

# BALANCE OF PAYMENTS AND INTERNATIONAL INVESTMENT POSITION

AUSTRALIA

EMBARGO: 11:30 AM (CANBERRA TIME) FRI 29 NOV 2002

**Current account****International investment****SEPTEMBER QTR KEY FIGURES**

TREND ESTIMATES	Jun Qtr 2002 \$m	Sep Qtr 2002 \$m	% change Jun Qtr 2002 to Sep Qtr 2002
Balance on current account	-6 999	-7 817	-12
<b>SEASONALLY ADJUSTED</b>			
<b>ORIGINAL</b>			
Balance on current account	-7 305	-7 871	-8
Balance on goods and services	-2 128	-2 611	..
Net income	-5 182	-5 238	-1
Net international investment position (IIP)	385 739	404 066	5
Net equity	55 282	56 910	3
Net debt	330 457	347 156	5

**SEPTEMBER QTR KEY POINTS****BALANCE OF PAYMENTS**

- Seasonally adjusted, the current account deficit rose \$566m to \$7,871m. The deficit on goods and services rose \$483m to \$2,611m. The income deficit rose \$56m to \$5,238m.
- In seasonally adjusted chain volume terms there was an increase of \$591m in the deficit on goods and services. This could be expected to make a contribution to growth of -0.3 percentage points in the September quarter 2002 volume measure of GDP.

- For further information contact Tom Jebbink on 02 6252 5540 for balance of payments estimates, or Linda Trenchuk on 02 6252 5541 for international investment estimates.

**INTERNATIONAL INVESTMENT POSITION**

- Australia's net IIP rose \$18b to a net liability of \$404b. Transactions of \$8b and market price changes of \$12b contributed to this increase. Net equity liabilities rose by \$2b, to close at \$57b. Net debt increased by \$17b, to \$347b.

## NOTES

### FORTHCOMING ISSUES

<i>ISSUE (Quarter)</i>	<i>RELEASE DATE</i>
December 2002	3 March 2003
March 2003	3 June 2003
• •	

### CHANGES IN THIS ISSUE

#### *Seasonal factors*

Seasonally adjusted and trend estimates of the current account have been revised as a result of the annual seasonal reanalysis which takes account of information that has become available since the previous analysis. Revised historical and new forward seasonal factors to September 2003 were released on 20 November 2002.

#### *Revisions*

Table 41 summarises revisions, in original current price terms, since the last issue of this publication, for the last three years and six quarters.

Incorporation of the latest available survey and administrative data has resulted in revisions to the current account back to March quarter 2000, reducing the 2001-02 current account deficit by \$405m. The financial account and international investment position have been revised back to September quarter 2001, decreasing Australia's net IIP liability as at 30 June 2002 by \$5b.

#### *Feature article*

This issue contains a feature article, *Foreign Ownership of Equity* (pages 10-16), which updates the analysis of foreign ownership of Australian equity last published in the September quarter 2001 issue.

#### *Central Bank*

Commencing with this issue, the term Central Bank replaces the previous term Reserve Bank. This is to conform with the international statistical standards, and the terminology used in the *Standard Economic Sector Classifications of Australia (SESCA)* (cat. no.1218.0).

R.W. Edwards  
Acting Australian Statistician

## B A L A N C E O F P A Y M E N T S

---

### C U R R E N T A C C O U N T

The trend estimate of the balance on current account was a deficit of \$7,817m in the September quarter 2002, an increase of \$818m (12%) on the previous quarter's deficit. The main contributors to the increase in the deficit were goods imports, which rose \$581m, services imports, which rose \$117m, and income credits, which fell \$69m.

In seasonally adjusted terms, the current account deficit rose \$566m to \$7,871m in the September quarter 2002. The net deficit on goods rose \$351m (19%) to \$2,180m. The net services deficit rose \$132m to \$431m. The net deficit on income rose \$56m to \$5,238m.

#### G O O D S A N D S E R V I C E S

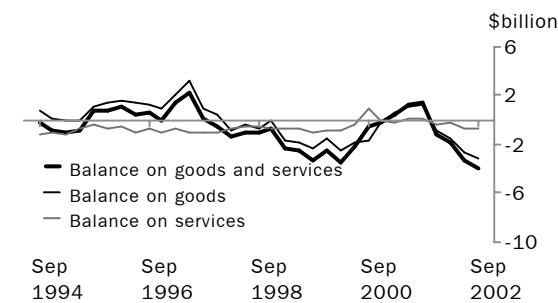

The trend estimate of the balance on goods and services at current prices was a deficit of \$2,572m, an increase of \$751m (41%) on the June quarter 2002 deficit of \$1,821m.

