# NOTES

#### FORTHCOMING ISSUES

ISSUE RELEASE DATE

March Quarter 2001 22 June 2001

#### INTRODUCTION

For the four quarters of 2000, the scope of the Survey of Tourist Accommodation (STA) has been expanded. Over this period the following accommodation sectors are included in the survey:

- hotels, motels, guest houses and serviced apartments with 15 or more rooms;
- holiday flats, units and houses operated by owners, managers or real estate agents who
  have sole letting rights to at least 15 flats, units or houses for short term letting;
- acaravan parks with 40 or more powered sites, cabins, etc; and
- visitor hostels with 25 or more bed spaces.

#### DATA NOTES

The 'takings from accommodation' data collected from 1 July 2000 is on a GST inclusive basis. Care should be taken when comparing takings data from September quarter 2000 onwards with takings from previous quarters.

Some instances where establishments have not included GST in 'takings from accommodation' have been identified. The ABS is currently investigating the extent of this under-reporting. If the under-reporting is found to be significant, revisions will be included in a future issue of this publication.

## HISTORICAL COMPARISONS

Statistics for hotels, motels, guest houses and serviced apartments are presented for the last 6 quarters to allow for comparison over time. However, data for caravan parks, holiday flats, units and houses and visitor hostels are compared with the corresponding period in 1997 when the data were last collected.

#### ANALYSES AND COMMENTS

HOTELS, MOTELS AND
SERVICED APARTMENTS

The number of in-scope establishments in the hotels, motels, guest houses and serviced apartments sectors of the tourist accommodation industry increased 1.3% in December quarter 2000 when compared with December quarter 1999. The number of serviced apartments showed the largest increase (up 7.7%).

Supply of guest rooms in Australian hotels and serviced apartments continued to increase with guest rooms in serviced apartments up 9.1%, in December quarter 2000 compared to December quarter 1999. Hotel guest rooms also increased (up 4.6%), while guest rooms in motels and guest houses decreased 1.5%.

Room occupancy rates in licensed hotels increased by 0.2 percentage points to 65.3% in December quarter 2000 compared with December quarter 1999. In the same period, room occupancy rates fell 2.4 percentage points to 52.4%, and 0.5 percentage points to 60.3%, for motels (and guest houses) and serviced apartments respectively. Room nights occupied increased by 5% for hotels, and 9.3% for serviced apartments.

Guest arrivals were down 1.3% across Australia in the December quarter 2000, when compared to the corresponding quarter in 1999. Motel and guest house arrivals decreased 5% and hotel arrivals decreased 1.2%. These were partly offset by a 14.1% increase in guest arrivals to serviced apartments.

Accommodation takings in hotels, motels, guest houses and serviced apartments for the year ended 31 December 2000 totalled \$4.7 million of which just over half was taken by licensed hotels. Overall takings increased 11.5% in this quarter compared with the same period in 1999, with high growth in serviced apartments (up 16.2%), licensed hotels (up 14.7%) and moderate growth in motels and guest houses (up 3.5%).

OCCUPANCY AND TAKINGS
IN NEW SOUTH WALES
DURING THE OLYMPIC
PERIOD

The Olympic and Para-Olympic Games were held in Sydney during the months of September and October 2000, and contribute to accommodation statistics for both the September and December quarters. In New South Wales, occupancy rates for hotels, motels, guest houses and serviced apartments were down on the same period in 1999 for both quarters (down 1.4 percentage points in September quarter 2000 and 2.2 percentage points in December quarter 2000). While there were increases in room nights occupied (up 5.9% and 2.2% respectively), growth in capacity was stronger with the number of guest rooms up 7.9% and 5.7% respectively. Takings in the September and December quarters 2000 increased markedly on 1999 (up 48.1% and 16.6%) reflecting higher average costs per room night occupied (up 39.8% and 14.1%). The relative increases were highest for licensed hotels and serviced apartments with star gradings of 3 or more.

### ANALYSES AND COMMENTS

HOLIDAY FLATS, UNITS
AND HOUSES,
CARAVAN PARKS AND
VISITOR HOSTELS

The number of holiday flats, units and houses nationally in the December quarter 2000 increased by 3.5% when compared with December quarter 1997. At the same time there was a marginal increase in unit occupancy rates and a 20.6% increase in accommodation takings.

