ACCOMMODATION TAKINGS

In March quarter 2007, accommodation takings for hotels, motels and serviced apartments with 5 or more rooms were \$1,907.8 million. The average takings per room night occupied for these establishments were \$140.08.

Accommodation takings for hotels, motels and serviced apartments with 15 or more rooms for March quarter 2007 were \$1,832.3 million, at an average of \$142.77 per room night occupied. For establishments with 5 to 14 rooms, accommodation takings were \$75.4 million, at an average of \$96.09 per room night occupied.

The contributions to accommodation takings in March quarter 2007 for hotels, motels and serviced apartments with 5 or more rooms were highest in New South Wales (\$642.1 million) and Queensland (\$475.0 million).

ROOM OCCUPANCY RATE

The room occupancy rate for hotels, motels and serviced apartments with 5 or more rooms was 65.1% in March quarter 2007.

For hotels, motels and serviced apartments with 15 or more rooms, the room occupancy rate was 66.6%, while for 5 to 14 room hotels, motels and serviced apartments, the room occupancy rate was 47.9%.

ROOM OCCUPANCY RATE, Original—Australia

(a) These establishments were included in the survey from March quarter 2005 onwards.

ROOM NIGHTS OCCUPIED

Total room nights occupied were 13.6 million in March quarter 2007 for hotels, motels and serviced apartments with 5 or more rooms. Room nights occupied were highest in New South Wales (4.3 million) and Queensland (3.6 million).

For hotels, motels and serviced apartments with 15 or more rooms, room nights occupied were 12.8 million in March quarter 2007, while for establishments with 5 to 14 rooms, room nights occupied were 0.8 million.

SUMMARY OF FINDINGS continued

Hotels, motels and serviced apartments continued

AVERAGE LENGTH OF STAY

The average length of stay in March quarter 2007 for hotels, motels and serviced apartments with 5 or more rooms was 2.3 days. For establishments with 15 or more rooms, the average length of stay was 2.3 days and 1.8 days for establishments with 5 to 14 rooms.

Queensland (2.7 days) reported the longest average length of stay for hotels, motels and serviced apartments with 15 or more rooms, followed by Western Australia (2.6 days). The shortest average length of stay was in Tasmania (1.9 days).

STAR GRADING

In March quarter 2007, the room occupancy rate for five-star hotels, motels and serviced apartments with 5 or more rooms was 79.5% compared with 31.5% for one-star. For hotels, motels and serviced apartments with 15 or more rooms, the room occupancy rate was 79.7% for five-star establishments compared with 31.4% for one-star.

For establishments with 5 to 14 rooms, four-star (53.9%) and three-star (52.6%) establishments had the highest room occupancy rates, compared with one-star establishments at 31.5%.

EXPLANATORY NOTES

INTRODUCTION

SCOPE

- **1** This publication presents data from the quarterly Survey of Tourist Accommodation (STA). The STA is a mailout collection that completely enumerates all in-scope accommodation establishments within Australia.
- **2** From March quarter 2005, the scope of the STA comprises the following categories of establishments:
 - licensed hotels and resorts with facilities and 5 or more rooms
 - motels, private hotels and guest houses with facilities and 5 or more rooms
 - serviced apartments with 5 or more units
 - caravan parks with 40 or more powered sites
 - holiday flats, units and houses of letting entities with 15 or more rooms or units
 - visitor hostels with 25 or more bed spaces.
- **3** With the exception of caravan parks, these establishments provide predominantly short-term non-residential accommodation, i.e. accommodation which is not leased, and which is provided to guests who would generally stay for periods of less than two months. Some of these establishments also provide long-term residential accommodation. The amount of such activity is considered to be insignificant and is included in the data presented in this publication.
- **4** Caravan parks provide either short-term or long-term accommodation. If a caravan park has the majority of sites occupied by paying guests who have stayed continuously for two months or more during the survey period, the caravan park is classified as long-term. Data for caravan parks are presented by short-term and long-term in this publication.
- **5** Previous to March quarter 2005, the scope of the STA comprised:
 - licensed hotels and resorts with facilities and 15 or more rooms
 - motels, private hotels and guest houses with facilities and 15 or more rooms
 - serviced apartments with 15 or more units.
- **6** For the four quarters of 2000 and 2003, the scope of the STA was expanded to include:
 - caravan parks with 40 or more powered sites
 - holiday flats, units and houses of letting entities with 15 or more rooms or units
 - visitor hostels with 25 or more bed spaces.
- **7** The main source of coverage is from the Australian Automobile Association through AAA Tourism Pty Ltd. This is supplemented by notification of new tourism developments and their likely opening dates in selected guides, major tourism journals and periodicals and newspapers. Periodic comparison with lists of accommodation establishments provided by the various tourism organisations and industry associations is also undertaken.
- **8** From 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. Where businesses are unable to provide the data inclusive of GST, it is automatically adjusted by the ABS prior to aggregation and release in output.
- **9** Star grade classifications of establishments are continuously revised by AAA Tourism Pty Ltd. This should be taken into account when making comparisons over time. Any queries regarding the star grading process should be directed to AAA Tourism Pty Ltd on (03) 8601 2200 or email <enquiries@aaatourism.com.au>.
- **10** Data by star grade for states and territories are included in the data cubes that accompany this publication: *Tourist Accommodation, Small Area Data* (cat. no. 8635.0.55.002 for national data and cat. no. 8635.1.55.001 8635.8.55.001 for state/territory data).

