## Release of 1991.92 a mainal issue

The 1991 -92 amual publication Balance of Paymenis, Australia ( 5303.0 ) is expected to be ereased in the second hatf of I me 1993 . Dam in that publication will be consistent with this publication, with the 1991.92 issue of Internotional Trade in Services, Ausiratia ( 5354.0 ), which is also expected to be released in the second half of lune 1993 and with the 1991 -92 issue of International Investment Position. Austratia ( 5305.0 ). Which is expected of bee released in July 1993.

## Release date for lune quarter 1993 issue:

The expecied release date for the fune quarter ig93 issue of: Balance of Paymenis. Australin( 53020 ) is Thursday. 12 August 1993

## MAIN FEATURES

BALANCE OF PAYMENTS MAIN AGGREGATES

(a) For the current acoount aggregates, a minus sign means an increase in a deficit, a decrease in a surplus, a decrease in exports or a decrease in imports; and a plus sign means a decrease in a deficit, an increase in a supplus, an increase in exports ar an increase in imports. (b) Period averages.

## March quarter 1993 -

Balance on current account (seasonally adjusted). The current account deficit rose by $\$ 32$ million, or 1 per cent, to $\$ 3,396$ million.

The rise in the deficit was caused by:

- a fall of $\$ 446$ million ( 77 per cent) in the surplus on merchandise trade (merchandise exports fell 4 per cent and merchandise imports fell 1 per cent); and
- a fall of $\$ 144$ million ( 51 per cent) in the net unrequited transfers surplus.

Almost offsetting these movements in merchandise trade and unrequited transfers were falls of $\$ 192$ million ( 26 per cent) in the net services deficit and $\$ 366$ million (11 per cent) in the net income deficit.

The trend estimate for the March quarter current account deficit was $\$ 3,365$ million, down $\$ 315$ million ( 9 per cent) on the December quarter deficit.

Balance on capital account (not seasonally adjusted)
The balance on capital account recorded a net outflow of $\$ 2,063$ million, a turnaround of $\$ 3,939$ million on the net inflow in the December quarter. The change resulted from turnarounds of $\$ 5,810$ million and $\$ 347$ million to net oufflows of $\$ 4,214$ million and $\$ 10$ million in net debt and net "other" capital transactions, respectively, and a turnaround of $\$ 2,219$ million to a net inflow of $\$ 2,161$ million in net equity transactions.

GRAPH 2 CapItal account man aggregates

## NOTES ON THE ESTIMATES

## March quarter 1993 -

## Current account (seasonally adjusted)

"Volume" refers to values at average 1989-90 prices and "price" refers to implicit price deflators.

## Goods and services

The deficit on goods and services was $\$ 409$ million, an increase of $\$ 254$ million on the deficit recorded in December quarter. This was due to a fall of $\$ 446$ million in the surplus on merchandise trade which was partially offset by a decrease of $\$ 192$ million in the net services deficit.

In volume terms, exports of goods and services fell $\$ 740$ million ( 4 per cent), while imports of goods and services fell $\$ 302$ million ( 2 per cent). The resulting decrease of $\$ 438$ million in the surplus on goods and services will make a negative contribution of 0.5 percentage points to the March quarter 1993 expenditure based estimates of GDP at average 1989-90 prices, assuming no significant revisions to the GDP estimates for the preceding quarter. The surplus on merchandise trade fell by $\$ 585$ million, while the net services deficit decreased by $\$ 147$ million.

## Exports of merchandise

Exports of merchandise at current prices decreased by $\$ 614$ million, or 4 per cent, to $\$ 14,871$ million, as a result of a 5 per cent decrease in volume and a 1 per cent increase in price.
Rural exports at current prices fell $\$ 254$ million, or 6 per cent, reflecting a 7 per cent decrease in volume and a 2 per cent rise in price.
The most significant decreases were recorded in:

- wool, down $\$ 246$ million ( 25 per cent), due to a 21 per cent decrease in volume and a 5 per cent fall in price; and
- meat, down $\$ 72$ million (8 per cent), due mainly to a decrease in volume.

