| 9.2 | 10.6 | -4.5 |
| 2.9 | 3.2 | 2.2 |

## JUNE KEY POINTS

## TRENDESTIMATES

- The trend estimate for total dwelling units approved has increased throughout the June 2002 quarter, with rises of $2.9 \%$ in April, $3.2 \%$ in May and $2.2 \%$ in June 2002. The series has now risen for five consecutive months following four months of decline.
- The trend estimate for private sector houses approved increased by $2.0 \%$ in April 2002, 1.9\% in May 2002 and $1.4 \%$ in June 2002. The trend estimate has increased in each of the past five months.

## SEASONALLY ADJUSTED ESTIMATES

- The seasonally adjusted estimates for total dwellings approved in each month of the June 2002 quarter were all higher than those in the same three months in 2001. The estimate for June 2002 is $17.6 \%$ higher than the estimate for June 2001.
- The seasonally adjusted estimate for private sector houses fell by $7.4 \%$ in June 2002, following rises of $8.7 \%$ and $3.1 \%$ in April and May 2002 respectively. The seasonally adjusted estimates for private sector houses approved in each month of the June 2002 quarter were all more than $18 \%$ higher than those in the same three months in 2001.

## ORIGINALESTIMATES

- The total number of dwellings approved in the June 2002 quarter rose to 12,825 , an increase of $18.2 \%$ on the March 2002 quarter estimate.
- The total value of building work approved in the June 2002 quarter was $\$ 3,561.8$ million, $12.9 \%$ higher than the March 2002 quarter. The value of residential and non-residential building both rose in the same period, by $14.4 \%$ and $10.2 \%$ respectively.

## NOTES

FORTHCOMING ISSUES

CHANGES IN THIS ISSUE

DATA NOTES

ISSUE
September 2002
December 2002

## RELEASE DATE

7 November 2002
10 February 2003

There are no changes in this issue.

Seasonally adjusted and trend estimates to May 2002 have been revised as a result of the annual reanalysis and subsequent refinement of seasonal factors. See paragraph 23 of the Explanatory Notes.

The following is a summary of revisions made to total dwellings since the last issue of this publication, mainly as a result of receiving previously unreported data.

|  | $2000-2001$ | $2001-2002$ | Total |

## VALUEOFBUILDING APPROVED

VALUE OF TOTAL BUILDING

VALUE OF RESIDENTIAL BUILDING

VALUE OF NON-RESIDENTIAL BUILDING

The trend estimate for the value of total building has increased for the past twenty one months.

The trend estimate for the value of residential building has risen for five consecutive months since February 2002 following four months of decline.

The trend estimate for the value of non-residential building approved has increased for the past ten months, since September 2001.

## S UMMARY O F 2 O O 1-2002 BUILDING APPROVALS

DWELLING UNITS APPROVED

VALUE OF BUILDING APPROVED

The number of dwelling units approved in 2000-2001 and 2001-2002 and the percentage movement between 2000-2001 and 2001-2002 for Victoria is summarised below.

|  | 2000-2001 | 2001-2002 | $2000-2001$ to <br> $2001-2002$ |
| :--- | :---: | :---: | :---: |
|  | no. | no. | \% change |
| New residential building | 34261 | 48336 | 41.1 |
| Alterations and additions to |  |  |  |
| residential buildings | 328 | 172 | -47.6 |
| Conversions <br> Non-residential building | 919 | 961 | 4.6 |
| Total dwelling units | 55 | 72 | 30.9 |

The total number of dwellings approved in 2001-2002 increased by 13,978 (39.3\%) compared with 2000-2001.

The value of building approved in 2000-2001 and 2001-2002 and the percentage movement between 2000-2001 and 2001-2002 for Victoria is summarised below.

|  | $2000-2001$ | $2001-2002$ | $2000-2001$ to <br> $2001-2002$ |
| :--- | :---: | :---: | :---: |
|  | $\$ m$ | $\$ m$ | \% change |
| New residential building | 5114.8 | 7600.3 | 48.6 |
| Alterations and additions <br> creating dwellings | 27.7 | 21.1 | -23.7 |
| Alterations and additions not <br> creating dwellings | 1024.8 | 1269.1 | 23.8 |
| Conversions <br> Non-residential building | 138.5 | 103.3 | -25.4 |
| Total building | 4062.9 | 4489.4 | 10.5 |

The value of total building approved increased by $30.0 \%$ to $\$ 13,483.1$ million in 2001-2002 compared with the previous year. This rise is largely the result of a $48.6 \%$ increase in new residential building approved to $\$ 7,600.3$ million.

## EFFECT OF NEW SEASONALLY ADJUSTED ESTIMATES ON TREND ESTIMATES

Readers should exercise care when interpreting trend estimates. The last six trend estimates, in particular, are likely to be revised when new seasonally adjusted estimates become available.

## TREND REVISIONS

Generally, the greater the volatility of the original series, the larger the size of the revisions to trend estimates. Analysis of the building approval original series has shown that they can be revised substantially. As a result, some months can elapse before turning points in the trend series are reliably identified.