COVERAGE

TAKINGS FROM ACCOMMODATION

STAR GRADING

STATISTICAL GEOGRAPHY

- **11** Small area statistics for 2007 are classified to the Australian Standard Geographical Classification (ASGC), 2006 Edition (cat. no. 1216.0). Data are coded to the statistical local area (SLA) level.
- **12** These SIA data are aggregated to tourism regions as defined by relevant state and territory tourism organisations. Tourism regions are reviewed annually and are subject to boundary and name changes. Where changes have occurred care should be taken when making comparisons with previously published data at this level.
- **13** Data by tourism regions are no longer presented in this publication. Small area data are provided in the data cubes that accompany this publication: *Tourist Accommodation, Small Area Data* (cat. no. 8635.0.55.002 for national data and cat. no. 8635.1.55.001 8635.8.55.001 for state/territory data).
- **14** Details of SIAs, the composition of tourism regions and maps of tourism regions are provided in the ABS publication *Tourism Region Maps and Concordance Files*, *Australia* (cat. no. 9503.0.55.001) available from the ABS web site <www.abs.gov.au>.
- **15** The survey does not have a sample component and the data are not subject to sampling variability. However, other inaccuracies collectively referred to as non-sampling error may affect the data. These non-sampling errors may arise from a number of sources, including:
 - errors in the reporting of data by providers
 - errors in the process of capturing data
 - imputation for missing data
 - definition and classification errors
 - incomplete coverage.
- **16** Every effort has been made to reduce non-sampling error to a minimum by careful design and testing of questionnaires, and efficient operating procedures and systems used to compile statistics.

Imputation rates

18 Missing data items are replaced by imputed values based on reported data. Average quarterly movements are applied to previously reported data for each non-responding unit to estimate values for missing data items. Only if previously reported data are not available, then data from a similar unit is used as a 'donor' for the missing data items.

Imputation rates continued

19 The imputation rates for the most recent quarters are shown below:

IMPUTATION RATES, Nights occupied(a)

	Mar Qtr 2006	Jun Qtr 2006	Sep Qtr 2006	Dec Qtr 2006	Mar Qtr 2007

BREAK IN TIME SERIES

- **20** In June quarter 2003, the ABS identified 132 licensed hotels with facilities, motels and guest houses and serviced apartments with 15 or more rooms which had been operating for a number of quarters but were not on the STA frame. These additional establishments were included in the STA from June quarter 2003.
- **21** The ABS also identified 74 caravan parks which were operating in the March quarter 2003 but were not on the STA frame. These caravan parks were included in the June, September and December quarter 2003 data, but not in the March quarter 2003 data.
- 22 The addition of these establishments resulted in a break in time series between March and June quarters 2003. The impact of the break in time series for hotels, motels and serviced apartments is explained in Appendix 1, *Tourist Accommodation, Australia, December quarter 2003* (cat. no. 8635.0). The impact of the break in series for caravan parks is explained in the Appendix of *Tourist Accommodation, Australia, Expanded Scope Collection, Year ended 31 December quarter 2003* (cat. no. 8635.0.55.001). Particular care needs to be taken for all calculations of percentage changes that cross the break in series.

