PUBLIC FINANCE

VICTORIAN BUDGET SUMMARY, 1976

Introduction

The Premier and Treasurer of Victoria, the Hon. R. J. Hamer, E.D., presented the Victorian Budget for 1976–77 in the Legislative Assembly of the Victorian Parliament on 8 September 1976.

The basic objectives of the 1976 Victorian Budget included the continuation of the programme begun four years earlier to improve the quality of living for all Victorians. In particular, the Budget was designed to co-operate with the Commonwealth Government in the control of inflation. Increases in expenditure by the Victorian Government would be limited to those necessary to carry out essential programmes and would be consistent with the maintenance of the highest feasible level of employment.

The main aspects of the Budget were:

- (1) No increases in State taxation;
- (2) probate duty to be abolished on property passing to one spouse on the death of the other;
- (3) pay-roll tax reduced by means of an increase in the general exemption to \$48,000;
- (4) rebates on municipal, water, and sewerage rates for eligible pensioners doubled to 50 per cent;
- (5) a new fund created to assist decentralised industries tendering for government contracts;
- (6) meeting the full operating costs of kindergartens and doubling the maximum capital subsidy;
- (7) substantial increases to be made in 1977 in education allowances payable to all parents;
- (8) reduction in supplementary charges for workers compensation;
- (9) larger grants to school councils and committees;
- (10) creation of a new fund to subsidise interest payable on borrowings for school self-help schemes; and
- (11) a 25 per cent increase in the Victorian Government subsidy for municipal library services.

With severe expenditure controls in effect, including a ceiling of 1 per cent on public service staff recruitment other than teachers and police, the estimates for 1976–77 envisaged receipts and payments of the Consolidated Fund in balance at \$2,901.8m, or an increase of 13 per cent on 1975–76.

The Current Account sector of the Budget for 1976–77 was estimated to be virtually in balance at \$2,493m, representing an increase in current receipts over 1975–76 of 15.6 per cent and in current payments of 16.4 per cent. The amount

available from the Consolidated Fund for the Works and Services Account (\$409m) showed a slight reduction on the actual amount available in 1975–76, mainly because of a stricter Commonwealth Government policy on works programmes. However, part of the amount available from 1975–76 would help to offset the fall in capital funds available in 1976–77.

In regard to the outcome of the 1975-76 year, the Premier explained that with moderating wage increases, firm controls on expenditures, and a general improvement in revenues, the Current Account sector of the Budget which had been expected to be \$20m in deficit actually showed a surplus of \$14.6m for the year. This amount was automatically carried forward in the Works and Services Account to support works programmes during 1976-77.

New trends in Commonwealth-State financial relationships

The Premier examined in detail the new arrangements whereby the States and local government would, as from 1 July 1976, receive a guaranteed share of personal income tax revenue collected by the Commonwealth Government. There would be a rationalising of responsibilities between the three levels of government in Australia. Under the first stage of the scheme, the States will receive in 1976–77 and following years 33.6 per cent of personal income tax collections in each year with the distribution between the States to be on the same basis as the 1975–76 financial assistance grants. In 1975–76, Victoria's share of the financial assistance grants paid by the Commonwealth Government was 23 per cent of the total. Subject only to changes in population relativities, Victoria would receive 7.7 per cent of total personal income tax collections by the Commonwealth Government during the 1976–77 financial year. This amount, estimated at \$852.5m, was included in the Budget.

The second stage of the scheme (scheduled to operate from 1977–78) would, inter alia, allocate responsibilities for specific programmes of expenditure which have been supported by the Commonwealth Government by grants of financial assistance. These matters were being examined by joint groups of Commonwealth and Victorian Government officers with a view to making suitable recommendations.

Details

Revenue 1976-77

There were no increases in rates of taxation to operate for 1976-77, reflecting the Victorian Government's determination not to increase indirect taxation which would bear on the cost of living.

The largest item of Budget revenue was State taxation—\$997m, an increase of \$110m for the year. Major contributors to this increase were: pay-roll tax, \$50m; probate duty, \$9m; Tattersall duty, \$9m; stamp duty, n.e.i., \$12m; and tobacco licences, \$11m. Commonwealth Government payments for current purposes credited to the Consolidated Fund were estimated to increase by \$169m in 1976-77. Other substantial contributors to increased revenue in 1976-77 were estimated to be railways revenue, increased from \$147m to \$169m, and debt charges recoveries, increased from \$90m to \$107m.

Expenditure 1976-77

Education

The provision for expenditure on education for 1976-77, \$1,048m, was again a record amount. This included \$933m derived from State sources and \$115m from the Commonwealth Government. The Premier stated that the continuing top priority which the Victorian Government gave to education was reflected in the increasing share of the Budget being devoted to it.

Among the principal items included in the Budget for 1976-77 were:

- (1) Provision for salaries, \$572m;
- (2) direct grants to school councils and committees, \$22.7m;

- (3) supplementary grants under disadvantaged schools programme, \$5.6m;
- (4) additional allowances to parents of pupils (government and non-government schools), \$9.5m in 1976-77 (\$21.5m in a full year);
- (5) per capita payments to independent schools, \$37.4m;
- (6) special education current expenditure, \$17.4m; and
- (7) education works programme, \$149.4m; the Victorian Government to provide \$104.2m (an increase of 17 per cent), and the Commonwealth Government to provide \$45.2m (a decrease of 6 per cent).

The approved works programme would enable a record building programme to be completed in order to cater for approximately 30,000 new pupil places required for the beginning of the 1977 school year.

Hospitals and health services

The Budget provided for a total expenditure of \$483.1m on health and hospital services in 1976-77, an increase of \$66.8m on 1975-76.

The principal item of expenditure was the State payment towards the running costs of hospitals and institutions which are supported by the Hospitals and Charities Commission. This was estimated at \$237.7m for 1976–77. All operating costs of public hospitals are now under Medibank arrangements, shared equally with the Commonwealth Government.

Provision for the general hospital building programme included \$37.6m from the Works and Services Account and \$25m made available by the Commonwealth Government under the Hospitals Development Programme. Much of the hospital development is taking place in the outer suburbs of Melbourne, for example, Ringwood, Dandenong, Fern Tree Gully, and Sunshine, while construction work is proceeding at country base hospitals such as Bendigo, Shepparton, Ballarat, Sale, and Geelong.

Mental health services provided from the Consolidated Fund were budgeted at \$115.7m for 1976-77, an increase of \$17.6m over the previous year, while \$15m was allocated from the Works and Services Account for the capital works programme of the Mental Health Authority and the Alcoholics and Drug Dependent Persons Services Branch of the Health Department.

The Victorian Government provided in the Budget for increased allocations for day training centres, kindergartens (operating and capital costs), elderly citizens clubs, and home help and infant welfare services. In co-operation with the Commonwealth Government, it accepted financial commitments for dental services for primary school children and for capital and operating costs of approved projects under the Community Health Programme.

Social welfare

The Budget provision for the Ministry of Social Welfare for 1976-77 was \$69.8m. Among the increased provisions were payments to foster parents, to deserted wives and unmarried mothers with dependent children, and to voluntary welfare agencies.

\$4.6m was made available for capital works from the Works and Services Account. This programme included an allocation of \$1.2m for works within the Prisons Division to improve prison facilities.

Police

\$123.7m was provided in the Budget for expenditure by the Police Department during 1976-77. Of this amount, the cost of salaries was estimated at \$101.4m.

Provision was made for a further increase of 300 persons in the actual staffing of the Victoria Police. During the last two years the ratio of police to population has improved from 1:663 to 1:589.

Capital works of \$9.5m were scheduled for 1976-77, including three new police stations at important centres and two new residential blocks at the Police Training Academy situated at Glen Waverley.

State development and decentralisation

The Budget allocation of \$30.9m for State development and decentralisation is intended to assist in achieving the objective of a more balanced distribution of population, industry, and development throughout Victoria. Approved decentralised secondary industries can qualify for rebates of pay-roll tax, land tax, freight concessions, etc., which were estimated to cost \$18.6m in 1976-77.

The Victorian Development Corporation would receive an advance of \$5.2m from the Works and Services Account for 1976–77. To date the Corporation has provided finance for firms in 97 country areas, thereby generating employment and commercial activity.

The Victorian Government established the Small Business Development Corporation to assist small businesses and to advise them on financial and management matters. Adequate funds would be provided and other measures in the Budget, notably regarding pay-roll tax and workers compensation, were specifically intended to help small businesses in the difficult economic climate which existed.

Agriculture and rural matters

Severe drought conditions, combined with long-term marketing problems experienced by primary producers, were causing the Victorian Government concern. Several measures were taken to alleviate the unsatisfactory situation, including:

- (1) The declaration of 133 municipalities as drought areas where special road and freight concessions would be available to farmers for the movement of fodder and stock:
- (2) a subsidy on the disposal of unwanted and helpless cattle;
- (3) the provision of short-term employment to dairy farmers whose farms were temporarily unproductive and to other primary producers not eligible for unemployment relief (at a cost of \$1.5m);
- (4) joining the Commonwealth Government in underwriting the sales of skim milk powder and casein (at a cost to Victoria of \$7.5m);
- (5) a contribution of \$3.5m by the Victorian Government for carry-on loans to dairy farmers on concessional terms;
- (6) the reintroduction of free milk for pre-school children from August 1976 to provide a market for 2,300,000 litres of milk at a cost of \$0.7m in 1976-77;
- (7) support of the Commonwealth-State Beef Assistance Scheme with transport subsidies to cost approximately \$1m in 1976-77;
- (8) compensation payments to farmers for cattle slaughtered under the campaign against bovine brucellosis (at a cost to Victoria of \$2m in 1976-77);
- (9) an increase for 1976-77 of \$2.5m in the Victorian Government's funds administered by the Rural Finance and Settlement Commission in the form of assistance to rural industries; and
- (10) the allocation of \$3m from the Works and Services Account for the works programme of the Department of Agriculture.

