borrowers through a retail intermediary which may then also be responsible for the on-going relationship with the borrower.
- **10** The Wholesale Lenders n.e.c. series almost exclusively comprises securitisation vehicles (typically special purpose trusts), established to issue mortgage backed securities. It excludes commitments where a bank or permanent building society, acting as a wholesale provider of funds, is the lender on the loan contract. Those commitments are published as bank or permanent building society commitments.

COVERAGE

REVISIONS

WHOLESALE LENDERS

WHOLESALE LENDERS continued

- **11** From July 1995 to July 2000, mortgage managers reported housing finance commitments on behalf of wholesale lenders. The introduction of wholesale lenders as the reporting unit does not change the scope of the collection, but has increased its coverage. This, along with the reclassification of some lending activity, increased the level of the Wholesale Lenders n.e.c. series by \$249m in July 2000.
- **12** Wholesale lenders contribute to the Non-Banks series, which is seasonally adjusted in table 3. A trend break was added to the Non-Banks series, shifting the trend up by 1 579 commitments and \$178m in July 2000. Revisions related to the introduction of wholesale lenders also resulted in a downward shift in the Banks' trend of 1 256 commitments and \$167m. Consequential breaks in the finance purpose trend series at July 2000 were:
 - construction finance trend shifted down 16 commitments (\$3m)
 - new dwelling finance trend shifted up 26 commitments (\$1m)
 - established dwelling finance trend shifted up 313 commitments (\$13m)
 - refinancing trend shifted up 177 commitments (\$17m)
 - total finance trend shifted up 323 commitments (\$11m).
- 13 Because of difficulties experienced by Wholesale Lenders n.e.c. in accurately identifying first home buyers in their commitments, these data are not used in estimating first home buyer commitments (table 9). Instead, from July 2000, the percentage of first home buyer commitments made by all banks and permanent building societies is applied to total Wholesale Lenders n.e.c. commitments to calculate their contribution to the First Home Buyers series. As a result, first home buyer commitments were revised upwards by 0.8 percentage points in July 2000.
- **14** An article on the introduction of the Wholesale Lenders n.e.c. series (including implications for the First Home Buyers series) featured in the October 2000 issue of this publication. A copy of the article is available from the contact person listed on the front of the publication.

SEASONAL ADJUSTMENT

- **15** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation and 'trading day effects'. A 'trading day effect' reflects the varying amounts of activity on different days of the week and the different number of days of the week in any month (i.e. the number of Sundays, Mondays, etc.). This effect may be partly caused by the reporting practices of the lenders. Adjustment is also made for Easter which may affect the March and April estimates differently. Seasonal adjustment does not remove the effect of irregular or non-seasonal influences (e.g. a change in interest rates) from the series.
- 16 Over the period from early 1990 to April 1995, four of the major banks changed from reporting for the 4 or 5 weeks ending on the last Wednesday of each month to reporting on a calendar month basis. The published seasonally adjusted data take account of this change in pattern.
- **17** Rapid change in the financial sector, and particularly developments in the provision of housing finance, may cause changes in the seasonal and trading day patterns of the housing finance data. Examples include changes in the classification of financial institutions (particularly the reclassification of non-bank financial institutions to banks) and the increased use of mortgage securitisation.
- **18** Estimation of seasonal adjustment and trading day factors that reflect the full effect of recent developments is not possible until a sufficient number of years of data have been collected. When changes are occurring in the seasonal patterns, larger revisions to the seasonally adjusted series can be expected at the time of the annual seasonal re-analysis. Accordingly, the trend estimate data provide a more reliable indicator of

EXPLANATORY NOTES continued

SEASONAL ADJUSTMENT continued

underlying movement in housing finance commitments. (See paragraphs 20 and 21 for further information on trend estimates).

19 State component series have been seasonally adjusted independently of the Australian series. The sum of the state components is therefore unlikely to equal the corresponding Australian total. State component series are also affected by the changes mentioned in paragraphs 15 to 18.