SEASONAL ADJUSTMENT

- **23** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the original time series so that the effect of other influences on the series may be more clearly recognised. Seasonal adjustment procedures do not aim to remove the irregular or non-seasonal influences which may be present in any particular quarter. Irregular influences that are highly volatile can make it difficult to interpret the movement of the series even after adjustment for seasonal variation, and cannot be assumed to indicate changes in the trend.
- 24 The way in which seasonally adjusted and trend estimates were calculated changed from a Forward Factor methodology to a Concurrent methodology in March quarter 2003. The Forward Factor method relied on an annual analysis of the original time series to estimate seasonal factors that were to be applied in the forthcoming four quarters. Under this method the projected seasonal factors, or forward factors, were not updated until the next annual analysis. The Concurrent methodology uses the most up to date original time series available at each reference period to estimate seasonal factors thus eliminating the need to use projected seasonal factors.

TREND ESTIMATES

- 25 Smoothing the seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates the trend estimates. The trend estimates are derived by applying a 7-term Henderson moving average to the quarterly seasonally adjusted series. The Henderson moving average used in the middle of the time series is symmetric but, as the end of a time series is approached, asymmetric forms of the symmetric moving average are applied. Unlike the weights of the standard 7-term Henderson moving average, the weights used with the quarterly data have been tailored to suit the particular characteristics of individual series.
- **26** While these techniques enable trend estimates for the latest period to be produced, the process does result in revisions to the trend estimates in recent quarters, particularly as additional original estimates become available. For further information refer to *Information Paper: A Guide to Interpreting Time Series Monitoring Trends, 2003* (cat. no. 1349.0) available at the ABS web site <www.abs.gov.au>.

CONFIDENTIALISATION OF DATA

27 Under the Census and Statistics Act, when releasing statistics the ABS is required to do this in a manner that is "not likely" (in a legal sense) to enable the identification of a particular person or organisation. A number of techniques are used to do this, including suppression of information. To ensure provider confidentiality in the Survey of Tourist Accommodation, the ABS uses a computerised process known as Disclosure Avoidance Analysis System (DAAS) to confidentialise the entire tourist accommodation dataset each quarter. This process not only ensures that data are suppressed to ensure individual

CONFIDENTIALISATION OF DATA continued

establishments cannot be identified, but also suppresses data in other (consequential) cells to ensure data cannot be derived through deduction from the information available.

- 28 While the scope and coverage of the Survey of Tourist Accommodation has been expanded, priority has been given to maintaining the integrity and continuity of the core collection (hotels, motels and guest houses, and serviced apartments with 15 or more rooms). In order to maximise data released from the core collection series and the new components of the expanded scope collection (hotels, motels and guest houses, and serviced apartments with 5-14 rooms), the 'total' series (5 or more rooms) has been used for any consequential confidentiality required where possible.
- 29 The DAAS process begins by confidentialising at the Statistical Local Area (SLA) level, then across Tourism regions, then at the state level and finally the national level. If there is an SLA that has been made confidential then another SLA will have to be made confidential within that Tourism region to protect the confidentiality of the providers in the SLA that was originally made confidential. Depending on the number of SLAs in the Tourism region the whole Tourism region may need to be made confidential. As a consequence of this, at least one more Tourism region within a state or territory will also be confidentialised. This may also occur at the state/territory level.

USER AGGREGATION OF DATA

- **30** The aggregation of data by users across time periods should be undertaken with caution, due to the possibility of non-inclusion of confidentialised data (see the above section for more information about confidentialisation). Where one or more cells contributing to a total have been confidentialised (ie, contains the value of n.p.), the resulting aggregated total will be incorrect. However, some broader levels of data may not be affected by confidentialised cells.
- **31** Where data can be aggregated (ie, no confidentialised cells are included) for calendar and financial year/s purposes, the data items Establishments, Rooms, Persons employed and Bed spaces should not be aggregated. For these items it is recommended that for calendar years, the value of the December quarter is used, and for financial years, the value of the June quarter is used.
- **32** Any data items that have been derived from other items collected in the survey cannot be aggregated (ie, all those with labels ending in 'rate' or commencing with 'average'). These items must be re-derived based on the aggregation of each of the quarterly items collected in the survey used in the derivation of the rate or average (see Glossary for formulas).
- **33** Users are cautioned against deriving any non-standard aggregations (eg, aggregation of selected star gradings such as 4-star and 5-star; aggregation of selected geographical areas such as capital city areas and balance of state; aggregation of selected activities such as hotels and motels combined). This is because data are confidentialised based on the standard data item structure.

