EXPLANATORY NOTES.

1. Boundaries of Metropolis.—Boundaries of the Metropolis have been changed by the addition of the following local government areas :—

- (a) From the date of the 1911 Census—
Shire of Ku-ring-gai (incorporated as a municipality in 1927).
- (b) From 1st January, 1929—
Municipalities of Auburn, Bankstown, Granville, Lidcombe and Parramatta.
- (c) From 1st January, 1933—
Municipalities of Dundas, Ermington and Rydalmere, and Holroyd (Pitt and Merrylands Wards only).
- (d) From 1st January, 1954—
The Guildford and Wentworth Wards of Holroyd Municipality, Fairfield Municipality, the Shires of Sutherland and Warringah, part of Liverpool Municipality and part of the Shires of Baulkham Hills, Blacktown and Hornsby (see following descriptions) :—
 - (i) That part of Liverpool Municipality north and east of a line commencing at the junction of Hume Highway and Campbelltown Road (Cross Roads), and following Hume Highway, Bringelly Road and Old Cowpasture Road to the northern boundary of the Municipality.
 - (ii) That part of Baulkham Hills Shire south and east of a line commencing at the junction of Old Windsor Road and Seven Hills Road, Seven Hills, and following Seven Hills Road, Chapel Lane, New Windsor Road, Gladstone Road, Victoria Road, Carrington Road, Showground Road, Castle Lane, Castle Street, and Old Northern Road to the shire boundary at Rogan's Hill.
 - (iii) That part of Blacktown Shire east of a line commencing at the junction of Chandos Road and Eastern Creek on the southern boundary of the Shire, and following Eastern Creek, Breakfast Creek and Sunny Holt Road to the north-eastern boundary of the Shire on Old Windsor Road, Parklea.
 - (iv) That part of Hornsby Shire south and east of a line commencing at the junction of Castle Hill Road and New Line Road, West Pennant Hills and following New Line Road, Gumnut Road, a prolongation of Boundary Road, Boundary Road, Thornleigh Gully Creek, Fish Pond Creek, Berowra Creek, Berowra Ferry Road, the Great Northern Railway, a line drawn south-easterly from the 21 mile peg (between Berowra and Mount Ku-ring-gai) to the head of Apple Tree Bay, Apple Tree Bay and Cowan Water to the eastern boundary of the Shire at Bobbin Head.

In Section I—Population, unless otherwise stated, the word "Metropolis" refers to the City of Sydney and suburbs as delimited for statistical purposes from 1st January, 1954. In Section II—Vital Statistics, "Metropolis" refers to the City of Sydney and suburbs as delimited at the time, unless otherwise stated.

2. Newcastle Urban Area.—From 1st January, 1954, a "Newcastle Urban Area" was defined for statistical purposes. This area includes the City of Newcastle, and that part of Lake Macquarie Shire east and north of Lake Macquarie, bounded on the west by Cockle Creek, Cocked Hat Creek, West Wallsend Road and Minmi-Young Wallsend Road.

3. Aborigines.—Full-blood aborigines have been excluded from all population statistics and have been excluded from statistics of births and deaths since 1st January, 1933.

4. Population and Migration Statistics.—

- (a) *Migratory Population.*—Shipping population and other migratory population are not included in any subdivisions of the State.
- (b) *Defence Personnel.*—
Sept., 1939 to June, 1947.—Australian defence personnel, irrespective of their location, are included in the population of the State in which they enlisted; statistics of migration relate to civilians only. Deaths of members of the Defence Forces overseas were taken into account in the population statistics when authentically recorded.
From July, 1947.—Movements of Australian troops are included in migration statistics and are shown in the temporary migration figures irrespective of the length of their stay overseas. Temporary migration otherwise refers to persons intending residence of less than one year, in Australia in the case of arrivals, and abroad in the case of departures.
- (c) *Interstate Migration.*—In view of the uncertainty of war-time records, from 1st July, 1943 to 30th June, 1947, recorded interstate arrivals and departures were disregarded for purposes of population estimates. It was assumed that interstate net migration was nil or negligible.
- (d) *Overseas Migration.*—Overseas migrants are classified on two bases :—
 - (i) Movement through the Ports of New South Wales. The figures represent the movement by sea and air through the Ports of New South Wales, irrespective of the State of residence or intended residence.
 - (ii) Movement of Residents or Intending Residents of New South Wales. The figures represent the movement of residents or intending residents of New South Wales, irrespective of the Australian port of arrival or departure.

5. Vital Statistics by Subdivisions of State.—Since the beginning of 1927, births for any subdivision of the State have been tabulated according to the usual residence of the mother and deaths for any subdivision according to the usual residence of the deceased; in cases where the usual residence is outside the State, the birth or death is included in the subdivision in which it occurred. Figures, on this basis, for any municipality, shire or division cannot be compared with those for years prior to 1927, particulars of which were tabulated according to place of occurrence. Marriages for any subdivision of the State were tabulated according to the place of celebration of the marriage up to 1954. From 1st January, 1955, tabulation of marriages for subdivisions of the State was discontinued.

