MARCH QTR KEY POINTS

BALANCE OF PAYMENTS

- Seasonally adjusted, the current account deficit fell \$949m to \$5,524m. There was a turnaround of \$1,359m in the balance on goods and services, to a surplus of \$110m. The income deficit rose \$523m to \$5,662m.
- In seasonally adjusted chain volume terms there was a fall of \$539m in the deficit on goods and services. This could be expected to make a contribution to growth of 0.3 percentage points in the March quarter 2002 measure of GDP.

INTERNATIONAL INVESTMENT POSITION

- Australia's net IIP rose \$10b to a net liability of \$421b. Net equity liabilities rose by \$4b, to close at \$89b as at 31 March 2002. Exchange rate effects of \$8b, and other adjustments of \$1b were partially offset by a net outflow of \$6b in transactions, and a negative price change effect of \$1b. Net debt increased \$6b in the quarter to close at \$332b. During the quarter there was a net inflow of \$10b, and price and other changes of \$1b. These increases were partially offset by exchange rate decreases of \$6b, following the appreciation of the \$A.

NOTES

FORTHCOMING ISSUES	ISSUE (Quarter)	RELEASE DATE
	June 2002	28 August 2002
	September 2002	29 November 2002

CHANGES IN THIS ISSUE

Table Change

As advised last quarter, the contents of table 39 have been changed in this issue. The table is now headed 'Foreign assets and liabilities by industry'. 'Foreign liabilities - income' has been removed and 'Foreign assets - transactions' and 'Foreign assets - levels at end of period' have been added.

Revisions

Table 41 summarises revisions in original current price terms, for the latest 3 years and 6 quarters. Incorporation of the latest available survey and administrative data has resulted in revisions to the current account back to September quarter 2001.

The financial account and international investment position have been revised back to September quarter 2000 to incorporate the latest available survey data and the results of the further investigation of complex transactions. Australia's net IIP liability position at 31 December 2001 has been revised down by \$1.3b (0.3%).

CHANGES IN FORTHCOMING ISSUES

Seasonal Factors

The seasonally adjusted and trend estimates of the current account will be revised in the next issue of this publication as a result of an annual seasonal reanalysis. The analysis will take account of additional data that have become available since the previous reanalysis. Revised historical and new forward seasonal factors will be released on 15 August 2002. Existing subscription clients to this data service will be contacted regarding renewal and delivery options. New clients should contact Kevin Yeadon on 02 6252 6255 or email <k.yeadon@abs.gov.au>.

Chain Volume Measures

The chain volume and associated price measures will be revised in the next issue of this publication to take account of a new base year (2000-01). This will result in revisions to growth rates for 2000-01. The reference year will also be advanced to 2000-01, which will result in revisions to levels, but not growth rates, for all periods.

R.W. Edwards
Acting Australian Statistician

BALANCE OF PAYMENTS

CURRENT ACCOUNT

The trend estimate of the balance on current account was a deficit of \$6,104m in the March quarter 2002, an increase of \$1,024m (20%) on the previous quarter's deficit. The main contributors to the increase in the deficit were goods exports, which fell \$541m, and goods imports, which rose \$270m.

In seasonally adjusted terms, the current account deficit decreased \$949m to \$5,524m. The balance on goods and services was back in surplus this quarter as exports of goods and services, up \$1,393m, drove a \$1,359m turnaround on the December 2001 deficit of \$1,249m. Partially offsetting this, the net deficit on income increased \$523m to \$5,662m.

GOODS AND SERVICES

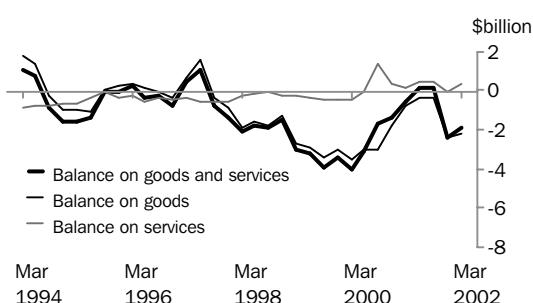

The trend estimate of the balance on goods and services at current prices was a deficit of \$614m, a turnaround of \$796m on the December quarter 2001 surplus of \$182m.

In seasonally adjusted current price terms, the balance on goods and services was a surplus of \$110m, a turnaround of \$1,359m on the December quarter 2001 deficit of \$1,249m.

