JUNE OTR KEY POINTS

BALANCE OF PAYMENTS

- Seasonally adjusted, the current account deficit rose \$2,267m to \$7,469m. The deficit on the balance of goods and services rose \$2,339m to \$2,355m. The income deficit fell \$85m to \$5,129m.
 - In seasonally adjusted chain volume terms there was an increase of \$2,203m in the deficit on goods and services. This could be expected to make a contribution to growth of -1.3 percentage points in the June quarter 2002 volume measure of GDP.
 - In original terms, the balance on current account for 2001-02 was a deficit of \$22.2b, up from the deficit of \$18.2b in 2000-01.

INTERNATIONAL INVESTMENT POSITION

- Australia's net IIP rose \$13b to a net liability of \$391b. Transactions of \$8b, market price changes of \$5b and other changes of \$1b contributed to this increase. Net equity liabilities rose by \$11b, to close at \$61b. Net debt increased by \$2b, to \$330b.

	• •	

CHANGES IN THIS ISSUE	<p><i>Chain Volume measures</i></p> <p>Chain volume and associated price measures in this issue incorporate a new base year (2000-01) which has resulted in revisions to growth rates for the most recent financial years. The reference year has been advanced to 2000-01, resulting in revisions to levels, but not growth rates, for all periods.</p> <p><i>Revisions to historical data</i></p> <p>Table 41 summarises revisions since the last issue of this publication, in original current price terms, for the latest three years and six quarters. Revisions have been made following the completion of several significant reviews and investigations.</p> <p>Progressive importation of capital goods</p> <p>Timing adjustments have been incorporated into estimates of the imports of goods and services to cover the importation of structures on a change of ownership basis. Rather than recording the full value of the structures as imports when the structures physically enter Australian territory, the series now reflect the progressive importation of structures as fabrication work is done overseas. This has resulted in revisions to the current account back to September quarter 2000.</p> <p>Income</p> <p>The ABS's Survey of International Investment (SII) is designed primarily to collect data for the compilation of Australia's International Investment Position and the related financial account of the Balance of Payments. The survey also collects income data which form the basis of the income estimates included in the current account of the Balance of Payments. As part of the program of progressive review of components of the SII, the collection and compilation of income data have been reviewed and improved, resulting in improved reporting and editing of the survey data and improved imputation. This has resulted in revisions to the current account back to September quarter 1998.</p> <p>Seasonally adjusted and trend estimates of income have also been revised as a result of the annual seasonal reanalysis which takes account of information that has become available since the previous analysis.</p> <p>Fund Managers</p> <p>The International Investment position has been revised to correct gaps and overlaps identified as a result of a review of the recording of the activities of fund managers during the recent period of high growth in their activity. The most significant impact of this work has been the inclusion of more foreign portfolio assets, predominantly equity, which are under the management of Australian fund managers. Revisions have been made to the financial account and international investment position back to September quarter 1998.</p>
-----------------------	---

N O T E S *continued*

CHANGES IN THIS ISSUE

continued

Other revisions

Incorporation of the latest survey and administrative data has also resulted in revisions to the current account and international investment positions. For the March quarter 2002, the combined effect of all revisions was to:

- decrease the current account deficit by \$136m; and
- decrease Australia's net IIP by \$43.4b.

CHANGES IN FORTHCOMING ISSUES

Seasonal Factors

The seasonally adjusted and trend estimates of the current account will be revised in the next issue of this publication as a result of an annual seasonal reanalysis. The analysis will take account of additional data that have become available since the previous reanalysis. Revised historical and new forward seasonal factors will be released in mid November 2002. Existing subscription clients to this data service will be contacted regarding delivery. New clients should contact Kevin Yeadon on 02 6252 6255 or email <k.yeadon@abs.gov.au>.

BALANCE OF PAYMENTS

CURRENT ACCOUNT

The trend estimate of the balance on current account was a deficit of \$7,157m in the June quarter 2002, an increase of \$1,024m (17%) on the previous quarter's deficit. The main contributors to the increase in the deficit were goods exports, which fell \$122m, goods imports, which rose \$700m, and services imports, which rose \$157m.