 Conservation

The Budget provided a total of \$21.3m for the Ministry of Conservation for 1976–77. Principal items were: National Parks Fund, \$3.6m; Environment Protection Authority, \$5m; Fisheries and Wildlife Division, \$3.1m; and Soil Conservation Authority, \$3.2m.

The arts

The Budget increased the funds for the Ministry of the Arts from \$26.8m in 1975-76 to \$32.0m in 1976-77.

Subsidies to municipal library services would cost \$9m in 1976–77, while regional library grants were increased to \$0.5m. \$1m was provided for regional venues for the performing arts. Other innovations were the establishment of two new bodies—the Victorian Film Corporation and the Victorian Tapestry Workshop.

Construction of the theatres and concert hall complex at the Victorian Arts Centre was progressing steadily. The allocation to the Arts Centre Building Committee from the Works and Services Account for 1976–77 was \$9.7m.

Transport

The cost of public transport services to the Consolidated Fund in 1976-77 was estimated at \$203.3m, excluding railway debt charges and the administrative costs of the Ministry of Transport. Components of this figure were: operating loss of the Railways Board, \$129.9m; payments to the Tramways Board, \$26.9m; payments to private bus operators, \$7.0m; allocation to the Railways Board for capital works, \$31.4m; and Melbourne Underground Rail Loop Authority debt charges, etc., \$8.1m.

Provision was made in the Budget for \$5.3m for fare concessions for pensioners and \$2.9m for fare concessions for school children using public transport.

Water resources and sewerage

The principal allocations of funds from the Works and Services Account for works to provide water and sewerage services in 1976–77 were \$38.5m to the State Rivers and Water Supply Commission and \$31.5m to the Melbourne and Metropolitan Board of Works.

Forests

Funds totalling \$26.4m were provided for the activities of the Forests Commission in 1976–77. This includes \$10.1m from the Works and Services Account.

Local government

The Premier explained the entitlement to be given for the first time in 1976–77 to local government to a specific share of Commonwealth Government personal income tax collections. In 1976–77 this would amount to 1.52 per cent of Commonwealth Government collections from personal income tax in 1975–76. On the recommendation of the Commonwealth Grants Commission, Victoria would receive 25.28 per cent of this figure, or \$35.4m. The Budget set out the basis for the initial distribution and stated that the Victorian Government would establish a permanent and independent Victorian Grants Commission to make recommendations for the distribution of funds in future years.

Planning

Funds available to the Ministry of Planning amounted to \$3.25m in 1976-77. Increased grants were made to regional planning authorities, while planning would continue in connection with the development of Melton and Sunbury as satellite towns. The Works and Services Account would provide \$0.5m to facilitate the purchase and aggregation of small building lots in the Dandenong Ranges to ensure that development in that region would be appropriate with regard to the maximum preservation of the environment.

Youth, sport, and recreation

Funds totalling \$9m were made available for 1976-77 to the Department of Youth, Sport, and Recreation. \$2.5m was allocated to provide subsidies for capital facilities for family and community recreation, including swimming pools, sports halls, and cycle tracks. The Budget provided up to \$430,000 to State-wide sporting and recreation associations, mainly to expand coaching programmes and to encourage participation, while the National Fitness Council received \$475,000 towards the operating costs and improvements of its camps. From the Youth Fund, \$894,000 was allocated for the recruitment and training of voluntary workers, capital improvements to youth clubs, and assistance to voluntary youth organisations; \$150,000 for after school and school holiday programmes; and \$208,000 for special youth work.

ECONOMIC AND SOCIAL RESPONSIBILITIES OF GOVERNMENTS General

Governments of developed countries with their now generally accepted responsibilities for economic stability and growth are expected to monitor and regulate their country's economy so that such evils as recession, price inflation, and unemployment are mitigated if not avoided. At the same time they are expected to provide a wide range of services, and to assist with substantial benefits those members of the community whose incomes are insufficient to support an acceptable standard of living or who are otherwise disadvantaged.

To help attain the objective of a reasonably stable level of economic activity, modern governments have recourse to a variety of taxation measures and expenditure programmes operated through budgetary policy. By the use of

taxation powers governments are able to release or withdraw purchasing power, and redistribute income from one section of the community to another, while through a rise or fall in their levels of expenditure on current goods and services or capital assets they can exert further control over purchasing power. To reinforce such actions governments also implement monetary policy through the activities of central banking institutions, through changes in currency valuations, and tariff adjustments.

Within the framework of a satisfactory level of economic activity, modern governments customarily provide a wide range of services including, *inter alia*, defence, law and order, education, public health, welfare, and housing. In addition to providing these and other services free, or at nominal costs, they also conduct trading enterprises. These enterprises (or public utilities) produce goods and services at prices usually designed to substantially cover expenses although, in recent years, charges of certain public utilities have tended to fall well below operating costs. This development has implications for income distribution and affects taxpayers as a whole in providing finance to cover deficits. Services provided by public utilities are ordinarily those considered to be of an essential nature such as provision of electricity and gas, transport, water supply, and sewerage which experience has shown can best be provided by government agencies.

Victorian governmental financial activity

In Victoria governmental financial activity is carried out through:

(1) State authorities comprising (i) the central government of the State and (ii) statutory bodies created by or under State legislation to carry out activities on behalf of the central government, and incorporated organisations in which the State Government has a controlling interest; and

(2) local governing bodies set up under the Local Government Act to carry out certain functions in municipal areas. Included with these bodies are authorities and undertakings created or acquired by local governing bodies.

The financial transactions of the central government are itemised in the State Consolidated Fund or in Trust Funds so that a satisfactory coverage of its transactions can be obtained from a detailed analysis of the accounts published in the annual budget papers, the Treasurer's Statement, and the report of the Auditor-General. The statutory bodies and other publicly owned or controlled organisations maintain accounts entirely or largely separate from the public accounts, although there are some transactions between them and the central government which affect the public accounts (e.g., interest payments and statutory contributions). The accounting reports of this group of organisations have to be collected and either fully analysed in order to present a complete statement of their transactions, or methods of analysis adopted so that their transactions are covered in principle. In tables which follow in this section all expenditure by the central government on certain institutions whether direct (e.g., a new building charged to the Works and Services Account) or indirectly by way of current or capital grants to the bodies administering them, has been treated as final expenditure on goods and services by State authorities; fees and gifts by persons to these institutions are not included nor is the expenditure of the institutions from their own resources. Universities and public hospitals are examples of organisations for which this practice has been adopted.

Many State authorities have been granted a degree of financial autonomy by legislation and are vested with independent borrowing powers. A number of these are included in the category of public trading enterprises (or public utilities) who, for services provided, make charges designed to cover operating costs. Usually, they have been created to control a specific activity or provide specific services including, *inter alia*, transport services, construction and maintenance of roads and bridges, provision of water supply and sewerage services, electricity and gas, and harbour facilities. Details of the activities of the

individual public utilities engaged in these fields can be found in this and other relevant chapters of the Victorian Year Book.

The system of local governing bodies (or municipal councils) is based on the principle of a grant of specified powers to them by the central government. Their autonomy, however, is limited in some degree by the provision for general supervision by a department of the central government, namely, the Local Government Department. Otherwise, within the scope of the Local Government Act and other Acts which they administer, municipal councils are responsible only to the ratepayers. Particulars of their receipts and outlay are based upon the detailed analysis of the accounts of councils.

The tables which follow comprise a set of economic accounts for the public sector of Victoria which complement and underlie the tables for the public sector provided in the Australian National Accounts—National Income and Expenditure published by the Australian Bureau of Statistics, Canberra, and in the annual Budget paper National Income and Expenditure.

These tables are intended to:

- (1) Consolidate the transactions of the various public authorities in the State and present them so that their economic impact can be assessed; and
- (2) show the overall purposes being served by State and local government expenditure programmes.

A substantial proportion of governmental financial transactions consists of transfers between funds and between authorities. Such transfers have been identified where possible and cancelled out so that duplication is avoided.

Public financial enterprises (government savings banks, insurance offices, etc.) have been omitted from the following tables mainly to centre attention on the activities of general government and public trading enterprises. Further comment on this treatment may be found in the annual publication *Public Authorities Finance: State and Local Authorities*, issued by the Australian Statistician.

COMMONWEALTH-STATE FINANCIAL RELATIONS UNDER THE CONSTITUTION

The Commonwealth Constitution allocated areas of power to the Commonwealth. The States were expressly excluded from some fields of Commonwealth power. The powers of Commonwealth and States were to be concurrent in other fields, although the laws made by the Commonwealth were potentially paramount. The areas of power that were given to the Commonwealth were not those which in the years preceding federation had involved large expenditure. The functions of government that remained with the States included those that had been the most costly.

Duties of customs and excise had been the main sources of revenue of the federating colonies. One of the main purposes of federation was to eliminate internal customs within the federated nation and to secure uniformity in the imposition of customs and excise duties throughout the nation. If the Commonwealth were to be given an exclusive power to levy customs and excise duties, a way had to be found to provide for disposing of the excess receipts by the Commonwealth over its expenditure and for satisfying State needs that would arise from the excess of expenditure over revenue in the light of the depletion of the States' customary means of taxation.

The Constitution vested in the Commonwealth by sec. 51 (ii) a general power of taxation which was subject only to the qualification that it was not to discriminate between States or parts of States. Its power to impose duties of customs and excise and to grant bounties on the production or export of goods was to become exclusive on the imposition of uniform duties of customs. All State laws imposing customs and excise duties and offering bounties were thereupon to cease to have effect (sec. 90). Uniform duties were imposed by the Commonwealth Parliament on 8 October 1901.

