NOTES

FORTHCOMING ISSUES ISSUE (Quarter) RELEASE DATE

 June 2004
 8 October 2004

 September 2004
 10 January 2005

INTRODUCTION

This publication presents results from the quarterly Survey of Tourist Accommodation (STA). The scope of the STA includes hotels, motels and guest houses and serviced apartments with 15 or more rooms.

HOTELS, MOTELS AND
GUEST HOUSES AND
SERVICED APARTMENTS

DATA QUALITY IMPROVEMENTS

In the June quarter 2003 the ABS identified 132 hotels, motels and guest houses and serviced apartments which had been operating for a number of quarters but were not on the STA frame. These additional establishments were included in the STA from the June quarter 2003.

BREAK IN TIME SERIES

The addition of the 132 tourism establishments resulted in a break in time series between the March and June quarters 2003. The impact of the break in time series is explained in Appendix 1, *Tourist Accommodation*, *Australia* (cat. no. 8635.0), December quarter 2003. Particular care needs to be taken for all calculations of percentage changes that cross the break in series.

DATA REVISIONS

Revisions were made to *Tourist Accommodation, Small Area Data, Australian Capital Territory* (cat. no. 8635.8.55.001), for the September and December quarters 2003. The revised data are available on the ABS web site <www.abs.gov.au>.

CHANGES IN THIS ISSUE

This publication no longer presents comparative tourism region data for the same quarter of the previous year. Tourism regions are reviewed annually and are subject to boundary and name changes. Extensive changes have been made to tourism regions in Western Australia. Where changes have occurred care should be taken when making comparisons with previously published data at this level. For details of changes to tourism regions refer to Tourism Theme Page of the ABS web site <www.abs.gov.au>.

STAR GRADING

Star grade classifications of establishments have been revised by AAA Tourism Pty Ltd. These changes have affected star grade tables in this publication. Further changes are expected to impact June and September quarter 2004 data. These changes should be taken into account when making comparisons with previous quarters.

CAPACITY COUNTS

A Feature Article presenting counts of accommodation establishments and capacity as at March 2004 will be available on the ABS web site <www.abs.gov.au> on 22 July 2004.

Accommodation takings

In March quarter 2004, accommodation takings for hotels, motels and guest houses and serviced apartments combined were \$1,398.6 million. This was a decrease of 6.7% (\$100.8 million) from December quarter 2003. The average takings per room night occupied for hotels, motels and guest houses and serviced apartments combined was \$122.50

Hotels were the highest contributor to accommodation takings with \$691.9 million (49.5%). Takings per room night occupied in March quarter 2004 were highest for hotels at \$144.20.

Accommodation takings continued

(a) Break in time series between the March and June quarters 2003. See Explanatory Notes.

The contributions of accommodation takings in March quarter 2004 for hotels, motels and guest houses and serviced apartments combined were highest in New South Wales (34.5%) and Queensland (25.9%) and lowest in the Northern Territory (1.9%).

Room nights occupied

Total room nights occupied were 11.4 million in March quarter 2004 for hotels, motels and guest houses and serviced apartments combined. Room nights occupied decreased by 4.1% (0.5 million) from December quarter 2003 to March quarter 2004.

Hotels represented 4.8 million (42.0%) of the total room nights occupied, while motels and guest houses represented 4.1 million (36.2%) and serviced apartments represented 2.5 million (21.7%).

Room occupancy rate

The room occupancy rate for hotels, motels and guest houses and serviced apartments combined decreased 1.9 percentage points to 61.6% in March quarter 2004 compared with December quarter 2003.

Tasmania recorded the highest room occupancy rate for hotels, motels and guest houses and serviced apartments combined with 74.5%. This was followed by the Australian Capital Territory (65.7%) and New South Wales (63.5%).