The graphs and tables which follow present the effect of two possible scenarios on the previous trend estimates: that the July seasonally adjusted estimate is higher than the June estimate by $6 \%$ for the number of private sector houses approved and $9 \%$ for total dwelling units approved; and that the July seasonally adjusted estimate is lower than the June estimate by $6 \%$ for the number of private sector houses approved and $9 \%$ for total dwelling units approved. These percentages were chosen because they represent the average absolute monthly percentage change for these series over the last ten years.

(a) Includes conversions and dwelling units approved as part of alterations and additions or the construction of non-residential buildings.
(b) Refer to Explanatory Notes paragraph 16.

## EXPLANATORYNOTES

SCOPE

VALUE DATA

1 This publication presents monthly details of building work approved

2 Statistics of building work approved are compiled from:

- permits issued by local government authorities and other principal certifying authorities;
- contracts let or day labour work authorised by Commonwealth, State, semi-government and local government authorities;
- major building approvals in areas not subject to normal administrative approval e.g. building on remote mine sites.

3 The scope of the survey comprises the following:

- construction of new buildings;
- alterations and additions to existing buildings;
- approved non-structural renovation and refurbishment work;
- approved installation of integral building fixtures.

4 From July 1990, the statistics include:

- all approved new residential building valued at $\$ 10,000$ or more;
- approved alterations and additions to residential building valued at $\$ 10,000$ or more;
- all approved non-residential building jobs valued at $\$ 50,000$ or more.

5 Excluded from the statistics is construction activity not defined as building (e.g. roads, bridges, railways, earthworks, etc.). Statistics for this activity can be found in Engineering Construction Activity, Australia (Cat. no. 8762.0).

6 Statistics on the value of building work approved are derived by aggregating the estimated 'value of building work when completed' as reported on building approval documents provided to local councils or other building approval authorities. Conceptually these value data should exclude the value of land and landscaping but include site preparation costs. These estimates are usually a reliable indicator of the completed value of 'houses'. However, for 'other residential buildings' and 'non-residential buildings', they can differ significantly from the completed value of the building as final costs and contracts have not been established before council approval is sought and gained.

7 The ABS generally accepts values provided by approving bodies. Every effort is made to ensure data are provided on a consistent basis, however, there may be instances where value data reported does not reflect the building completion value. For example, the reported value for most project homes is the contract price, which may include the cost of site preparation and landscaping. In other cases where a builder is contracted to construct a dwelling based on the owner's plans, the value may only be the builder's costs. Some councils do not use the value on approval documents, instead deriving a value based on floor area and type of structure.

8 From July 2000, value data includes the Goods and Services Tax (GST) for residential and non-residential building approvals. The ABS has consulted with councils and other approving authorities to ensure that approval values are reported inclusive of the GST. Where it was identified by a council or other approving authority that approvals submitted from its jurisdiction were on a GST-exclusive basis, the ABS has made adjustments to the data to ensure that values were consistent with other data collected and were inclusive of GST.

## EXPLANATORYNOTES

9 Building ownership is classified as either public or private sector and is based on the sector of intended owner of the completed building at the time of approval. Residential buildings constructed by private sector builders under government housing authority schemes are classified as public sector when the authority has contracted, or intends to contract, to purchase the building on or before completion.

10 Building approvals are classified both by the Type of Building (e.g. 'house', 'factory') and by the Type of Work involved (e.g. 'new', 'alterations and additions' and 'conversions'). These classifications are often used in conjunction with each other in this publication and are defined in the Glossary.

11 The Type of Building classification refers to the intended major function of a building. A building which is ancillary to other buildings or forms a part of a group of related buildings is classified to the function of the specific building, not to the function of the group as a whole.

12 An example is the treatment of building work approved for a factory complex. For instance, a detached administration building would be classified to Offices, a detached cafeteria building to Shops, while the factory buildings would be classified to Factories.

13 An exception to this rule is the treatment of group accommodation buildings. For example, a student accommodation building on a university campus would be classified to Education.

14 In the case of a large multi-function building which, at the time of approval is intended to have more than one purpose (e.g. a hotel/shops/casino project), the ABS endeavours to split the approval details according to each main function.

15 Where this is not possible because separate details cannot be obtained, the building is classified to the predominant function of the building on the basis of the function which represents the highest proportion of the total value of the project.

16 The Type of Work classification refers to the building activity carried out Conversion jobs are shown separately in tables 5 and 6. However, in other tables they are included within existing categories, as follows: in tables $1,2,11$ and 12 they are included in the appropriate Type of Building category, and in tables 3, 4, 11 and 12 they are included in the 'Alterations and additions to residential buildings' category.

17 Seasonal adjustment is a means of removing the estimated effects of seasonal variation from the series so that the effects of other influences can be more clearly recognised.

18 In the seasonal adjustment of series, account has been taken of both normal seasonal factors and 'trading day' effects arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month. Adjustment has also been made for the influence of Easter which may affect the March and April estimates differently.

19 Seasonal adjustment does not remove from the series the effect of irregular or non-seasonal influences (e.g. the approval of large projects or a change in the administrative arrangements of approving authorities).

20 Some of the component series have been seasonally adjusted independently. Therefore, the adjusted components may not add to the adjusted totals.

