NOON 22 AUGUST 1979

# THE LABOUR FORCE, JULY 1979 (PRELIMINARY)

INQUIRIES

If you want to know more about these statistics ring Mr Godfrey Laurie on Canberra 526565 or our State office, or write to Information Services, ABS, P.O. Box 10, Belconnen, A.C.T. 2616

For copies of this publication contact Information Services, Canberra 526627 or State offices.

# MAIN FEATURES

NOTE. The survey estimates are subject to sampling variability, as explained in paragraphs 15 to 18. Standard errors are shown in Table 1 and on page 3.

- In July 1979 the estimated number of persons in the civilian labour force was 6,450,200 (4,112,400 males and 2,337,800 females), comprising 6,067,800 employed persons (3,910,800 males and 2,157,000 females) and 382,400 unemployed persons (201,600 males and 180,800 females).
- . There were 950,600 persons employed part-time of whom 115,700 reported they would have preferred to work more hours. Of these 37,900 were actively looking for full-time work.
- . The average weekly hours worked by employed persons in July was 36.5. For full-time workers the average was 40.4 and for part-time workers 15.7.

# **EXPLANATORY NOTES**

#### Introduction

This publication contains preliminary estimates of the civilian labour force derived from the monthly population survey. More detailed estimates will be published in *The Labour Force*, *Australia* (6203.0). Preliminary unemployment estimates have been issued in advance of this publication in *Unemployment*, *Preliminary Estimates* (6201.0).

# The population survey

2. The survey is based on a multi-stage area sample of private dwellings (about 30,000 houses, flats, etc.) and non-private dwellings (hotels, motels, etc.), and covers about two-thirds of one per cent of the population of Australia. The information is obtained from the occupants of selected dwellings by carefully chosen and specially trained interviewers, the interviews generally being conducted during the two weeks beginning on the Monday between the 6th and 12th of each month. The information obtained relates to the week prior to the interview (i.e. the survey week).

Because of operational problems arising from the Christmas and New Year holidays, the December 1978 survey commenced a week earlier than usual (i.e. on 4 December), but most interviews were conducted during the following week. The January 1979 survey commenced a week later than usual (i.e. on 15 January).

#### Scope

3. The survey includes all persons aged fifteen years and over except: members of the permanent defence forces; certain diplomatic personnel of overseas governments, customarily excluded from census and estimated populations; non-Australians on tour or holidaying in Australia; and members of non-Australian defence forces (and their dependants) stationed in Australia.

#### **Definitions**

- 4. The labour force category to which a person is assigned depends on his *actual activity* (i.e. whether working, looking for work, etc.) during the survey week. The definitions conform closely to the international standard definitions recommended by the ILO.
- 5. Employed persons comprise all those aged 15 years and over who, during the survey week:
  - (a) worked for one hour or more for pay, profit, commission or payment in kind in a job or business, or on a farm (including employees, employers and self-employed persons); or
  - (b) worked for 15 hours or more without pay in a family business or on a farm (i.e. unpaid family helper); or
  - (c) were employees who had a job but were not at work and were: on paid leave; on leave without pay for less than four weeks up to the end of the survey week; stood down without pay because of bad weather or plant breakdown at their place of employment for less than four weeks up to the end of the survey week; on strike or locked out; on workers' compensation and expected to be returning to their job; or receiving wages or salary while undertaking full-time study; or

- (d) were employers or self-employed persons who had a job, business or farm, but were not at work.
- 6. Unemployed persons are those aged 15 years and over who were not employed during the survey week, and
  - (a) had actively looked for full-time or part-time work at any time in the four weeks up to the end of the survey week and:
    - (i) were available for work in the survey week, or would have been available except for temporary illness (i.e. lasting for less than four weeks to the end of the survey week);
    - (ii) were waiting to start a new job within four weeks from the end of the survey week and would have started in the survey week if the job had been available then;
  - or (b) were waiting to be called back to a full-time or part-time job from which they had been stood down without pay for less than four weeks up to the end of the survey week (including the whole of the survey week) for reasons other than bad weather or plant breakdown.
- 7. Unemployed persons looking for first job are those who had never worked for two weeks or more in a full-time job.
- 8. The unemployment rate for any group is the number unemployed expressed as a percentage of the labour force in the same group.
- 9. The *labour force* comprises all persons who, during the survey week, were employed or unemployed, as defined in paragraphs 5 and 6.
- 10. The *labour force participation rate* for any group is the labour force expressed as a percentage of the civilian population aged 15 years and over in the same group.
- 11. Full-time workers are those who usually work 35 hours a week or more and others who, although usually part-time workers, worked 35 hours or more during the survey week. Part-time workers are those who usually work less than 35 hours a week and who did so during the survey week. When recording hours of work, fractions of an hour are disregarded.
- 12. Persons not in the labour force are those who, during the survey week, were not in the categories 'employed' or 'unemployed'.