In seasonally adjusted current price terms, the balance on goods and services was a deficit of \$2,611m. The deficit on goods was \$2,180m, an increase of \$351m on the deficit of \$1,829m in June quarter 2002 and was driven by higher goods imports, up \$496m, partially offset by higher goods exports, up \$145m. In goods imports there were increases in consumption goods, up \$218m (2%), capital goods, up \$191m (3%), intermediate and other merchandise goods, up \$213m (2%), and a decrease in other goods, down \$126m (9%). The rise in goods credits resulted from increased exports of non-rural goods, up \$248m (1%), and other goods, up \$97m (5%), being partially offset by lower exports of rural goods, down \$200m (3%).

In seasonally adjusted volume terms, the deficit on goods and services was \$3,921m, an increase of \$591m (18%) on the \$3,330m deficit recorded for June quarter 2002. The goods deficit rose \$542m (20%) to \$3,190m as goods credits fell \$143m and goods debits rose \$399m (1%). The net services balance was a deficit of \$730m, a \$49m increase on the June quarter 2002 deficit of \$681m.

The increase of \$591m in the deficit on goods and services in volume terms could be expected to make a contribution to growth of -0.3 percentage points in the September quarter 2002 volume measure of GDP, assuming no significant revision to the GDP chain volume estimate for the June quarter 2002.

GOODS AND SERVICES(a)

(a) Chain volume measures, seasonally adjusted, reference year 2000-01.

## BALANCE OF PAYMENTS

---

### CURRENT ACCOUNT *continued*

#### GOODS CREDITS

The goods credits trend estimate continued to fall in the September quarter 2002 and at \$30,002m, was \$1,196m (4%) lower than the June quarter 2001 peak of \$31,198m.

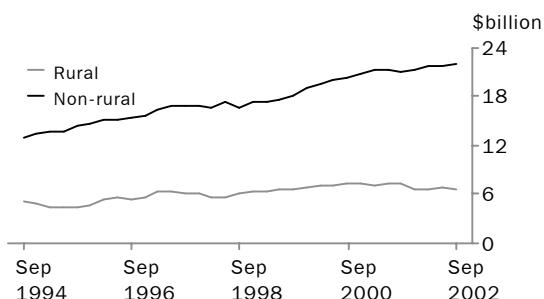

Seasonally adjusted, goods credits were \$29,989m, up \$145m on the June quarter 2002 but \$1,947m (6%) lower than the June quarter 2001 peak of \$31,936m.

Rural goods (seasonally adjusted, current prices) fell to \$6,871m, down \$200m (3%) on the June quarter 2002. The largest decrease was in meat and meat preparations, down \$104m (7%), due to lower exports of: beef and veal with volumes down 2% and prices down 5%; and mutton and lamb with volumes down 10% and prices down 4%. Cereal and cereal preparations also decreased, down \$68m (5%), driven by lower exports of wheat, down \$185m, with volumes down 17% and prices up 2%.

Non-rural goods (seasonally adjusted, current prices) rose \$248m (1%) to \$21,060m. The largest increase was in other mineral fuels, up \$258m (9%), due largely to increased shipments of petroleum products.

Other goods credits (seasonally adjusted, current prices) rose \$97m (5%) to \$2,058m on the June quarter 2002.

#### GENERAL MERCHANDISE CREDITS(a)

(a) Chain volume measures, seasonally adjusted, reference year 2000–01.

#### GOODS DEBITS

The trend estimate of goods debits rose \$581m in the September quarter 2002. In seasonally adjusted terms, goods debits rose \$496m to \$32,169m.

In seasonally adjusted current price terms, consumption goods rose \$218m (2%) due to a rise in volumes. The largest rises were in non-industrial transport equipment, up \$201m (8%) on higher volumes, and consumption goods n.e.s. up \$25m (1%) on higher volumes. Partially offsetting these rises was a fall in textiles, clothing and footwear, down \$36m (3%), with prices down 3%.

Capital goods (seasonally adjusted, current prices) rose \$191m (3%). The largest rises were in machinery and industrial equipment, up \$426m (18%), with volumes up 20% and prices down 1%, and capital goods n.e.s., up \$79m (8%), with volumes up 9% and prices down 1%. Industrial transport equipment n.e.s. fell \$196m (18%), with volumes down 21% and prices up 4%.

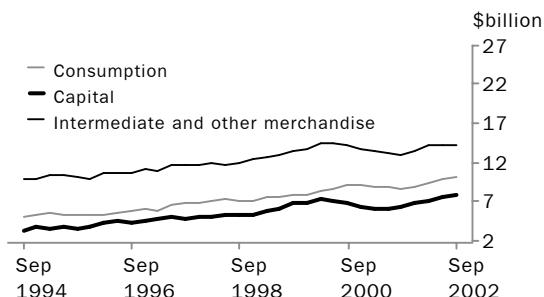

Intermediate and other goods (seasonally adjusted, current prices) rose \$213m (2%). The largest rise was in parts for transport equipment, up \$144m (9%), with volumes up 9% and prices down 1%.