The capacity of caravan parks across Australia fell by 3.7% in the December quarter 2000 compared with December quarter 1997 with the number of powered and un-powered sites down 6.4% to 205 105. However, the number of cabins in caravan parks increased by 35.5% to 24 236. Over the three year period, site occupancy rates in caravan parks increased 2.0 percentage points to 48.4%. These changes corresponded to a 24.6% increase in takings from caravan parks in that period.

Compared to the December quarter 1997 the number of visitor hostels increased 18.3% to 466, in the December quarter 2000. This growth is also reflected in a 32.7% increase in bed spaces (to 40 659 spaces); a 30.6% increase in guest nights (to 1.81 million); and, a 27.2% increase in guest arrivals (to 0.68 million). These increases translated into a 71.5% rise in accommodation takings from visitor hostels.

<sup>(</sup>b) Australian Capital Territory data included with New South Wales in the December quarter 1997 figures.

## **EXPLANATORY NOTES**

#### **INTRODUCTION**

SCOPE

- **1** This publication contains data from the ABS quarterly Survey of Tourist Accommodation (STA). The STA is a mailout collection that completely enumerates all in-scope accommodation establishments.
- **2** From the March quarter 1998, the scope and collection strategy for the STA were changed to include only significant accommodation establishments. Data series presented in this publication which relate to the 1997 calendar year have been recompiled on the basis of the new scope.
- **3** On a quarterly basis the STA includes hotels, motels, guest houses and serviced apartments with 15 or more rooms.
- **4** Every third year, beginning with 2000 the STA has been expanded to also include:
- holiday flats, units and houses of letting entities with 15 or more rooms or units.
- caravan parks with 40 or more powered sites;
- visitor hostels with 25 or more bed spaces.
- **5** The short-term non-residential accommodation, which is in scope of this survey, is accommodation which is not let out on a lease basis, and which is let out to guests who would generally, although not necessarily, stay for periods of less than two months.
- **6** Some establishments included in the survey such as caravan parks also provide long-term residential accommodation. For hotels, motels, guest houses and serviced apartments, the amount of such activity is considered to be insignificant and is included in the data presented in this publication.
- **7** The STA includes the following categories of establishments which provide predominantly short-term non-residential accommodation to the general public:
- hotels and resorts with facilities establishments with 15 or more rooms which are licensed to operate a public bar and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms;
- motels, private hotels and guest houses with facilities establishments with 15 or more rooms which are not licensed to operate a public bar, and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms;
- serviced apartments establishments with 15 or more units which mostly comprise self-contained units at the same location, and which are available on a unit/apartment basis to the general public for a minimum of one night. The units should have full cooking facilities (i.e. hot plates and oven/microwave), refrigerator and bath/shower and toilet facilities; all bed linen and towels should be provided, and daily servicing (i.e. cleaning and bed making) must be available through the on-site management, although this service may not necessarily be used.

DEFINITIONS OF ACCOMMODATION ESTABLISHMENTS

- holiday flats, units and houses (excluding establishments predominantly operated on a time-share basis) which are operated by owners, managers or real estate agents who have sole letting rights to at least 15 flats, units or houses for short-term letting. They are mainly self-contained in terms of cooking, bath (or shower) and toilet facilities and do not have breakfast available for guests. Data for holiday flats units or houses include short-term owner operation as well as paying guest occupation.
- caravan parks establishments with 40 or more powered sites and cabins, etc. which provide either short-term or long-term accommodation to the general public and which provide powered sites for caravans and toilet, shower and laundry facilities for guests.
- visitor hostels establishments with 25 or more bed spaces which provide accommodation to visitors on a bed basis (rather than by room). This category does not include establishments providing charity type accommodation (e.g. Salvation Army hostels) nor hotels, motels and guest houses without in-room facilities which provide accommodation on a per room basis.