TREND ESTIMATES

## CHAIN VOLUME MEASURES

AUSTRALIAN STANDARD GEOGRAPHICAL CLASSIFICATION (ASGC)

21 As happens with all seasonally adjusted series, the seasonal factors are reviewed annually to take account of each additional year's data. The timing of this review may vary and when appropriate will be notified in the 'Data Notes' section of this publication.

22 Smoothing seasonally adjusted series reduces the impact of the irregular component of the seasonally adjusted series and creates trend estimates. For monthly series, these trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months of the seasonally adjusted series except the last six months. Trend series are created for the last six months by applying surrogates of the Henderson moving average to the seasonally adjusted series. For further information, see Information Paper: A Guide to Interpreting Time Series-Monitoring 'Trends': an Overview (Cat. no. 1348.0) or contact the Assistant Director, Time Series Analysis on Canberra 0262526076.

23 While the smoothing techniques described in paragraph 22 enable trend estimates to be produced for the latest few periods, they do result in revisions to the trend estimates as new data becomes available. Generally, revisions become smaller over time and, after three months, usually have a negligible impact on the series. Revisions to the original data and re-analysis of seasonal factors may also lead to revisions to the trend.

24 The chain volume measures appearing in this publication are annually re-weighted chain Laspeyres indexes referenced to current price values in a chosen reference year. The reference year will be updated annually in the September publication. While current price estimates reflect both price and volume changes, chain volume estimates measure changes in value after the direct effects of price changes have been eliminated and therefore only reflect volume changes. The direct impact of the GST is a price change, and hence is removed from the chain volume estimates.

25 Further information on the nature and concepts of chain volume measures is contained in the ABS publication Information Paper: Introduction of Chain Volume Measures in the Australian National Accounts (Cat. no. 5248.0).

26 Area statistics are now being classified to the Australian Standard Geographical Classification (ASGC), 2001 Edition (Cat. no. 1216.0), effective from 1 July 2001, and ASGC terminology has been adopted in the presentation of building statistics.

27 Some Statistical Districts straddle State/Territory boundaries. The AlburyWodonga Statistical District lies partly in Victoria and partly in New South Wales.

28 As well as the statistics included in this and related publications, the ABS may have other relevant data available on request. Inquiries should be made to the National Information and Referral Service on 1300135070.

## EXPLANATORYNOTES

## Alterations and additions

Alterations and additions to residential buildings

Building activity carried out on existing buildings. Includes adding to or diminishing floor area, altering the structural design of a building and affixing rigid components which are integral to the functioning of the building.

Alterations and additions carried out on existing residential buildings, which may result in the creation of new dwelling units. See also Explanatory Notes paragraph 16.

## Building

## Conversion

Dwelling unit
A dwelling unit is a self-contained suite of rooms, including cooking and bathing facilities and intended for long-term residential use. Regardless of whether they are self-contained or not, units within buildings offering institutional care (e.g. hospitals) or temporary accommodation (e.g. motels, hostels and holiday apartments) are not defined as dwelling units. Such units are included in the appropriate category of non-residential building approvals. Dwelling units can be created in one of four ways: through new work to create a residential building; through alteration/addition work to an existing residential building; through either new or alteration/addition work on non-residential building or through conversion of a non-residential building to a residential building.

Educational Includes schools, colleges, kindergartens, libraries, museums and universities.

Flats, units or apartments

Health

Hotels, motels and other short term accommodation

House A house is a detached building primarily used for long term residential purposes. It consists of one dwelling unit. For instance, detached ‘granny flats’ and detached dwelling units (e.g. caretaker's residences) associated with a non-residential building are defined as houses.

## Miscellaneous <br> New building work

## New other residential

 buildingsNew residential

Non-residential building
A non-residential building is primarily intended for purposes other than long term residential purposes. Note that, on occasions, one or more dwelling units may be created through non-residential building activity. Prior to the April 1998 issue of this publication, they have been included in the 'Conversions, etc.' column in tables showing dwelling units approved. They are now identified separately (e.g. see table 5). However, the value of these dwelling units cannot be separated out from that of the non-residential building which they are part of, therefore the value associated with these remain in the appropriate Non-residential category.

## Offices

## Other business premises

## Other dwellings

## Other residential building

## Religious

## Residential building

Semi-detached, row or terrace houses, townhouses

Shops Includes retail shops, restaurants, taverns and shopping arcades.

FOR MORE INFORMATION...

INTERNET www.abs.gov.au the ABS web site is the best place to start for access to summary data from our latest publications, information about the ABS, advice about upcoming releases, our catalogue, and Australia Now-a statistical profile.

LIBRARY A range of ABS publications is available from public and tertiary libraries Australia-wide. Contact your nearest library to determine whether it has the ABS statistics you require, or visit our web site for a list of libraries.

CPI INFOLINE For current and historical Consumer Price Index data, call 1902981074 (call cost 77c per minute).

DIAL-A-STATISTIC For the latest figures for National Accounts, Balance of Payments, Labour Force, Average Weekly Earnings, Estimated Resident Population and the Consumer Price Index call 1900986400 (call cost 77c per minute).
