## I．WAGE AND SALARY EARNERS IN EMPLOYMENT

The series contained in this section are based on comprehensive data （referred to herein as＂benchmarks＂）derived for the purpose from the population censuses of June，1954，and June，1961．

2．Figures for periods between and subsequent to the two benchmark points of time are estimates obtained from three main sources，namely，（a）current Pay－roll Tax returns；（b）current returns from Government bodies；and（c）some other direct current records of employment（e．g．for hospitals）．Data from these sources have been supplemented by estimates of changes in the number of wage and salary earners not covered by the foregoing collections．

3．Figures for current months are subject to revision．As they become available，particulars of employment obtained from other collections，such as the annual factory census and the censuses and sample surveys of retail establishments， are used to check，and，where desirable，to revise estimates in relevant sections． The work force survey（see Section III）will supply an additional check for future estimates．

4．The benchmark figures are derived from particulars recorded for individuals on population census schedules．while the estimated monthly figures are derived mainly from reports supplied by employers，relating to enterprises or establishments．Because the two sources differ in some cases in scope and in reporting of industry the industry dissection of the benchmark total has been adjusted to conform as closely as possible to an enterprise／establishment reporting basis．The industry classification used throughout the series is that of the population census of June， 1961.

5．Pay－roll Tax returns are lodged at present by all employers paying more than $\$ 400$ a week in wages（other than certain Commonwealth Government bodies， religious and benevolent institutions，public hospitals and other similar organizations specifically exempted under the Pay－roll Tax Assessment Act 1941－1966）。 At June，1954，this Act required employers paying wages of more than 880 （ $\$ 160$ ）a week to lodge returns．The exemption limit was raised to £120（\＄240）a week from 1st September，1954，and to the present level as from 1st September，1957。

6．Employees in rural industry and in private domestic service are not included in the estimates，because of the inadequacy of current data。

7．The figures herein relate to＂wage and salary earners＂on payrolls or＂in employment＂in the latter part of each month as distinct from numbers of employees actually working on a specific date．They include some persons working part－time．

8．The prime purpose of this series is to measure，as nearly as may be with available data，current monthly trends in employment in the defined field．The estimates are subject to less reliability for longeroterm measurement．

NOTE．－Any discrepancies between totals and sums of components are due to rounding．

（a）See note（a）to Table 6．Excludes State and Local Government employees（3．3 thous． persons in June，1966）engaged in rural industry，or in private homes as employees of government emergency housekeeper services．Also excludes defence forces（see Table 1 on page 3）．（b）Includes semi－government bodies．

## II．EIMPLOYEES IN LARGER PRIVATE FACTORIES

The employment figures in this section are obtained by means of a survey of larger＇private factories undertaken by joint arrangement between the Department of Labour and National Service and this Bureau．The survey covers practically all private factories with 100 or more employees and a large section of those with between 50 and 100 employees．

2．The results of the survey give an earilier indication of current monthly trends in private factory employment than is available from any other source，and the trends in employment in these larger private factories are broadly consonant with those shown by the subsequent estimates of total private factory employment．It should be noted，however，that the figures in this section include persons on strike but exclude persons stood down as a result of an industrial dispute．To this extent they differ from the employment estimates in Section I of this bulletin．The latter exclude all persons who，as a result of an industrial dispute，are not shown on employers＇payrolis．

3．Employers cowoperating in the survey are asked to supply，as at the last paymday in the month，the number of employees in the factory or on the factory office staff，providing their employment is directly related to manufacture．Selling and distribution staff are excluded．

4．Employment in factories in the industry group＂food，drink and tobacco＂is subject to considerable seasonal fluctuation．In order to isolate the effect of such seasonal movements，separate tables have been included in this section to show the movement in employment in factories other than food，drink and tobacco factories．

5．The table showing employment in industry groups includes particulars for only the five mainland States．Figures for Tasmania cannot be included because of the possibility of disclosing individual factory particulars．

6．In order to keep the survey as representative as possible，the list of factories included is revised at the beginning of each year．When comparing employ－ ment figures for different periods it should be noted that at any point of time a continuous monthly series on a uniform basis is available only from January of the previous year．

All Factories in Survey

## III. CIVILIAN WORK FORCE - SIX STATE CAPITAL CITIES

1. Introduction. - Estimates of the Civilian Work Force in this section are based on results of surveys of a sample of households selected by area sampling methods in the six Australian State capital cities. The first survey was conducted in November, 1960, and surveys have been conducted at quarterly intervals since that date. The surveys are conducted in February, May, August and November each year. The survey information is obtained by personal interview at about 19,500 sample households which are visited during a four-week period each quarter by specially trained enumerators. Each person included in the surveys is classified by work force characteristics on the basis of his actual activity during the previous week as reported to the enumerator.
2. Population Coverage. - The sample used in the surveys covers the metropolitan areas, comprising the six Australian State capital cities as defined for statistical purposes. The surveys are currently in process of extension to non-metropolitan areas. The enumeration includes all persons, 15 years of age and over, living in selected households, with the exception of (a) members of the permanent armed services and national servicemen enlisted in the Regular Army Supplement, and (b) non-Australian diplomatic staff and non-Australian members of their households. Prior to August, 1966, persons aged 14 were within the scope of the surveys. See page 18.
3. Classification of the Work Force. - The classification used in the surveys conforms closely to that recommended by the Eighth International Conference of Labour Statisticians held in Geneva in 1954. In this classification, the work force category to which an individual is assigned depends on his actual activity (i.e. whether working, looking for work, etc.) for a specified week during the four-week period covered by the surveys. A person's activity during the specified week is determined from answers given to a set of questions specially designed for this purpose. The principal categories appearing in the tables in this bulletin are the employed and unemployed, which together constitute the work force, and the remainder who are not in the work force. Details of the classification used are as follows:-
(i) Employed Persons: all those who, during the specified week:
(a) did any work for pay, profit, commission or payment in kind, in a job or business, or on a farm (the category includes employees, employers and workers on own account), or
(b) worked 15 hours or more without pay in a family business (or farm), or
(c) had a job, business or farm, but were not at work because of illness, accident, leave or holiday, industrial dispute or because of production hold-up due to bad weather, plant breakdown, etc.