During the first ten years of the federation and thereafter until the Parliament provided otherwise, the Commonwealth was prohibited by sec. 87 from applying more than one fourth of the net revenue from customs and excise duties towards its own expenditure and was required to pay the balance to the States or to apply it towards the payment of interest on State debts taken over by the Commonwealth. Until the imposition of uniform duties of customs and for five years thereafter the Commonwealth was required to credit to each State the net revenues that the Commonwealth collected in it (secs. 89, 93). After five years from the imposition of uniform customs duties, the Commonwealth Parliament was to have the power to provide for the monthly payment to the States of all the surplus revenue of the Commonwealth on such basis as it deemed fair (sec. 94).

In addition, during a period of ten years after the establishment of the Commonwealth and thereafter until the Parliament otherwise provided, sec. 96 authorised the grant of financial assistance by the Commonwealth Parliament to any State on such terms and conditions as the Parliament thought fit.

The Commonwealth Parliament imposed customs and excise duties in 1901. They were the only Commonwealth taxes until 1910 when a land tax was levied. Commonwealth estate duty was first imposed in 1914, income tax in 1915, and entertainments tax in 1916.

The assumption that the financial needs of the Commonwealth would be adequately provided for from customs and excise duties so that there would be surplus revenue available to be paid to the States under sec. 94 foundered soon after the five year period. At first the Commonwealth adopted the practice of appropriating moneys from the Consolidated Revenue for the purposes of trust accounts formed in accordance with the Audit Act, so that all the revenue of one year would be appropriated for authorised purposes although part might not be expended until a later year. In 1908 the Commonwealth Parliament enacted a statutory scheme which had the effect that any unexpended Commonwealth revenue was appropriated for expenditure in future years and that moneys so appropriated were deemed expenditure of the Commonwealth, so that there should be no surplus revenue until after the moneys so appropriated had been added to the moneys actually expended within the year and deducted from the revenue of that year.

In 1910 a proposal to amend the Constitution by, in effect, omitting secs. 87, 93, and 94 and substituting provisions requiring the Commonwealth to pay to the States or to apply to the payment of interest on State debts taken over by the Commonwealth an annual sum amounting to £1 5s. per capita of population was rejected at a referendum. The Commonwealth Parliament nevertheless by statute required the Commonwealth to make annual per capita payments to all the States for ten years to 1 July 1920 and thereafter until the Parliament otherwise provided and to make special additional payments to Western Australia. Special payments to Tasmania were made from 1912.

Those provisions continued until 1927 when the provisions of the statute of 1910 for making per capita payments were repealed and new provisions were enacted which provided for the payment to the States in 1927 of amounts equivalent to what the per capita payments would have been if the previous legislation had continued.

Section 105 of the Constitution originally enabled the Commonwealth Parliament to take over the public debts of the States existing at the establishment of the Commonwealth and required the interest upon such debts to be deducted from the portions of the surplus revenue payable to the States or, if there were no surplus or if it were insufficient, requiring payment to be made by the States. An amendment was approved by referendum in 1910 which deleted the limitation in sec. 105 confining the power to the State public debts existing at the establishment of the Commonwealth.

When the per capita payments system was reviewed in 1927 a scheme was proposed by which the Commonwealth should take over the public debts of the States and become responsible for the payment of interest. Instead of making per capita payments to the States for fifty-eight years from 1929, the Commonwealth was to pay agreed sums to a sinking fund for the redemption of loans. The States were to pay to the Commonwealth amounts equivalent to interest on moneys borrowed on their behalf exceeding the fixed payments. The Australian Loan Council consisting of a representative of the Commonwealth and representatives of each of the States was to determine the amounts to be borrowed for each financial year for government purposes other than defence purposes. Each party to the scheme was to submit an annual programme to the Loan Council setting out the amount it desired to raise by loans for purposes other than the conversion, renewal, or redemption of existing loans or temporary purposes. Unless the Loan Council agreed otherwise, the Commonwealth was to arrange for all borrowings. The financial agreement was approved by the Parliaments of all the States and the Commonwealth in 1928 and an amendment of the Constitution, by which a new sec. 105A was inserted, was approved by a referendum.

Section 105A empowered the Commonwealth to make agreements with the States with respect to the public debts of the States, including the taking over and management of such debts. Any agreement might be varied or rescinded by the parties and every agreement and any variation should be binding on the Commonwealth and the party States notwithstanding anything in the Constitution or a State Constitution or any Commonwealth or State law. The Commonwealth Parliament was given power to enact laws for the carrying out of any such agreement by the parties thereto. The High Court has held that the power supports the making of Commonwealth laws to enforce the observance of the obligations of a State by requiring payments to be made out of the State Consolidated Revenue without appropriation by the State Parliament.

The financial agreement was ratified by the Commonwealth Parliament after the approval of the referendum for the insertion of sec. 105A. The agreement ended the system of per capita grants; it curtailed the Commonwealth's power to distribute surplus revenue; and it removed from the Commonwealth (except for defence purposes) and the several States the power to determine the amount of public borrowing for their own purposes, other than temporary purposes, and gave it to a body consisting of representatives of the States and the Commonwealth whose decisions were not subject to the ratification of any Parliament.

By 1933 the arrangements accepted in 1927 were found to work unequally between the States. The less populous States were less able than the more populous to obtain the funds that were needed to carry out their functions of government by using the taxing resources available to them. In that year a Commonwealth Grants Commission was set up to review and assess, on a continuing basis, applications received by the Commonwealth for special financial assistance to enable those States to maintain their functions and services at a level comparable with those of the other States. Although the Commission was established by statute and although, unlike the Loan Council, neither its existence nor its functions are protected by the Constitution, it has acquired a quasi-constitutional role in the financial relationship between the Commonwealth and the States.

Special grants recommended by the Grants Commission are made by the Commonwealth under sec. 96 of the Constitution. In the 1920s the Commonwealth began to make grants to the States pursuant to that section for the specific purpose of their being used for the construction of new roads. In 1926 the Commonwealth made those grants subject to the conditions that the funds should be used for construction and reconstruction and that maintenance should be paid for wholly by the States. The States were required to submit a

comprehensive plan of proposed construction works for approval by the Commonwealth and a Commonwealth board was established to consider the submitted plans and supervise their execution. The States were required to match the funds granted by the Commonwealth on a specified ratio. The grants to a particular State were to cease if the conditions were not observed. The validity of the scheme was challenged in the High Court on the grounds (1) that the terms and conditions referred to in sec. 96 were financial terms and conditions or, if not, were limited to matters within sec. 51: (2) that if only one State were to receive a grant the Act would give it a preference over other States in contravention of sec. 99. The objections to validity were peremptorily dismissed by the High Court. The roads grants legislation has become the model for schemes by which assistance has been granted to the States for multifarious specific purposes without regard to whether it was within the ordinary power of the Commonwealth Parliament to make laws with respect to the things for which the assistance was granted or concerning which conditions were imposed. Conditions have been attached to grants made for specific purposes which specify the manner in which the granted funds are to be expended. The High Court has stated that the only legal constraint upon the conditions that may be imposed upon assistance granted under sec. 96 is that they cannot be legally coercive.

In 1942 the Commonwealth Parliament passed, as a war-time measure, a series of Acts which had the effect of excluding the States from levying income taxes. The Constitution gave to the Commonwealth and left with the States the power to impose all forms of taxes, other than those allocated exclusively to the Commonwealth, for their separate purposes. From 1915, when Commonwealth income tax was first imposed, until 1942, separate income taxes were levied by the Commonwealth and the States. Commonwealth taxes were collected by the States on behalf of the Commonwealth in all States other than Western Australia. By the 1942 scheme, the Commonwealth took over the State income tax offices and officers and placed them under its own control until a year after the war; income tax was imposed at high rates; assistance, called income tax reimbursements, was to be granted to the States under sec. 96 upon the condition that a State in receipt of reimbursements should refrain from imposing income tax: and priority was given to the liability of a person to pay Commonwealth income taxes over any liability to pay State income taxes. All the provisions of the scheme were held to be valid by the High Court. The "uniform tax" scheme continued after the war. Its validity was challenged again before the High Court in 1957 upon the footing that the scheme had been supported only by the defence powers of the Commonwealth in time of war. It was held that the provision purporting to confer priority on the Commonwealth in the collection of taxes was invalid but that the decision of 1942 upon the validity of the other parts of the scheme should stand. Since 1959 the grants formerly known as income tax reimbursements grants have been called financial assistance grants. No State has imposed a general income tax since the inception of the "uniform tax" scheme.

Since 1942 State taxation has been confined to the fields other than income taxes: death and succession duties, land taxes, gift and stamp duties, entertainment taxes, liquor licensing fees, specific levies and licensing charges and, since 1971, pay-roll taxes. The validity of State taxes of various kinds has been called in question in proceedings before the High Court on the ground that they were excise duties or that they imposed a burden upon inter-State trade and commerce that was forbidden by sec. 92 of the Constitution. By a series of cases, in several of which the decision of the Court depended upon the judgments of a small majority of the judges, the High Court has held that a tax imposed upon goods at any time from manufacture until before the point of consumption is a duty of excise which sec. 96 gives the Commonwealth Parliament the exclusive power to impose, and hence that State taxes upon, among other things, the first sale

of petrol, an area in which a cash crop was planted, the distribution of milk within a metropolitan area, and liquor sold under occasional permits were duties of excise. Laws imposing stamp duties generally upon the receipt of moneys were held to be duties of excise to the extent that they fell upon receipts of payments for the sale of goods at any stage from manufacture to consumption. But fees charged upon the annual licences of victuallers and tobacco sellers, calculated by reference to sales in the previous year, and taxes upon the consumption of tobacco were held not to be duties of excise. The distinction in law between various kinds of licensing fees and consumption taxes and taxes upon sales or dealings with goods has not in all cases been easy to discern.