EFFECTS OF ROUNDING

34 Where figures have been rounded, discrepancies may occur between totals and the sum of the component items.

RELATED PUBLICATIONS

35 Other ABS publications and products which may be of interest are outlined below. Please note, older publications may no longer be available through ABS bookshops but

RELATED PUBLICATIONS continued

are available through ABS libraries. All publications released from 1998 onwards are available on the ABS web site <www.abs.gov.au>.

Tourist Accommodation, Small Area Data (cat. no. 8635.0.55.002) (data cube for Australia – issued quarterly)

Tourist Accommodation, Small Area Data (cat. no. 8635.1.55.001–8635.8.55.001) (data cubes for each state/territory – issued quarterly)

Tourism Region Maps and Concordance Files, Australia (cat. no. 9503.0.55.001) (annual)

Tourist Accommodation, Australia, Expanded Scope Collection (cat. no. 8635.0.55.001) (irregular)

Short-term Visitor Arrivals Estimates, Australia (cat. no. 3401.0.55.001) (issued monthly)

Overseas Arrivals and Departures, Australia (cat. no. 3401.0) (issued monthly)

Australian National Accounts, Tourism Satellite Account (cat. no. 5249.0) (annual)

36 Current publications and other products released by the ABS are listed in the *Catalogue of Publications and Products* (cat. no. 1101.0). The catalogue is available from any ABS office or the ABS web site <www.abs.gov.au>. The ABS also issues a daily Release Advice on the web site which details products to be released in the week ahead.

ABS DATA AVAILABLE ON REQUEST

37 As well as the statistics included in this publication, the ABS has other relevant data available on request. Inquiries should be made to the National Information and Referral Service on 1300 135 070.

GLOSSARY

Average length of stay Average number of days each guest stayed during the reference period. It is a derived

item calculated by dividing the number of guest nights occupied by the number of guest

arrivals with the result expressed as a number of days,

 $Average\ length\ of\ stay(days) = \frac{Guest\ nights\ occupied}{Guest\ arrivals}$

Average takings per available

room night

The takings from accommodation divided by the total number of room nights available

for the survey period,

Average takings per available room $night(\$) = \frac{Takings\ from\ accommodation}{Room\ nights\ available}$

Average takings per room night

occupied

The takings from accommodation divided by the total number of room nights occupied

for the survey period,

 $Average \ takings \ per \ room \ night \ occupied(\$) = \frac{Takings \ from \ accommodation}{Room \ nights \ occupied}$

Bed occupancy rate The bed occupancy rate represents bed occupancy expressed as a percentage of total

capacity available during the survey period,

 $\textit{Bed occupancy rate (\%)} = \frac{\textit{Guest nights occupied}}{\textit{Guest nights available}} * 100$

Bed spaces The maximum number of bed spaces normally in place available to accommodate paying

guests during the survey period. Three-quarter beds are counted as one bed space; double beds as two bed spaces. Cots and divans not normally used as beds are excluded.

Cabins, flats, units and villas The maximum number of cabins, flats, units and villas available at caravan parks for

accommodating paying guests during the survey period.

Capacity Capacity in terms of rooms/units/apartments/suites, visitor hostel bed spaces, holiday

flats/units/houses or caravan park sites is the maximum number available to accommodate paying guests on the last day of the survey period. Capacity closed

temporarily for seasonal reasons is included.

Caravan park sites The measure of total caravan park capacity available for accommodating paying guests

during the survey period. Includes on-site vans, other powered sites, unpowered sites

and cabins, flats, units and villas.

Caravan parks Establishments with 40 or more powered sites and cabins, flats, units and villas which

provide either short-term or long-term accommodation to the general public and which provide powered sites for caravans and toilet, shower and laundry facilities for guests.