Persons who had a job but were temporarily laid off by their employers for the whole week without pay are excluded, and are classified in the tables as unemployed. Persons who did some work during the week, however, before they either lost their jobs or were laid off, are classified as employed.
(ii) Unemployed Persons: all those who, during the specified week, did no work at all, and
(a) did not have a job or business and were looking for work (including those who stated that they would have looked for work had they not been temporarily ill, and those who would have looked for work had they not already made definite arrangements to start work in a new job after the specified week), or
(b) were laid off from their jobs without pay for the whole week.

Persons who either lost their jobs or were laid off during the specified week, but did some work during that week, are classified as employed.
(iii) The Work Force: comprises all persons, who, during the specified week, were employed or unemployed as defined in (i) and (ii) above.
(iv) Persons Not in the Work Force: those who, during the specified week, were not classified as employed or unemployed. This category therefore includes persons without a job, business or farm and not looking for work, who, during the specified week, were:

```
keeping house (unpaid)
attending a school or university
retired or voluntarily idle
permanently unable to work
inmates of institutions
```

4. Nature of Estimates. - Since the survey estimates are based on a sample they are subject to sampling variability, that is, variations that might occur by chance because only a sample of the population is enumerated.

Estimates of less than 5,000 are not published in the tables because they would be subject to sampling variability too high for most practical purposes. Although figures for these small components can, in some cases, be derived from the tables by deduction, undue significance should not be attached to them nor to any small quarter to quarter movement. Further information on variability of survey estimates is available on request.

NOTE. - Any discrepancies between totals and sums of components are due to rounding.

## CHANGE IN THE AGE RANGE COVERED IN THE SURVEYS

In previous issues of this bulletin the estimates in all tables in this section related to civilians aged 14 years and over. Taking cognizance of changes in the school leaving age, and in order to bring the work force survey definitions into conformity with those of the 1966 Population Census, the scope of the surveys has been restricted,as from August, 1966, to civilians aged 15 years and over. All estimates shown in the tables for August, 1966 therefore exclude persons aged 14.

In Tables 13, 14 and 16, figures for periods prior to August, 1966 have been revised since the previous issue to a basis comparable with that for August, 1966, i.e. to exclude persons aged 14. Revised figures for earlier periods (prior to May, 1963) are available on request.

In Thbles 17 to 20, corresponding revisions for periods prior to August, 1966 have not been made, as these particular figures (i.e. exclusive of fourteen year olds) are not available。

(a) Excludes persons laid off for the whole week without pay, who are included in unemployed.

Note. - The figures in this table are based on actual hours worked, not hours paid for; they are therefore affected by public holidays, leave, absenteeism, temporary absence from work due to sickness, accident and industrial disputes, and work stoppages due to bad weather, plant breakdowns, etco

The principal public holidays that affeoted the figures are: May (each year) - Labour Day (Brisbane) August (each year) - Brisbane Show Day; November, 1965 - Melboume Cup Day, Queen se Bixthday (Perth); Feoruary, 1966 ... Australia Day (all capitals)。

TABLE 18. - SIX AUSTRALIAN STATE CAPITAL CITIES - CIVILIAN POPULATION : EMPLOYED PERSONS WHO WORKED LESS THAN 35 HOURS, BY REASON
Note。 - Figures for periods to May, 1966 relate to persons 14 years of age and over. Those for August, 1966 relate to persons 15 years of age and over. See explanatory notes, page 18.

(c) Includes the Northern Territory.
K.M. ARCHER

COMMONWEALTPH STPATISTICIAN
COMMONWEALTH BUREAU OF CENSUS AND STATISTICS

## CANBERRA, A.C.I. <br> 10TH NOVEMBER, 1966.

NOTE. - Inquiries concerning these statistics may be made in Canberra by telephoning 41971 Extension 10 or, in each State capital, by telephoning the office of the Bureau of Census and Statistios.

[^0]:    (a) Permanent Defence Forces in Australia and overseas.

    From July, 1965, includes national servicemen enlisted in the Regular Army Supplement. Where the intake occurred at the end of the month, national servicemen have been included in the defence forces figures in the following month. (National Service trainees in camp under the former training scheme, applicable from July, 1951, to November, 1959, are not included.) (b) Affected by industrial disputes.
    r - revised.

[^1]:    (a) Includes persons employed in the Australian Capital Territory, who reside in adjoin ing areas.
    (b) Affected by industrial disputes. $r$ - revised.

[^2]:    (a) Affected by industrial disputes. (b) For particulars of manufacturing industry subgroups, see Table 5. r-revised.

[^3]:    (a) Excludes persons stood down as a result of an industrial dispute. See paragraph 2,