# Revision of series

13. The survey estimates for February 1978 and subsequent months are based on population estimates derived from the 1976 Population Census, adjusted for under-enumeration, and were obtained by using a new sample and revised questionnaire. Estimates from August

1966 have been revised to the new basis and are not comparable with those in issues of this publication prior to February 1978.

# Comparability of series

14. When comparing labour force estimates for February 1978 and subsequent months with those for earlier periods it should be noted that with the introduction of monthly surveys the interviews are now conducted during a two-week period, whereas formerly the period was four weeks. The change of timing may affect the level of the figures for any month, but particularly for months during which the employment status of the population may be changing rapidly.

# Reliability of the estimates

- 15. Since the survey estimates are based on information obtained from occupants of a sample of dwellings they, and the movements derived from them, are subject to sampling variability; that is, they may differ by chance from the figures that would have been produced if all dwellings had been included in the surveys. One measure of the likely difference is given by the *standard error*. There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been obtained if all dwellings had been included in the survey, and about nineteen chances in twenty that the difference will be less than two standard errors.
- 16. Standard errors of estimates for the latest month and of estimates of movements since the previous month are shown in Table 1. Standard errors of other estimates and other *monthly* movements should be determined by using Tables A and B on page 3. Further information on standard errors is contained in the Technical Note in *The Labour Force, Australia* (6203.0).
- 17. The smaller the estimate the higher is the relative standard error. Very small estimates are subject to such high relative standard errors as to detract seriously from their value for most reasonable uses. Estimates below the levels shown in Table A and percentages based on such estimates have not been included. Although figures for these small components can in some cases be derived by subtraction, they should not be regarded as reliable.
- 18. Examples of the calculation and use of standard errors are given below:
  - (a) From Table A it will be seen that the estimate of 188,200 unemployed males looking for full-time work in July 1979 has a standard error of about 5,000 and therefore there are about two chances in three that the value that would have been produced if all dwellings had been included in the survey will be within the range 183,200 to 193,200 and about nineteen chances in twenty that the value will be within the range 178,200 to 198,200.
  - (b) The estimate of movement in the number of unemployed males looking for full-time work

from June to July 1979 is a decrease of 4,600. Table B relates the standard error of the monthly movement to the larger of the two estimates from which the movement is derived. In this case the June 1979 estimate (192,800) is the larger. From Table B it will be seen that the standard error of the monthly movement is about 4,200. Therefore there are about two chances in three that if all dwellings had been included in the surveys the movement would have been within the range -8,800 to -400 and about nineteen chances in twenty that it would have been within the range -13,000 to +3,800.

## Seasonally adjusted estimates

19. Seasonally adjusted quarterly estimates of the labour force are shown in Table 1. Calculation of seasonally adjusted monthly figures will not be possible until results of monthly surveys for two or three years are available. The move to the higher level of unemployment since 1974 appears to have been accompanied by shifts in the pattern of seasonal variation. For this reason the publication of seasonally adjusted quarterly figures of unemployment was suspended as from November 1977. The matter will be kept under review.

# Related publications

20. Users may also wish to refer to the following publications which are available on request:

Unemployment (Preliminary estimates) (6201.0) The Labour Force, Australia (6203.0) Information Paper: Questionnaires used in the Labour Force Survey (6232.0)

21. All publications produced by the ABS are listed in the *Catalogue of Publications* (1101.0), which is available free of charge from any ABS office.

## Symbols and other usages

- \* Subject to sampling variability too high for most practical uses. See paragraph 17, page 2.
- n.a. not available.
  - .. not applicable.
  - r revised.
- 22. Figures have been rounded and discrepancies may occur between sums of the component items and totals.

TABLE 3. EMPLOYED PERSONS, JULY 1979 (a)

	Males	Married women	Other females (b)	All females	Persons
	NUMBI	ER ('000)			
All employed persons	3,910.8	1,368.2	788.8	2,157.0	6,067.8
Full-time workers	3,715.6	768.6	632.9	1,401.6 3	5,117.20
Part-time workers	195.2	599.6	155.8	755.4	950.6
Preferred not to work more hours	160.5	548.0	126.4	674.4	834.9
Preferred to work more hours	34.7	51.6	29.5	81.0	115.7
Were actively looking for full-time work	16.9	9.6	11.4	21.0	37.9
A	VERAGE WEEKLY	HOURS WORKI	ED (c)		
All employed persons	40.1	28.6	32.7	30.1	36.5
Full-time workers	41.3	38.6	37.3	38.0	40.4
Part-time workers	16.0	15.9	14.3	15.6	15.7