Taxes by the Commonwealth or a State upon goods committed to inter-State trade and commerce or activities performed in the course of inter-State trade and commerce are prohibited by sec. 92. But State laws requiring persons carrying goods for reward by road between the States to pay road maintenance charges of an amount commensurate with the cost of meeting additional wear and tear caused to highways have been held not to infringe sec. 92.

Section 114 prohibits a State, without the consent of the Commonwealth, from imposing a tax on property of any kind belonging to the Commonwealth and the Commonwealth from imposing a tax on property of any kind belonging to a State. The section has, however, been construed narrowly so that it does not prohibit the levying of customs duties upon the importation of goods by a State for its own use.

Apart from sec. 114, the general principle has been accepted that a State cannot tax an activity of the Commonwealth or one of its instrumentalities and the Commonwealth cannot impose a discriminatory tax upon the States or their activities or impose a tax which constitutes an interference of a fundamental kind with the performance by the States of their functions of government. A tax on the wages paid by a State to its employees has been held not to be a tax of that character.

COMMONWEALTH GOVERNMENT PAYMENTS TO VICTORIA

General

The fiscal superiority of the Commonwealth Government is supported by present day acceptance of the role of national governments as agents of economic control and providers of social services on a large scale. In order to carry out these functions the central government requires a substantial measure of control over major types of taxation revenue and the level of public investment.

However, the lack of balance between the spending functions and the sources of revenue (mainly taxation) available to the Commonwealth and State governments, respectively, has led to a system of grants from the Commonwealth Government to the States including more recently, grants made to the States for on-passing to local government authorities and to direct payments by the Commonwealth Government to individual local authorities within each State. Grants may be either unconditional or earmarked for specific purposes such as roads or universities. Important examples of the former are financial assistance grants payable under the uniform tax system, and special grants payable under the provisions of sec. 96 of the Constitution which provide assistance to those States experiencing difficulty in raising revenue and providing services on a comparable level with other States. At the end of 1975–76 the only claimant State for special grants under sec. 96 was Queensland.

The history and particulars of Commonwealth Government payments to States and local government authorities are comprehensively covered in the publication *Payments to or for the States and Local Government Authorities* issued annually with the Commonwealth Government Budget. A summary of the principal Commonwealth Government payments to Victoria (other than Loan

Council borrowing programmes, and direct payments to non-government bodies) are given below.

Financial Agreements

Under the terms of the Financial Agreement of 1927 the Commonwealth Government undertook to share debt charges with the States. In 1929 the Commonwealth Government assumed responsibility for the payment of interest on debt, on the understanding that the States would reimburse these payments less a sum of \$15.2m which the Commonwealth Government agreed to contribute annually for a period of 58 years from 1 July 1927. Victoria's share of this is \$4.3m. The Financial Agreement also provided for the creation of sinking funds for the extinction of debt existing at 30 June 1927 or incurred subsequently. Contributions to these sinking funds are made jointly by the Commonwealth and State Governments on bases laid down. In 1975–76 the sinking fund contribution made by the Commonwealth Government on account of debt incurred by Victoria was \$7.5m.

Nature of payment

Financial assistance grants

When the Commonwealth Government took over the States' income taxing powers during the Second World War in order to meet its war-time obligations, it became the sole authority for levying taxes on income. In return for vacating this field of taxation the States received an annual payment from the Commonwealth Government as reimbursement for the loss of income tax revenue. Over the years a number of challenges to the validity of the income tax legislation have been made. These are discussed on pages 546–7 of the Victorian Year Books 1975 and in earlier editions. The various Year Books have also covered the arrangements for tax reimbursement grants (or financial assistance grants as they became known after 1958–59) by the Commonwealth Government leading up to the fixing of the financial assistance grants for 1974–75, of which Victoria's share was \$548.4m.

At the 1975 Premiers' Conference the Commonwealth Government undertook to legislate to provide for changes in the financial assistance grants arrangements. The changes affecting Victoria were the addition of \$200m to be divided between the States in 1975–76 and this amount was to be "built in" to the base on which the grants will be calculated under the formula in 1976–77 and onwards. The "betterment" factor in the formula for 1976–77 onwards was to be increased from 1.8 per cent to 3.0 per cent.

In accordance with this formula Victoria's share of these financial assistance grants in 1975-76 was \$706.4m.

Personal income tax sharing with the States

The formula system referred to above continued in use for annual determination of financial assistance grants only up to the end of 1975–76. Commencing with the year 1976–77 financial assistance grants were replaced by arrangements under which State Governments will be entitled to a specified share of Commonwealth personal income tax collections. This was in pursuance of the implementation of a basic element of the Federalism policy of the Commonwealth Government which assumed office in December 1975. This policy included tax sharing arrangements with the States and local government, as well as a more selective use of specific purpose payments to the States with the absorption of such payments where appropriate into general purpose funds.

In discussions with the Premiers at conferences held in February, April, and June 1976 the tax sharing arrangements were agreed to in principle with introduction to be made in two stages. Stage 1 commenced in 1976–77 with the Commonwealth continuing to be the sole government imposing taxes on incomes while the States would receive a specified proportion of personal

income tax collections made under Commonwealth legislation. Under Stage 2, intended to commence in 1977–78, the Stage 1 arrangement will continue but in addition each State will have the right to impose a surcharge or grant a rebate of personal income tax in its State. Any State surcharges or rebates will be allocated or paid by the Commonwealth on behalf of the State.

In respect of the year 1976-77 the amount to be distributed to the States under the new tax sharing arrangements was estimated for Commonwealth budgetary purposes to be in excess of the amount which would have accrued to the States had the formula system referred to above been used to calculate financial assistance grants for that year.

⁽a) Excludes subsidies and bounties to primary producers, payments from National Welfare Fund, repayable loans. Includes on-passing grants but not direct payments to local government authorities and non-government bodies.

⁽b) Includes financial assistance grants and special revenue assistance.(c) Paid to National Debt Sinking Fund.

Special revenue assistance

From time to time the Commonwealth Government has made ad hoc revenue grants to supplement those payable under the financial assistance grants arrangements. (See *Victorian Year Books* 1976 and earlier *Year Books*.) In 1975–76 no such assistance was provided.

Debt charges assistance

With the formal transfer of \$1,000m of States' debt to the Commonwealth Government on 30 June 1975, the commitment by the Commonwealth Government to make grants to meet the interest and sinking fund contributions by States was concluded (see *Victorian Year Book* 1976).

Capital assistance grants

From 1970-71 the Commonwealth Government has made interest free capital grants to support that part of the States' works programmes from which debt charges are not normally recoverable (e.g., schools, police buildings, etc.). These grants which are distributed between the States in proportion to their respective borrowing programmes represented 24.3 per cent of the total works and housing programme for 1970-71. Changes in the method of calculating the capital assistance grants since 1972-73 have resulted in the payment of grants which represent a higher percentage of total works and housing programmes. In 1975-76 total capital assistance grants represented one-third of works and housing programmes and amounted to \$430.3m of which Victoria received \$108.9m.

Grants for schools

The Commonwealth Government has been providing assistance for secondary schools since 1964-65 when it made grants for science laboratories and equipment. The range of assistance was progressively extended and by 1975-76 it was providing grants for both government and non-government schools in a number of categories. Because of the policy of budgetary restraint in 1975-76 the Commonwealth Government was unable to support the recommendations of the Schools Commission for the triennium 1976-1978 and provided instead in 1976 for a year of relative pause outside the usual triennial progression. Three year rolling programme arrangements apply to the period 1977-1979 and the Schools Commission presented a report for the period based on the 1977 allocation and the planning guidelines of the Commonwealth Government for 1978 and 1979 which takes into account a 2 per cent per annum growth in real terms.

The total amount of grants for schools in 1975-76 was \$475.5m of which \$300.5m was for government schools, \$152.4m for non-government schools, and \$22.7m for joint programmes. Of these amounts, Victoria received \$90.1m, \$53.0m, and \$6.6m, respectively.

Technical and further education

Grants towards capital expenditure for technical and further education have been made by the Commonwealth Government since 1964–65 and towards recurrent expenditure since 1973–74. These programmes are now administered by the Technical and Further Education Commission established on 1 July 1975. Under the three year rolling programme arrangements the Commonwealth Government decided on an allocation of \$79.6m for all States in 1977. For the three years 1977–1979 the Commission presented a report based on the 1977 allocation and on a 5 per cent per annum growth in real terms for 1978 and 1979. In 1975–76, \$64.7m was paid to the States, of which Victoria received \$17.0m (\$9.7m for recurrent expenditure and \$7.4m for capital expenditure).

Grants for colleges of advanced education and teachers colleges

The Commonwealth Government has made grants to the States for colleges of advanced education since 1965–66, for teachers colleges since 1967–68, and for pre-school teachers colleges since 1968–69.

As in the case of universities, the Commonwealth Government assumed full financial responsibility for these colleges from 1 January 1974. For the year 1976 the Commission on Advanced Education recommended a programme based on guidelines determined by the Commonwealth Government and outside the normal triennial progression. For the triennium 1977–1979 a rolling programme was presented by the Commission in accordance with the Commonwealth Government's decision to provide a growth rate of 5 per cent per annum in real terms for 1977 and a 2 per cent per annum growth rate in real terms for 1978 and 1979.

In 1975-76 the total grants made to the States for these institutions amounted to \$373.5m, of which Victoria received \$145.6m (\$111.3m for recurrent expenditure and \$34.3m for capital expenditure).

Grants for universities

Assistance to the States for universities was first introduced for recurrent expenditure in 1951–52, and remained relatively small until 1957–58 when it was considerably expanded and also included grants for capital programmes. From 1 January 1974 the Commonwealth Government accepted full financial responsibility for universities. The year 1976, however, was treated by the Commonwealth Government, because of budgetary considerations, as outside the normal triennial programme recommended by the Universities Commission. Instead the Commission submitted a programme for 1976 based on guidelines determined by the Commonwealth Government. For the triennium 1977–1979 the Commission submitted a report in respect of a rolling programme taking into account a 2 per cent per annum growth in real terms as advocated by the Commonwealth Government.