The largest increase was in "other" rural, up $\$ 74$ million ( 5 per cent), due to a 3 per cent increase in volume and a 2 per cent increase in price.
Non-rural exports at current prices fell $\$ 360$ million, or 3 per cent, reflecting a 4 per cent decrease in volume and a 1 per cent increase in price. Decreases occurred in six of the nine commodity groupings, the most significant being:

- gold, down $\$ 286$ million ( 21 per cent), as a result of a 25 per cent fall in volume, being partially offset by a 5 per cent rise in price;
- transport equipment down $\$ 105$ million ( 19 per cent), due to a 22 per cent decrease in volume, being partially offset by a 4 per cent rise in price;
- "other" mineral fuels down $\$ 71$ million (7 per cent), due mainly to a fall in price; and
- metal ores and minerals down $\$ 67$ million (3 per cent), due to a 4 per cent drop in volume pardy offset by a 1 per cent rise in price.

The most significant increase was in "other manufactures", up $\$ 97$ million ( 7 per cent), due to a 5 per cent rise in volume and a 2 per cent rise in price.

## Services credits

Services credits at current prices rose $\$ 92$ million (2 per cent) to $\$ 3,884$ million, due almost entirely to an increase in volumes. "Other transportation" was the most significant contributor to the rise in volumes.

## Exports implicit price deflator

The implicit price deflator (IPD) for total exports of goods and services rose 1 per cent. On a fixed-weighted basis, export prices were virtually unchanged from the December quarter, indicating that compositional change within exports of goods and services accounted for most of the rise in the IPD.

## Imports of merchandise

Imports of merchandise at current prices fell $\$ 168$ million, or 1 per cent, to $\$ 14,741$ million, as a result of a 2 per cent decrease in volume and a 1 per cent increase in price. Falls were recorded in six of the nine commodity groupings, with the most significant being:

- machinery, down $\$ 320$ million ( 7 per cent), due to a 5 per cent volume decrease and a 2 per cent price decrease;
- "other manufactures", down $\$ 172$ million ( 5 per cent), due mainly to a fall in volumes; and
- "other' imports, down $\$ 107$ million ( 15 per cent), also due mainly to a fall in volumes.

The most significant increases were in transport equipment, up $\$ 359$ million ( 19 per cent), due to an 11 per cent increase in volume and a 7 per cent increase in price; and fuels, up $\$ 129$ million ( 15 per cent), due to a 22 per cent increase in volume, partially offset by a 6 per cent fall in price.

Exogenous imports fell $\$ 172$ million (13 per cent), with decreases in civil aircraft and government imports being partially offset by increased fuel imports. Endogenous imports rose by $\$ 4$ million in the March quarter. A 1 per cent decrease in volume of en-
dogenous imports was offset by a 1 per cent rise in prices. In terms of volume, consumption goods fell 4 per cent, while capital goods and "other" goods were virtually unchanged from December quarter. In terms of price, capital goods rose by 4 per cent while consumption and "other" goods were flat.

## Services debits

Services debits at current prices fell $\$ 100$ million (2 per cent), to $\$ 4,423$ million, as a result of a 2 per cent fall in volume and a 1 per cent fall in price. In both current price and volume terms, decreases in shipment and "other" services were partially offset by increases in the remaining components.

## Imports implicit price deflator

The implicit price deflator (IPD) for imports of goods and services rose slightly in the March quarter. On a fixedweighted basis, import prices rose 1 per cent, indicating that compositional changes within imports had a marginal (downward) effect on the level of the IPD.

## Terms of trade

Australia's terms of trade rose 1 per cent, resulting from a rise of 1 per cent in the IPD for exports of goods and services, and a marginal rise in the IPD for imports of goods and services.

GRAPH \& TERMS OF TRADE FOR GOODS AND SERVICES
( $1989-90=100$ )

## Income

The net income deficit fell $\$ 366$ million ( 10 per cent) to $\$ 3,127$ million. Income credits rose $\$ 45$ million ( 4 per cent) to $\$ 1,098$ million, due to a rise in official sector investment income. Income debits fell $\$ 321$ million ( 7 per cent) to $\$ 4,225$ million, due to decreases in interest payable by the official sector on borrowing domiciled abroad, dividends payable abroad by the non-official sector on portfolio corporate equity investment, and interest payable abroad by the non-official sector on portfolio and other investment. These falls were partly offset by increases in interest payable abroad by the official sector on borrowing domiciled in Australia, remitted profits payable abroad by the non-official sector on direct investment, and interest payable abroad by the non-official sector on direct investment.

