Principal Causes of Death—		
77.	Numbers and Rates, 1893-1946	438

Notes.

- Since the beginning of 1927, the basis of tabulation of births and deaths for any subdivision of the State has been according to usual residence; consequently in this issue, comparison of these figures for any municipality, shire or division cannot be made with those for years prior to 1927. Marriages have always been tabulated according to the place of celebration.
- There have been several changes in the delimitation of the Metropolis and the following local government areas have been added:—
 - From the date of the 1911 Census—
Shire of Ku-ring-gai (incorporated as a municipality in 1927).
 - From 1st January, 1929—
Municipalities of Auburn, Bankstown, Granville, Lidcombe, and Parramatta.
 - From 1st January, 1933—
Municipalities of Dundas, Ermington and Rydalmere, and Holroyd (Pitt and Merrylands Wards only).
- Commencing with 1933, full-blood aboriginals have been excluded from all figures. They have also been excluded from statistics of population for earlier years in certain tables, and where this has been done, an appropriate note has been inserted under the heading of the table.
- For purposes of record, stillbirths are registered as deaths as well as births, but in the tables in this Part stillbirths are not included in the deaths.
 - The death statistics for the years 1939 to 1946 were compiled on the following basis:—
1939 to 1941. Australian defence personnel (irrespective of State of enlistment) who died in New South Wales, viz., 256 males, were included.
New South Wales defence personnel who died out of the State were excluded.
1942 to 1946. All defence personnel and other non-civilians were excluded; therefore the statistics relate to civilians only.
 - Deaths of New South Wales personnel in defence forces in or out of Australia, so far as recorded, were as follows:—

Year.	Males.	Females.	Year.	Males.	Females.
1939	8	...	1943	3,996	7
1940	136	1	1944	2,083	12
1941	1,379	1	1945	2,517	5
1942	3,989	3	1946	191	5

 These figures are subject to revision. They do not include dead who are posted as "missing".
- In calculating "natural increase" over the war years the figures as recorded in (a) and (b) above have been combined to give "total deaths." This causes an overstatement of 256 males in deaths of the period 1939 to 1941.
- Allied defence personnel have been excluded from statistics of population and deaths.
- In this issue rates based on population for the years 1933 to 1946 have been revised in accordance with the preliminary results of the census of 30th June, 1947.

PART V.—POPULATION AND VITAL STATISTICS.

Section I.—POPULATION.

No. 1.—Population of New South Wales at each Census, 1828-1947.

NOTE.—The figures quoted for 1841 and subsequent years represent the population of New South Wales within its boundaries after the separation of Victoria and Queensland. Victoria was separated from New South Wales on the 1st July, 1851, and Queensland on the 10th December, 1859. The Australian Capital Territory was transferred to the Commonwealth on 1st January, 1911.

* The population of the Australian Capital Territory is excluded, viz., 1911, 992 males, 722 females, 1,714 total; 1921, 1,587 males, 1,005 females, 2,572 total; 1933, 4,805 males, 4,142 females, 8,947 total; and 1947, 9,002 males, 7,813 females, 16,905 total. † From 26th October, 1821. ‡ Includes unoccupied dwellings. § Not available.

No. 2.—Population of Metropolis at each Census, 1861-1947.

(Exclusive of Full-blood Aboriginals and Shipping.)

Note.—The figures relate to the Metropolitan Area within its actual boundaries at the date of each Census.

NOTE.—Twins and triplets, first-born in a family, are included in this table, but only the first born alive of each plural birth is enumerated.

No. 29.—Live Births, 1946—Ages of Mothers of First Born and Interval since Marriage.

Table with columns for Age of Mother (14-48), Total Mothers (87-24,202), Months (1-12), and Years (1-23). Rows represent mother's ages from 14 to 48. Data includes counts of live births and intervals since marriage.

Note.—Twins and triplets, first-born in a family, are included in this table, but only the first born alive of each plural birth is enumerated.

No. 31.—Single Live Births—

Ages of Parents in cases of Plural Live

* The figures represent children who were born to mothers whose place of residence was in the municipalities named.

† The figures represent live births in institutions situated within the specified municipalities, without allocation to the residence of the mother.

No. 35.—Plural Births—Ages of Parents—1946.

These are cases of plural births in which at least one child was born alive. For cases in which all children were stillborn see Table No. 40. **Twins.**