Total grants for universities for 1975-76 were \$475.2m, of which Victoria received \$120.2m (\$110.7m for recurrent expenditure and \$9.5m for capital expenditure).

Pre-school and child care

From 1972-73 grants for services for children were made by the Commonwealth Government direct to local government authorities and non-profit organisations. Payments to the States commenced in 1973-74 under a broader scheme of assistance. In 1974-75 and 1975-76 recommendations of the Pre-School Committee helped to shape the form of the assistance. In 1975-76, instead of the Children's Commission, an Office of Child Care was set up to advise on and administer a programme providing capital and recurrent assistance for pre-school child care projects including home care, vacation, and after school care projects, and various other community-initiated projects. The grants in 1975-76 amounted to \$55.1m, of which \$48.8m was paid to the States and \$6.4m was paid direct to local government authorities. Of the \$48.8m, Victoria received \$11.5m for recurrent expenditure and \$1.3m for capital expenditure. Of the \$6.4m, local government authorities in Victoria received \$0.2m for recurrent expenditure and \$2.2m for capital expenditure.

Health insurance programme

Section 30 of the *Health Insurance Act* 1973 authorised the Commonwealth Government to enter into agreements with State Governments for the provision by the States of free standard ward public hospital treatment and free public hospital outpatient services. In essence the agreements provided that the Commonwealth Government met 50 per cent of the net recurrent costs of the

"recognised" hospitals referred to in the agreements. Victoria entered into such an agreement with effect from 1 August 1975.

On 25 May 1976, following receipt of legal advice that the agreements made were invalid, the Commonwealth Government suspended hospital payments to the States. The State Grants (Hospital Operating Costs) Act 1976 then authorised interim payments until new cost-sharing arrangements negotiated with the States came into operation on 1 October 1976.

Payments totalling \$575.2m were made to the States up to 25 May 1976, and a further \$294.5m up to 30 June 1976, of which \$215.6m was a pre-payment for the period 1 July to 30 September 1976. Victoria received a total of \$230m under both arrangements in 1975–76.

Grants to community health facilities and services

Under the Community Health Programme which commenced in 1973–74 the Commonwealth Government provides grants to the States and other eligible organisations. Within this scheme the Commonwealth Government meets 75 per cent of capital costs and 90 per cent of operating costs of approved projects administered by the State and the full cost of those community health projects which have an Australia-wide application. New grants for community facilities and services for mental health, alcoholism, and drug dependency under this programme commenced in 1973–74. From 1955–56 the Commonwealth Government had also made grants to the States for capital expenditure on mental health institutions and final grants under this earlier programme were made in 1973–74. Grants for mental hospitals from 1973–74 were made available under the hospitals development programme (see following section). In 1975–76, \$49.4m was paid to the States under the Community Health Programme, of which Victoria received \$10.9m (\$7.7m for recurrent expenditure and \$3.2m for capital expenditure).

Hospitals development programme

This programme commenced in 1973-74 and covers grants to the States for capital expenditure on public general hospitals, mental hospital facilities, public nursing homes, and health hostels. In 1975-76, \$107.2m was paid to the States for these purposes, of which Victoria received \$27.3m.

Employment grants

The scheme for unemployment relief begun in 1971 continued through 1975–76 on the same conditions as during 1974–75 but on a phasing-out basis. The grants provided by the Commonwealth Government were divided in 1974–75 and 1975–76 between the States in proportion to seasonally adjusted numbers of unemployed (excluding school leavers). In 1975–76, \$30m was paid to the States for the relief of unemployment, and of this amount Victoria received \$8.2m.

Regional Employment Development Scheme

The scheme instituted in 1974–75 provides grants by the Commonwealth Government to State Government departments, State semi-government authorities, local government authorities, and non-government bodies. Total grants to the State (including semi-government authorities) in 1975–76 were \$15.0m, of which Victoria received \$5.4m. In addition, Victorian local government authorities received direct payments of \$14.2m and Victorian non-government bodies received \$1.7m.

Grants for roads

The Commonwealth Government assistance for expenditure on roads has taken two main forms—general assistance, and assistance for specific roads or road projects. Payments of the latter kind were subsumed in the general

programme of roads assistance introduced in 1974–75. The Commonwealth Government's proposals for the triennium 1974–75 to 1976–77 envisaged an expenditure of \$1,126m mainly for national highways and arterial roads. In 1975–76 the actual grants made totalled \$442.1m including \$8.6m for transport planning and research. Victoria's share of these amounts was \$92.0m and \$2.9m, respectively.

Urban public transport grants

Under an agreement concluded with the States in 1974 the Commonwealth Government is meeting two thirds of the cost of approved urban public transport projects, including railways, in the States for five years until 1977–78. The grants in 1975–76 amounted to \$34.1m, of which Victoria received \$9.5m.

National sewerage programme

In 1973-74 the Commonwealth Government instituted a programme of assistance to the States designed to eliminate the backlog of sewerage works in principal urban areas, including from 1974-75, amounts for research, training, monitoring, and planning. Total assistance to the States in 1975-76 amounted to \$113.2m. \$34.8m of this amount comprised grants and \$78.4m, advances, of which Victoria received \$10.8m and \$24.8m, respectively.

Grants for local government authorities

In 1972 the Commonwealth Government took the view that it should provide general purpose funds for local authorities and that these funds should be provided in such a way as to promote financial equality between local authorities and regional groupings of such authorities. The Commonwealth Government accepted the recommendations of the Grants Commission for 1974–75 and 1975–76 on the provision of these grants. The grants were in the first instance to be paid to the State for transmission to individual local government authorities in the amounts specified and with no conditions attached to their use. In 1975–76, \$79.9m was so paid and Victoria's share of these grants was \$20.2m.

Local government assistance under personal income tax sharing arrangements

Following discussions at the February and April 1976 Premiers' Conferences, an agreement was reached at the June 1976 Conference on instituting a scheme of general purpose assistance for local government in 1976–77 through the medium of a share of the proceeds of personal income tax collections.

In 1976-77, \$140m will be provided to the States for distribution to local government (of which the Commonwealth Grants Commission recommended that Victoria should receive \$35.4m). The total amount will be expressed as a percentage of personal income tax collections in 1975-76, and this percentage is to be applied to collections in determining the amount of assistance in subsequent years.

Each State will be required to devote a minimum of 30 per cent of each year's assistance for distribution among all local authorities based on population and other factors as agreed to by the Commonwealth and State Governments. The remainder is to be distributed to local authorities with regard to their respective financial needs, on the recommendation of the State Grants Commissions the States have agreed to establish.

Advances to the States

In addition to grants to the States and direct payments to local government authorities the Commonwealth Government also makes advances to the States for various purposes. Particulars of these advances to Victoria other than Loan Council borrowings, for the years 1970-71 to 1974-75, are shown in the following table:

VICTORIA—ADVANCES FROM THE COMMONWEALTH GOVERNMENT (a) (\$'000)

Commonwealth Government payments made direct to local government authorities

While there are no Commonwealth Government programmes of direct payments to local government authorities designed for the specific purpose of providing financial assistance to these authorities there are, however, a number of programmes under which local government authorities are among bodies that are eligible for, and have received, Commonwealth Government assistance paid directly to them. The comments on grants for pre-school and child care and regional employment development on pages 563 and 564 should be noted. For further details see the Budget Paper Payments to or for the States and Local Government Authorities.

CONSOLIDATED FUND

Prior to 1970-71, Victoria's financial transactions were carried out through the Consolidated Revenue Fund, the Loan Fund, and the Trust Fund,

From 1 July 1970 legislation abolished the Consolidated Revenue Fund and Loan Fund and in lieu established the Consolidated Fund which was designed to show in a single statement the receipts and disbursements of all moneys, both revenue and loan, coming within the scope of the Budget (see Victorian Year Book 1976, pages 514 and 530).

The legislation also provided for the establishment of a new trust fund, the Works and Services Account, to be financed by appropriations from the Consolidated Fund. These appropriations were to be determined by the surplus of receipts available from time to time in the Consolidated Fund. Moneys to the credit of the Account were available to be expended on various works and services as approved by the Victorian Parliament.

Details of the principal sources of receipts are shown in the following table for each of the years 1970-71 to 1974-75. The table has been re-structured to show amounts broadly in line with the categories of receipts as published in the Victorian Treasurer's Finance Statement 1974-75.

 ⁽a) Excluding Loan Council borrowings.
 (b) In 1971-72 there were no specific advances for housing, the State meeting these expenditures from within its ordinary Loan Council borrowings. In 1972-73 the same arrangements applied except for an advance of \$1.5m to supplement the programmes financed from these Loan Council borrowings.

The principal payments for each of the years 1970-71 to 1974-75 are shown in the following table. The table has been re-designed following the re-organisation of Victorian Government departments in recent years and generally conforms to the purpose classification of government expenditure described in the publication Public Authority Finance: Authorities of the Australian Government, 1974-75. The purpose classification is derived from that outlined in the United Nations publication A System of National Accounts.

VICTORIA—CONSOLIDATED FUND: PAYMENTS (\$'000)

(a) Excludes interest, etc., on Railways debt which is included with "Public debt charges".
(b) Including secondary technical.
(c) Includes grants to municipalities for culture and recreation, education, health, and social welfare among others.

(d) Railways pensions included under "Railways—Working expenses".

(e) Includes in 1974-75: \$10m. Special budgetary assistance repaid to the Commonwealth Government.

VICTORIAN GOVERNMENT TAXATION

As mentioned on page 555 the Commonwealth Government alone exercises the right to impose customs and excise duties, and taxation on personal and company incomes. It also has exclusive access to sales tax. Before 1 September 1971 the Commonwealth Government was the sole collector of pay-roll tax, but since that date the right to impose this tax within State boundaries has been given to the States. For the most part, the responsibility now left to the States comprises motor taxation, stamp duties, and liquor, land, lottery, racing, pay-roll, and, until recently, entertainments taxes. Estate and gift duties are shared between the Commonwealth and Victorian Governments.