As goods and services debits were relatively steady, the turnaround was driven by increased exports of goods, up \$949m, and services, up \$444m. Within goods credits, increases in exports of non-rural goods, up \$792m (4%), and other goods, up \$254m (15%), were only slightly offset by the \$97m (1%) fall in rural goods. There were increases in all categories of services credits. The largest rises were in travel services, up \$197m (6%), and transportation services, up \$165m (9%).

In seasonally adjusted volume terms, the deficit on goods and services was \$1,831m, a decrease of \$539m on the \$2,370m deficit recorded for the December quarter 2001. The goods deficit fell \$169m to \$2,191m as goods credits rose \$948m (4%) and goods debits rose \$779m (3%). The net services balance was a surplus of \$360m, a \$370m turnaround on the December quarter 2001 deficit of \$10m.

The decrease of \$539m in the deficit on goods and services in volume terms could be expected to make a contribution to growth of 0.3 percentage points in the March quarter 2002 volume measure of GDP, assuming no significant revision to the GDP chain volume estimate for the December quarter 2001.

(a) Chain volume measures, seasonally adjusted, reference year 1999–2000.

BALANCE OF PAYMENTS

CURRENT ACCOUNT *continued*

GOODS CREDITS

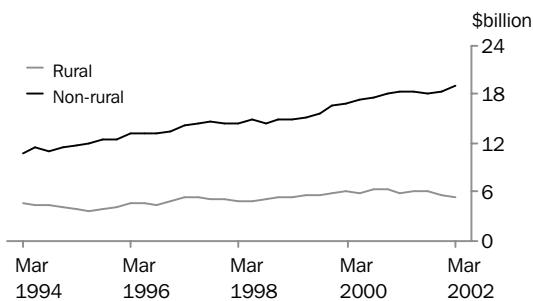

The goods credits trend estimate continued to fall in the March quarter 2002 and, at \$29,993m, was \$1,256m (4%) lower than the June quarter 2001 peak of \$31,249m.

Seasonally adjusted, goods credits were \$30,582m, up \$949m (3%) on December quarter 2001 but still \$1,425m (4%) lower than the June quarter 2001 peak of \$32,007m.

Rural goods (seasonally adjusted, current prices) were \$7,069m, down \$97m on the December quarter 2001 estimate of \$7,166m. Exports of cereal grains and cereal preparations, at \$1,243m, were at their lowest since March quarter 2000, having fallen a further \$186m (13%) in the latest quarter, on 15% lower volumes and 2% higher prices. Partially offsetting this were rises in exports of wool and sheepskins, up \$75m (9%) as prices rose 10%; and other rural goods, up \$55m (2%).

Non-rural goods (seasonally adjusted, current prices) rose \$792m (4%) to \$21,533m. There were increases in other non-rural (including sugar), up \$375m (20%) with volumes up 23% and prices down 2%; coal, coke and briquettes, up \$280m (8%), with volumes up 12% and prices down 3%; other manufactures, up \$212m (6%) with volumes up 6%; and transport equipment up \$127m (9%) with volumes up 3% and prices up 6%. Partially offsetting these rises, exports of machinery fell \$231m (11%) on both lower volumes (5%) and lower prices (5%).

Other goods credits (seasonally adjusted, current prices) rose \$254m (15%). This was driven by a \$158m (57%) increase in exports of goods for processing, reflecting 54% higher volumes and 2% higher prices.

(a) Chain volume measures, seasonally adjusted, reference year 1999–2000.

GOODS DEBITS

The trend estimate of goods debits rose \$270m to \$30,409m in March quarter 2002. In seasonally adjusted terms, goods debits fell \$69m to \$30,399m, with a 3% fall in prices more than offsetting a rise in volumes.

In seasonally adjusted current price terms, consumption goods rose \$70m (1%) with a rise in volumes (2%) partly offset by a fall in prices. The largest rises were in toys, books and leisure goods, up \$76m (9%), mainly due to an increase in volumes (12%); and consumption goods nes up \$172m (6%) with volumes up 10% and prices down 3%.

Capital goods (seasonally adjusted, current prices) fell \$108m (2%) on 2% lower volumes. The largest fall was in telecommunications equipment, down \$304m (31%) due to a fall in volumes. Machinery and industrial equipment also fell, down \$204m (8%), due to a 6% fall in volumes and a 3% fall in prices.

Intermediate and other merchandise goods in seasonally adjusted, current price terms rose \$36m, with a 6% increase in volumes being almost fully offset by a fall in prices.

