EXPLANATORY NOTES

Introduction

This publication presents statistics on the assets and liabilities of common funds at the end of each quarter. The statistics have been compiled from returns furnished by trustee companies (the managers of common funds) as part of the quarterly Survey of Financial Information.

Scope

Trustee companies manage all common funds. A trustee company is any company which is listed in the relevant State Trustee Companies Act.

Common funds were established in the early 1960s in accordance with appropriate State legislation to enable trustee companies to combine depositors' funds and other funds held in trust in an investment pool, and invest the funds in specific types of securities and/or assets.

Cash common and other types of common funds have the same investment strategy and economic functions as cash management trusts and public unit trusts. However they do not operate in the same manner, in that they do not issue units, nor do they necessarily issue prospectuses.

All the assets and liabilities of all common funds are within scope of the statistics in this publication. However cross-investment between common funds is excluded and data are presented on a consolidated basis.

Coverage

All common funds operating in Australia are included in the statistics in this publication. At the end of June 2002 there were 13 trustee companies operating 51 common funds throughout Australia.

Common funds can be further classified by their primary investment asset. The types of common funds covered in this publication are:

Cash funds - are limited by the provisions of the relevant Act or prospectus to invest in a limited class of investments which are short term in nature;

Equity funds - established to primarily invest in shares;

Mortgage funds - established to primarily invest in mortgages on real estate;

Property funds - established to primarily invest directly in property; and

Other funds - all other types of funds e.g. funds where the primary asset is interest bearing securities.

Basis of Valuation

Respondents to the ABS quarterly survey are requested to report assets and liabilities at market values.

Assets in Australia/overseas

Assets in Australia include land and buildings located in Australia and financial claims on residents. Assets overseas include land and buildings located overseas and financial claims on non-residents. A resident is any person, corporation or other entity permanently domiciled in Australia, except that foreign embassies, consulates and military establishments are classified as non-resident. A non-resident is any person, corporation or other entity permanently domiciled overseas. Entities located in Australia which are owned by non-residents are classified as residents of Australia (e.g. a branch or subsidiary of an overseas company). Overseas branches or subsidiaries of Australian companies are classified as non-resident.

Financial instruments

The classification of financial instruments in this publication follows that contained in the ABS publication, Australian National Accounts- Financial Accounts, Australia (5232.0). A definition of these instruments is contained in that publication.