## BALANCE OF PAYMENTS

---

### CURRENT ACCOUNT *continued*

GENERAL MERCHANDISE DEBITS(a)

(a) Chain volume measures, seasonally adjusted, reference year 2000–01.

#### SERVICES

The trend estimate of net services was a deficit of \$452m, up \$152m on the June quarter 2002 deficit. In seasonally adjusted terms, net services recorded a deficit of \$431m, an increase of \$132m on the deficit for the June quarter 2002.

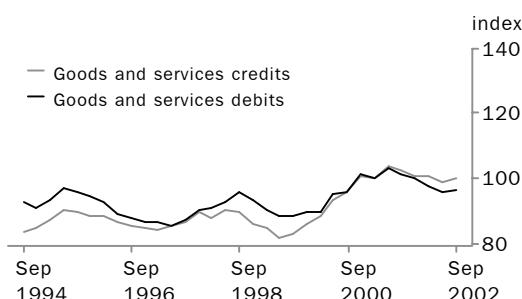

Services credits, in seasonally adjusted terms at current prices, fell \$50m (1%) on lower volumes. Services debits, in seasonally adjusted terms at current prices, rose \$82m (1%) to \$8,205m, with prices up 2% and volumes down 1%. Passenger and other transportation service debits fell 1%, with volumes down 4% and prices up 3%.

#### IMPLICIT PRICE DEFULATOR

In seasonally adjusted terms the implicit price deflator (IPD) for total goods and services credits rose 1.0%. The chain Laspeyres price index for credits rose 1.1%, indicating that the compositional effects had a small downward influence on the movement in the IPD. The IPD for goods credits rose 1.0% and the IPD for services credits rose 1.1%.

The total goods and service debits IPD rose 0.6% in seasonally adjusted terms. The chain Laspeyres price index for debits rose 0.9%, indicating that compositional effects had an downward influence on the movement in the IPD.

IMPLICIT PRICE DEFULATOR

(a) 2000–2001=100.0.

#### RELATIONSHIP TO IPI AND EPI

The goods exports IPD (in original terms) rose 1.0% while the chain Laspeyres price index for goods exports rose 1.3% and the export price index (EPI) fell 0.2%. The goods imports IPD (in original terms) rose 0.7% while the chain Laspeyres price index for goods imports rose 0.3% and the import price index (IPI) rose 0.2%.

#### TERMS OF TRADE

Australia's seasonally adjusted terms of trade rose 0.3% to 103.2, with a rise of 1.0% in the IPD for goods and services credits and a 0.7% increase in the goods and services debits IPD. The trend estimate of the terms of trade remained unchanged at 103.3.

## BALANCE OF PAYMENTS

---

### CURRENT ACCOUNT *continued*

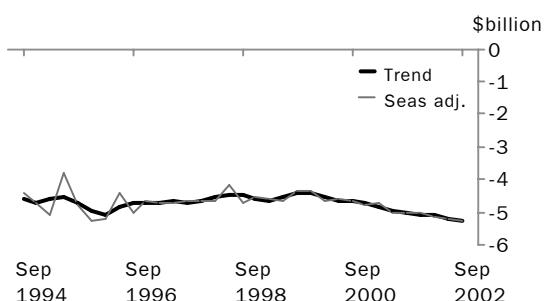

#### INCOME

The trend estimate of the net income deficit rose \$68m to \$5,244m.

In seasonally adjusted terms, the net income deficit rose \$56m (1%) to \$5,238m. Income debits fell \$82m to \$8,840m and income credits fell \$138m to \$3,602m.

In original terms, income debits rose \$506m (6%) to \$9,350m and income credits fell \$102m (3%) to \$3,547m.

#### NET INCOME

#### CURRENT TRANSFERS

In seasonally adjusted terms, net current transfers was a deficit of \$22m, down \$27m on the \$5m surplus recorded in the June quarter 2002. Current transfers credits fell \$16m and debits rose \$11m.

### CAPITAL AND FINANCIAL ACCOUNT

#### CAPITAL ACCOUNT

In original terms, the capital account surplus was \$290m, up \$121m on the June quarter 2002 surplus. Capital transfer credits rose \$55m (10%) to \$628m, while capital transfer debits fell \$57m (15%) to \$323m.

#### FINANCIAL ACCOUNT

In original terms, the balance on financial account recorded a net inflow of \$8.5b, with a \$4.6b equity outflow and a \$13.1b net inflow on debt. This was the fifth consecutive quarter showing this pattern of flows since September 2001.