In seasonally adjusted terms, the current account deficit rose \$2,267m to \$7,469m in the June quarter 2002. The balance on goods and services was a deficit of \$2,355m, an increase of \$2,339m on the deficit in March quarter 2002. Partially offsetting this, the net deficit on income fell \$85m to \$5,129m.

GOODS AND SERVICES

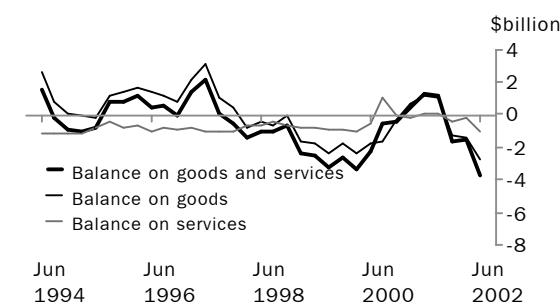

The trend estimate of the balance on goods and services at current prices was a deficit of \$1,981m, an increase of \$977m on the March quarter 2002 deficit of \$1,004m.

In seasonally adjusted current price terms, the balance on goods and services was a deficit of \$2,355m. The deficit on goods of \$1,732m, a turnaround of \$1,862m on the surplus of \$130m in March quarter 2002, was driven by higher goods imports, up \$1,226m, and lower goods exports, down \$636m. Goods imports recorded increases in all commodity groups, with consumption goods up \$536m (6%), capital goods up \$502m (7%), intermediate and other merchandise goods up \$73m (1%) and other goods up \$115m (9%). The fall in goods credits was driven by a fall in exports of non-rural goods, down \$617m (3%). Exports of rural goods and other goods were relatively steady.

In seasonally adjusted volume terms, the deficit on goods and services was \$3,773m, an increase of \$2,203m on the \$1,570m deficit recorded for the March quarter 2002. The goods deficit rose \$1,363m to \$2,752m as goods credits rose \$308m (1%) and goods debits rose \$1,671m (5%). The net services balance was a deficit of \$1,021m, an \$840m increase on the March quarter 2002 deficit of \$181m.

The increase of \$2,203m in the deficit on goods and services in volume terms could be expected to make a contribution to growth of -1.3 percentage points in the June quarter 2002 volume measure of GDP, assuming no significant revision to the GDP chain volume estimate for the March quarter 2002.

GOODS AND SERVICES(a)

(a) Chain volume measures, seasonally adjusted, reference year 2000–01.

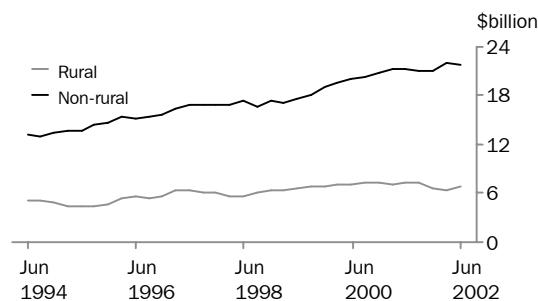

BALANCE OF PAYMENTS

CURRENT ACCOUNT *continued*

GOODS CREDITS

The goods credits trend estimate continued to fall in the June quarter 2002 and, at \$29,990m, was \$1,270m (4%) lower than the June quarter 2001 peak of \$31,260m. Seasonally adjusted, goods credits were \$29,956m, down \$636m (2%) on the March quarter 2002 and \$2,056m (6%) lower than the June quarter 2001 peak of \$32,012m. Non-rural goods (seasonally adjusted, current prices) fell \$617m (3%) to \$20,912m. There were decreases in coal, coke and briquettes, down \$412m (11%), with volumes down 6% and prices down 6%, metals (excluding non-monetary gold) down \$328m (13%), with volumes down 11% and prices down 2%, and other manufactures, down \$136m (4%), with volumes down 1% and prices down 3%. Partially offsetting these falls were increased exports of: other mineral fuels, up \$207m (8%) on 7% higher prices; and other non-rural, up \$171m (8%).

GENERAL MERCHANDISE CREDITS(a)

(a) Chain volume measures, seasonally adjusted, reference year 2000–01.