COVERAGE

STAR GRADING

DATA QUALITY

- **1** This publication presents data from the quarterly Survey of Tourist Accommodation (STA). The STA is a mailout collection that completely enumerates all in-scope accommodation establishments within Australia.
- **2** On a quarterly basis the STA includes hotels, motels, guest houses and serviced apartments with 15 or more rooms or units.
- **3** Short-term non-residential accommodation, which is in scope of the STA, is accommodation which is not leased, and which is provided to guests who would generally stay for periods of less than two months.
- **4** Some establishments also provide long-term residential accommodation. For hotels, motels, guest houses and serviced apartments, the amount of such activity is considered to be insignificant and is included in the data presented in this publication.
- **5** For 2004 the STA includes the following categories of establishments which provide predominantly short-term non-residential accommodation to the general public:
 - hotels and resorts with facilities establishments with 15 or more rooms which are licensed to operate a public bar and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms
 - motels, private hotels and guest houses with facilities establishments with 15 or more rooms which are not licensed to operate a public bar, and which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms
 - serviced apartments establishments with 15 or more units which mostly comprise self-contained units at the same location, and which are available on a unit/apartment basis to the general public for a minimum of one night. The units should have full cooking facilities (i.e. hot plates and oven/microwave), refrigerator and bath/shower and toilet facilities; all bed linen and towels should be provided, and daily servicing (i.e. cleaning and bed making) must be available through the on-site management, although this service may not necessarily be used.
- **6** The main source of coverage is from the Australian Automobile Association through AAA Tourism Pty Ltd. This is supplemented by notification of new tourism developments and their likely opening dates in selected guides, major tourism journals and periodicals and newspapers. Periodic comparison with lists of accommodation establishments provided by the various tourism commissions and industry associations is also undertaken.
- **7** Star grade classifications of establishments have been revised by AAA Tourism Pty Ltd. These changes have affected star grade tables in this publication. Further changes are expected to impact June and September quarter 2004 data. These changes should be taken into account when making comparisons with previous quarters.
- **8** The survey does not have a sample component and the data are not subject to sampling variability. However, other inaccuracies collectively referred to as non-sampling error may affect the data. These non-sampling errors may arise from a number of sources, including:
 - errors in the reporting of data by providers
 - errors in the process of capturing data
 - estimation for missing data
 - definition and classification errors
 - incomplete coverage.

EXPLANATORY NOTES continued

DATA QUALITY continued

- **9** Every effort has been made to reduce non-sampling error to a minimum by careful design and testing of questionnaires, and efficient operating procedures and systems used to compile statistics.
- **10** The March quarter 2004 response rates were:
- 92% licensed hotels
- 93% motels and guest houses
- 92% serviced apartments.

BREAK IN TIME SERIES

- **11** In the June quarter 2003 the ABS identified 132 hotels, motels and guest houses and serviced apartments which had been operating for a number of quarters but were not on the STA frame. These additional establishments were included in the STA from the June quarter 2003.
- **12** The addition of the 132 tourism establishments resulted in a break in time series between the March and June quarters 2003. The impact of the break in time series is explained in Appendix 1, *Tourist Accommodation, Australia* (cat. no. 8635.0), December quarter 2003. Particular care needs to be taken for all calculations of percentage changes that cross the break in series.
- TAKINGS FROM ACCOMMODATION
- **13** From 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. Where businesses are unable to provide the data inclusive of GST, it is automatically adjusted by the ABS prior to aggregation and release in output.

STATISTICAL GEOGRAPHY

- **14** Small area statistics for 2004 are classified to the *Australia Standard Geographical Classification (ASGC), 2003 Edition* (cat. no. 1216.0). Data are coded to the statistical local area (SLA) level.
- 15 These SIA data are aggregated to tourism regions as defined by relevant state and territory tourist commissions. Tourism regions are reviewed annually and are subject to boundary and name changes. Where changes have occurred care should be taken when making comparisons with previously published data at this level.
- **16** Details of SLAs, the composition of tourism regions, major changes to tourism regions and outline maps of tourism regions are provided on the Tourism Theme Page of the ABS web site <www.abs.gov.au>.

