TASMANIAN STATISTICAL DIVISIONS

The State, for statistical purposes, is analysed by division which is basically a group of whole municipalities. The traditional Tasmanian statistical divisions, in use for over 50 years, were exposed to searching scrutiny in 1971 and the decision was taken to introduce a new structure, to be applied to statistics in respect of periods commencing on or after 1 July 1972.

History of Statistical Divisions

The groupings of administrative areas into divisions for statistical purposes can be found in annual volumes of the *Statistics of Tasmania* dating back to the nineteenth century. The administrative areas included: police districts, registration districts, electoral districts, and municipalities. The boundaries of these areas were subject to periodic changes. The *Local Government Act* 1906 provided a basis for the whole State coming under uniformly constituted local government and gradually the divisional grouping of administrative areas was confined, in official statistics, to municipalities. As a result of this Act, fixed local government area (municipality) boundaries were delineated in 1907 by a commission specially set up for the purpose. These boundaries remained generally unchanged from 1907, although there have been numerous relatively minor boundary changes, to 1919 when the old municipalities of 'Hobart', 'Queenborough' and 'New Town' were combined to form the new municipality of 'Hobart'.

In 1919, groupings of local government areas used were very similar to those still used in 1971; in some series Hobart, Launceston and Glenorchy were separately specified as components of an 'Urban Division' distinct from the region in which each was located.

The basis of these 1919 groupings can only be inferred since no specific criteria were specified in the records. The Western Division clearly combined the 'west coast' mining municipalities into one entity; the Southern Division seemed to be based on orcharding, small fruit and hop areas; while the South Eastern Division was allied more with pastoral and grazing areas. In short, the main determinant may well have been similarity of rural activity (with the Western Division a special case because of its mining activity).

After the 1966 population census, a new division was formed with the title Hobart Division, comparable with similar capital city divisions in other States; its boundaries were drawn wide enough to encompass the expected expansions of the inner urban area for a period of 20 to 30 years. Apart from this, the broad divisional structure in 1971 was very much the same as it had been in 1919.

In 1972 a new statistical division structure, using the three principal urban centres of influence as a basis, was designed. The three urban centres and their areas of influence were: Hobart - South and South-East; Launceston - North and North-East; and Burnie-Devonport - North-West and West. The following divisional structure was then adopted; with Hobart as focus - Hobart and Southern divisions; with Launceston as focus - Northern Division split into Tamar and North Eastern sub-divisions; and with Burnie-Devonport as focus - Mersey-Lyell Division split into North Western and Western sub-divisions.

In July 1985 the old municipalities of 'St Leonards', 'Lilydale', and 'Launceston' amalgamated to form the new 'City of Launceston'. In July 1986 the west coast municipalities of 'Gormanston' and 'Queenstown' amalgamated to form the new municipality of 'Lyell'.

With the introduction of the Australian Standard Geographical Classification (ASGC), there were changes to statistical sub-divisions. The Tamar and North Western statistical sub-divisions ceased to exist. They are now represented by the Greater Launceston and Central North statistical sub-divisions, and Burnie-Devonport and North Western Rural statistical sub-divisions respectively.

Greater Hobart Division

This Division comprises Hobart, Glenorchy and Clarence cities, and parts of four other municipalities: Brighton, Kingborough, New Norfolk, and Sorell. The Division is Tasmania's principal industrial region and the administrative focal point. The Greater Hobart Division boundaries were drawn wide enough to contain the expected outward growth of the inner urban area for a period of 20 to 30 years.

One important component of the Greater Hobart Division is Urban Hobart, defined as the densely settled contiguous parts of the cities of Hobart, Glenorchy and Clarence, and the municipality of Kingborough. The boundaries of Urban Hobart and of the Greater Hobart Division do not conform with borders defining local government areas.

Southern Division

Comprises the southern local government authority areas which have Hobart as their urban focus. Predominant activities include orcharding, sheep and cattle grazing, forestry and timber processing.

Northern Division

The Northern Division is the region with Launceston as its urban focus.