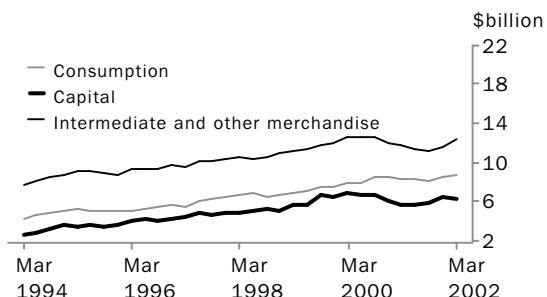

Fuels and lubricants rose 22% in volume terms, but this was mostly offset by a 19% fall in prices.

BALANCE OF PAYMENTS

CURRENT ACCOUNT *continued*

GOODS DEBITS *continued*

GENERAL MERCHANDISE DEBITS(a)

(a) Chain volume measures, seasonally adjusted, reference year 1999–2000.

SERVICES

The trend estimate of net services was a deficit of \$198m, down \$15m on the December quarter 2001 deficit. In seasonally adjusted terms, net services recorded a deficit of \$73m, a decrease of \$341m on the deficit in the December quarter 2001.

Services credits, in seasonally adjusted terms at current prices, rose \$444m (6%), due mainly to an increase in volumes.

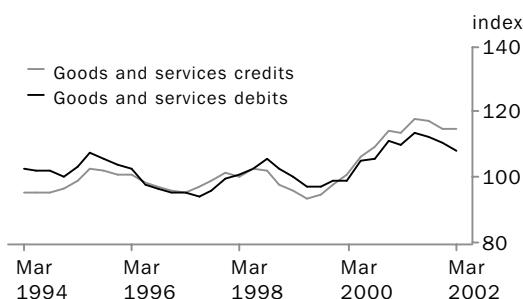

Services debits, in seasonally adjusted terms at current prices, rose \$103m (1%) to \$7,933m, with prices up 2% but volumes down nearly 1%. Passenger and other transportation services rose 7% with volumes down 3% but prices up 11% mainly due to the introduction of new charges and levies on airfares.

IMPLICIT PRICE DEFULATOR

In seasonally adjusted terms the implicit price deflator (IPD) for total goods and services credits remained flat between the December and March quarters. The chain Laspeyres price index for total goods and services credits fell 0.9%, indicating that compositional effects had an upward effect on the movement in the IPD. The IPD for goods credits fell 0.5% and the IPD for services credits rose 1.1%.

The total goods and services debits IPD fell 2.0% in seasonally adjusted terms. The chain Laspeyres price index for total goods and services debits fell 2.5%, indicating that compositional effects had an upward effect on the movement in the IPD.

IMPLICIT PRICE DEFULATOR(a)

(a) 1999–2000=100.0.

RELATIONSHIP TO IPI AND EPI

The goods exports IPD (in original terms) fell 1.2% while the chain Laspeyres price index for goods exports fell 1.4% and the export price index (EPI) fell 0.7% during the March quarter 2002.

During the March quarter 2002 both the goods imports IPD (in original terms) and the import price index (IPI) fell 3.0% while the chain Laspeyres price index for goods imports fell 3.1%.

BALANCE OF PAYMENTS

CURRENT ACCOUNT *continued*

TERMS OF TRADE

Australia's seasonally adjusted terms of trade rose 1.8% to 105.8, with a fall of 0.2% in the IPD for goods and services credits and a 2.0% decrease in the goods and services debits IPD. The trend estimate of the terms of trade rose slightly to 104.9.

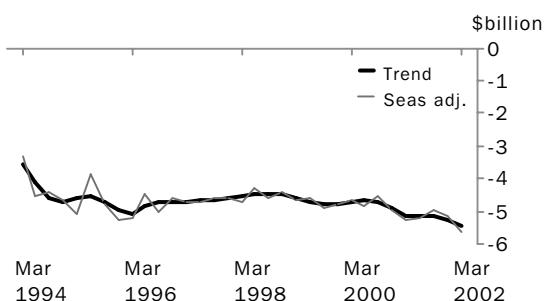

INCOME

The trend estimate of the net income deficit rose \$229m to \$5,470m.

In seasonally adjusted terms, the net income deficit rose \$523m (10%) to \$5,662m in the March quarter 2002. Income debits rose \$690m to \$9,362m and income credits rose \$167m to \$3,700m.