SEASONAL ADJUSTMENT

- **17** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the original time series so that the effect of other influences on the series may be more clearly recognised. Seasonal adjustment procedures do not aim to remove the irregular or non-seasonal influences which may be present in any particular month. Irregular influences that are highly volatile can make it difficult to interpret the movement of the series even after adjustment for seasonal variation, and cannot be assumed to indicate changes in the trend.
- 18 The way in which seasonally adjusted and trend estimates were calculated changed from a Forward Factor methodology to a Concurrent methodology in March quarter 2003. The Forward Factor method relied on an annual analysis of the original time series to estimate seasonal factors that were to be applied in the forthcoming four quarters. Under this method the projected seasonal factors, or forward factors, were not updated until the next annual analysis. The Concurrent methodology uses the most up to date original time series available at each reference period to estimate seasonal factors thus eliminating the need to use projected seasonal factors.

EXPLANATORY NOTES continued

TREND ESTIMATES

- **19** Smoothing the seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates the trend estimates. The trend estimates are derived by applying a 7-term Henderson moving average to the quarterly seasonally adjusted series. The Henderson moving average used in the middle of the time series is symmetric but, as the end of a time series is approached, asymmetric forms of the symmetric moving average are applied. Unlike the weights of the standard 7-term Henderson moving average, the weights used with the quarterly data have been tailored to suit the particular characteristics of individual series.
- **20** While these techniques enable trend estimates for the latest period to be produced, the process does result in revisions to the trend estimates in recent months, particularly as additional original estimates become available. For further information refer to *Information Paper: A Guide to Interpreting Time Series Monitoring Trends*, 2003 (cat. no. 1349.0) available at the ABS web site <www.abs.gov.au>.

EFFECTS OF ROUNDING

21 Where figures have been rounded, discrepancies may occur between totals and the sum of the component items.

RELATED PUBLICATIONS

22 Other ABS publications and products which may be of interest are outlined below. Please note, older publications may no longer be available through ABS bookshops but are available through ABS libraries. All publications released from 1998 onwards are available on the ABS web site <www.abs.gov.au> (charges apply).

Tourist Accommodation, Australia, Expanded Scope Collection cat. no. 8635.0.55.001 (irregular)

Directory of Tourism Statistics, 2001 cat. no. 1130.0 (irregular)

Overseas Arrivals and Departures, Australia cat. no. 3401.0 (issued monthly) Short-term Visitor Arrivals Estimates, Australia cat. no. 3401.0.55.001 (issued monthly)

Tourism Indicators, Australia cat. no. 8634.0 (discontinued from September quarter 2002 - previously issued quarterly)

Tourist Accommodation, Small Area Data cat. no. 8635.1.55.001–8635.8.55.001 (data cubes for each state/territory - issued quarterly).

Australian National Accounts, Tourism Satellite Account cat. no. 5249.0 (annual)

23 Current publications and other products released by the ABS are listed in the *Catalogue of Publications and Products* (cat. no. 1101.0). The catalogue is available from any ABS office or the ABS web site <www.abs.gov.au>. The ABS also issues a daily Release Advice on the web site which details products to be released in the week ahead.

ABS DATA AVAILABLE ON REQUEST

24 As well as the statistics included in this publication, the ABS has other relevant data available on request. Inquiries should be made to the National Information and Referral Service on 1300 135 070.

GLOSSARY

Average length of stay Average length of stay is expressed in numbers of days and calculated by dividing gue	est
--	-----

nights by guest arrivals.

Average takings per available The takings from accommodation divided by the total number of guest nights for the

room night survey period,

 $Avge.TakingsPerAvailableRoomNight(\$) = \frac{TakingsFromAccommodation}{(GuestRooms)*(No.OfDaysInThePeriod)}$

Average takings per room The takings from accommodation divided by the total number of room nights occupied for the survey period.