- (i) *Greater Launceston Statistical Sub-division:* A new boundary delineating the Launceston Statistical District was drawn for the purpose of presenting results of the 1976 Population Census. The boundary was drawn to contain the area of expected urban growth over the next two decades and includes the City of Launceston and parts of five other municipalities.

Urban Launceston is defined for statistical purposes as the City of Launceston plus the contiguous urban parts of the Evandale, Westbury and Beaconsfield municipalities.

- (ii) *Central North Statistical Sub-division:* This region comprises the Tamar Valley, parts of the City of Launceston and inland to Longford and Deloraine. It includes several major manufacturing industries, port facilities of the northern region and agricultural, pastoral, dairying and forestry industries.
- (iii) *North-Eastern Statistical Sub-division:* This comprises the outer seven municipalities of the Northern Division. Principal activities include agriculture, dairying, sheep and cattle grazing, forestry and some mining.

Mersey-Lyell Division

This division encompasses the north-west and western portions of the State. The region has a twin urban focus of Burnie-Devonport.

- (i) *Burnie-Devonport Statistical Sub-division:* As with the Launceston Statistical District the Burnie-Devonport Statistical District was drawn to contain the area of expected urban growth over the next two decades. It includes the whole of the City of Devonport and parts of the City of Burnie and the municipalities of Wynyard, Penguin, Ulverstone and Latrobe.
- (ii) *North-Western Rural Statistical Sub-division:* This comprises the municipalities stretching along Bass Strait from Latrobe to Circular Head plus part of the City of Burnie as well as the municipalities of Kentish and King Island. The sub-division includes several major manufacturing industries and is a principal agricultural, pastoral, dairying and forestry area for the State.
- (iii) *Western Statistical Sub-division:* Contains Tasmania's western municipalities where mining activities predominate.

STATISTICAL SUMMARY

In the following pages, an historical summary of the more important statistics available that relate to Tasmania is shown. Only brief footnotes have been included and readers should refer to publications listed in the bibliography at the end of each relevant chapter. Naturally, the range of statistics for early years is very limited. Also, it should be borne in mind that perfect comparability over long periods of time is difficult to attain due to changes in definitions,

scope of statistical collections, etc. While major breaks in series are shown, minor changes to series are not indicated and the statistics should be interpreted with this in mind.

Generally, the first year shown on each page is the earliest for which any series on that page is available. Due to space constraints, earlier details for some series are given only for either every five or ten years.

(Chapter 6)

Summary of Population at Census Dates, Tasmania (a) (b)

(a) Full-blood Aboriginals excluded from census data prior to 1966.

(b) As recorded. Not adjusted for under-enumeration.

(c) Includes Catholic and Roman Catholic.

(d) The Uniting Church was formed in 1978 from members of the Congregational, Methodist and Presbyterian churches.

(e) Conjugal condition was allocated where this information was not stated.

(a) At August each year to 1977, at June each year from 1978 (seasonally adjusted).

(b) Persons on benefit on last Friday of June. From 1991 the monthly average number was used. Unemployment Benefit was first paid in July, 1945.

(Source: Department of Social Security.)

(c) The rates shown up to and including 1966 are those in Commonwealth awards. State Wages Boards awards are shown from 1967.

The Commonwealth and State rates prior to 1967 were identical except between 1956 and 1959 when the State's rates were slightly higher.

(d) The Tasmanian Wages Boards introduced the concept of the minimum wage in June 1967.

(e) Based on the survey of average weekly earnings introduced in September quarter 1981. Amounts for June 1981 and earlier periods are estimated by linking the various pay-roll tax series with the new series at September quarter 1981.

(f) Over June quarter of previous year.

(g) Tasmanian decision of 13 July 1979 following National Wage Case decision of 27 June 1979.

(a) At 31 December until 1948; at 31 March for 1950 and subsequent years.

(b) Area of State, 68 300 square kilometres.

(c) Excludes areas under pulpwood concessions and exclusive forest permits.

(d) Year ended 31 March.