In Victoria, taxation collections by the Victorian Government are allocated by statute either to the Consolidated Fund or to special funds. One of the principal items of Victorian taxation-taxes on the ownership and operation of motor vehicles—is allocated between the Consolidated Fund and special funds. (See pages 574–5 for 1974–75 allocation.)

(b) Includes gift duty from 1 January 1972 only. Gift duty collected prior to 1 January 1972 is included with "Stamp duties, n.e.i.".

Specific collections

Pay-roll tax

Commonwealth Government pay-roll tax operated from 1 July 1942 to 31 August 1971. The tax was payable by employers on all wages and salaries paid or payable in excess of a general exemption. The rate of tax, 2.5 per cent, remained unchanged from its inception.

From 1 September 1971, in accordance with an agreement between the Commonwealth and State Governments, the Commonwealth Government vacated the pay-roll tax field within State boundaries in favour of the States.

The Victorian Pay-roll Tax Act 1971, operative from 1 September 1971, imposed a pay-roll tax at the rate of 3.5 per cent on all taxable wages and salaries paid or payable in this State. Amending legislation operative from 1 September 1973 increased the rate to 4.5 per cent. The rate was further increased to 5 per cent from 1 September 1974. The main exemptions from pay-roll tax are on wages and salaries paid by benevolent institutions, public hospitals, non-profit private hospitals, non-profit private schools (other than technical) of secondary level or below, and by municipalities other than in respect of their business activities.

Under the Decentralized Industry Incentive Payments Act 1972, operative from 1 July 1973, incentive payments in the form of pay-roll tax rebates may be made to a manufacturing or processing industry at a decentralised or special establishment, as defined in the Act. In 1973-74, \$4,019,906 and in 1974-75, \$7,023,137 was so paid. Total receipts of pay-roll tax for the year ending 30 June 1975, excluding relates and pay-roll tax paid by Victorian Government departments, amounted to \$327.2m.

Probate duties

The Probate Duty Act 1962 (a completely revised Act) fixed the rates of duty payable on the estates of deceased persons leaving property, whether real or personal, in the State of Victoria, and personal property wherever situate if the deceased was domiciled in Victoria at the date of death. The Act provides for discriminatory rates of duty in favour of estates passing to close relatives.

 A. Widow, widower, children under 21 years of age, wholly dependent adult children, or wholly dependent widowed mother.

 B. Children over the age of 21 years not being wholly dependent, or grandchildren.

Brothers, sisters, or parents. D. Other beneficiaries.

Land tax

The Land Tax Act 1958 provides for an annual tax on the unimproved value of all land owned by a taxpayer at 31 December in the year preceding the year of assessment. Unimproved value is the estimated selling price of the land if offered for sale on reasonable terms and conditions and assuming that improvements, if any, had not been made.

Land tax is assessed at the rate of 0.42 per cent on the total unimproved value up to \$17,500 with a graduated increase in the rate to reach 4 per cent where the unimproved value exceeds \$1,000,000. Land tax is not charged where the total unimproved value of all non-exempt land of a taxpayer does

not exceed \$9,000. However, where only one parcel of land is owned, which is less than half a hectare in area and is used exclusively for residential purposes by the owner, land tax is not charged unless the unimproved value exceeds \$15,000.

Exemption from tax is provided for charities, municipalities, public statutory bodies, servicemen's associations, friendly societies, and trade unions unless the land is leased or occupied for business purposes. Certain concessions are available under the *Decentralized Industry Incentive Payments Act* 1972 and to taxpayers in necessitous circumstances. Land used for primary purposes is generally exempt, but within the metropolitan area exemption depends on the zoning of the land and whether the owner is substantially a full-time farmer. Where certain land ceases to be exempt from land tax a special land tax of 5 per cent of the unimproved value is payable. This applies only to land owned by statutory bodies, certain clubs, or land used for primary production.

In the following table details are shown of the assessments made during each of the years 1970 to 1974. The exemption from tax of land used for primary production purposes as from 1 January 1969, increases in land valuations, and increases from time to time in the amount of exemption from tax of land used for other purposes are mainly responsible for the fluctuations in the figures shown in the table.

VICTORIA—LAND TAX ASSESSMENTS

| Year | | Number of taxpayers | Total tax payable | Average tax payable per taxpayer | Total unimproved value (a) |

| 1974 | | 66,558 | 58,398 | 877.41 | 3,057,498 |

⁽a) Of land not exempted from land tax.

Liquor tax

The Liquor Control Commission, established under the provisions of the Liquor Control Act 1968, controls the issue of liquor licences in Victoria. The principal sources of taxation are the fees received for liquor licences and club certificates. All receipts of the Commission are paid into the Licensing Fund. After payments for compensation, administration, etc., have been met, the excess of receipts is transferred each year from the Licensing Fund to the Consolidated Fund.

Lottery tax

The trustees of the will and estate of the late George Adams, founder of Tattersall's Consultations, conduct sweepstakes in Victoria, under the *Tattersall Consultation Act* 1958, with the object of providing additional finance for hospitals, charitable institutions, and recreational promotion. During 1972 a further type of consultation named "Tattslotto" was introduced, and in 1974, "Soccerpools".

The Act provides that 31 per cent of the total amount subscribed to each consultation and 30 per cent of the total subscribed to soccer pools be paid into the Consolidated Fund. Each year an equivalent amount of this duty on consultations and one third of the soccer pools duty is paid out of the Consolidated Fund, in such proportions as the Treasurer determines, into both the Hospitals and Charities Fund and the Mental Hospitals Fund. The Act further provides that, of the soccer pools duty, two thirds is paid out of the Consolidated Fund for the promotion of sport and recreation, at such intervals as the Treasurer determines.

In the following table, the amounts subscribed to consultations, the duty paid to the Consolidated Fund, and the amounts allocated to the Hospitals and Charities Fund, the Mental Hospitals Fund, and other funds, are shown for each of the years 1970–71 to 1974–75:

VICTORIA—TATTERSALL LOTTERIES: SUBSCRIPTIONS, DUTY PAID, ETC. (\$'000)

| Other funds, etc. (b) | · • • | ••• | 19 | 10 | 958 |

⁽a) Includes subscriptions to football pool lotteries of \$97,706 in 1972-73 and \$26,428 in 1973-74.

Racing taxes

The principal taxes levied on racing in Victoria are the percentage deducted from investments on the totalisator, the turnover tax on bookmakers' holdings, and stamp duty on betting tickets.

The Racing (Totalizator Commissions) Act 1975 increased the commission to be deducted from all investments on the on-course and from win, place, and quinella, investments on the off-course totalisators in respect of horse races (including trotting), and greyhound races. As from 1 November 1975 a deduction of 15 per cent is made from investments on the on-course totalisator (metropolitan) and divided as follows: doubles, quinella, trio, trifecta, and forecast investments, 6.75 per cent to revenue and 8.25 per cent to the club; win and place investments, 9.75 per cent to revenue and 5.25 per cent to the club. In respect of country race meetings, 4.75 per cent of total investments is paid to revenue and 10.25 per cent to the club.

Under the provisions of the Racing Totalizators Extension Act 1960, off-course betting is permitted on race-course totalisators. The Totalizator Agency Board, appointed under the Act, conducts the off-course betting scheme which came into operation on 11 March 1961.

⁽b) Allocated for various sport and recreation purposes.

From investments on the off-course totalisator the following commission is deducted:

- (1) From investments for win, place, and quinella—15 per cent;
- (2) from investments for daily doubles and feature doubles—17 per cent; and
- (3) from investments for quadrella-19 per cent.

The commission is allocated in the following proportions:

VICTORIA—INVESTMENTS ON OFF-COURSE TOTALISATOR: COMMISSION DEDUCTED

Gift duty

The Gift Duty Act 1971 and the Gift Duty (Rates and Rebates) Act 1971 imposed gift duty, from 1 January 1972, on any disposition of property which is made, other than by will, without consideration in money or money's worth, or with any consideration so passing if the consideration is not fully adequate.

Note. Deductions from third party insurance premiums—credited to the Hospitals and Charities Fund in following years—are included in "other taxes" in the table on page 569, and amounted to \$2,062,000 in 1970-71, \$2,138,000 in 1971-72, \$2,188,000 in 1972-73, \$2,356,000 in 1973-74, and \$1,336,000 in 1974-75.

The Motor Accidents Board, which came into operation on 19 September 1973, received \$469,580 in deductions from third party insurance premiums in 1973-74 and \$1,929,548 in 1974-75. The Board also received levies from authorised insurers of \$653,330 in 1973-74 and \$9,046,670 in 1974-75. (See also pages 671-3.)

Stamp duties

Under the provisions of the Stamps Act 1958 and subsequent amendments thereto, stamp duty is imposed in Victoria on a wide range of legal and commercial documents.

The rates of duty payable at 1 December 1975 on the principal dutiable classes of documents, etc., are shown in the following table:

VICTORIA—STAMP DUTIES: RATES PAYABLE, 1 DECEMBER 1975

⁽a) From 1 January 1972 the Gift Duty Act 1971 and the Gift Duty (Rates and Rebates) Act 1971, administered by the Commissioner of Probate Duties, imposed duty on gifts (including gifts and settlements of property) formerly imposed only under the Stamps Acts. However, where a gift involves the transfer of real property, stamp duty is still charged at the rates shown on page 575 but the amount paid is allowed as a deduction from the duty payable under the Gift Duty Act.

NOTE. Exemptions from duty are allowed in certain specific cases.