Direct investment in Australia recorded an inflow of \$5.7b in the September quarter 2002, a \$1.1b increase on the June quarter inflow of \$4.6b. Australia's direct investment abroad recorded an outflow of \$2.3b, similar to the previous quarter's outflow of \$2.6b. This is the seventh consecutive quarterly outflow, bringing the total outflow on Australia's direct investment abroad to \$31.6b since the March quarter 2001.

Portfolio investment recorded a net inflow of \$3.0b, an increase of \$4.2b on the net outflow in June quarter 2002.

Other investment recorded a net inflow of \$1.0b, a decrease of \$9.4b on the net inflow in June quarter 2002.

Reserve assets recorded a net inflow of \$1.0b, due to a decrease in foreign exchange reserves, a turnaround of \$4.4b on the previous quarter's outflow of \$3.4b.

## INTERNATIONAL INVESTMENT POSITION

---

Australia's net international investment position as at 30 September 2002 was a net foreign liability of \$404.1b, up \$18.3b on 30 June 2002. The increase consisted of:

- net transactions of \$8.5b;
- price changes of \$12.1b;
- exchange rate variations of -\$1.3b; and
- other adjustments of -\$1.0b.

During the September quarter 2002, the level of net debt liabilities rose \$16.7b (5.1%) to \$347.2b. New debt raising of \$13.1b and exchange rate variations of \$5.2b were the major contributors to this increase, which was partially offset by other adjustments of -\$2.5b.

During the September quarter 2002, the level of net equity liabilities rose \$1.6b (2.9%) to \$56.9b.

As at 30 September 2002, the ratio of Australia's net IIP to GDP using the latest available GDP (for the year ending 30 June 2002) was 56.4%. This compares with 55.8% one year ago and 50.8% a decade ago.

**FOREIGN OWNERSHIP OF EQUITY****INTRODUCTION**

This article updates the analysis of foreign ownership of Australian equity presented in the September quarter 2001 issue of *Balance of Payments and International Investment Position, Australia* (cat. no. 5302.0). The data presented here are sourced from:

- for rest of world holdings of Australian equity, table 33 of this publication and more detailed data underlying the published aggregates; and
- for total and sectoral aggregates of Australian equity on issue, tables 40 and 41 of the June quarter 2002 issue of *Australian National Accounts: Financial Accounts* (cat. no. 5232.0).

A brief explanation of how the financial accounts can be used to derive estimates of foreign ownership of equity in Australian enterprise groups is provided below. For a more detailed explanation, see the earlier article published in the June quarter 1992 issue of *International Investment Position, Australia* (cat. no. 5306.0). That article also explains the relationship between these measures and measures derived from earlier foreign participation studies.

The data cover financial instruments classified as equity, which are mainly listed and unlisted shares and units in trusts. Instruments convertible to equity, such as convertible notes, are not treated as equity until converted. Ownership of property by non-residents and ownership of Australian branches of foreign companies are also treated as equity for the purposes of these statistics. The data for amounts on issue for each sub-sector are consolidated by excluding amounts held by related companies in the same sub-sector. Market valuations are used where possible; for the cases where market values are not available, net asset value (total assets less non-equity liabilities and less the paid up value of non-voting shares) has been used as a proxy. A non-resident is defined as any individual, enterprise or other organisation ordinarily domiciled in a country other than Australia. For further definitions of the concepts and methods employed in compiling the source data see *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (cat. no. 5331.0) and the Explanatory Notes to *Australian National Accounts: Financial Accounts* (cat. no. 5232.0).

By expressing the value of equity issued by a particular sector and held by the rest of world (non-residents) as a percentage of the total value of all equity issued by that sector, it is possible to derive an estimate of the percentage of foreign ownership in that sector. For example, at 30 June 2002, equity held by 'rest of world' in banks was \$48.5b, or 26% of the total equity of \$189.3b issued by banks. Likewise, an estimate of total foreign ownership of equity in all Australian enterprises can be derived by summing the equity held by non-residents across all sectors and dividing this by the total value of equity issued by all sectors. Estimates of foreign ownership by sector are shown in table F1.

**ANALYSIS OF RESULTS**

Table F1 shows that the value of equity on issue by Australian enterprise groups at 30 June 2002 stood at \$1,181.4b. Of this total, 65% related to shares or similar equity interests issued by corporate trading enterprises. Banks accounted for a further 16% of total equity issued; other financial sub-sectors, including life and other insurance corporations and central borrowing authorities also accounted for 16%; while lesser amounts were issued by 'non-bank deposit taking institutions' (2%); and the Central Bank (1%).

## FOREIGN OWNERSHIP OF EQUITY *continued*

### ANALYSIS OF RESULTS *continued*

Of the total equity on issue at 30 June 2002, non-residents held equity valued at \$336.0b (28%), while residents held \$845.4b (72%).