In original terms, income credits rose \$117m to \$3,667m. Income debits rose \$678m to \$9,102m.

NET INCOME

CURRENT TRANSFERS

In seasonally adjusted terms, net current transfers was a surplus of \$28m in the March quarter 2002, a turnaround of \$113m on the deficit recorded in the December quarter 2001. Current transfers credits rose \$50m and debits fell \$63m.

CAPITAL AND FINANCIAL ACCOUNT

CAPITAL ACCOUNT

In original terms, the capital account surplus was \$211m, down \$105m on the surplus recorded in the December quarter 2001. Capital transfers credits fell \$77m (11%) to \$601m, while capital transfers debits rose \$29m (8%) to \$381m.

FINANCIAL ACCOUNT

In original terms, the balance on the financial account recorded a net inflow of \$4.7b for the quarter, with a \$5.6b outflow on equity and \$10.3b inflow on debt.

Direct investment in Australia recorded an inflow of \$7.8b, up \$7.3b on December quarter. Australia's direct investment abroad recorded an outflow of \$6.1b, up on the previous quarter's outflow of \$3.4b. This was the ninth consecutive quarterly outflow, bringing the total outflow on Australia's direct investment abroad to \$36.4b since the March quarter 2000.

Portfolio investment recorded a net inflow of \$5.3b, up \$5.0b from the \$0.3b inflow of the previous quarter.

Other investment recorded a net outflow of \$5.9b, a turnaround of \$13.7b on the \$7.8b inflow recorded in December 2001. This outflow was primarily due to increased loans to non-residents made by Australian depository corporations during the quarter.

Reserve assets recorded a net inflow of \$3.0b, a \$3.2b turnaround on the previous quarter's outflow of \$0.3b.

INTERNATIONAL INVESTMENT POSITION

Australia's net international investment position at 31 March 2002 was a net foreign liability of \$421b, up \$10b on the previous quarter. The increase consisted of:

- net transactions of \$5b;
- exchange rate changes of \$3b; and
- other adjustments of \$3b.

During the March quarter 2002, the level of net debt liabilities increased \$6b (0.2%) to \$332b. New debt raisings added \$10b, while other adjustments and price changes added a further \$1b. These increases were only partially offset by exchange rate decreases of \$6b, following the appreciation of the \$A.

Net equity liabilities rose to \$89b at 31 March 2002, with exchange rate increases of \$8b more than offsetting net transactions of -\$6b.

As at 31 March 2002, the ratio of Australia's net international investment position to GDP using the latest available GDP (for the year ended December 2001) was 61.0%. This compares with 59.9% one year ago and 50.1% a decade ago.

TRADE-WEIGHTED INDEX OF VALUE OF THE \$A(b)									
End of period	58.4	53.3	49.7	51.6	47.6	49.7	47.0	50.2	52.2
Period average	56.0	55.2	50.3	49.6	50.0	49.6	49.3	49.6	51.0

(a) Exchange rates and the trade-weighted index are provided by the Reserve Bank of Australia in respect of each trading day. Period averages are derived from these rates.

(b) May 1970=100. The Trade Weighted Index is reweighted annually (on 1 October) and on special occasions as required.

EXPLANATORY NOTES

.....

INTRODUCTION

1 This publication presents comprehensive details of Australia's international accounts: its balance of payments and international investment position statistics.

2 The conceptual framework used in Australia's balance of payments and international investment position statistics is based on the Fifth Edition of the International Monetary Fund's *Balance of Payments Manual* (BPM5, 1993). Descriptions of the underlying concepts and structure of the balance of payments and international investment position, and the sources, methods and terms used in compiling the estimates are presented in *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (5331.0), which was released on 22 September, 1998.

SIGN CONVENTION

3 In keeping with balance of payments conventions, credit entries are shown without sign and debit items are shown as negative entries. However, references to debit items in Key points and analysis and comments are made without regard to sign.

4 International investment position statistics follow the balance of payments sign convention. For foreign liabilities, position data and any transaction increase or other flow increase in liabilities is shown without sign. A negative sign for transactions and other flows in liabilities denotes a fall in liabilities. For foreign assets, position data and any transaction increase or other flow increase in assets is shown with a negative sign. Transactions and other flows in assets shown without sign denote a decrease in assets.