Statutory levy

The Public Authorities (Contributions) Act 1966 requires the State Electricity Commission and the Gas and Fuel Corporation to pay to the Consolidated Fund in each of the financial years a contribution of an amount equal to 3 per

cent of the total revenue of each authority in the preceding financial year. On 8 December 1971 the percentage was increased to 4 per cent.

COMMONWEALTH GOVERNMENT TAXATION Specific collections

Commonwealth Government estate duty

The Commonwealth Government levies duties on deceased estates. The amount of such duty collected throughout Australia during each of the five years to 1974–75 was: 1970–71, \$70.1m; 1971–72, \$67.3m; 1972–73, \$66.4m; 1973–74, \$66.0m; and 1974–75, \$63.8m.

Commonwealth income tax

Uniform taxation of income throughout Australia was adopted in 1942, when the Commonwealth Government became the sole authority levying this tax. However, arrangements are being introduced (details of which are given in 1976–77 Budget Paper No. 7, Payments to or for the States and Local Government Authorities, 1976–77) which will enable each State to legislate to impose a surcharge on personal income tax in the State additional to that imposed by the Commonwealth or to give (at a cost to the States) a rebate on personal income tax payable under Commonwealth law.

A new personal income tax system was introduced in the 1975-76 Budget with the following principal features:

- (1) The introduction of a new rate scale, effective from 1 July 1975;
- (2) replacement of most deductions of a concessional nature by rebates of tax involving: (i) increased allowances for dependants; and (ii) most other expenditure formerly qualifying as concessional deductions being allowed by way of rebate at 40 per cent, subject to a minimum concessional rebate of \$540; and (3) the introduction of a concessional rebate for a sole parent.

The property income surcharge which had applied in 1974–75 was not re-imposed in 1975–76 and the low income family rebate and aged persons rebate were discontinued.

No income tax is levied where the minimum taxable income does not exceed the following levels:

| No dependants | \$ 2,518 |
|--|----------------------------------|
| Sole parent with— One child Two children (neither students) Two children (both students) | 4,000 4,556 4,741 |
| Housekeeper and one child (under 16 years of age) sole parent rebate not available Dependent spouse with— | 4,741 |
| No children One child Two children (neither students) Two children (both students) | 4,000 4,741 5,229 5,372 |

| 20,000 | 25,000 | | | | | | | | | excess | | |
| | and over | | | | | | | | | excess | | |

Rehates

(1) Dependants, housekeeper, and zone allowance:

The deductions from assessable income previously allowed for the maintenance of dependants, housekeeper, and zone allowance in respect of specified isolated localities, have been converted to rebates of tax. The following rebates from tax payable on taxable income, derived during the year of income ended 30 June 1976, are allowable to resident taxpayers:

| Dependant, etc. (resident) | | Rebate |
|---------------------------------|------------------------|--------------|
| | | \$ |
| Spouse or daughter-housekeer | oer . | 400 |
| Students under 25 years of age | | 200 |
| Children under 16 years of age | e, not being students— | |
| First child | | 200 |
| Others | | 150 |
| Invalid relatives-16 years of a | age and over | 200 |
| Parents/parent-in-law | | 400 |
| Housekeeper | | 400 |
| Sole parent | | 200 |
| Zone and overseas allowance— | - | |
| Zone A | \$216 + 25 per cent of | |
| Zone B | \$36 + 4 per cent of | above rebate |

(2) Concessional expenditure:

This rebate replaces the concessional deductions previously allowed in respect of expenditure on education, medical, life insurance, etc. The minimum concessional rebate reduces gross tax payable by \$540 (40 per cent of \$1,350). However, where allowable expenditure exceeds \$1,350, the rebate is calculated at 40 per cent of the total amount expended.

Other deductions

The following remain as allowable deductions against assessable income:

- (1) Subscriptions to trade unions and trade business or professional associations:
- (2) gifts to approved school building funds and public institutions; (3) living-away-from-home allowance; (4) expenditure relating to allowances received; and (5) any other deductions necessarily incurred in gaining assessable income.

A graduated deduction is also allowable in respect of housing loan interest paid on a residence, where the combined income of husband and wife does not exceed \$13,999.

⁽a) Net income is defined briefly as "total assessable income less total deductions for expenses incurred in gaining assessable income".
NOTE. Particulars shown in the above table relate to individuals who were assessed for income tax in the Melbourne Office of the Australian Taxation Office.

Withholding tax

A flat rate of tax has been levied on dividends derived by non-residents of Australia from Australian companies since 1 July 1960. In 1967 the income tax legislation was amended to provide also for a flat rate of tax on interest derived by non-residents of Australia from Australian residents on, or after, 1 January 1968.

The rate of withholding tax on dividends is 30 per cent of the gross payment, but the rate applicable to dividends paid to residents of countries with which Australia has comprehensive double tax agreements is limited to 15 per cent. The rate of withholding tax on interest is 10 per cent of the gross interest.

⁽a) Includes contributions to the Pensions Supplementation Fund from 1972-73.

⁽a) Additional tax at rate of 50 per cent payable on undistributed income.

(b) A non-profit company is not liable to tax unless the taxable income exceeds \$416; where, in the case of a non-profit company other than a friendly society dispensary, the taxable income does not exceed \$1,830, the maximum amount of tax payable is 55 per cent of the taxable income over \$416, less any rebate or credit to which the company is entitled; where, in the case of a non-profit company that is a friendly society dispensary, the taxable income does not exceed \$1,664, the amount of tax payable shall not exceed 50 per cent of the excess of taxable income over \$416, less any rebate or credits to which the company is entitled.

Victorian Superannuation Fund

This Fund was established under the Superannuation Act 1925 to provide superannuation benefits, on a contributory basis, for public servants, teachers, railway employees, and employees of certain statutory bodies. The scope of the Fund was widened by amending legislation in 1963 to include, inter alia, members of the Victoria Police (see page 569 of the Victorian Year Book 1975), and in succeeding years amending Acts considerably increased the range of benefits available.

Substantial changes to the superannuation scheme were brought about by the Superannuation Act 1975. These changes in the main were introduced to deal with the problem of extremely high rates of contribution required to be paid in the years prior to retirement to secure maximum pensions and to cope with inroads made into benefits by inflation.

Briefly stated the main provisions which operated from 1 July 1975 are as follows:

- (1) A basic pension on retirement for ill-health or at age 65 of 70 per cent of salary at retirement.
- (2) On age retirement before age 65, but after age 60, the pension will reduce pro rata to $66\frac{2}{3}$ per cent of salary at age 60.
- (3) Officers' contributions to be limited to a maximum of 9 per cent of salary. Officers at present contributing more than 9 per cent of salary will have their contributions reduced to 9 per cent.
- (4) Widows' pensions, including present widows' pensions, to be increased from five eighths to two thirds of officers' pensions.
- (5) The existing rights to convert part of the pension into a lump sum will be retained.
- (6) Married women to be eligible to elect to be contributors to the super-annuation scheme.
- (7) Railway officers, who previously elected to limit their superannuation entitlement to a maximum of six units, or to forego superannuation altogether, to have the right to reinstate their situation.

⁽c) Estimated.

VICTORIAN TRUST FUNDS AND SPECIAL ACCOUNTS

Conora

Under the provisions of the Constitution Act revenues of the State are payable to the Consolidated Fund with the exception of certain revenues set aside by various Acts of Parliament for specific purposes and payable into special funds or accounts held at the Victorian Treasury and known collectively as the Trust Fund. In recent years there has been a proliferation of funds and accounts established to record the receipt and disbursement of moneys provided by the Commonwealth Government for specific purposes. Other funds record the transactions of State insurance offices, of the Hospitals and Charities Commission and, in relation to capital works, of the Country Roads Board and the Works and Services Account. The Trust Fund also includes accounts which are in the nature of suspense accounts. Certain of these accounts are governed by legislation while others are clearing accounts for book-keeping purposes.

The transactions recorded annually are numerous and of considerable magnitude in total. Debits to all funds and accounts in 1974–75 aggregated \$2,573.0m and credits \$2,627.2m. At the end of the year the liability of the State on account of all trust funds or accounts (including securities to the value of \$15.6m lodged with the Treasurer) was \$321.0m. Of this total, investments in government and other securities amounted to \$192.5m, cash advanced was \$28.1m while the balance, \$100.4m, was at the credit of the Public Account.

Relevant figures of balances and transactions of funds and accounts within the Trust Fund are shown under broad classifications in the following table, in respect of the year 1974–75:

VICTORIA—CURRENT TRUST FUNDS AND ACCOUNTS (a)

(\$m) 1974-75 Balance at Balance at 30 June 1975 Particulars 1 July 1974 Debits Credits Commonwealth and Commonwealth-Victorian 21.8 668.3 670.4 23.8 168.2 Compensation and insurance 112.3 274.5 330.4 214.3 Social, health, and welfare 211.6 6.8 4.0 662.7 42.9 Suspense 667.6 38.0 Works and development 37.7 490.6 490.7 37.8 Other 32.4 260.3 258.6 30.8 251.2 2,573.0 2.627.2 305.4

Specific accounts

Commonwealth and Victorian

In this category there were over 94 separate funds in existence at 30 June 1975 including 20 established during the financial year ending on that date. In terms of financial turnover the most important were (1) Australian Aid Roads accounts with credits totalling \$74.7m; (2) subsidy accounts for Victorian universities credited with \$118.9m; (3) accounts credited with grants for advanced education \$126.1m; and (4) a number of accounts credited with advances from the Commonwealth Government for housing and repayments of principal and interest by borrowers totalling in all \$115.0m for the year.

Compensation and insurance

The principal accounts under this heading are (1) those dealing with the financial activities of the State Insurance offices represented by credits totalling \$219.1m for 1974-75; and (2) receipts of third party insurance premiums \$106.7m for allocation to approved insurers and the Motor Accidents Board.

⁽a) Excluding securities (i.e., shares of the Gas and Fuel Corporation of Victoria) amounting to \$15.6m at 30 June 1975 lodged with the Treasurer and included in the Trust Fund.