TREND ESTIMATES

- **20** Smoothing seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13 term Henderson-weighted moving average to all but the last six months of the respective seasonally adjusted series. Trend series are created for the last six months by applying surrogates of the Henderson moving average to the seasonally adjusted series. For further information, refer to *Information Paper: A Guide to Interpreting Time Series—Monitoring Trends: An Overview* (cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on Canberra 02 6252 6345 or by email at <timeseries@abs.gov.au>.
- **21** While the smoothing technique described in paragraph 20 enables trend estimates to be produced for the latest few months, it does result in revisions to the trend estimates as new data become available. Generally, revisions become smaller over time and, after three months, usually have a negligible impact on the series. Changes in the original data and re-estimation of seasonal factors may also lead to revisions to the trend.

EFFECTS OF ROUNDING

22 Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Percentage changes in this publication have been derived from unrounded data.

ABS DATA AVAILABLE ON REQUEST

23 Estimates for months prior to those shown in this publication and more detailed series can be purchased in spreadsheet format from the ABS web site - see listing in Appendix, page 20. For more information, contact the ABS National Information and Referral Service on 1300 135 070.

RELATED RELEASES

By purpose and lender: Australia, Original (Average loan size - \$'000)

GLOSSARY

Alterations and additions

Alterations and additions cover all structural and non-structural changes which are integral to the functional and structural design of a dwelling. Examples are garages, carports, pergolas, reroofing, recladding, etc. Alterations and additions do not include swimming pools, ongoing repairs, or maintenance and home improvements which do not involve building work.

Average loan

The Average Loan series is calculated as follows:

Total value of lending commitments per month Total number of dwellings financed per month

The Average Loan series does not necessarily represent the average loan size per dwelling. For instance, the average separately reflects first and second mortgages, committed in separate months, which apply to the same dwelling.

Commitment

A lending commitment is a firm offer of housing finance. It either has been, or is normally expected to be, accepted. Included are commitments to provide housing finance to employees and commitments accepted and cancelled in the same month.

Commitments not advanced

Commitments not advanced at the end of the month are calculated as follows:

Balance of unadvanced commitments at the end of the previous month

- + Total new housing commitments (including refinancing)
- + Alterations and additions
- = Total commitments
- Cancellations of commitments
- Commitments advanced during the month
- = Commitments not advanced at the end of the month

Commitment value

The commitment value for a contract of sale is the dwelling's sale value less any deposit.

Construction of dwellings

Construction of dwellings represents commitments made to individuals to finance, by way of progress payments, the construction of owner occupied dwellings.

Dwelling

A dwelling is a single self-contained place of residence such as a detached or semi-detached house, a terrace house, a flat, home unit, town house, etc.

Dwellings units

Dwelling units refer to the number of single self-contained residences for which commitments have been made, either on the security of first mortgage or on contract of sale.

Established dwelling

An established dwelling is one which has been completed for 12 months or more prior to the lodgement of a loan application, or which has been previously occupied.

First home buyers

First home buyers are persons entering the home ownership market for the first time.

Fixed rate loan

Fixed rate loans have a set interest rate which cannot be varied, either upward or downward, for a minimum period of two years. Capped loans are not categorised as fixed rate loans because their interest rate can vary within a two year period.

New dwelling

A new dwelling is one that has been completed within 12 months of the lodgement of a loan application, and the borrower will be the first occupant.

Refinancing

Refinancing represents a commitment to refinance an existing loan where the refinancing lender is not the lender who made the original loan. Excluded are an institution's refinancing of its own loans and the refinancing of loans to fund a change of residence. The latter is treated as a new lending commitment.

Secured housing finance

This is all secured commitments to individuals for the construction or purchase of dwellings for owner occupation, regardless of type of security. Commitments for dwellings that will be occupied by persons other than the owner(s) are excluded.

Self-contained

The dwelling includes bathing and cooking facilities.

GLOSSARY continued

Wholesale lenders

A wholesale lender provides funds to borrowers through a retail intermediary which may then also be responsible for the ongoing relationship with the borrower. The Wholesale Lenders n.e.c. (not elsewhere classified) series almost exclusively comprises securitisation vehicles (typically special purpose trusts) established to issue mortgage backed securities. It excludes funds provided where a bank or permanent building society, acting as a wholesale provider of funds, remains the lender on the contract. Those commitments are published as bank or permanent building society commitments.