Bed occupancy rate The bed occupancy rate represents bed occupancy expressed as a percentage of total

capacity available during the survey period,

 $BedOccupancyRate~(\%) = \frac{GuestNightsOccupied}{(BedSpaces)*(No.OfDaysInThePeriod)}*100$

Bed spaces Three-quarter beds are counted as one bed space; double beds as two bed spaces. Cots

are excluded.

Capacity Capacity in terms of guest rooms/units is the maximum number available to

accommodate paying guests during the survey period. Capacity closed temporarily for

seasonal reasons is included.

Establishments The number of hotels, motels and guest houses and serviced apartments within the

scope of the survey which operated for any part of the survey period, or which closed

temporarily for the quarter for seasonal reasons.

Guest arrivals The total number of paying guests counted only on the first night they stayed at the

accommodation establishment during the survey period.

Guest nights The total number of paying guests counted on each night they stayed at the

accommodation establishment during the survey period.

Guest rooms The maximum number of rooms available at each establishment during the survey

period for accommodating short-term paying guests. Units and apartments within

serviced apartments are treated as rooms in these survey results.

Occupancy Occupancy in terms of room nights occupied refers to the total number of nights each

guest room was occupied during the survey period.

Occupancy in terms of guest nights refers to the total number of paying guests counted on each night they stayed at the accommodation establishment during the survey

period.

Persons employed The total number of persons working at each accommodation establishment at the end

of the survey period (including working proprietors and those working on other than

accommodation activities).

Room nights available The number of guest rooms/units available multiplied by the number of days for which

they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are included.

Room nights occupied The number of nights each guest room/unit was occupied by a paying guest during the

survey period.

Room occupancy rate

The room occupancy rate represents room occupancy expressed as a percentage of total

capacity available during the survey period,

 $RoomOccupancyRate (\%) = \frac{RoomNightsOccupied}{(GuestRooms)*(No.OfDaysInTbePeriod)}*100$

providing that, for establishments closing (other than for seasonal reasons) or opening during the survey period, the denominator of the above expression includes only

operating periods.

GLOSSARY continued

Star grading

The grading of hotels, motels and guest houses with facilities and serviced apartments is based on the classification system owned by AAA Tourism Pty Ltd. The gradings are allocated according to a points system based on the amenities and facilities available to guests. Details of the grading scheme are contained in the publication *Accommodation Guide* published by AAA Tourism Pty Ltd for each of the individual Australian Motoring Organisations. For the purpose of classifying establishments to a star grading in this publication, 'half' star gradings are ignored (e.g. a two and a half star grading has been shown as two star).

Takings from accommodation

Since 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. In cases where takings from accommodation data cannot be provided inclusive of GST the amount of GST payable is estimated and the data revised accordingly.

Takings from accommodation for each month generally represent the takings received during that month. Where payments are received in advance of, or after the provision of accommodation to guests, the monthly figure for takings from accommodation may not necessarily bear a direct relationship to the number of guests accommodated during the month.

FOR MORE INFORMATION

INTERNET www.abs.gov.au the ABS web site is the best place to

start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now—a

statistical profile.

LIBRARY A range of ABS publications is available from public and

tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require,

or visit our web site for a list of libraries.

CPI INFOLINE For current and historical Consumer Price Index data, call

1902 981 074 (call cost 77c per minute).

DIAL-A-STATISTIC For the latest figures for National Accounts, Balance of

Payments, Labour Force, Average Weekly Earnings, Estimated Resident Population and the Consumer Price Index call 1900 986 400 (call cost 77c per minute).

INFORMATION SERVICE

Data already published that can be provided within five minutes will be free of charge. Our information consultants can also help you to access the full range of ABS information—ABS user pays services can be tailored to your needs, time frame and budget. Publications may be purchased. Specialists are on hand to help you with analytical or methodological advice.