Caravan parks, long-term Caravan parks where the majority of paying guests occupied sites for periods of two

months or more.

Caravan parks, short-term Caravan parks where the majority of paying guests occupied sites for periods of less than

two months.

Establishments The number of licensed hotels and resorts, motels and guest houses, serviced

apartments, caravan parks and visitor hostels within the scope of the survey which operated for any part of the survey period, or which closed temporarily for the quarter

for seasonal reasons.

Guest arrivals The total number of paying guests counted only on the first night they stayed at the

accommodation establishment during the survey period.

For holiday flats, units and houses this is the same as unit lettings.

This data item is not collected for caravan parks.

Guest nights available The total number of nights available to all paying guests during the survey period.

This is derived from the number of bed spaces multiplied by the number of days for which they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are

included.

GLOSSARY continued

Guest nights occupied The total number of paying guests counted on each night they stayed at the

accommodation establishment during the survey period.

The total number of holiday flats, units and houses (excluding establishments Holiday flats, units and houses

> predominantly operated on a time-share basis) operated by letting entities (i.e. owners, managers or real estate agents) who have sole letting rights to at least 15 flats, units or houses for short-term letting. These flats, units or houses should be mainly self-contained in terms of cooking, bath (or shower) and toilet facilities and should not have breakfast available for guests. Data for holiday flats, units or houses include

short-term owner operators as well as paying guest accommodation.

Hotels See licensed hotels and resorts with facilities.

For holiday flats, units and houses, the number of owners, managers or real estate agents Letting entities

within the scope of the survey who operated for any part of the survey period.

Licensed hotels and resorts Establishments with five or more rooms which are licensed to operate a public bar and with facilities

which provide accommodation on a room/suite basis, with a bath/shower and toilet in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and

oven/microwave) in most guest rooms.

Motels, private hotels and Establishments with five or more rooms which are not licensed to operate a public bar, guest houses with facilities and which provide accommodation on a room/suite basis, with a bath/shower and toilet

in most guest rooms, but which do not have full cooking facilities (i.e. hot plates and oven/microwave) in most guest rooms.

Multiple bedroom holiday The total number of holiday flats, units and houses available with multiple bedrooms. flats, units and houses

> Occupancy in terms of room nights, unit nights or site nights occupied refers to the total Occupancy

number of nights each room, unit or caravan park was occupied during the survey

period.

Occupancy in terms of guest nights refers to the total number of paying guests counted on each night they stayed at the accommodation establishment during the survey

period.

On-site vans The maximum number of vans owned or leased by the establishment for the purpose of

providing accommodation to the general public.

Other powered sites The maximum number of sites with provision for connection to electric power supply, available at caravan parks for accommodating paying guests during the survey period,

excluding powered sites occupied by on-site vans, and cabins, flats, units and villas.

The total number of powered and unpowered sites, on-site vans and cabins, flats, units Other sites permanently reserved

and villas continuously let for two months or more on the last day of the survey period to

tenants who occupy the sites only on a casual or sporadic basis.

Persons employed The total number of persons working at each accommodation establishment at the end

> of the survey period (including working proprietors and those working on other than accommodation activities). This data item is not applicable to holiday flats, units and

houses let by real estate agents.

Room nights available The number of rooms/units available multiplied by the number of days for which they

were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are included.

Room nights occupied The number of nights each guest room/unit was occupied by a paying guest during the

survey period.

Room occupancy rate The room occupancy rate represents room occupancy expressed as a percentage of total

capacity available during the survey period,

Room occupancy rate (%) = $\frac{Room\ nights\ occupied}{Room\ nights\ available}$

GLOSSARY continued

Room occupancy rate continued

providing that, for establishments closing (other than for seasonal reasons) or opening during the survey period, the denominator of the above expression includes only operating periods.

Rooms

The maximum number of rooms available for accommodating short-term paying guests at each licensed hotel and resort, motel and guest house and serviced apartment during the survey period. Units, apartments and suites are treated as rooms for these types of establishments in these survey results.