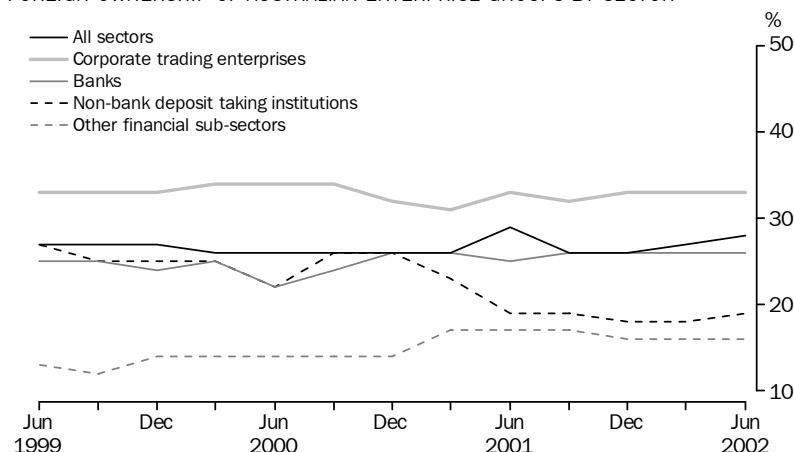

The proportion of equity held by non-residents has fallen slightly, from 29% in June 2001 to 28% in June 2002. The total value of equity on issue has increased by 19%, from \$991.7b to \$1,181.4b over the three-year period since 30 June 1999.

Analysed by sub-sector, at 30 June 2002 non-residents held 33% of the equity in corporate trading enterprises, which has changed little over recent years. The value of equity on issue by corporate trading enterprises at 30 June 2002 decreased 5% on the previous year, but has increased 6% over the three years since 30 June 1999.

While the value of equity on issue by banks has increased 67% to \$189.3b, over the period 30 June 1999 to 30 June 2002, the proportion held by non-residents increased from 25% to 26% during this period.

The value of equity on issue by 'other' financial sub-sectors has increased 48% to \$191.5b, over the three year period 30 June 1999 to 30 June 2002. The foreign ownership of this sub-sector's equity has increased from 13% at 30 June 1999 to 16% at 30 June 2002.

### FOREIGN OWNERSHIP OF AUSTRALIAN ENTERPRISE GROUPS BY SECTOR

### PROBLEMS WITH THE DATA THAT MAY IMPACT ON ANALYSIS

Data for equity on issue for unlisted corporations are of lesser quality than the data supplied by the Australian Stock Exchange for listed corporations. Data for unlisted corporations are compiled from returns supplied in the ABS Survey of Financial Information, ABS Survey of International Investment, selected annual reports and estimates synthesised from analysing residual items in demand and supply tables for the various share markets.

Care should also be exercised in interpreting the regional data shown in table F2. Source data do not always clearly identify the country of the non-resident transactor. Accordingly, the values shown in table F2 for the USA, UK and Japan may be understated by amounts attributed to 'country unspecified' in the other countries category.

**FOREIGN OWNERSHIP OF EQUITY *continued*****REGIONAL ANALYSIS**

As shown in table F2, the value of holdings of equity in Australian enterprise groups by non-residents can be further disaggregated according to the country of residence of the immediate holder. This disaggregation has been done as at the end of each financial year.

At 30 June 2002, UK residents owned \$110.0b (33%) of the foreign-owned equity in Australian enterprise groups, accounting for 9% of total equity on issue. At the same point in time, USA residents owned \$97.2b (29%) of the foreign equity holdings in Australian enterprise groups, while residents of Japan owned a further \$19.3b (6%). The USA and Japanese holdings accounted for 8% and 2%, respectively, of total equity on issue.

UK residents owned 31% of the total non-resident equity investment in Australian corporate trading enterprises on issue at 30 June 2002, while residents of the USA and Japan owned a further 30% and 6%, respectively. The UK and USA holdings each accounted for 10% of the total equity of Australian corporate trading enterprises on issue, while Japanese holdings accounted for a further 2%.

The USA, UK and Japan generally have the biggest participation rates in the other sectors, although their respective contributions vary significantly across these sectors. For example, at 30 June 2002, residents of the UK owned 51% of the total non-resident equity investment in Australian banks, but only 2% of the non-resident equity in non-bank deposit taking institutions. Although residents of Japan owned 20% of the total non-resident equity investment in non-bank deposit taking institutions at 30 June 2002, their participation rates in the remaining sectors are relatively small when compared with their UK and US counterparts.

