JANUARY KEY POINTS

HOUSING FINANCE FOR OWNER OCCUPATION

- Growth in the trend estimate for the value of commitments for owner occupied housing continued to slow in January 2000, increasing only 0.8 percentage points to \$6 810 million.
- In January 2000, the seasonally adjusted value of owner occupied housing finance fell for the third consecutive month, down 1.4% to \$6 531 million.

PERSONAL FINANCE

- Trend growth in the series for total personal finance commitments remained largely unchanged with an increase in January 2000 of only 0.2 percentage points to \$4 251 million.
- The seasonally adjusted estimate decreased by 4.7% to \$4 043 million in January, a result of the 7.1% fall in revolving credit commitments.

COMMERCIAL FINANCE

- The trend estimate of commercial finance commitments grew strongly in January 2000, increasing 4.2% to \$14 612 million. The rise was due to increases in both revolving credit (up 4.3%) and fixed lending commitments (up 4.1%).

LEASE FINANCE

- The seasonally adjusted estimate for total lease commitments increased 7.4% to \$731 million in January 2000 while the trend series continued to decline, falling 1.4% to \$692 million.

- For further information about these and related statistics, contact Karen Young on Sydney 02 9268 4784, or Client Services in any ABS office as shown on the back cover of this publication.

SUMMARY OF FINDINGS

HOUSING FINANCE FOR OWNER OCCUPATION

Still under the influence of an exceptionally high October 1999 seasonally adjusted estimate of \$7 024 million, the trend series for the value of housing finance commitments increased by 0.8%, although the rate of growth in the series has continued to decline over the last three months. The seasonally adjusted series fell for the third consecutive month, down 1.4% to \$6 531 million, causing downward trend revisions back to September 1999. Caution should be exercised when interpreting this estimate since, for some housing loan products, there is an increasing tendency to include components of finance for non-housing purposes.

For further information refer to *Housing Finance For Owner Occupation, Australia* (Cat. no. 5609.0)

PERSONAL FINANCE

Growth in the trend series for total personal finance commitments continued to slow in January 2000, increasing by only 0.2 percentage points to \$4 251 million. A second significant fall in the seasonally adjusted estimate (down 4.7% in January and 5.3% in December) has reversed the November 1999 increase of 10.0%, causing downward trend revisions back to September 1999.

Declining trend growth in both fixed lending (essentially unchanged this month) and revolving credit commitments (up only 0.3 percentage points) contributed to an overall slowing in growth in the trend series for total personal finance commitments (up only 0.2 percentage points). The second successive fall in the seasonally adjusted estimate for total personal finance commitments, down 4.7% in January, resulted largely from a significant decline in revolving credit commitments, down 7.1%, while fixed lending also continued to decline, falling 1.5% in January.

COMMERCIAL FINANCE

Growth in the trend series for total commercial finance commitments rose strongly in January 2000, increasing 4.2% to \$14 612 million. The rise results from increases in the trend series for both revolving credit commitments (up 4.3% to \$6 221 million) and fixed lending commitments, which rose 4.1% to \$8 391 million.

Readers should exercise caution when interpreting the seasonally adjusted data. For further information, see Explanatory Note 10.

LEASE FINANCE

Decline in the trend series for lease finance commitments continued in January 2000, falling for the eighth consecutive month to \$692 million (down 1.4%). This was despite a 7.4% increase in the seasonally adjusted estimate which rose for the first time since August 1999.

EXPLANATORY NOTES

SCOPE

1 Commitments made by the following types of lenders are included in these statistics:

- Banks;
- Permanent building societies;
- Credit unions/co-operative credit societies;
- Life or general insurance companies;
- General government enterprises;
- Organisations raising funds through the secondary mortgage market for approved home buyers under State government housing schemes;
- Superannuation funds;
- Other corporations registered under the *Financial Corporations Act 1974*; and
- Other providers of consumer finance registered with State credit tribunals, including mortgage managers.

COVERAGE

2 The statistics cover significant lenders only. Significant lenders account in aggregate for at least 95% of the Australian total and at least 90% of each State total of the value of commitments for secured housing finance for owner occupation, other personal finance, commercial finance and lease finance, each calculated separately.

3 An annual collection is conducted to maintain coverage of significant lenders. In addition, new lenders are included in the series as their level of lending becomes significant. All banks qualify as significant lenders and are therefore included.