The non-official sector transactions were comprised of:

- a net inflow of foreign investment in Australia of $\$ 134$ million, a decrease of $\$ 35$ million on the December quarter net inflow; and
- a net outflow of Australian investment abroad of $\$ 1,236$ million, an increase of $\$ 253$ million on the previous quarter's net outflow.
The changes due to transactions in foreign investment in Australia in respect of the non-official sector were mainly the result of:
- borrowing from unrelated enterprises, which increased $\$ 800$ million to a net outflow (repayment) of $\$ 2,726$ million; and
- "other" direct investment transactions, which turned around $\$ 726$ million to a net outflow of $\$ 568$ million.

These changes were largely offset by those in other components of foreign investment in the non-official sector:
$=$ boncwing from dircci invesiors, which iumed arouind $\$ 713$ million to a net inflow of $\$ 479$ million;

- direct investment in corporate equities, which rose by $\$ 226$ million to an inflow of $\$ 1,444$ million in the March quarter; and
- portfolio investment in corporate equities, which recorded a net inflow of $\$ 797$ million, up $\$ 375$ million on the December quarter inflow.

The chief factors responsible for the rise in Australian investment abroad were:

- lending to unrelated enterprises abroad, which turned around $\$ 1,793$ million to an outflow of $\$ 1,507$ million;
- direct investment lending, which recorded a net inflow (withdrawal) of $\$ 523$ million, down $\$ 327$ million on the December quarter inflow; and
- portfolio investment in corporate equities abroad, which recorded a net inflow (withdrawal) of $\$ 242$ million, down $\$ 76$ million on the previous month's inflow.

These were partly offset by Australian direct investment in foreign corporate equities which fell $\$ 1,745$ million to an outflow of $\$ 379$ million, and accounts receivable/prepayments made, which turned around $\$ 227$ million to an inflow of $\$ 100$ million.

## Trade weighted index and US/A\$ exchange rates

The trade weighted index of the value of the Australian dollar at the end of March quarter 1993 was 52.9, up 1 per cent on the previous quarter. The Australian dollar rose 2.6 per cent against the US dollar to 0.7058 at the end of the quarter.

## Revisions

Apart from miscellaneous services and property income, current account estimates in this publication are consistent with those published in the March 1993 issue of Balance of Payments, Australia 5301.0, which was released on 4 May 1993.

Revisions to miscellaneous services credits and debits, and "other" property income credits and debits, are due to the incorporation of further data from the International Trade in Services Survey. In the case of miscellaneous services credits and debits, and "other" property income credits, these revisions affected data from September quarter 1990 onwards. In the case of "other" property income debits, revisions affected data from September quarter 1989 onwards.
Revisions have also been made to investment income credits and debits, and capital account estimates, back to September quarter 1992, as a result of the incorporation of preliminary data from the March quarter 1993 Survey of Foreign Investment.
Table 30 shows revisions to current price unadjusted series, on an annual and quarterly basis, since the December quarter 1992 issue of this publication.

# RECENT CHANGES TO SOURCES AND METHODS USED FOR ESTIMATING SERVICES AND OTHER PROPERTY INCOME 

## Introduction

The estimates of components in the balance of payments are derived from a wide variety of sources which are fully described in Balance of Payments, Australia: Concepts, Sources and Methods (ABS catalogue no 5331.0). This article summarises a number of recent changes and improvements which have been made in the sources and methods used in estimating some services and other property income components of the current account.

## QUARTERLY INTERNATIONAL TRADE IN SERVICES SURVEY

The quarterly International Trade in Services Survey (ITSS) was designed to improve the estimation of the balance of payments components "non-official miscellaneous services" and "other property income". These components are shown separately in tables 17-18 and 2124 of this quarterly publication.

Non-official miscellaneous services comprise agency and advertising services provided to transport operators, repairs and processing services and all other miscellaneous services. The change affects only the "all other miscellaneous services" credits and debits.

Other property income credits includes the earnings derived by Australian residents from their ownership of cinema and television film and other intellectual property normally evidenced by intangible assets (ie patents, licences, copyrights, trademarks, etc) where the rights to use the assets are acquired by non-residents. In the balance of payments these earnings are referred to generically as royalties.