GOODS DEBITS

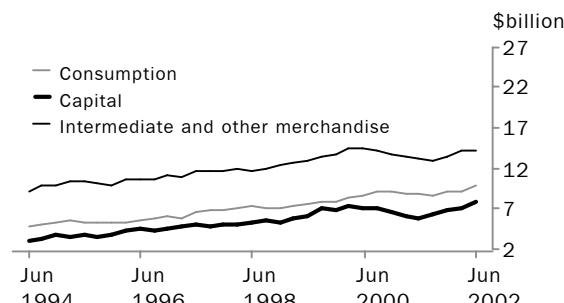

The trend estimate of goods debits rose \$700m to \$31,469m in the June quarter 2002. In seasonally adjusted terms, goods debits rose \$1,226m to \$31,688m.

In seasonally adjusted current price terms, consumption goods rose \$536m (6%) with an 8% increase in volumes outweighing a 2% decrease in prices. The largest rises were in non-industrial transport equipment, up \$309m (13%) on 16% higher volumes, and household electrical items up \$143m (19%), with volumes up 22% and prices down 3%.

Capital goods (seasonally adjusted, current prices) rose \$502m (7%). The largest rise was in industrial transport equipment nes, up \$367m (47%). Telecommunications equipment also rose, up \$219m (33%), due to a 34% rise in volumes.

Intermediate and other merchandise goods in seasonally adjusted, current price terms rose \$73m (1%). Fuels and lubricants rose \$235m (12%) with a 7% decrease in volumes outweighed by a 20% increase in prices. Parts for transport equipment fell \$95m (5%), with a 2% fall in volumes and a 3% fall in prices.

GENERAL MERCHANDISE DEBITS(a)

(a) Chain volume measures, seasonally adjusted, reference year 2000–01.

BALANCE OF PAYMENTS

CURRENT ACCOUNT *continued*

SERVICES

The trend estimate of net services was a deficit of \$502m, up \$155m on the March quarter 2002 deficit. In seasonally adjusted terms, net services recorded a deficit of \$623m, an increase of \$477m on the deficit for the March quarter 2002.

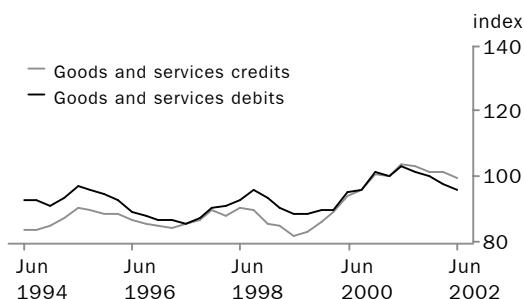

Services credits, in seasonally adjusted terms at current prices, fell \$86m (1%), due mainly to a decrease in volumes. Services debits, in seasonally adjusted terms at current prices, rose \$391m (5%) to \$8,353m, with prices down 4% and volumes up 9%. Passenger and other transportation services debits rose 11%, with volumes up 12% and prices down 1%.

IMPLICIT PRICE DEFULATOR

In seasonally adjusted terms the implicit price deflator (IPD) for total goods and services credits fell 2.3%. The chain Laspeyres price index for credits fell 1.8%, indicating that the compositional effects had a downward influence on the movement in the IPD. The IPD for goods credits fell 3.1% and the IPD for services credits rose 0.9%.

The total goods and services debits IPD fell 1.7% in seasonally adjusted terms. The chain Laspeyres price index for debits fell 2.0%, indicating that compositional effects had an upward influence on the movement in the IPD.

IMPLICIT PRICE DEFULATOR(a)

(a) 2000–2001=100.0.

RELATIONSHIP TO IPI AND EPI

The goods exports IPD (in original terms) fell 2.9% while the chain Laspeyres price index for goods exports fell 2.7% and the export price index (EPI) fell 2.2%.

The goods imports IPD (in original terms) fell 1.3% while the chain Laspeyres price index for goods imports fell 1.6% and the import price index (IPI) fell 1.8%.

TERMS OF TRADE

Australia's seasonally adjusted terms of trade fell 0.6% to 103.5, with a fall of 2.3% in the IPD for goods and services credits and a 1.7% decrease in the goods and services debits IPD. The trend estimate of the terms of trade rose slightly to 103.6.