CLASSIFICATION CHANGES

**8** As a result of the separate classification of serviced apartments from the March quarter 1998, there have been several changes to definitions of accommodation units. Some units, which were formerly in categories such as hotels, motels or holiday flats, units and houses are now classified as serviced apartments. A small number of establishments which were previously classified as motels have been reclassified as holiday flats, units and houses and are therefore no longer in scope of the quarterly STA, except as described in paragraph 4.

COVERAGE

**9** Coverage is comprehensive and from the December quarter 1999, is obtained from the Australian Automobile Association accommodation guide, supplied as an electronic file, which is updated twice yearly. This is supplemented by notification of new tourism developments and their likely opening dates in selected guides, major tourism journals and periodicals and newspapers. Periodic comparison with lists of accommodation establishments provided by the various Tourism Commissions and Industry Associations is also undertaken.

DATA QUALITY

- **10** The survey does not have a sample component and the data are not subject to sampling variability. However, other inaccuracies collectively referred to as non-sampling error may affect the data. These non-sampling errors may arise from a number of sources, including:
- errors in the reporting of data by respondents;
- errors in the process of capturing data;
- estimation for missing data; and
- definition and classification errors.

Every effort has been made to reduce non-sampling error to a minimum by careful design and testing of questionnaires, and efficient operating procedures and systems used to compile statistics.

- **11** The December quarter 2000 response rates were:
- 91% licensed hotels, motels and guest houses, serviced apartments.
- 91% holiday flats, units and houses,
- 89% caravan parks.
- 88% visitor hostels.

## **EXPLANATORY NOTES** continued

#### REGIONAL DATA

**12** Survey results are aggregated to Tourism Regions as defined by relevant State and Territory Tourist Commissions or equivalent organisations. Details of the composition of Tourism Regions, including maps, are available on request.

#### ANNUAL CAPACITY DATA

- **13** ABS releases counts of accommodation establishments and their capacity as at the end of December each year in respect of the pre-1998 scope of the survey (but recognising serviced apartments separately) as follows:
- hotels, motels and guest houses and serviced apartments with facilities and having five or more rooms;
- holiday flats, units and houses (other than those included with serviced apartments) which are operated by owners, managers or real estate agents who have sole letting rights to at least five flats, units or houses for short term letting;
- all caravan parks regardless of size; and
- all visitor hostels regardless of size.
- **14** As a result of classification changes applied from March quarter 1998 onward, data will not be comparable with that previously published for particular accommodation types.
- **15** These counts are published annually in a quarterly issue of Tourism Indicators, Australia (Cat. no. 8634.0). Counts in respect of December 1999 were published in the June quarter 2000 edition.

#### UNPUBLISHED STATISTICS

**16** The ABS may make available on request certain unpublished tourist accommodation statistics, including statistics for past quarters and for specific areas and more detailed information for specific data items. For example, detailed employment statistics showing the number of full-time, part-time or casual employees may be available.

#### **RELATED PUBLICATIONS**

- 17 Other ABS publications and products which may be of interest include: Directory of Tourism Statistics, 2000 (Cat. no. 1130.0) (irregular) Overseas Arrivals and Departures, Australia (Cat. no. 3401.0) (issued monthly)
  - Tourism Indicators, Australia (Cat. no. 8634.0) (issued quarterly)

    Tourist Accommodation, Small Area Data Standard Data Service (SDS)

    products for each State/Territory (except the ACT) (Cat. no. 8635.n.40.001)

    (issued quarterly).
- **18** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (Cat. no. 1101.0). The ABS also issues the *Release Advice* (Cat. no. 1105.0) on Tuesdays and Fridays which lists publications to be released in the next few days. Both are available from any ABS office or the ABS web site.

### EFFECTS OF ROUNDING

**19** Where figures have been rounded, discrepancies may occur between totals and the sum of the component items.

Average length of stay Average length of stay is expressed in numbers of days and calculated:

- for hotels, motels and guest houses and serviced apartments, by dividing Guest nights by Guest arrivals.
- for holiday flats, units and houses, by dividing *Unit nights occupied* by *Unit* lettings.

Bed spaces Three-quarter beds are counted as one bed space; double beds as two bed spaces. Cots are excluded.

