FEBRUARY KEY POINTS

TREND ESTIMATES

- The trend series for total domestic sales of Australian produced wine fell by 2.0% in February to 29.7 million litres. However, the trend estimate is 0.8% higher than February 1999.
- The trend estimate for white table wine decreased by 1.3% from the previous month and by 0.3% since February 1999.
- The trend estimate for red/rosé table wine rose by 0.1% on January 2000 and by 11.0% on February 1999.

SEASONALLY ADJUSTED ESTIMATES

- The seasonally adjusted estimate for total sales of Australian produced wine rose by 10.8% in February to 30.7 million litres. This is 5.3% higher than February 1999.
- The seasonally adjusted estimate for white table wine rose by 4.8% in February and by 2.2% since February 1999.
- The seasonally adjusted estimate for red/rosé rose by 10.6% on January 2000 and by 17.6% since February 1999.

ORIGINAL ESTIMATES

■ In original terms, 26.3 million litres of Australian produced wine was sold domestically by winemakers during February, up 60.2% on January 2000 and 8.4% on February 1999. The monthly rise reflected increases in both red table wine (73.4%) and white table wine (58.7%).

Australian Statistician

TABLE WINE, GLASS
CONTAINER < 2 LITRES

The February trend estimate for white table wine in glass containers less than 2 litres was up 4.3% on February 1999 and 16.6% on February 1997. Higher growth was recorded for the trend estimate for red/rosé table wine in glass containers less than 2 litres, up 16.6% on February 1999 and 58.3% on February 1997.

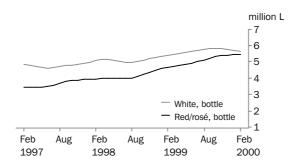

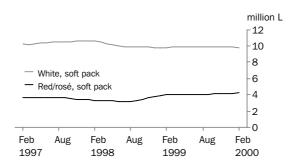

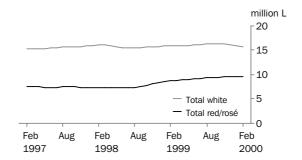

TABLE WINE, SOFT PACK CONTAINERS

The trend estimate in February for white table wine in soft packs has remained unchanged since February 1999 and fell by 4.2% since February 1997. The February estimate for red/rosé table wine in soft packs increased 5.4% on February 1999 and by 16.3% on February 1997.

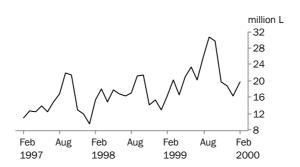

TOTAL WHITE AND RED/ROSÉ TABLE WINE

The trend estimate for the domestic sales of total white table wine has fallen 0.3% since February 1999 and by 3.1% since February 1997. The trend estimate for total red/rosé has increased by 11.0% since February 1999 and by 28.1% since February 1997.

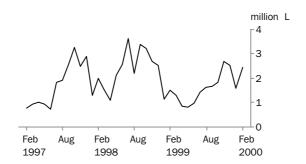

EXPORTS OF AUSTRALIAN PRODUCED WINE

Original data for exports in February shows that 19.8 million litres of Australian produced wine was exported. This volume is up 21.7% on January 2000 and by 22.1% on February 1999. The average value of Australian produced wine exported was \$5.25 per litre up on \$5.14 per litre in February 1999.

WINE IMPORTS CLEARED FOR HOME CONSUMPTION

Original data for February 2000 shows that 2.4 million litres of wine worth \$8.3 million was cleared for home consumption. This volume is up 51.8% on January 2000 and by 63.6% on February 1999. The average value of the wine cleared for home consumption in February 2000 was \$3.40 per litre down from \$4.63 per litre in February 1999.

DISPOSALS OF AUSTRALIAN PRODUCED WINE AND WINE AVAILABLE FOR CONSUMPTION IN AUSTRALIA

Original data for the December quarter of 1999 shows that wine available for consumption in Australia rose by 9.7% on the same quarter in 1998. An increase of 11.9% in domestic sales of Australian produced wine was partly offset by a 17.0% fall in the volume of wine imported. Total disposals of Australian produced wince increased by 19.3% over the same period in 1998 aided by a 34.3% rise in exports.

⁽a) Exports may include sales made by exporters other than winemakers. (b) Includes ships' stores.

EXPLANATORY NOTES

INTRODUCTION

1 The information shown in this publication for the domestic sales of Australian produced wine is obtained directly from winemakers by means of a mail collection. The brandy sales figures shown represent quantities on which excise duty was paid, i.e. the quantity of brandy released for sale. Statistics relating to import clearances and exports are based on information provided to the Australian Customs Service by importers, exporters and their agents.