CURRENT TRANSFERS

In seasonally adjusted terms, net current transfers was a surplus of \$15m, down \$13m on the \$28m surplus recorded in the March quarter 2002. Current transfers credits rose \$11m and debits rose \$24m.

INCOME

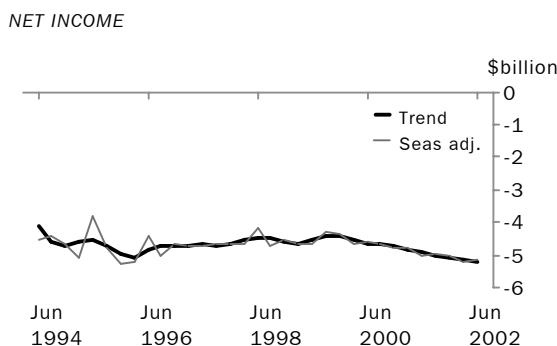

The trend estimate of the net income deficit rose \$67m to \$5,187m.

In seasonally adjusted terms, the net income deficit fell \$85m (1.6%) to \$5,129m. Income debits fell \$267m to \$8,810m and income credits fell \$182m to \$3,681m.

In original terms, income debits fell \$322m (3.5%) to \$8,761m and income credits fell \$297m (7.6%) to \$3,609m.

BALANCE OF PAYMENTS

CURRENT ACCOUNT *continued*

CAPITAL AND FINANCIAL ACCOUNT

CAPITAL ACCOUNT

In original terms, the capital account surplus was \$159m, down \$24m on the March quarter 2002 surplus. Capital transfer credits fell \$38m (6.3%) to \$563m, while capital transfers debits fell \$1m to \$380m.

FINANCIAL ACCOUNT

In original terms, the balance on financial account recorded a net inflow of \$8b, with a \$1.7b outflow on equity and a \$9.7b inflow on debt.

Direct investment in Australia recorded an inflow of \$0.6b in the June quarter 2002, a \$9.4b decrease on the March quarter inflow of \$10.0b. Australia's direct investment abroad recorded an outflow of \$1.5b, down from the previous quarter's outflow of \$5.3b. This is the sixth consecutive quarterly outflow, bringing the total outflow on Australia's direct investment abroad to \$29.2b since the March quarter 2001.

Portfolio investment recorded a net inflow of \$1.6b, a \$2.0b turnaround from the net outflow of \$0.4b in March quarter 2002.

Other investment recorded a net inflow of \$10.5b, a \$14.5b turnaround on the net outflow of \$3.9b recorded in March quarter 2002. Net inflows of \$10.2b for Australian depository corporations contributed significantly to the turnaround.

Reserve assets recorded a net outflow of \$3.4b, due to an increase in foreign exchange reserves, a turnaround of \$6.3b on the previous quarter's inflow of \$3.0b.

Australia's net international investment position at 30 June 2002 was a net foreign liability of \$390.5b, up \$13.1b on 31 March 2002. The increase consisted of:

- net transactions of \$8.0b;
- price changes of \$4.8b;
- exchange rate variations of -\$0.5b; and
- other adjustments of \$0.8b.

During the June quarter 2002, the level of net debt liabilities rose \$2.3b (0.7%) to \$329.8b. New debt raising added \$9.7b. This increase was partially offset by exchange rate changes of -\$5.4b, as a result of the continuing appreciation of the \$A, and market price changes of -\$2.0b.

During the June quarter 2002, the level of net equity liabilities rose \$10.7b (21.4%) to \$60.8b, reflecting market price increases of \$6.8b, exchange rate increases of \$4.9b and transactions of -\$1.7b.

BALANCE OF PAYMENTS

In original terms, the balance on current account for 2001-02 was a deficit of \$22.2b, a 22% increase on the deficit of \$18.2b recorded for 2000-01. The balance on goods and services deficit of \$2.0b was a turnaround of \$2.9b on the surplus of \$0.9b recorded in 2000-01. Goods exports increased \$0.9b or 1% (composed of a 0.1% increase in volumes and a 0.7% increase in prices) while goods imports increased \$1.6b or 1.3% (composed of a 3.7% increase in volumes and a 2.3% decrease in prices).