Other property income debits refers to amounts payable by residents for the use of intangible assets owned by non-residents. Royalties paid to non-residents for the use of cinema and telcvision film are separately identified in other property income debits in published statistics.

## Former estimation method

These components were formerly extrapolated from the results of the biennial ITSS, with adjustments made on the basis of: an indicator series derived from the (now discontinued) Survey of Non-trade Foreign Receipts and Payments; and annual reports for selected enterprises.

## Current estimation method

Commencing with the December quarter 1992 issue of this publication, these components have been compiled using the preliminary results from the quarterly ITSS for periods from September quarter 1991.

Results from the quarterly ITSS have now been revised, and benchmarked to the soon-to-be-published 1991-92 biennial ITSS, and those revised estimates are incorporated in the tables in this issue.

## SURVEY OF RETURNED AUSTRALIAN TRAVELLERS

The Survey of Returned Australian Travellers (SORAT) is designed to improve estimates of the travel debits item in the balance of payments. Travel debits refers to expenditure abroad on goods and services by Australian travellers. These travellers include Australians studying abroad; and Australians going overseas for business, health or recreation purposes for less than one year. Australian government officials (e.g. diplomats and military personnel) and their dependants stationed abroad, Australians working abroad for foreign employers and Australian crews of aircraft and vessels (both civilian and military) are not regarded as travellers for balance of payments purposes. However, their overseas expenditure is measured in other items in the balance of payments estimates.

## Former estimation method

For several years, the main data source for the estimation of Australian travellers' expenditure abroad (excluding students) has been the Survey of International Travel Enterprises (SITE), which collects information from travel service providers on payments made by Australian residents for international travel. The SITE is conducted on both a quarterly and annual basis (the annual survey being a larger version of the quarterly survey). Until recently, there has been no reliable source of information on shortterm students' expenditure abroad, and estimates have been based on the assumption that the expenditure patterns of Australian students studying abroad have been similar to those of foreign students studying in Australia.

## Purpose of the SORAT

While the SITE is considered to be a reasonably good indicator of changes in the pattern of overseas expenditure by Australian travellers, there was a need for more comprehensive information on expenditure to be obtained on a periodic basis to ensure that the estimates were as accurate as possible. By obtaining details of expenditure directly from travellers, the SORAT is designed to satisfy this need. The SORAT will be conducted on a four-yearly basis, and will provide detailed, or benchmark, estimates for particular years. That will enable the more frequent SITE resuits to be used as an indicator series wnich will be applied to the SORAT benchmarks to obtain estimates of the travel debits item.

In addition to providing information on overseas expenditure by general travellers, the SORAT also collects details of expenditure by short-term students studying overseas, which are measured in the students expenditure debits item, and earnings by Australian residents while travelling abroad, which are measured in the labour income credits item. (Estimates of these earnings and short-term students' expenditure have previously been based on an assumption that the earnings/expenditure of Australian travellers abroad follow a similar pattern to those of nonresident travellers in Australia). As the survey collects information on the countries where expenditure was incurred and eamings produced, it also provides information for compilation of balance of payments estimates on a regional basis, which are published in the annual publication Balance of Payments, Australia (Catalogue 5303.0).

## SORAT Procedure

The first SORAT was conducted in respect of overseas travel by Australian residents during the 1991-92 financial year. Australian residents over the age of fifteen years, who travelled abroad for less than twelve months, and who began their travel in that year, were included in the
survey. An average of 600 returned travellers were selected for each month of the 1991-92 financial year, representing about one in every two hundred and fifty residents who had recently returned from travel abroad. On average, over ninety per cent of the travellers approached provided information, a rate of response which indicates that the resulting estimates can be considered to be of good quality.

## Incorporation of results into balance of payments estimates

The estimates of travel debits and labour income credits in the March month 1993 issue of the monthly balance of payments publication (Catalogue 5301.0) and in this issue of the quarterly publication are based on a preliminary analysis of results from the 1991-92 SORAT. Data based on a complete analysis, and a detailed description of the survey and its results will be published in the June quarter 1993 issue of this publication.