5 Movements over time are expressed as percentage changes. A minus sign means a decrease in credit entries, a decrease in debit entries, a decrease in a surplus or an increase in a deficit. The absence of a sign means an increase in credit entries, an increase in debit entries, an increase in a surplus or a decrease in a deficit.

ACCURACY AND RELIABILITY

6 The transactions recorded in the balance of payments are of many different kinds, and therefore the compilation of balance of payments and international investment position estimates entails the use of a very wide range of statistical data of varying degrees of accuracy and timeliness.

7 Care should be exercised in the use and interpretation of estimates in this publication. The latest estimates are *preliminary and subject to revision* as more accurate data come to hand. Also, the more detailed estimates may be less accurate in relative terms than broader items and aggregates of which they form components.

SEASONAL ADJUSTMENT

8 The quarterly current account series in this publication are affected to some extent by seasonal influences and it is useful to recognise and take account of this element of variation.

9 The seasonally adjusted statistics in this publication should not be regarded as in any way definitive as recent estimates are subject to revision for several years, and results from seasonal adjustment vary according to the method used.

10 The factors used in seasonally adjusting the current account series can be obtained from Balance of Payments Section on Canberra 02 6252 5878. There is a charge for this service.

EXPLANATORY NOTES

TREND ESTIMATES

11 The trend estimates are derived by applying a 7-term Henderson moving average to the seasonally adjusted series. The 7-term Henderson average (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. While the asymmetric weights enable trend estimates for recent quarters to be produced, it does result in revisions to the estimates for the most recent three quarters as additional observations become available. There may also be revisions because of changes in the original data and as a result of the re-estimation of the seasonal factors. For further information, see *A Guide to Interpreting Time Series—Monitoring 'Trends', an Overview* (1348.0) or contact Time Series Analysis Section on Canberra 02 6252 6076.

CHAIN VOLUME MEASURES

12 To enable analysis of the movement of goods and services in 'real' terms, estimates of chain volume measures are compiled and published each quarter. Chain volume measures are derived by deflating the original current price series by specially compiled measures of price change. The reference year for chain volume measures is the year prior to the latest complete financial year incorporated in this issue. The reference year is updated with the release of each June quarter issue of this publication. Prior to the reference year chain volume measures are non-additive, in that the component chain volume measures of an aggregate will not add through to the chain volume measure of the total aggregate. For further information on chain volume measures refer to the ABS publication *Information Paper: Australian National Accounts, Introduction of Chain Volume and Price Indexes* (5248.0), which was released on 19 March, 1998.

INDEXES

IMPLICIT PRICE DEFULATOR (IPD)

13 The quarterly implicit price deflators (IPDs) are derived by dividing seasonally adjusted current price estimates by the corresponding chain volume measures. Movements in IPDs can be greatly affected by changes in the physical composition of the aggregates and their components. The quarterly IPDs derived from seasonally adjusted data are preferred to those using original data because the seasonal adjustment process removes some of the seasonal changes in the composition of this series. However, the seasonal adjustment process itself is also a possible source of distortion.

TERMS OF TRADE

14 There are several ways of measuring the terms of trade. In this publication, the following index is used:

$$\frac{\text{Implicit price deflator for the credit item}}{\text{Implicit price deflator for the debit item}} \times 100$$

Quarterly estimates of the terms of trade shown in table 6 of this publication are derived from seasonally adjusted data.

CHAIN LASPEYRES

15 The chain Laspeyres indexes are derived by combining individual component prices with weights which reflect the average relative importance of the components in the previous year. These are then indexed to the relevant reference year. For all periods since the latest reference year, reference year weights are used.

DIRECT INVESTMENT ADJUSTMENT

16 Direct investment adjustments are required in tables 28 and 29 to adjust total foreign assets and liabilities to the net basis for recording foreign investment in Australia (FIA) and Australian investment abroad (AIA). For both FIA and AIA, the adjustment is symmetrical and includes claims of Australian direct investment enterprises on direct investors abroad plus liabilities of Australian direct investors to direct investment enterprises abroad.

EXPLANATORY NOTES

FOREIGN DEBT

17 Foreign debt transactions, levels and interest income (as recorded in tables 34 to 37) between direct investors and direct investment enterprises are recorded on a gross basis for assets and liabilities. The direct investment adjustment is not applied in these tables.

18 In table 37 'currency' refers to the currency in which assets or liabilities are likely to be repaid, while 'residual maturity' refers to the time remaining until an asset or liability is due to be fully repaid. Reserve assets are not allocated by currency. All reserve assets are allocated to the repayment category 'less than or equal to 90 days' although a range of maturities may be involved.