The 2001-02 services deficit of \$1.2b was a turnaround of \$2.1b on the surplus of \$0.9b in 2000-01. This is largely the result of travel and transportation services credits returning to more normal levels following the Sydney Olympic Games.

The net income deficit rose \$1.1b, with a marginal decrease in income debits of \$0.1b more than offset by the 7.8% decrease in income credits from \$16.2b in 2000-01 down to \$14.9b in 2001-02.

The balance on financial account recorded a net inflow of \$20.3b, with a net inflow on debt of \$35.3b and an outflow on net equity of \$15.1b. This result was up \$6.0b on the net inflow recorded for the previous year as a result of:

- a turnaround of \$5.3b to a net outflow on direct investment;
- a fall of \$2.8b in the net inflow on portfolio investment;
- a rise of \$3.5b in the net inflow on other investment; and
- a turnaround of \$9.7b to a net inflow on reserve assets.

INTERNATIONAL INVESTMENT POSITION

Australia's net international investment position as at 30 June 2002 was a net foreign liability of \$390.5b. This was up \$29.5b (8.2%) on the position a year earlier as a result of:

- net transactions of \$20.3b;
- price changes of \$10.1b;
- exchange rate effects of -\$0.2b; and
- other changes of -\$0.6b.

During 2001-02, the level of net equity liabilities rose to \$60.8b, up \$13.2b (27.8%) on the previous year, with transactions of -\$15.1b outweighed by price changes of \$13.8b and exchange rate changes of \$14.0b.

Net foreign debt rose to \$329.8b, up \$16.3b (5.2%) on the previous year, with transactions of \$35.3b partially offset by exchange rate changes of -\$14.2b, due to the appreciation of the \$A over the year, and market price changes of -\$3.8b.

As at 30 June 2002, the ratio of Australia's net international investment position to GDP, using the latest available GDP (for the year ended March 2002), was 55.6%. This compares with 53.7% one year ago and 50.0% a decade ago.

(a) For sign conventions, see paragraphs 3 to 5 of the Explanatory Notes.

(c) In using these seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

(b) Reference year for chain volume measures is 2000–01. See paragraphs 12 to 13 of the Explanatory Notes.

(d) Quarterly figures are derived from seasonally adjusted data. Annual figures are derived from original data.

EXPLANATORY NOTES

INTRODUCTION

- 1** This publication presents comprehensive details of Australia's international accounts: its balance of payments and international investment position statistics.
- 2** The conceptual framework used in Australia's balance of payments and international investment position statistics is based on the Fifth Edition of the International Monetary Fund's *Balance of Payments Manual* (BPM5, 1993). Descriptions of the underlying concepts and structure of the balance of payments and international investment position, and the sources, methods and terms used in compiling the estimates are presented in *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (5331.0), which was released on 22 September, 1998.

SIGN CONVENTION

- 3** In keeping with balance of payments conventions, credit entries are shown without sign and debit items are shown as negative entries. However, references to debit items in Key points and analysis and comments are made without regard to sign.
- 4** International investment position statistics follow the balance of payments sign convention. For foreign liabilities, position data and any transaction increase or other flow increase in liabilities is shown without sign. A negative sign for transactions and other flows in liabilities denotes a fall in liabilities. For foreign assets, position data and any transaction increase or other flow increase in assets is shown with a negative sign. Transactions and other flows in assets shown without sign denote a decrease in assets.
- 5** Movements over time are expressed as percentage changes. A minus sign means a decrease in credit entries, a decrease in debit entries, a decrease in a surplus or an increase in a deficit. The absence of a sign means an increase in credit entries, an increase in debit entries, an increase in a surplus or a decrease in a deficit.

ACCURACY AND RELIABILITY

- 6** The transactions recorded in the balance of payments are of many different kinds, and therefore the compilation of balance of payments and international investment position estimates entails the use of a very wide range of statistical data of varying degrees of accuracy and timeliness.
- 7** Care should be exercised in the use and interpretation of estimates in this publication. The latest estimates are *preliminary and subject to revision* as more accurate data come to hand. Also, the more detailed estimates may be less accurate in relative terms than broader items and aggregates of which they form components.

