## PREFACE.

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered "to make laws for the peace, order, and good government of the Commonwealth, with respect to Census and Statistics." In the exercise of the power so conferred, a "Census and Statistics Act" was passed in 1905, and in the year following the "Commonwealth Bureau of Census and Statistics" was created. The first Official Year Book was published early in 1908. The publication here presented is the twentieth Official Year Book issued under the authority of the Commonwealth Government.

The synopsis on pp. VII. to XXII. immediately following shows the general arrangement of the work. In addition to the ordinary Chapters, each issue contains special articles dealing with some particular subject or subjects of more or less permanent interest. These cannot of course be repeated year after year, but in some instances a brief condensation is given in subsequent issues. While portion of the matter contained in Year Books Nos. 1 to 19 has been reduced to synopses or deleted in the present issues, the special index provided at the end of the volume will assist in tracing it in previous issues.

The present issue contains a specially-contributed article, dealing with the "Topography of Australia," placed at the end of Chapter II., "Physiography."

Amongst the new matter contained in the various Chapters, mention may be made of the sub-sections dealing with "Film Censorship" and the "Marketing of Australian Commodities," which appear at the close of Chapter XXVI., "Miscellaneous," and the sub-sections dealing with the "Inter-relation of Commonwealth and State Finance," and "Child Endowment," incorporated in the Appendix.

The full text of the Commonwealth Constitution Act and Amendments appears on pages 17 to 34.

Recent information or returns which have come to hand since the various Chapters were sent to press will be found in the Appendix, p. 996.

The material contained in each issue is always carefully examined, but it would be idle to hope that all error has been avoided. The Commonwealth Statistician desires to express appreciation of the opportunity afforded him of improving the Year Book, by those who have been kind enough to point out defects or make suggestions.

My best thanks are due to the State Statisticians, to the responsible officers of the various Commonwealth and State Departments, and to others, who have kindly, and often at considerable trouble, supplied information for this issue.

I wish to express my keen appreciation of the valuable work performed by Mr. J. Stonham, M.A., the editor of the Year Book, and by Mr. H. J. Exley, M.A., the assistant-editor, who capably filled the position of acting-editor during a period of five months' absence in Europe by Mr. Stonham. I also appreciate highly the services rendered by the officers in charge of the various branches of the Commonwealth Bureau of Census and Statistics, upon whom has devolved the duty of revising, or in some cases of re-writing the Chapters relative to their respective branches.

### CHAS. H. WICKENS,

#### Commonwealth Statistician and Actuary.