INDUSTRY DATA

19 The industry categories shown are based on the *Australian and New Zealand Standard Industrial Classification (ANZSIC)*, 1993 (1292.0). Industry statistics should be treated with some caution as they do not necessarily reflect the industry of the end use of the funds. First, the statistical unit (that is, the unit of observation and classification) generally consists of all enterprises in an enterprise group within a single resident institutional sector. The industry of this statistical unit, which may cover a broad range of activities, is determined on the basis of the predominant activity of the unit as a whole which may be quite different from the industry in which funds are used. Second, financial enterprises such as trading and merchant banks, may borrow funds as principals and then on-lend to clients in other industries.

COMMODITY BREAKDOWNS OF GENERAL MERCHANDISE

20 Commodity breakdowns of general merchandise credits are provided in table 8 (at current prices), 10 (chain volume measures), 12 (at current prices, seasonally adjusted) and 14 (chain volume measures, seasonally adjusted). The groupings shown are based on the third revision of the United Nations Standard International Trade Classification (SITC Rev 3). For further details see table 6.6 in *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (5331.0).

21 Commodity breakdowns of general merchandise debits are provided in table 9 (at current prices), 11 (chain volume measures), 13 (at current prices, seasonally adjusted), and 15 (chain volume measures, seasonally adjusted). The three broad end-use categories—*Consumption goods, Capital goods* and *Intermediate and other merchandise goods*—are based on United Nations' Classification of Broad Economic Categories (BEC), but differ from the BEC to the extent that intermediate goods are combined with other merchandise goods. These broad end-use categories are further divided into a total of 25 SITC Rev 3-based commodity groupings, which have also been aligned to the BEC.

22 Table 6.7 in 5331.0 provides details of the classification used for goods debits. Most of the 25 SITC Rev 3-based commodity groups are further sub-divided into a total of 106 commodity sub-groups. Although the information at this level is not published, it is available as a special data service, see paragraph 25.

23 For more information on the commodity classification of general merchandise debits and a detailed concordance between balance of payments general merchandise debits end-use categories, commodity groups, BEC and SITC Rev 3, refer to the ABS *Information Paper: Change to Commodity Classification of Merchandise Imports in Balance of Payments Publications* (5344.0).

RELATED PRODUCTS AND SERVICES

24 Users may also wish to refer to the following publications which are available from ABS Bookshops:

- *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (5331.0)
- *International Trade Prices Indexes, Australia* (6457.0)—quarterly
- *Information Paper: Implementing New International Statistical Standards in ABS International Accounts Statistics* (5364.0) — irregular, issued on 29 September 1997
- *Information Paper: Upgraded Balance of Payments and International Investment Position Statistics* (5365.0)—irregular, issued on 24 November 1997.
- *Information Paper: Quality of Australian Balance of Payments Statistics* (5342.0)
- *International Merchandise Imports, Australia* (5439.0)—monthly
- *International Merchandise Trade, Australia* (5422.0)—quarterly
- *International Trade in Goods and Services, Australia* (5368.0)—monthly

25 Estimates for periods prior to those shown in this publication and more detailed merchandise goods debits time series on a balance of payments basis are available. Detailed data of exports and imports of goods, including dissections by commodity and country of origin, are also available on an international trade basis. These data can be obtained by contacting the General Sales and Inquiries telephone numbers shown on the back of this publication. There may be a charge for this information, depending on the volume of data requested.

26 Detailed quarterly general merchandise chain volume measures can be obtained by contacting the ABS on Canberra 02 6252 6716. These series are based on international trade statistics (i.e. they are not adjusted to a balance of payments basis) and relate to selected divisions and sections of the SITC Rev 3. Quarterly tables showing components of services can also be obtained from the ABS on Canberra 02 6252 6716. These tables provide original and seasonally adjusted current price and chain volume measures, corresponding to the series shown (in original current price terms) in tables 20 and 21 of this publication. Both sets of measures are working estimates only and may not always be completely consistent with published measures.

GLOSSARY

27 A glossary of terms that are either new with the ABS implementation of BPM5 in the balance of payments and international investment position, or which represent a significantly different concept from an existing but similarly named concept, is provided on pages 88 and 89 of *Information Paper: Upgraded Balance of Payments and International Investment Position Statistics* (5365.0).