SEASONAL ADJUSTMENT

- 8** The quarterly current account series in this publication are affected to some extent by seasonal influences and it is useful to recognise and take account of this element of variation.
- 9** The seasonally adjusted statistics in this publication should not be regarded as in any way definitive as recent estimates are subject to revision for several years, and results from seasonal adjustment vary according to the method used.
- 10** The factors used in seasonally adjusting the current account series can be obtained from Balance of Payments Section on Canberra 02 6252 6255. There is a charge for this service.

EXPLANATORY NOTES

TREND ESTIMATES

11 The trend estimates are derived by applying a 7-term Henderson moving average to the seasonally adjusted series. The 7-term Henderson average (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. While the asymmetric weights enable trend estimates for recent quarters to be produced, it does result in revisions to the estimates for the most recent three quarters as additional observations become available. There may also be revisions because of changes in the original data and as a result of the re-estimation of the seasonal factors. For further information, see *A Guide to Interpreting Time Series—Monitoring 'Trends'; an Overview* (1348.0) or contact Time Series Analysis Section on Canberra 02 6252 6076.

CHAIN VOLUME MEASURES

12 To enable analysis of the movement of goods and services in 'real' terms, estimates of chain volume measures are compiled and published each quarter. Chain volume measures are derived by deflating the original current price series by specially compiled measures of price change. The reference year for chain volume measures is the year prior to the latest complete financial year incorporated in this issue. The reference year is updated with the release of each June quarter issue of this publication. Prior to the reference year chain volume measures are non-additive, in that the component chain volume measures of an aggregate will not add through to the chain volume measure of the total aggregate. For further information on chain volume measures refer to the ABS publication *Information Paper: Australian National Accounts, Introduction of Chain Volume and Price Indexes* (5248.0), which was released on 19 March, 1998.

INDEXES

IMPLICIT PRICE DEFULATOR (IPD)

13 The quarterly implicit price deflators (IPDs) are derived by dividing seasonally adjusted current price estimates by the corresponding chain volume measures. Movements in IPDs can be greatly affected by changes in the physical composition of the aggregates and their components. The quarterly IPDs derived from seasonally adjusted data are preferred to those using original data because the seasonal adjustment process removes some of the seasonal changes in the composition of this series. However, the seasonal adjustment process itself is also a possible source of distortion.

TERMS OF TRADE

14 There are several ways of measuring the terms of trade. In this publication, the following index is used:

$$\frac{\text{Implicit price deflator for the credit item}}{\text{Implicit price deflator for the debit item}} \times 100$$

Quarterly estimates of the terms of trade shown in table 6 of this publication are derived from seasonally adjusted data.

CHAIN LASPEYRES

15 The chain Laspeyres indexes are derived by combining individual component prices with weights which reflect the average relative importance of the components in the previous year. These are then indexed to the relevant reference year. For all periods since the latest reference year, reference year weights are used.

DIRECT INVESTMENT ADJUSTMENT

16 Direct investment adjustments are required in tables 28 and 29 to adjust total foreign assets and liabilities to the net basis for recording foreign investment in Australia (FIA) and Australian investment abroad (AIA). For both FIA and AIA, the adjustment is symmetrical and includes claims of Australian direct investment enterprises on direct investors abroad plus liabilities of Australian direct investors to direct investment enterprises abroad.

EXPLANATORY NOTES

FOREIGN DEBT

17 Foreign debt transactions, levels and interest income (as recorded in tables 34 to 37) between direct investors and direct investment enterprises are recorded on a gross basis for assets and liabilities. The direct investment adjustment is not applied in these tables.

18 In table 37 'currency' refers to the currency in which assets or liabilities are likely to be repaid, while 'residual maturity' refers to the time remaining until an asset or liability is due to be fully repaid. Reserve assets are not allocated by currency. All reserve assets are allocated to the repayment category 'less than or equal to 90 days' although a range of maturities may be involved.