<sup>(</sup>a) For scope of estimates see paragraph 3. For definitions see paragraphs 4 to 12. (b) Comprises never married, widowed and divorced. (c) Averages have been calculated by using actual hours worked during the survey week, not hours paid for. All employed persons, including those who did not work during the survey week, have been included in the calculations. When recording hours worked, fractions of an hour are disregarded. This procedure results in a slight lowering of the average hours figures. The figures may be affected by public holidays, leave, absenteeism; temporary absence from work due to sickness, accidents and industrial disputes; and work stoppages due to bad weather, plant breakdown, etc.

TABLE 4. CIVILIAN POPULATION AGED 15 YEARS AND OVER, BY EMPLOYMENT STATUS AND AGE, JULY 1979 (a) (\*000)

		Employed			Unemployed				
Age group (years)	Full-	Part- time	Total	Looking for full-time work	Looking for part-time work	Total	Labour force	Not in labour force	Civilian population aged 15 years and over

Total	195.5	43.0	238.5	5.6	6.7	5.8

<sup>(</sup>a) See note (a) to Table 4.

TABLE 7. UNEMPLOYED PERSONS, BY INDUSTRY AND OCCUPATION OF LAST FULL-TIME JOB, JULY 1979 (a)

Industry division or sub-division (b)	Number ('000)	Occupation group	Number ('000)
Had worked for two weeks or more in a		Had worked for two weeks or more in a	
full-time job in the last two years	236.6	full-time job in the last two years	236.6
Agriculture and services to agriculture	10.8	Professional, technical, etc.	13.2
Manufacturing	56.1	Administrative, executive and managerial	5.1
Food, beverages and tobacco	14.3	Clerical	25.5
Metal products	7.4	Sales	27.2
Other manufacturing	34.5	Farmers, fishermen, timber-getters, etc.	14.6
Construction	28.3	Miners, quarrymen, etc.	*
Wholesale and retail trade	59.3	Transport and communication	8.6
Transport and storage	8.4	Tradesmen, production-process workers	
Finance, insurance, real estate and		and labourers, n.e.c.	110.5
business services	12.6	Service, sport and recreation	30.6
Community services	21.2		
Entertainment, recreation, restaurants,			
hotels and personal services	24.4		
Other industries	15.5		
Stood down (c)	9.6		
Other (d)	136.2		
Total	382.4		

<sup>(</sup>a) For scope of estimates see paragraph 3. For definitions see paragraphs 4 to 12. (b) Classified according to the Australian Standard Industrial Classification, 1969. (c) For definition, see paragraph 6(b). (d) Had never worked for two weeks or more in a full-time job or had not done so in the last two years. Industry and occupation were not obtained for these persons.

TABLE 8. UNEMPLOYED PERSONS: DURATION OF UNEMPLOYMENT, JULY 1979 (a)

						Persons	
					Lookin	g for –	
	Males	Married women	Other females (b)	All females	Full-time work	Part-time work	Total
		NUMB	ER ('000)				
Duration of unemployment (weeks) -							
Under 2	14.1	9.0	7.3	16.3	19.5	10.9	30.4
2 and under 4	18.6	11.0	7.6	18.6	26.3	10.9	37.2
4 and under 8	30.4	11.6	12.4	24.0	43.4	11.0	54.4
8 and under 13	23.6	8.0	8.0	16.0	34.2	5.3	39.6
13 and under 26	31.6	12.0	20.8	32.8	56.7	7.6	64.3
26 and under 39	29.0	8.4	26.1	34.6	55.3	8.8	J 63.6
39 and under 52	9.4	*	*	5.0	13.9		14.4
52 and over	45.0	13.5	20.1	33.6	70.1	8.4	78.5
Total	201.6	75.0	105.9	180.8	319.4	63.0	382.4
	AVERAGE	DURATION (	OF UNEMPLOY!	MENT (week	s)		
All unemployed persons	31.9	25.9	32.1	29.6	32.7	21.2	30.8
Aged 15-19 years	23.8	*	28.3	27.9	27.6	15.3	26.1
Aged 20 years and over	35.1	26.2	38.2	30.5	35.3	23.2	33.1

<sup>(</sup>a) Period from the time the person began looking for work, or was laid off, to the end of the survey week. Periods of unemployment are recorded in complete weeks and this results in a slight understatement of duration. For scope of estimates see paragraph 3. For definitions see paragraphs 4 to 12. (b) Never married, widowed and divorced.