6. Stillbirths.—For purposes of record, stillbirths are registered as deaths as well as births, but in the tables in this Part stillbirths are not included in the statistics of deaths. Compulsory registration of stillbirths became effective in 1935. A stillborn child is defined as "any child of seven months gestation or over, not born alive, and includes any child not born alive which measures at least fourteen inches, but does not include any child which has actually breathed".

EXPLANATORY NOTES—*continued.*

7. **Death Statistics, 1939 to 1947.**—(a) The death statistics (as recorded in Section II) for the years 1939 to 1947 were compiled on the following basis :—

1939 to 1941.—Australian defence personnel (irrespective of State of enlistment) who died in New South Wales, viz., 256 males, were included.
New South Wales defence personnel who died outside the State were excluded.

1942 to 30th June, 1947.—All defence personnel and other non-civilians were excluded.

- (b) Deaths of New South Wales personnel in defence forces in or out of Australia, so far as recorded, were as follows :—

Year.	Males.	Females.	Year.	Males.	Females.
1939	8	...	1944	2,047	12
1940	137	1	1945	2,482	6
1941	1,355	1	1946	207	5
1942	3,963	3	1947 (Jan.-June)	35	1
1943	3,045	7			

8. **Classification of Causes of Death.**—Commencing with the year 1950, causes of death have been classified according to the Statistical Classification of Diseases, Injuries, and Causes of Death (Sixth Revision, 1948, of the International List of Diseases and Causes of Death), and the international rules for selecting the underlying cause of death. The full 3-digit classification (with some 4-digit categories) has been used in tabulation but certain categories have been grouped together for publication purposes. Accidents, poisonings and violence (Class XVII) have been classified according to the external cause of injury.

Particulars of the causes of death for each of the ten years ended 1949, as published in previous issues of the Statistical Register, were classified according to the Fifth Revision, 1938, of the International List of Causes of Death and the rules for selecting the underlying cause of death which were used with this Revision.

In order to facilitate comparison with previous years, causes of death in 1950 were classified according to both the Fifth Revision and the Sixth Revision of the International List. Table 34 of Part VII of the Statistical Register for 1950-1951 shows particulars of causes of death in 1950 and earlier years classified according to the Fifth Revision. All tables of causes of death in this Part are classified on the basis of the Sixth Revision. Owing to the considerable changes involved, caution should be exercised in attempting to compare causes of death classified according to the Fifth Revision and the Sixth Revision of the International List.

9. **Regional Statistics.**—The regional subdivisions of the State shown in Tables 1 to 4 of Section III are as delimited by the Regional Boundaries Committee, which was appointed by the Premier in 1943 to divide the State into regions for survey, planning and decentralisation.

10. **Statistical Summary.** (Pages 531 to 534)—For the sake of uniformity, the population estimates published by the Commonwealth Statistician have been adopted for all years. On this account, estimates of population shown for years prior to 1921 differ slightly from the estimates (which included full-blood aborigines) published in the 1949-50 and earlier issues of the Statistical Register. All estimates have been adjusted in accordance with the results of the various censuses. Birth, death and marriage rates shown on page 534 have been based on these population estimates and consequently, for years prior to 1921, in some instances vary slightly from the rates previously published.

In Table 6, the difference between (i) the sum of the natural increase and increase by migration, and (ii) the total increase in population, represents :—

- (a) for the period 1907 to 1932, the difference between the natural increase as shown and the natural increase as compiled by the Commonwealth Statistician and used in these population estimates, and
(b) for the period 1933 to 1954, the adjustment of population on the basis of the results of the censuses of 30th June, 1947 and 1954, and also deaths of defence personnel from September, 1939 to June, 1947. (See note 7.)

Particulars of total increase have been adjusted for these differences, but the individual elements of increase have not been adjusted separately.

NOTE.—In the case of ex-nuptial births, particulars of the ages of the fathers are not available.

No. 39.—Plural Births, N.S.W.—Relative Ages of Parents, 1953.

These are cases of plural births in which at least one child was born alive. For cases in which all children were stillborn see Table 48. Twins.

Table with columns for Mother's Age (15-46) and Father's Age (18-66). Rows represent cases with entries like 'I' (single birth) or pairs of numbers (e.g., '1 2') representing twin births. Includes sub-totals for Nuptial, Ex-nuptial, and Total.

Note.—Figures in small type represent the number of cases of twins in which one child was stillborn. These cases are included in figures in large type. In the case of ex-nuptial births particulars of the ages of the fathers are not available.