Residents of APEC economies accounted for \$154.2b (46%) of foreign-owned equity in Australian enterprise groups at 30 June 2002, while residents of EU countries accounted for \$135.3b (40%). The holdings of residents in APEC and EU countries accounted for 13% and 11% respectively of the total equity on issue. The holdings of residents of OECD member countries amounted to \$276.1b, which accounted for 82% of total foreign-owned equity and 23% of total equity on issue.

**SIGNIFICANT FOREIGN INFLUENCE**

The concept of direct investment is broadly one of capital invested in an enterprise by an investor having a significant influence, either actually or potentially exercised, over the key policies of the enterprise (called a direct investment enterprise). Ownership of 10% or more of the voting shares (or an equivalent equity interest) is regarded as indicative of significant influence by an investor.

Three enterprise group dissections are shown in table F3 and these can be associated with three different levels of foreign influence: foreign control; significant foreign influence but not necessarily foreign control; and other foreign influence. First, direct investment enterprise groups over 50% owned by their direct foreign investors are groups in which there is significant foreign influence that is clearly sufficient to allow foreign control. Second, direct investment enterprise groups 10%–50% owned by their direct foreign investors are groups in which there is significant foreign influence but not necessarily sufficient to allow foreign control. Third, other enterprise groups are groups in which there are foreign equity interests that are below the threshold used in defining significant foreign influence, as no foreign investor holds 10% or more of the equity. Analysis of data on equity issued to non-residents by direct investment enterprise groups in Australia as a proportion of total equity on issue provides an indication of the amount of influence non-residents have as a result of their equity holdings.

## FEATURE ARTICLE

---

### FOREIGN OWNERSHIP OF EQUITY *continued*

#### SIGNIFICANT FOREIGN INFLUENCE *continued*

As shown in table F3, at 30 June 2002, \$175.3 (52%) of the total foreign equity holdings of \$336.0b was in the form of direct investment, with the remaining \$160.7b (48%) being in the form of portfolio investment. These amounts represented 15% and 14%, respectively, of the total equity on issue. These proportions vary significantly across sectors.

In other words, the \$175.3b of equity held in the form of foreign direct investment represents 15% of the total equity on issue at 30 June 2002 being held by non-residents who had significant influence in the issuing Australian enterprises. This influence in most cases was sufficient to provide control, as \$162.7b (93%) of the equity held by those non-residents was in enterprise groups where a direct foreign investor held more than 50% of the shares. The direct investment equity associated with majority direct foreign ownership also accounted for 48% of all foreign equity and 14% of all equity issued in Australia.

#### FOR MORE INFORMATION

The data used in this analysis are available from the International Investment Section of the Australian Bureau of Statistics. For more information about the type of foreign participation analysis that can be undertaken or the availability of related statistics, contact Kevin Yeadon on Canberra 02 6252 6255 or email <[k.yeadon@abs.gov.au](mailto:k.yeadon@abs.gov.au)>.

All sectors										
Proportion of total equity on issue	1	—	1	13	—	13	13	14	13	27
Proportion of total equity held by rest of world	4	—	4	48	—	49	47	52	48	100

(a) The type of equity dissection in the table shows foreign *direct* investment equity holdings separately from foreign *portfolio* equity holdings. Direct investment equity holdings refers to holdings of direct investors; that is, investors who own 10% or more of the voting shares of an enterprise. Portfolio investment equity holdings refers to holdings of all other investors, covering their holdings in both direct investment enterprise groups and other enterprise groups.

(b) Data for Central Bank are not shown, as there is no foreign ownership in this sub-sector.

(c) Includes private non-financial corporations; and national, state and local public non-financial corporations.

(d) Includes life and other insurance corporations; central borrowing authorities; and other financial institutions.

(a) For sign conventions, see paragraphs 3 to 5 of the Explanatory Notes.

(b) For all time periods, estimates for Sugar, sugar preparations and honey are included in Non-rural goods.

(c) In using this seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

(c) In using these seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

(b) Reference year for chain volume measures is 2000–01. See paragraphs 12 to 13 of the Explanatory Notes.

(d) Quarterly figures are derived from seasonally adjusted data. Annual figures are derived from original data.

## EXPLANATORY NOTES

.....

### INTRODUCTION

**1** This publication presents comprehensive details of Australia's international accounts: its balance of payments and international investment position statistics.

**2** The conceptual framework used in Australia's balance of payments and international investment position statistics is based on the Fifth Edition of the International Monetary Fund's *Balance of Payments Manual* (BPM5, 1993). Descriptions of the underlying concepts and structure of the balance of payments and international investment position, and the sources, methods and terms used in compiling the estimates are presented in *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (5331.0), which was released on 22 September, 1998.

### SIGN CONVENTION

**3** In keeping with balance of payments conventions, credit entries are shown without sign and debit items are shown as negative entries. However, references to debit items in Key points and analysis and comments are made without regard to sign.

