PREFACE.

By the Constitution of the Commonwealth of Australia, the Parliament of the Commonwealth is empowered "to make laws for the peace, order, and good government of the Commonwealth, with respect to Census and Statistics." In the exercise of the power so conferred, a "Census and Statistics Act." was passed in 1905, and in the year following, the "Commonwealth Bureau of Census and Statistics." was created. The first Official Year Book was published early in 1908. The publication here presented is the twenty-sixth Official Year Book issued under the authority of the Commonwealth Government.

The synopsis on pp. ix to xxii immediately following shows the general arrangement of the work. The special index (following the usual general index) provided at the end of the volume, together with certain references given in the various Chapters, will assist in tracing in previous issues matter which, owing to limitations of space, has been omitted or is not printed fully in the present volume.

Economic and financial conditions during recent years have caused a demand for new information, or information expressed in new terms, concerning many matters of finance, trade, production and industry. The need for economy hampers the collection of this material, and the need for abbreviation precludes adequate presentation of some that is available. The editing of the Year Book has, therefore, become particularly difficult, involving as it does the continual balancing of the claims of old material and new. Some progress has been made in the later volumes towards bringing closer to present day requirements the Chapters dealing with production, trade, finance, population and vital statistics, etc., while the Appendix furnishes a summary, brought up to the latest available date, of the chief events in connexion with the financial crisis. It is not proposed to refer here to the whole of the new matter or to the new treatment of existing matter, incorporated in the present volume, but attention may be drawn to the following :---

Chapter	VI.	Trade—Balance of Payments (Appendix).
Chapter	XIV.	Public Finance-State Net Loan Expenditure as defined in the
-		Financial Agreement Act (p. 421).
Chapter	XV.	Private Finance-Private Wealth of Australia (p. 471).
Chapter	XVII.	Pastoral Production—Inquiry into Wool Industry (p. 558).
Chapter	XXV.	Population-Incorporation of available details of Census of
		1033.

Later information which has come to hand since the various Chapters were sent to press has been incorporated in the Appendix (pp. 867 to 903).

The material contained in each issue is always carefully examined, but it would be idle to hope that all error has been avoided. I shall be grateful to those who will be kind enough to point out defects or make suggestions.

My best thanks are due to the State Statisticians, who have collected and compiled the data on which the greater part of the information given in the Year Book is based. Thanks are also due to the responsible officers of the various Commonwealth and State Departments, and to others, who have kindly, and often at considerable trouble, supplied information.

My special thanks are due to Dr. Roland Wilson for the contribution of his very exhaustive statement of matters affecting the "balance of payments" for Australia.

PREFACE.

Publication of the present volume has been held back in order to permit of the incorporation of available information in regard to population obtained at the Census of 1933. Intercensal estimates of population for the States and for Australia have been amended in accordance with the Census results.

I wish to express my keen appreciation of the valuable work performed by Mr. J. Stonham, M.A., the Editor of the Year Book, and of the services rendered by the officers in charge of the various branches of the Commonwealth Bureau of Census and Statistics, upon whom has devolved the duty of revising the Chapters relative to their respective branches.

> E. T. McPHEE, Commonwealth Statistician.