> Capacity in terms of Guest rooms, serviced apartment units, visitor hostel bed spaces, holiday units or caravan park sites is the maximum number available to accommodate paying guests during the survey period. Capacity closed temporarily for seasonal reasons is included.

Caravan park sites Includes On-site vans, Other powered sites, Unpowered sites and Cabins, etc.

> For hotels, motels and guest houses and serviced apartments, caravan parks and visitor hostels, the number of establishments within the scope of the survey which operated for any part of the survey period, or which closed temporarily for the quarter for seasonal reasons.

The total number of paying guests counted only on the first night they stayed at the accommodation establishment during the survey period.

The total number of paying guests counted on each night they stayed at the accommodation establishment during the survey period.

The maximum number of rooms available at each establishment during the survey period for accommodating short-term paying guests. Units and apartments within serviced apartments are treated as rooms in these survey results.

For holiday flats, units and houses, the number of owners, managers or real estate agents within the scope of the survey who operated for any part of the survey period.

Caravan parks where the majority of paying guests occupied sites for periods of more than two months.

Occupancy in terms of Room nights, Unit nights or Site nights occupied refers to the total number of nights each guest room, serviced apartment unit, holiday unit or caravan park site was occupied during the survey period.

Occupancy in terms of *Guest nights* refers to the total number of paying guests counted on each night they stayed at the accommodation establishment during the survey period.

Occupancy rates represent occupancy expressed as a percentage of total capacity available during the survey period, e.g. for the period

Room occupancy rate (%) =  $\frac{Room\ nights\ occupied}{(Guest\ rooms)\ \times\ (\text{No. of days in the period})}$ 

providing that, for establishments closing (other than for seasonal reasons) or opening during the survey period, the denominator of the above expression includes only operating periods.

Capacity

Establishments

Guest arrivals

Guest nights

Guest rooms

Letting entities

Long-term caravan parks

Occupancy

Occupancy rates

Other sites permanently reserved The total number of powered and unpowered sites, on-site vans and cabins, etc.

continuously let for two months or more of the survey period to tenants who

occupy the sites only on a casual or sporadic basis.

Persons employed The total number of persons working at each accommodation establishment at

the end of the survey period (including working proprietors and those working

on other than accommodation activities).

**Room nights available** The number of guest rooms/units available multiplied by the number of days for

which they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating

periods only are included.

Serviced apartment units 
Units and apartments within serviced apartments are treated as rooms in these

survey results.

**Short-term caravan parks** Caravan parks where the majority of paying guests occupy sites for periods of

less than two months.

Site nights available The total number of nights each caravan park site was occupied during the

survey period.

guests

Sites occupied by long-term The total number of sites, etc. occupied at the end of the survey period by guests

who have stayed continuously for 2 months or more.

**Star grading** The grading of hotels, motels and guest houses with facilities and serviced

apartments based on the classification system used by members of the Australian Automobile Association (AAA). The gradings are allocated according to a points system based on the amenities and facilities available to guests. Details of the grading scheme are contained in the RACV-RAASA members' publication *Accommodation Australia*, or the individual State guides. For the purpose of classifying establishments to a star grading in this publication, 'half' star gradings are ignored (e.g. a two and a half star grading has been shown as two star).

From the June quarter 1999, some (very few) large establishments not star graded by the AAA have been allocated a star grade by the ABS for Survey of

Tourist Accommodation statistical tabulation purposes.

**Takings from accommodation** Since 1 July 2000, takings from accommodation include gross revenue from the

provision of accommodation, including GST. Takings from meals are excluded.

Prior to 1 July 2000, takings from accommodation for some jurisdictions included bed taxes. From 1 July bed taxes were abolished being replaced by GST. Takings from accommodation for each month generally represent the takings received during that month. Where payments are received in advance of, or after, the provision of accommodation to guests, the monthly figure for takings from accommodation may not necessarily bear a direct relationship to the number of

guests accommodated during the month.

Unit lettings The total number of times a holiday flat, unit or house was occupied by a new

tenant, counted only on the first night it was occupied by the new tenant.

Unit nights The total number of nights each holiday flat, unit or house was occupied during

the survey period.