**4** International investment position statistics follow the balance of payments sign convention. For foreign liabilities, position data and any transaction increase or other flow increase in liabilities is shown without sign. A negative sign for transactions and other flows in liabilities denotes a fall in liabilities. For foreign assets, position data and any transaction increase or other flow increase in assets is shown with a negative sign. Transactions and other flows in assets shown without sign denote a decrease in assets.

**5** Movements over time are expressed as percentage changes. A minus sign means a decrease in credit entries, a decrease in debit entries, a decrease in a surplus or an increase in a deficit. The absence of a sign means an increase in credit entries, an increase in debit entries, an increase in a surplus or a decrease in a deficit.

### ACCURACY AND RELIABILITY

**6** The transactions recorded in the balance of payments are of many different kinds, and therefore the compilation of balance of payments and international investment position estimates entails the use of a very wide range of statistical data of varying degrees of accuracy and timeliness.

**7** Care should be exercised in the use and interpretation of estimates in this publication. The latest estimates are *preliminary and subject to revision* as more accurate data come to hand. Also, the more detailed estimates may be less accurate in relative terms than broader items and aggregates of which they form components.

### SEASONAL ADJUSTMENT

**8** The quarterly current account series in this publication are affected to some extent by seasonal influences and it is useful to recognise and take account of this element of variation.

**9** The seasonally adjusted statistics in this publication should not be regarded as in any way definitive as recent estimates are subject to revision for several years, and results from seasonal adjustment vary according to the method used.

**10** The factors used in seasonally adjusting the current account series can be obtained from Balance of Payments Section on Canberra 02 6252 6255. There is a charge for this service.

## EXPLANATORY NOTES

---

### TREND ESTIMATES

**11** The trend estimates are derived by applying a 7-term Henderson moving average to the seasonally adjusted series. The 7-term Henderson average (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. While the asymmetric weights enable trend estimates for recent quarters to be produced, it does result in revisions to the estimates for the most recent three quarters as additional observations become available. There may also be revisions because of changes in the original data and as a result of the re-estimation of the seasonal factors. For further information, see *A Guide to Interpreting Time Series—Monitoring 'Trends'; an Overview* (1348.0) or contact Time Series Analysis Section on Canberra 02 6252 6076.

### CHAIN VOLUME MEASURES

**12** To enable analysis of the movement of goods and services in 'real' terms, estimates of chain volume measures are compiled and published each quarter. Chain volume measures are derived by deflating the original current price series by specially compiled measures of price change. The reference year for chain volume measures is the year prior to the latest complete financial year incorporated in this issue. The reference year is updated with the release of each June quarter issue of this publication. Prior to the reference year chain volume measures are non-additive, in that the component chain volume measures of an aggregate will not add through to the chain volume measure of the total aggregate. For further information on chain volume measures refer to the ABS publication *Information Paper: Australian National Accounts, Introduction of Chain Volume and Price Indexes* (5248.0), which was released on 19 March, 1998.

### INDEXES

#### IMPLICIT PRICE DEFULATOR (IPD)

**13** The quarterly implicit price deflators (IPDs) are derived by dividing seasonally adjusted current price estimates by the corresponding chain volume measures. Movements in IPDs can be greatly affected by changes in the physical composition of the aggregates and their components. The quarterly IPDs derived from seasonally adjusted data are preferred to those using original data because the seasonal adjustment process removes some of the seasonal changes in the composition of this series. However, the seasonal adjustment process itself is also a possible source of distortion.

#### TERMS OF TRADE

**14** There are several ways of measuring the terms of trade. In this publication, the following index is used:

$$\frac{\text{Implicit price deflator for the credit item}}{\text{Implicit price deflator for the debit item}} \times 100$$

Quarterly estimates of the terms of trade shown in table 6 of this publication are derived from seasonally adjusted data.

#### CHAIN LASPEYRES

**15** The chain Laspeyres indexes are derived by combining individual component prices with weights which reflect the average relative importance of the components in the previous year. These are then indexed to the relevant reference year. For all periods since the latest reference year, reference year weights are used.

#### DIRECT INVESTMENT ADJUSTMENT

**16** Direct investment adjustments are required in tables 28 and 29 to adjust total foreign assets and liabilities to the net basis for recording foreign investment in Australia (FIA) and Australian investment abroad (AIA). For both FIA and AIA, the adjustment is symmetrical and includes claims of Australian direct investment enterprises on direct investors abroad plus liabilities of Australian direct investors to direct investment enterprises abroad.

## EXPLANATORY NOTES

.....