(e) Area of sown grasses cut for hay, seed and green fodder is included under 'crops'.

(f) Not available on a comparable basis.

(g) From 1972-73 area of sown grasses cut for hay, seed and green fodder are included under 'sown grasses'.

(h) Not strictly comparable with earlier years due to changes in definition of a 'rural establishment'.

(i) The scope of the census for 1986-87 differs from previous years.

(a) Source: Tasmanian Department of Agriculture up to 1978-79; Australian Dairy Corporation from 1979-80. (b) Includes butter equivalent of butter oil and from 1965-66 excludes farm production. (c) Excludes farm production from 1965-66. (d) Includes non-factory production. From July 1970 all weights are on a bone-in basis; earlier figures include an element of unconverted bone-out weights. (e) Includes hardwood and softwood.

(NOTE: Details of production of a number of important articles cannot be published because of confidentiality.)

(a) Details are not comparable with those contained in the table: 'Manufacturing, 1910-1967-68, Tasmania'. (b) No census was conducted in 1970-71 and 1985-86. From 1974-75 figures exclude details for single establishment enterprises with less than four persons employed. (c) Includes working proprietors and employees at separately located administrative and ancillary units. (d) Excludes drawings by working proprietors and partners. (e) Turnover plus increase (or less decrease) in the value of stocks less purchases, transfers in and selected expenses. (f) Includes transfers in of goods from other establishments of the enterprise, charges for commission and sub-contract work, repair and maintenance expenses, outward freight and cartage, motor vehicle running expenses and sales commission payments. (g) Comprises sales of goods, transfers out of goods to establishments of the same enterprise, bounties and subsidies on production, all other operating revenue from outside the enterprise and capital work done for own use, rental or lease. (h) Outlay on fixed tangible assets less disposals.

(a) Includes tram, omnibus and trolley-bus services originally under municipal control but taken over by Metropolitan Transport Trust on 1.7.55. Trams ceased operating: Hobart 21.10.60; Launceston 13.12.52. (b) Prior to 1955-56 includes government grants: see note (a) above. (c) Includes interest, redemption and depreciation. (d) The method used for calculating passengers changed after a change in ticketing procedures revealed inaccuracies. (e) Since the introduction of Metrofare in February 1988 passenger transfers at Springfield Interchange have been included as passenger trips.

(a) Includes interest, redemption and depreciation. (d) The method used for calculating passengers changed after a change in ticketing procedures revealed inaccuracies. (e) Since the introduction of Metrofare in February 1988 passenger transfers at Springfield Interchange have been included as passenger trips.

(Chapter 21)

(a) Data for 1979-80 onwards are not directly comparable with data for previous years because of revisions to estimating procedures to take account of inadequate documentation available for interstate imports by sea. (b) Data for 1978-79 onwards are not directly comparable with data for previous years. From 1 July 1978 overseas export figures relate to all goods leaving Tasmania for overseas countries. Prior to that date export figures relate to only goods leaving Tasmania for overseas countries for which documents had been lodged with customs in Tasmania. (c) In this section each vessel is recorded as an entry at the first Tasmanian port of call only; intrastate movements are excluded. (d) Collection discontinued until 1922-23. (e) Not collected before 1949-50. (f) From 1966-67 not comparable with previous years; details are now confined to vessels of over 200 registered net tons engaged solely in trade. (g) Figures no longer available, due to discontinuation of the Interstate Imports Collection. (h) Overseas only. (i) Deadweight tonnes.

(Chapter 20)

(a) Average of weekly figures. (b) Commonwealth, trustee and private. Private savings commenced operations in Tasmania as follows: ANZ, September 1961; National, May 1962; CBA, July 1962; CBC, March 1963; and Bank of Adelaide, November 1970. (c) Excludes debits to Government accounts at Hobart City branches.