(a) Quarterly figures are derived from seasonally adjusted data. (b) The fixed-weighted indexes are derived by combining individual component prices (base year 1989-90=100) with a weighting to reflect the relative imporance of the components in the base year. (c) Derived by dividing the implicit price deflator (IPD) for merchandise exports fob by the IPD for merchandise imports fob. (d) Derived by dividing the IPD for services, credits by the IPD for services, debits. (e) Derived by the dividing the IPD for total exports of goods and services by the IPD for tocal exports of goods and services by the IPD for toul imports of goods and services. (f) Derived by amoothing the terms of tade series using a tailored seven term Henderron moving averaga

## EXPLANATORY NOTES

## Introduction

This publication provides detailed estimates of Australia's balance of payments for the December quarter 1992 together with revised estimates for previous quarters and financial years. Longer term estimates, from September quarter 1959, consistent with those shown in this issue, are available on request. A charge is made for this service.
2. Tables 1 to 6 in this publication provide summary statistics; they show the main aggregates and the more important components of these aggregates and include, in addition, trend estimates and percentage changes in the seasonally adjusted estimates of the current account. The remaining tables, Tables 7 to 32 , provide additional breakdowns, related series (e.g. exchange rates and the tradeweighted index), reconciliations of selected balance of payments series with other series (i.e. with foreign trade statistics and levels of official reserve assets), historical data on selected balance of payments aggregates and other analytical information.

## Concepts, sources and methods

3. Descriptions of the underlying concepts and structure of the balance of payments and the sources and methods used in compiling the estimates are presented in Balance of Payments, Australia: Concepts, Sources and Methods (5331.0). The publication also provides item definitions, explanations of seasonal adjustment, constant price estimates, implicit price deflators and the terms of trade; and an analysis of the quality of the estimates.

## Commodity breakdowns of merchandise

4. Commodity breakdowns of merchandise exports and imports are provided in Table 11 (at current prices), 12 (at average $1989-90$ prices), 13 (at current prices, seasonally adjusted) and 14 (at average 1989-90 prices, seasonally adjusted). The groupings shown are based on the third revision of the United Nations Standard Intemational Trade Classification (SITC rev 3) as follows:

SITC rev 3
Exports Section or Division

Rural -
Meat \& meat preparations
Cereal grains and cereal preparations
Sugar, sugar preparations \& honey

21(part),26(part)
Wool and sheepskins
Other rural

[^4]Exports (cont.)
Other metals
Machinery
Transport equipment
Other manufactures
Other non-rural

## Imports

Food, beverages \& tobacco 0,1
Fuels
Chemicals (incl. plastics) 5
Textiles, fabrics etc 65
Metals and metal manufactures 67 to 69
Machinery
71 to 77
Transport equipment
78,79
Other manufactures
61 to $64,66,8$
Other imports
2,4,9
Note: Division 98 is not part of the SITC. In the balance of payments it comprises confidential items, which are removed from their actual division and combined in Division 98 to prevent disclosure of their values.

## Seasonal adjustment

5. Most of the current account series in this publication are affected to some extent by seasonal influences and it is useful to recognise and take account of this element of variation. However, seasonally adjusted statistics in this publication should not be regarded as in any way definitive as results from seasonal adjustment vary according to the method used.
6. The factors to be used in compiling seasonally adjusted estimates for certain series (principally components of merchandise trade and investment income) up to and including December quarter 1993 can be obtained, for a charge, from Mr Trevor Jolly on Canberra (06) 2526820.

## Trend estimates

7. The trend estimates are derived by applying a 7-term Henderson moving average to the seasonally adjusted series. The 7 -term Henderson average (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. Unlike the weights of the standard 7-term Henderson moving average, the weights employed here have been tailored to suit the particular characteristics of individual series. While the asymmetric weights enable trend estimates for recent quarters to be produced, it does result in revisions to the estimates for the most recent three quarters as additional observations become available. There may also be revisions because of changes in the original data and as a result of the re-estimation of the seasonal factors. Details of trend-cycle weighting patterns are availahle on request from the Supervisor, Time Series Analysis, on (06) 2526345.

## Accuracy and reliability of estimates

8. Because the transactions recorded in the balance of payments are of many different kinds, compilation of balance of payments estimates entails the use of a very
wide range of statistical data of varying degrees of accuracy and timeliness.
9. Therefore care should be exercised in the use and interpretation of estimates in this publication. The latest estimates are preliminary and subject to revision as more accurate data come to hand. Also, the more detailed estimates may be less accurate in relative terms than broader items and aggregates of which they form components.