Serviced apartments

Establishments with five or more units which mostly comprise self-contained units at the same location, and which are available on a unit/apartment basis to the general public for a minimum of one night. The units should have full cooking facilities (i.e. hot plates and oven/microwave), refrigerator and bath/shower and toilet facilities; all bed linen and towels should be provided, and daily servicing (i.e. cleaning and bed making) must be available through the on-site management, although this service may not necessarily be used.

Single bedroom holiday flats, units and houses

The total number of holiday flats, units and houses available with a single bedroom.

Site nights available

The number of caravan park sites available multiplied by the number of days for which they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are included.

Site nights occupied

The total number of nights each caravan park site was occupied during the survey period.

Site occupancy rate

The site occupancy rate for caravan parks represents site occupancy expressed as a percentage of total capacity available during the survey period,

Site occupancy rate (%) = $\frac{\text{Site nights occupied}}{\text{Site nights available}} * 100$

providing that, for establishments closing (other than for seasonal reasons) or opening during the survey period, the denominator of the above expression includes only operating periods.

Sites occupied by long-term guests

The total number of caravan park sites occupied on the last day at the end of the survey period by guests who have stayed continuously for two months or more.

Star grading

The grading of hotels, motels and guest houses with facilities and serviced apartments is based on the classification system owned by AAA Tourism Pty Ltd. The gradings are allocated according to a points system based on the amenities and facilities available to guests. Details of the grading scheme are contained in the publication *Accommodation Guide* published by AAA Tourism Pty Ltd for each of the individual Australian Motoring Organisations. For the purpose of classifying establishments to a star grading in this publication, 'half' star gradings are ignored (e.g. a two and a half star grading has been shown as two star).

While coverage has significantly improved, some establishments (including some competing in the four and five star markets and having significant takings) still remain outside the star grading scheme. These establishments have been given a star grading of 'ungraded'.

Takings from accommodation

Since 1 July 2000, takings from accommodation include gross revenue from the provision of accommodation, including GST. Takings from meals are excluded. In cases where takings from accommodation data cannot be provided inclusive of GST the amount of GST payable is estimated and the data revised accordingly.

Takings from accommodation for each month generally represent the takings received during that month. Where payments are received in advance of, or after the provision of accommodation to guests, the monthly figure for takings from accommodation may not necessarily bear a direct relationship to the number of guests accommodated during the month.

GLOSSARY continued

Unit lettings The total number of times a holiday flat, unit or house was occupied by a new tenant,

counted only on the first night it was occupied by the new tenant. This is the equivalent $% \left(1\right) =\left(1\right) \left(1\right$

of guest arrivals.

Unit nights available The number of holiday flats, units and houses available multiplied by the number of days

for which they were available during the survey period. For establishments closing (other than for seasonal reasons) or opening during this period, operating periods only are

included.

Unit nights occupied The total number of nights each holiday flat, unit or house was occupied during the

survey period.

Unit occupancy rate The unit occupancy rate for holiday flats, units and houses represents unit occupancy

expressed as a percentage of total capacity available during the survey period,

Unit occupancy rate (%) = $\frac{Unit \ nights \ occupied}{Unit \ nights \ available} * 100$

providing that, for letting entities closing (other than for seasonal reasons) or opening

during the survey period, the denominator of the above expression includes only

operating periods.

Unpowered sites The maximum number of sites with no provision for connection to electric power

supply, available at caravan parks for accommodating paying guests during the survey

period.

Visitor hostels Establishments with 25 or more bed spaces which provide accommodation to visitors on

a bed basis (rather than by room). This category does not include establishments providing charity type accommodation (e.g. Salvation Army hostels) nor hotels, motels and guest houses without in-room facilities which provide accommodation on a per

room basis.

INFORMATION F O R MORE

www.abs.gov.au the ABS web site is the best place for INTERNET

data from our publications and information about the ABS.

LIBRARY A range of ABS publications are available from public and

tertiary libraries Australia wide. Contact your nearest library to determine whether it has the ABS statistics you

require, or visit our web site for a list of libraries.

INFORMATION AND REFERRAL SERVICE

Our consultants can help you access the full range of information published by the ABS that is available free of charge from our web site, or purchase a hard copy publication. Information tailored to your needs can also be requested as a 'user pays' service. Specialists are on hand to help you with analytical or methodological advice.