CATEGORIES OF LENDING FINANCE

4 *Secured housing finance for owner occupation* is secured finance to individuals for purchase or construction of dwellings for owner occupation, and for alterations and additions to existing owner-occupied dwellings. Refinancing, involving a change of lender, is also included.

5 *Personal finance* is finance provided to individuals for their personal, non-business, use. Both fixed loans and revolving credit finance are included; secured housing finance and loans for investment purposes are excluded.

6 *Commercial finance* is finance provided to individuals and corporations for business or investment purposes. Fixed loans, revolving credit and commercial hire purchase are included.

7 *Lease finance* includes finance and leverage leases. Operating lease finance data, though excluded, is available from the ABS on request.

REVISIONS

8 Revisions to previously published statistics are included as they occur.

SEASONAL ADJUSTMENT

9 Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation and 'trading day effects' (arising from the varying amounts of activity on different days of the week and the varying reporting practices of the lenders). Adjustment is also made for Easter which may affect the March and April estimates differently. Seasonal adjustment does not remove the effect of irregular or non-seasonal influences (for example, a change in interest rates) from the series.

EXPLANATORY NOTES

SEASONAL ADJUSTMENT *continued*

10 There is some evidence that a change may be occurring in the seasonal patterns of both the fixed and revolving credit components of the commercial finance series. When changes are occurring in the seasonal patterns, larger revisions to the seasonally adjusted series can be expected at the time of the annual seasonal re-analysis. A number of years of data is required before changes in seasonal patterns are fully reflected in the seasonally adjusted series. In these circumstances, especially, the trend estimate is a more reliable indicator of underlying movements in the series, although it should be recognised that the more volatile the seasonally adjusted series, the larger the monthly revisions which can be expected in the most recently published trend series estimates.

TREND ESTIMATES

11 Smoothing seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months of the respective seasonally adjusted series except the last six months. Trend series are created for the last six months by applying surrogates of the Henderson moving average to the seasonally adjusted series. For further information, refer to *A Guide to Interpreting Time Series—Monitoring ‘Trends’: an Overview* (Cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on Canberra (02) 6252 6345.

12 While the smoothing technique described in paragraph 11 enables trend estimates to be produced for the latest few months, it does result in revisions to the trend estimates as new data become available. Generally, revisions become smaller over time and, after three months, usually have a negligible impact on the series. Changes in the original data and re-estimation of seasonal factors may also lead to revisions to the trend.

RELATED PUBLICATIONS

13 Users may also wish to refer to the following publications:

- *Building Activity Australia: Dwelling Unit Commencements* (Cat. no. 8750.0)
- *Building Approvals, Australia* (Cat. no. 8731.0)
- *Housing Finance for Owner Occupation, Australia* (Cat. no. 5609.0)
- *Private New Capital Expenditure and Expected Expenditure, Australia* (Cat. no. 5625.0)
- *New Motor Vehicle Registrations, Australia: Preliminary* (Cat. no. 9301.0)

14 Users may also wish to refer to the *Reserve Bank of Australia, Bulletin* for further information on the lending position of banks and other financial institutions.

UNPUBLISHED DATA

15 Estimates for months prior to those shown in this publication and more detailed commitment series by purpose, type of facility and industry are available. There may be a charge for this information, depending on the volume of data requested.

16 Detailed data are also available from PC Ausstats, the ABS on-line time series data service under the subject *Financial Surveys*, then the titles *Housing Finance for Owner Occupation*, *Personal Finance*, *Commercial Finance* and *Lease Finance*.

EXPLANATORY NOTES

EFFECTS OF ROUNDING	17 Where figures have been rounded, discrepancies may occur between sums of the component items and totals.
SYMBOLS AND OTHER USAGES	n.a. not available n.p. not available for publication but included in totals where applicable n.y.a. not yet available