## Investment income and capital transactions

10. Additional information about capital account and investment income transactions is available in the quarterly publication International Investment Position, Australia (5306.0) and in the annual publication International Investment Position, Australia (5305.0). Statistics in international investment publications are consistent with those in balance of payments publications. International investment publications also provide comprehensive statistics on the level of foreign investment in Australia, the level of Australian investment abroad and Australia's external debl.

## Transportation transactions

11. Additional information on freight and other transportation transactions is available on request for a charge from Mr Frank Bingham on (06) 2525738.

## Comparability with capital expenditure statistics

Tables 11 and 13 in this publication contain current price estimates of imports of endogenous capital goods. Shorter-term movements in this series can differ quite significantly from the corresponding movements in the new private capital expenditure on equipment, plant and machinery series published in Private New Capital Expenditure, Australia ( 5625.0 and 5626.0). The main reasons for the differences are:

- The imports series includes all goods defined as endogenous capital goods, whereas the capital expenditure series relates only to goods classified as equipment, plant and machinery that are acquired by private enterprises in selected industries.
- The capital expenditure series includes all plant, machinery and equipment, irrespective of whether it has been imported or manufactured in Australia.
- Imports are valued f.o.b. at the point of export whereas estimates of capital expenditure are measured at domestic market prices, including international transport margins, government duties and domestic trade and transport margins.

12. Accordingly, while movements in imports of endogenous capital goods can provide a broad indication of movements in the import component of new private capital expenditure on equipment, plant and machinery, they do not necessarily provide an accurate indication of movements in total new private capital expenditure on these goods.

## Series available on request

13. Detailed quarterly export and import series at constant (average 1989-90) prices can be obtained by contact-
ing Mr Stephen Waugh on Canberra (06) 252 6716. These series are based on foreign trade statistics (ie they are not adjusted to a balance of payments basis) and relate to selected divisions and sections of the SITC rev 3. Quarterly tables showing components of services can also be obtained from Mr Waugh. These tables provide original and seasonally adjusted current and constant price estimates, corresponding to the series shown (in original current price terms) in Tables 17 and 18 of this publication. Both sets of estimates are working estimates only and may not always be completely consistent with published estimates.

## Related publications

14. Other ABS publications which may be of interest include:

Balance of Payments, Australia (5301.0) - issued monthly Balance of Payments, Australia (5303.0) - issued annually

Balance of Payments, Australia: Concepts, Sources and Methods (5331.0)

Information paper - Seasonal Adjustment of Australia's Monthly Balance of Payments Statistics (5359.0)

Foreign Trade, Australia: Merchandise Exports and Imports by Country (5422.0) - issued quarterly

Foreign Trade, Australia: Merchandise Exports (5432.0) issued monthly

Foreign Trade, Australia: Merchandise Imports (5433.0) issued monthly

Export Price Index, Australia (6405.0) - issued monthly
Import Price Index, Australia (6414.0) - issued quarterly
International Investment Position, Australia (5305.0) issued annually

International Investment Position, Australia (5306.0) issued quarterly

Foreign Investment, Australia: Summary of Concepts, Sources and Methods (5355.0)
15. Current publications produced by the ABS are listed in the Catalogue of Publications, Australia (1101.0). The ABS also issues, on Tuesdays and Fridays, a Publications Advice (1105.0) which lists publications to be released in the next few days. The Catalogue and Publications Advice are available from any ABS office.

## For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the ABS Catalogue of Publications and Products available at all ABS Offices (see below for contact details).

## Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

## Electronic Data Services

A wide range of ABS data are available on electronic media. Selections of most frequently requested statistics are available, updated daily, on Discovery (Key "656\#). The ABS PC Telestats service delivers major economic indicator main features ready to download into personal computers on the day of release. The PC Ausstats service enables on-line access to a data base of thousands of up-to-date time series. Selected datasets are also available on diskette or CD-ROM. For more details on electronic data services available, contact Information Services in any of the ABS Offices (see Information Inquiries below for contact details).

## Bookshops and Subscriptions

There are over 500 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008020608 Australia wide).