SCOPE AND COVERAGE

- **2** The information on domestic sales of Australian produced wine is obtained from winemaking enterprises with sales of 250,000 litres or more in the previous financial year. These account for approximately 95% of total wine sales. All sales data are collected on an Australia-wide basis only and State figures are therefore not available.
- **3** Tables 1–3 include all sales by winemakers (within the scope of the collection) with the exception of exports, sales for ships' stores, sales of imported wine and brandy and inter-winery sales, the last exclusion being necessary to avoid duplication in the published figures. From July 1998 the definition for table wine in the glass container categories changed from '1 litre and under' to 'less than 2 litres'. This series has been retained as the contribution of the over 1 litre but under 2 litres containers (such as table wine in magnum sized bottles) is believed to have been less than 1%. There is an expectation this contribution will increase in the future. This has a consequential effect for the 'other containers' category which includes glass containers 2 litres and over from July 1998 (prior to this it was glass over 1 litre). This series will also be retained.

IMPORTS AND EXPORTS

- **4** Figures relating to international trade in wine and brandy are presented in tables 4–6 to provide a basis for assessing the overall wine market. Imports cleared for home consumption comprise those goods entered for home consumption, together with goods cleared from Customs warehouses. Exports of Australian produce are defined as exports of goods, materials or articles which have been produced, manufactured or partly manufactured in Australia.
- **5** The value of exports is the free on board (f.o.b.) transactions value of the goods expressed in Australian dollars. The ABS converts foreign currency f.o.b. values to Australian dollars using the exchange rate prevailing on the date of departure shown on the export manifest.
- **6** The value of imports is the Australian Customs value. Goods are valued at the point of containerisation (in most cases) or the port of shipment, or at the customs frontier of the exporting country, whichever comes first.
- **7** For further information on the compilation of Trade Statistics refer to explanatory notes contained in *International Merchandise Trade*, *Australia* (Cat. no. 5422.0).

SEASONALLY ADJUSTED AND TREND ESTIMATES

- **8** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences can be more clearly recognised. Seasonal adjustment does not remove from the series the effect of irregular influences (e.g. abnormal weather and industrial disputes).
- **9** The seasonally adjusted estimates in this publication have been produced using a concurrent methodology whereby the seasonal factors are revised each month to take into account the seasonality exhibited by the latest observation. A more detailed review is conducted annually.

EXPLANATORY NOTES

SEASONALLY ADJUSTED AND TREND ESTIMATES continued

- 10 The overall degree of revision to the seasonally adjusted estimates is expected to be less on average than would be the case with annual reanalysis only. However, the nature of the seasonal adjustment process is such that the magnitude of some revisions resulting from each adjustment may be quite significant, especially towards the end of the series. For this reason additional care should be exercised when interpreting movements in seasonally adjusted data for recent months.
- **11** The smoothing of seasonally adjusted series to create trend estimates is a means of reducing the impact of the irregular component of the series. The trend estimates of wine sales have been derived by applying a 13–term Henderson weighted moving average to the seasonally adjusted series.
- **12** For further information, see *A Guide to Interpreting Time Series—Monitoring 'Trends', an Overview* (Cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on (02) 6252 6345.

ACKNOWLEDGMENT

13 ABS publications draw extensively on information provided freely by individuals, businesses, governments and other organisations. Their continued cooperation is very much appreciated: without it, the wide range of statistics published by the ABS would not be available. Information received by the ABS is treated in strict confidence as required by the *Census and Statistics Act 1905*.

RELATED PUBLICATIONS

- **14** Another ABS publication which may be of interest is the *Australian Wine and Grape Industry* (Cat. no. 1329.0). This is a statistical compendium of Australia's wine and grape industries containing information on: area of vines and production of grapes by region; wine production and grapes crushed by region; structure of the wine manufacturing industries; stocks of wine held by winemakers at 30 June; domestic wine sales; exports and imports of wine; price indexes of grapes and wine; consumption of wine and world comparisons.
- **15** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products Australia* (Cat. no. 1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (Cat. no. 1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

ROUNDING

16 Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

SYMBOLS AND OTHER USAGES

- nil or rounded to zero
- L litres
- L al litres of alcohol
- n.a. not available
- n.p. not available for separate publication (but included in totals where applicable)
- figure or series revised since previous issue