INDUSTRY DATA

19 The industry categories shown are based on the *Australian and New Zealand Standard Industrial Classification (ANZSIC)*, 1993 (1292.0). Industry statistics should be treated with some caution as they do not necessarily reflect the industry of the end use of the funds. First, the statistical unit (that is, the unit of observation and classification) generally consists of all enterprises in an enterprise group within a single resident institutional sector. The industry of this statistical unit, which may cover a broad range of activities, is determined on the basis of the predominant activity of the unit as a whole which may be quite different from the industry in which funds are used. Second, financial enterprises such as trading and merchant banks, may borrow funds as principals and then on-lend to clients in other industries.

COMMODITY BREAKDOWNS OF GENERAL MERCHANDISE

20 Commodity breakdowns of general merchandise credits are provided in table 8 (at current prices), 10 (chain volume measures), 12 (at current prices, seasonally adjusted) and 14 (chain volume measures, seasonally adjusted). The groupings shown are based on the third revision of the United Nations Standard International Trade Classification (SITC Rev 3). For further details see table 6.6 in *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (5331.0).

21 Commodity breakdowns of general merchandise debits are provided in table 9 (at current prices), 11 (chain volume measures), 13 (at current prices, seasonally adjusted), and 15 (chain volume measures, seasonally adjusted). The three broad end-use categories—*Consumption goods, Capital goods and Intermediate and other merchandise goods*—are based on United Nations' Classification of Broad Economic Categories (BEC), but differ from the BEC to the extent that intermediate goods are combined with other merchandise goods. These broad end-use categories are further divided into a total of 25 SITC Rev 3-based commodity groupings, which have also been aligned to the BEC.

22 Table 6.7 in 5331.0 provides details of the classification used for goods debits. Most of the 25 SITC Rev 3-based commodity groups are further sub-divided into a total of 106 commodity sub-groups. Although the information at this level is not published, it is available as a special data service, see paragraph 25.

23 For more information on the commodity classification of general merchandise debits and a detailed concordance between balance of payments general merchandise debits end-use categories, commodity groups, BEC and SITC Rev 3, refer to the ABS *Information Paper: Change to Commodity Classification of Merchandise Imports in Balance of Payments Publications* (5344.0).

RELATED PRODUCTS AND SERVICES

24 Users may also wish to refer to the following publications which are available from ABS Bookshops:

- *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (5331.0)
- *International Trade Price Indexes* (6457.0)—quarterly
- *Information Paper: Implementing New International Statistical Standards in ABS International Accounts Statistics* (5364.0) — irregular, issued on 29 September 1997
- *Information Paper: Upgraded Balance of Payments and International Investment Position Statistics* (5365.0)—irregular, issued on 24 November 1997.
- *Information Paper: Quality of Australian Balance of Payments Statistics* (5342.0)
- *International Merchandise Imports, Australia* (5439.0)—monthly
- *International Merchandise Trade, Australia* (5422.0)—quarterly
- *International Trade in Goods and Services, Australia* (5368.0)—monthly

25 Estimates for periods prior to those shown in this publication and more detailed merchandise goods debits time series on a balance of payments basis are available. Detailed data of exports and imports of goods, including dissections by commodity and country of origin, are also available on an international trade basis. These data can be obtained by contacting the General Sales and Inquiries telephone numbers shown on the back of this publication. There may be a charge for this information, depending on the volume of data requested.

26 Detailed quarterly general merchandise chain volume measures can be obtained by contacting the ABS on Canberra 02 6252 6716. These series are based on international trade statistics (i.e. they are not adjusted to a balance of payments basis) and relate to selected divisions and sections of the SITC Rev 3. Quarterly tables showing components of services can also be obtained from the ABS on Canberra 02 6252 6716. These tables provide original and seasonally adjusted current price and chain volume measures, corresponding to the series shown (in original current price terms) in tables 20 and 21 of this publication. Both sets of measures are working estimates only and may not always be completely consistent with published measures.

GLOSSARY

27 A glossary of terms that are either new with the ABS implementation of BPM5 in the balance of payments and international investment position, or which represent a significantly different concept from an existing but similarly named concept, is provided on pages 88 and 89 of *Information Paper: Upgraded Balance of Payments and International Investment Position Statistics* (5365.0).