Social, health, and welfare

The major fund in this category is the Hospital and Charities Fund which in 1974-75, was credited with \$196.0m, almost all of which represented transfers from the Consolidated Fund.

Suspense accounts

Various railways suspense accounts comprise almost half of the credits in this category. Pay-roll deductions account for a further \$215.3m.

Works and development

The two major funds in this category are the Country Roads Board Fund (credits \$55.5m in 1974–75) and the Works and Services Account. The Country Roads Board Fund provides rather less than half of the finance required by the Country Roads Board to carry out its functions. Other sources of funds for the Board are referred to in Chapter 6 of this *Year Book*. The Works and Services Account, undoubtedly the most important of all Victorian Trust Funds, was credited with \$347.1m in 1974–75 and its origin and transactions are referred to below in some detail.

Works and Services Account

When the Victorian Government amalgamated the Consolidated Revenue Fund and the Loan Fund in 1970-71 into one account to be known as the Consolidated Fund it created, at the same time, a trust fund, the Works and Services Account, which was to cater for expenditure by the Commonwealth Government on capital works and services. In effect, therefore, this Account which is financed by appropriations from the Consolidated Fund, serves a similar purpose to that of the former Loan Fund.

| Total | 159,551 | 221,950 | 247,742 | 246,860 | 340,800 |

⁽a) Expenditure on destruction of vermin and noxious weeds was charged mainly to the Consolidated Fund from 1973-74.

PUBLIC DEBT

The public debt chiefly comprises moneys raised and expended with the object of assisting the development of the resources of the State and is, to a large extent, represented by tangible assets.

Loan moneys have been used in Victoria principally for the construction of railways, roads, water supply and sewerage works, schools, hospitals, and other public buildings, improvements to harbours and rivers, electricity supply, land settlement, and forestry.

A notable feature of the public debt of the State is that approximately 99 per cent of indebtedness is now domiciled in Australia. There has been a gradual change from the situation which existed a century ago when nearly all loans were financed in London. Even at the beginning of the twentieth century, only 10 per cent of State indebtedness was domiciled in Australia.

In the tables in this section relating to the public debt of Victoria, loans domiciled in overseas countries have been converted to Australian currency at rates of exchange ruling at 30 June in each respective year.

The public debt of the State of Victoria as shown in the following tables excludes certain liabilities due to the Commonwealth Government at 30 June 1975. These liabilities include advances of \$688.7m for housing purposes under the Commonwealth-State Housing Agreements, \$37.5m for sewerage, \$31.9m for rural and dairy reconstruction, \$25.5m for growth centres, \$11.5m for land acquisition, and \$12.3m of special assistance loans for soldier settlement. These and other purpose loans and advances made pursuant to Commonwealth-State agreements and arrangements should be taken into account when considering the total debt position of Victoria.

Public debt transactions

The following table shows particulars of the loans raised and redeemed during, and the amount outstanding at the end of, each of the years 1970-71 to 1974-75. The variations from year to year in the Australian currency equivalent of overseas loans, resulting from application of the rates of exchange ruling at 30 June in each year, are shown.

⁽b) Includes advances of \$5m to the Victorian Development Corporation in 1973-74 and 1974-75.

⁽c) Includes secondary technical.

⁽d) Includes grants for culture and recreation, education, health, roads, and social welfare among others.

⁽e) In 1971-72 and 1972-73 funds required for general housing purposes were treated as part of the States Loan Council borrowings programme and therefore disbursed in Victoria through the Works and Services Account. In 1973-74 it was decided to return to the system in force from 1945-46 to 1970-71, i.e. separate funds for housing as approved by the Loan Council which were then credited to and disbursed from Trust Accounts created for the purpose by the Victorian Treasury.

National Debt Sinking Fund

Under the Financial Agreement of 1927 between the Commonwealth Government and the States, it was arranged that the Commonwealth Government assume responsibility for the public debt of the States. The securities covering these debts would be redeemed or repurchased by payments from the National Debt Sinking Fund (which had been in existence from 1923) and the Commonwealth Government and the States were to make annual contributions to the Fund for this purpose.

Details of transactions of the National Debt Sinking Fund in respect of the public debt of the State of Victoria, for each of the years 1970-71 to 1974-75, are shown in the following tables. The first table shows particulars of the receipts of the Fund, and the second table shows details of the expenditure on, and face value of, securities repurchased and redeemed.

NEW FEDERALISM POLICY

Introduction

The central element of the Commonwealth Government's federalism policy is the sharing of personal income tax with the States.

Other elements of the policy are:

- (1) Sharing by local government in the proceeds of personal income tax;
- (2) a more selective use of specific purpose payments to the States with the absorption of such payments, where appropriate, into general purpose funds;
- (3) the establishment of an advisory Council for Inter-Government Relations; and
- (4) a review of the functions of the different levels of government and the elimination of unnecessary overlapping waste and interference.

Details

Personal Income Tax Sharing between the Commonwealth and the States

From 1976-77 general revenue assistance that was formerly paid by the Commonwealth to the States by way of financial assistance grants has been replaced by a system of sharing of the proceeds from personal income tax between the Commonwealth and the States.

Personal income tax sharing will be introduced in two stages. Under Stage 1 the Commonwealth will continue to be the sole Government imposing income taxes in Australia, with each State receiving a specified proportion of personal income tax collections. Under Stage 2 for which it is expected arrangements will be settled so that it may commence in 1977–78, Stage 1 entitlements will continue to operate, but each State will be free to impose a surcharge or to grant a rebate of personal income tax.

Tax sharing arrangements are to apply to receipts from personal income tax only, not to receipts from company taxes, withholding taxes on dividends, and interest.

Stage 1 Entitlements

Under Stage 1 of the scheme, which began in 1976–77, the States are entitled to receive a fixed percentage of Commonwealth personal income tax each year. That percentage for 1976–77 and for subsequent years, subject to any decisions made, given relevant points mentioned below, will be 33.6 per cent. Victoria's share is estimated to be \$852.5m in 1976–77.

In determining the allocation of the total amount between States, it has been decided that the distribution will be such that the relative per capita distribution of the total amount in 1976–77 between the States will be the same as the per capita distribution of Financial Assistance Grants in 1975–76. The Agreement provides that these relativities should be reviewed before 1980.

The Commonwealth has guaranteed that a State's entitlement in any year will not be less in absolute terms than that which it received in the previous year. In addition, the Commonwealth has guaranteed that during the first four years of the Agreement the States will not receive less than they would have received under the previous system of financial assistance grants.

The amounts received by the States are dependent on actual personal income tax collections. Total collections will vary as changes in Commonwealth Government taxation are announced. As a part of the new federalism arrangements the Commonwealth has given firm assurances that:

- (1) It will ensure that the States are kept fully informed of relevant tax changes made by the Commonwealth and of their estimated effects on the States' entitlements;
- (2) it will participate in a review of the arrangements when there are changes in Commonwealth tax legislation which would have effects on the States' entitlements of such significance as to warrant such a review;
- (3) longer term trends in regard to such matters as changes in the relative importance of personal income tax vis-à-vis other taxes will be kept under notice between the Commonwealth and State Governments; and
- (4) when post-budget changes in Commonwealth personal income tax legislation with substantial effects on the States' entitlements are made, the Commonwealth will consider, in consultation with the States, appropriate adjustments to offset the effect of such charges on the States' entitlements.

Stage 2 Entitlements

Under Stage 2 of the arrangements, Stage 1 entitlements will continue. However, each State will be entitled to legislate to impose a surchage on personal income tax in the State, or to give (at cost to the State) a rebate on personal income tax. Assessment provisions, and the basic income tax rate structure will remain uniform throughout Australia. There will continue to be one income tax assessment form and the Commonwealth will remain the sole income tax collection agency.

Where the States wish to impose a surcharge or grant a rebate of tax, the Commonwealth is to act as agent for the State concerned. The level of surcharge or rebate will be a matter for determination by each State. However, in

exercising their powers the States have agreed to work in parallel with, and not in negation of, the overall economic management policies of the Commonwealth. Equalisation arrangements will continue to operate so that the smaller, less populous States will be able to enjoy the same relative advantage from a surcharge as those States with a broader tax base.

Local Government

In 1976-77 local government will receive an amount equal to 1.52 per cent of Commonwealth Government collections from personal income tax collections in 1975-76. This amount will be distributed between the States in accordance with recommendations of the Commonwealth Grants Commission. Allocations to individual councils within States will be determined in accordance with recommendations made by State Grants Committees which are to be established in each State. Victoria's share of the pool in 1976-77 is 25.8 per cent, or \$35.4m.

Specific Purpose Payments

Another element of the new federalism concerns specific purpose payments. Specific purpose payments have grown at a much faster rate than general purpose payments in recent years. Specific purpose payments will be examined to determine which of them can be absorbed into the general arrangements for income tax sharing. It was agreed at the April 1976 Premiers' Conference that absorption would not commence before 1977-78 but that the necessary work by Commonwealth and State officers would take place during 1976-77.

Advisory Council for Intergovernmental Relations

Following discussions at Premiers' Conferences in 1976 it was agreed that a Council for Intergovernmental Relations would be established. The Council will comprise members of the Commonwealth and State Parliaments, representatives from local government, and private citizens. Subjects for investigation and advice by the Council will be referred to it by Premiers' Conferences, and may include matters raised originally at the initiative either of local government or the Council itself.

Elimination of Duplication of Effort between Governments

A fourth part of the federalism policies involves a review of the function of the different levels of government in Australia so as to eliminate unnecessary duplication of effort. One of the matters on which the Administrative Review Committee was asked to report was "possible means of improving Commonwealth-State administrative arrangements with particular reference to the degree of Commonwealth involvement in the supervision of State expenditure of Commonwealth financial assistance, and to the avoidance of duplication and overlapping of activities".