G L O S S A R Y

Agricultural machinery and equipment	Includes tractors, tillage implements, seeding planting and fertilising equipment, agricultural mowers, harvesters, etc.
Alterations and additions	Comprise all structural and non-structural changes which are integral to the functional and structural design of a dwelling. Examples are garages, carports, pergolas, reroofing, recladding, etc. Alterations and additions do not include swimming pools, ongoing repairs, or maintenance and home improvements which do not involve building work.
Commitment	A lending commitment is a firm offer of finance. It either has been, or is normally expected to be, accepted. Commitments accepted and cancelled in the same month are included. Commitments to non-residents are excluded.
Construction and earth moving equipment	Includes concrete mixers and pumpers, dozers, graders, mobile cranes, crawler tractors, dumpers, road rollers, earth packers, scarifiers, rippers, etc.
Construction of dwellings	For secured housing finance, comprises commitments made to individuals to finance, by way of progress payments, the construction of owner-occupied dwellings.
Debt consolidation	For personal finance, comprises commitments whose principle purpose is to consolidate and pay out amounts owing by the borrower to third parties.
Dwelling	Is a place of residence such as a house, semi-detached house, flat, home unit, town house, terrace house, etc. which includes bathing and cooking facilities.
Electronic data processing equipment	Includes computers, computer peripherals, data entry devices, word processing machines, etc.
Established dwelling	Is a dwelling which has been completed for more than 12 months prior to the lodgement of a loan application, or which has been previously occupied.
Finance lease	A finance lease refers to the leasing or hiring of tangible assets under an agreement, other than a hire purchase agreement, which transfers from the lessor to the lessee substantially all the risks and benefits incident to ownership of the asset without transferring the legal ownership.
Fixed loan facilities	Fixed loan facilities generally involve: <ul style="list-style-type: none"> ▪ a commitment for a fixed amount for a fixed period for a specific purpose; ▪ a schedule of repayments over a fixed period; and ▪ repayments which reduce the liability of the borrower but do not act to make further finance available.
Heavy trucks	Comprises all vehicles with a gross combination mass rating in excess of 3.5 tonnes, including prime movers registered without trailers.
Light trucks	Comprises vehicles constructed primarily for the carriage of goods which do not exceed 3.5 tonnes gross vehicle mass such as utilities, panel vans, trucks, cab-chassis, forward control vans and four-wheel drives used to carry goods.
Manufacturing equipment	Includes all plant and equipment used in the manufacture of goods except motor vehicles such as forklifts, work trucks and tractors.
Motor cars and station wagons	Includes cars, station wagons, four-wheel drive and forward control passenger vehicles with up to nine seats (including the driver).

G L O S S A R Y

Motor cycles	Includes two and three wheeled motor cycles and mopeds, scooters and motor cycles with side cars.
Newly erected dwelling	A new dwelling that has been completed within 12 months of the lodgement of a loan application, and the borrower will be the first occupant.
Office machines	Includes telephone systems (including PABX equipment), facsimile machines, cash registers, photocopiers, etc.
Purpose	The purpose of the loan is that specified by the borrower. Where possible multiple purpose loans are split and each component is reported in the appropriate purpose category; otherwise the whole loan is classified to the major purpose.
Refinancing	For personal and commercial finance, represents a commitment to refinance an existing loan. For secured housing finance, only those loans where the refinancing lender is not the original lender and the security is unchanged are included. The refinancing of a loan to fund a change of residence is treated as a new lending commitment.
Revolving credit facilities	Revolving credit facilities generally have the following characteristics: <ul style="list-style-type: none"> ▪ a commitment for a credit or borrowing limit is given for a specific period after which the commitment is reviewed; ▪ the extent of the borrowing used at any time during the period may be for any amount up to the authorised limit; and ▪ repayments (other than of charges and interest) made during the period reduce the extent of the borrowing used and thereby increase the amount of unused credit available up to the authorised limit. Examples include credit cards, lines of credit and approved overdrafts.
Secured credit limits	Includes overdrafts, lines of credit, credit cards etc. backed by a mortgage or other assets owned by the borrower.
Secured housing finance	This comprises all secured commitments to individuals for the construction or purchase of dwellings for owner occupation, regardless of type of security. Commitments for housing that will be occupied by persons other than the owner(s) are excluded.
Significant lenders	Significant lenders include, but are not restricted to, those lenders who, Australia wide during the calendar year 1998, committed funds of more than: <ul style="list-style-type: none"> ▪ \$103 million for Secured housing finance for owner-occupation; or ▪ \$74 million for Personal finance; or ▪ \$550 million for Commercial finance; or ▪ \$62 million for Lease finance.
Total credit limits at end of period	Comprises total approved credit limits available at the end of the reference month. In principle, this can be derived by adding new and increased lending commitments during the period less cancellations and reductions of credit limits during the period to the balance of credit limits at the end of the previous period. In practice, however, revisions and other adjustments such as the transfer of an existing fixed credit facility will mean that such a derivation is inexact.
Wholesale finance	Comprises finance for the purchase of goods by retailers and wholesalers.