### FOREIGN DEBT

**17** Foreign debt transactions, levels and interest income (as recorded in tables 34 to 37) between direct investors and direct investment enterprises are recorded on a gross basis for assets and liabilities. The direct investment adjustment is not applied in these tables.

**18** In table 37 'currency' refers to the currency in which assets or liabilities are likely to be repaid, while 'residual maturity' refers to the time remaining until an asset or liability is due to be fully repaid. Reserve assets are not allocated by currency. All reserve assets are allocated to the repayment category 'less than or equal to 90 days' although a range of maturities may be involved.

### INDUSTRY DATA

**19** The industry categories shown are based on the *Australian and New Zealand Standard Industrial Classification (ANZSIC)*, 1993 (1292.0). Industry statistics should be treated with some caution as they do not necessarily reflect the industry of the end use of the funds. First, the statistical unit (that is, the unit of observation and classification) generally consists of all enterprises in an enterprise group within a single resident institutional sector. The industry of this statistical unit, which may cover a broad range of activities, is determined on the basis of the predominant activity of the unit as a whole which may be quite different from the industry in which funds are used. Second, financial enterprises such as trading and merchant banks, may borrow funds as principals and then on-lend to clients in other industries.

### COMMODITY BREAKDOWNS OF GENERAL MERCHANDISE

**20** Commodity breakdowns of general merchandise credits are provided in table 8 (at current prices), 10 (chain volume measures), 12 (at current prices, seasonally adjusted) and 14 (chain volume measures, seasonally adjusted). The groupings shown are based on the third revision of the United Nations Standard International Trade Classification (SITC Rev 3). For further details see table 6.6 in *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (5331.0).

**21** Commodity breakdowns of general merchandise debits are provided in table 9 (at current prices), 11 (chain volume measures), 13 (at current prices, seasonally adjusted), and 15 (chain volume measures, seasonally adjusted). The three broad end-use categories—*Consumption goods, Capital goods and Intermediate and other merchandise goods*—are based on United Nations' Classification of Broad Economic Categories (BEC), but differ from the BEC to the extent that intermediate goods are combined with other merchandise goods. These broad end-use categories are further divided into a total of 25 SITC Rev 3-based commodity groupings, which have also been aligned to the BEC.

**22** Table 6.7 in 5331.0 provides details of the classification used for goods debits. Most of the 25 SITC Rev 3-based commodity groups are further sub-divided into a total of 106 commodity sub-groups. Although the information at this level is not published, it is available as a special data service, see paragraph 25.

**23** For more information on the commodity classification of general merchandise debits and a detailed concordance between balance of payments general merchandise debits end-use categories, commodity groups, BEC and SITC Rev 3, refer to the ABS *Information Paper: Change to Commodity Classification of Merchandise Imports in Balance of Payments Publications* (5344.0).

### RELATED PRODUCTS AND SERVICES

**24** Users may also wish to refer to the following publications which are available from ABS Bookshops:

- *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (5331.0)
- *International Trade Price Indexes* (6457.0)—quarterly
- *Information Paper: Implementing New International Statistical Standards in ABS International Accounts Statistics* (5364.0) — irregular, issued on 29 September 1997
- *Information Paper: Upgraded Balance of Payments and International Investment Position Statistics* (5365.0)—irregular, issued on 24 November 1997.
- *Information Paper: Quality of Australian Balance of Payments Statistics* (5342.0)
- *International Merchandise Imports, Australia* (5439.0)—monthly
- *International Merchandise Trade, Australia* (5422.0)—quarterly
- *International Trade in Goods and Services, Australia* (5368.0)—monthly

**25** Estimates for periods prior to those shown in this publication and more detailed merchandise goods debits time series on a balance of payments basis are available. Detailed data of exports and imports of goods, including dissections by commodity and country of origin, are also available on an international trade basis. These data can be obtained by contacting the General Sales and Inquiries telephone numbers shown on the back of this publication. There may be a charge for this information, depending on the volume of data requested.

**26** Detailed quarterly general merchandise chain volume measures can be obtained by contacting the ABS on Canberra 02 6252 6716. These series are based on international trade statistics (i.e. they are not adjusted to a balance of payments basis) and relate to selected divisions and sections of the SITC Rev 3. Quarterly tables showing components of services can also be obtained from the ABS on Canberra 02 6252 6716. These tables provide original and seasonally adjusted current price and chain volume measures, corresponding to the series shown (in original current price terms) in tables 20 and 21 of this publication. Both sets of measures are working estimates only and may not always be completely consistent with published measures.

### GLOSSARY

**27** A glossary of terms that are either new with the ABS implementation of BPM5 in the balance of payments and international investment position, or which represent a significantly different concept from an existing but similarly named concept, is provided on pages 88 and 89 of *Information Paper: Upgraded Balance of Payments and International Investment Position Statistics* (5365.0).