PUBLICATION OF TASMANIAN STATISTICS

General

The Tasmanian Office of the Australian Bureau of Statistics is located at 175 Collins Street, Hobart. Requests for statistical publications can be made by calling at this address; by phoning the Information Officer on Hobart 20 5800; or by writing to the Deputy Commonwealth Statistician, GPO Box 66A, Hobart 7001. Those requiring particular publications on a regular basis should ask to be placed on the publications mailing list.

Service to the public is not restricted to the distribution of publications. If no publication adequately covers the subject matter of the inquiry, then a special extraction of the data required may be undertaken if they are readily available from the basic records held in the Office. The guide, *Catalogue of Publications* (1101.0), includes descriptions of all publications together with a detailed subject index.

Historical

Before the appointment of the first Government Statistician in Tasmania in 1867, statistics had been published in the official 'Blue Books' compiled by the Colonial Secretary during the period 1822-1855, and in volumes entitled *Statistics of Tasmania* after self-government was granted.

By the *Commonwealth and State Statistical Agreement Act* 1924, the Tasmanian Parliament ratified an agreement for the establishment of an office in Tasmania of the Australian Bureau of Statistics to meet the statistical needs of the State Government. Provision was made for the Deputy Commonwealth Statistician, a Federal Government officer, to hold, at the discretion of the State Government, the title of (State) Government Statistician. The first officer appointed in this way was L.F. Giblin, D.S.O.M.C., who had previously been the State Government Statistician. (It was not until the late 1950s that similar arrangements were made in the other Australian States.)

Statistics from 1804

In the Archives Office of Tasmania, the following series are available:

- (i) *Statistical Account of Van Diemen's Land or Tasmania*, 1804 to 1854 compiled by Hugh M. Hull (Office of the Colonial Secretary).
- (ii) Official 'Blue Books' for the period 1822-1855.
- (iii) *Statistics of Tasmania* - annual publications from 1856 to 1922-23.
- (iv) *Statistics of the State of Tasmania* - annual publications commencing 1923-24 and continuing to 1967-68. (Copies of these volumes are held at the University Library, the State Library in Hobart, the Northern Regional Library in Launceston and the Tasmanian Office of the Australian Bureau of Statistics.) Although the bound volume entitled *Statistics of the State of Tasmania* has been discontinued as from the 1967-68 issue, the component parts are still published as separate bulletins.

Copies of publications listed above, are available for inspection at the Tasmanian Office of the Bureau.

Current Publications of the Tasmanian Office

The Tasmanian Office of the Australian Bureau of Statistics is engaged in a continuous publication program.

The publications can be dissected into annual bulletins and monthly or quarterly press releases. The press releases are issued with a view to making the statistical information available as soon as possible after compilation. Bulletins contain greater detail than press releases, but because of time taken to compile and print, are issued some time after the period to which they refer. The two principal publications issued by the Tasmanian Office of the Bureau are the *Tasmanian Year Book* and *Pocket Year Book of Tasmania*.

Tasmanian Statistics in Central Office Publications

Although publications of the Tasmanian Office of the Australian Bureau of Statistics make available statistics on many aspects of the State, there are some fields in which additional or more frequent information is available in publications of the Central Office. Data may also be available on different media including microfiche, magnetic tape, floppy disk and CD-ROM.

How to Obtain Central Office Publications

Central Office priced publications may be bought direct from the *Australian Bureau of Statistics, PO Box 10, Belconnen, ACT 2616* or from the Tasmanian Office of the Australian Bureau of Statistics. A standing order may also be placed with the Bureau on a pre-paid basis.

Subject Matter of Central Office Publications

The fields of statistical inquiry covered in Central Office publications are very wide (more than 270 different titles are issued annually) and the best way to obtain a guide to the material available is to write to: *The Australian Statistician, PO Box 10, Belconnen, ACT 2616* and ask for the booklet *Catalogue of Publications* (1101.0). Copies of this guide are also available at the Tasmanian Office of the Bureau. This comprehensive guide lists the publications of the Central Office and of the State offices; in addition, it contains a subject index to information covered by Central Office publications. Readers with interest in a particular field are invited to call at, or write to, the Tasmanian Office which is in a position to give advice on what publications are available.
