KEY POINTS

BALANCE ON GOODS AND SERVICES

- The trend estimate of the *balance on goods and services* was a surplus of \$1,369m in April 2009, a decrease of \$138m (9%) on a revised surplus in March 2009.
- In seasonally adjusted terms, the balance on goods and services was a deficit of \$91m in April 2009, a turnaround of \$2,393m on a revised surplus in March 2009.

CREDITS (EXPORTS OF GOODS & SERVICES)

- Seasonally adjusted, goods and services credits fell \$2,760m (11%) to \$21,680m.
 Non-rural goods fell \$1,692m (12%), other goods fell \$784m (34%) and rural goods fell \$320m (11%). Services credits rose \$34m (1%).
- The fall in *non-rural goods* largely reflects the falls in the *coal*, *coke and briquettes* component, down \$619m (15%), and the *metal ores and minerals* component, down \$430m (10%). Prices declines were driving the falls in these components. The largest fall in *other goods* was in the *non-monetary gold* component, down \$783m (37%).

DEBITS (IMPORTS OF GOODS & SERVICES)

■ Seasonally adjusted, *goods and services debits* fell \$367m (2%) to \$21,771m. *Other goods* fell \$463m (35%), mainly due to a fall in non-monetary gold, down \$305m (32%). *Capital goods*, down \$47m and *consumption goods*, down \$38m both fell 1%. *Intermediate and other merchandise goods* rose \$160m (2%) and *services debits* rose \$20m.

REVISIONS

Revisions were made to merchandise trade data for the previous six months to incorporate the latest available administrative data. There were no revisions to the balance of payments series in original terms. However, the seasonally adjusted and trend estimates have been revised due to the use of concurrent seasonal adjustment (see paragraph 8 in the explanatory notes).

AVAILABILITY OF RELATED DATA

As advised in previous issues, the services 2008 calendar year time series data cubes (other than table 9) will be released on 17 June 2009. Table 9 was released with the March issue of this publication.

A new services table, 'Table 12 International trade in services, credits, education related travel, by educational sector, by type of expenditure by year' will be available from 17 June 2009 on a calendar year basis.

INFORMATION PAPER

The *Information paper: Revisions to international standards in monthly international trade in goods and services statistics from August 2009* (cat. no. 5368.0.55.012) will be released on 17 June 2009. This paper outlines the changes to the international standards and the impact on the presentation of statistics in this publication. It describes the background to the changes, the timing of the changes, and provides mock-ups of the proposed publications and related spreadsheets.

A separate information paper (cat. no. 5302.0.55.002) advising the impact of changes to the international standards on the quarterly international accounts is scheduled to be released on 22 July 2009.

IRON ORE AND COAL PRICES

An adjustment has been made to the value of iron ore exports in the Balance of Payments series. For details see page 4 - Commodity prices adjustment.

COMMODITY PRICES ADJUSTMENT

PRICES ADJUSTMENT

Recorded trade exports data presented for recent months in tables 12-15 of this publication are based on information initially reported by exporters to the Australian Customs Service (ACS). At the time of initial reporting to ACS the final prices may not be known for some commodities. Therefore, the information recorded for recent months for commodities like iron ore and coal can include a variety of prices including previous or current contract prices and the prevailing spot prices. New contract prices that have been recently negotiated, or are still being negotiated, are not fully reflected in the data first reported to ACS. As with commodity price changes in previous years, it is expected that the decreased prices resulting from the negotiation of new contracts will be updated progressively in revised information reported to ACS and then reflected in recorded trade data.

IRON ORE

The balance of payments data in this publication for April 2009 includes an adjustment for the anticipated price decrease for iron ore from April 1. As progressive revisions to the recorded trade prices are reported to ACS and then provided to the ABS they will be incorporated into the balance of payment series and the adjustment reduced accordingly.

In the unadjusted recorded trade series, the value of iron ore and concentrates decreased by 21% between March and April 2009 with volumes down 1% and prices down 20%. In the adjusted balance of payment series, the comparable item decreased 23%, with volumes down 1% and prices down 22%.

COAL

The price for coal has been steadily decreasing since December 2008. On a recorded trade basis, prices for metallurgical coal fell 20% and non-metallurgical coal (bituminous coal) fell 16% between March 2009 and April 2009. Because of the already observed falls in price, and historical patterns showing that adjustments to coal prices occur progressively, no adjustments have been made to the balance of payments series. This will be reviewed as future data are observed.

TIME SERIES DATA

TIME SERIES DATA

Data available free on the ABS web site include longer time series of tables in this publication and the additional spreadsheets and data cubes listed below.

- 31 Merchandise exports by Broad Economic Category (BEC)
- 32 Merchandise exports by industry of origin (ANZSIC)
- 33 Merchandise imports by Broad Economic Category (BEC)
- 34 Merchandise imports by Balance of Payments Broad Economic Category (BoPBEC)
- 35 Merchandise imports by industry of origin (ANZSIC)
- 36 Merchandise exports, state by country and country groups
- 37 Merchandise imports, state by country and country groups
- 91 Monthly seasonal adjustment factors and forward factors for 12 months.

TRADE IN SERVICES DATA CUBES

Trade in Services data are usually updated on an annual basis - with the March issue of this publication for calendar year and with the September issue for financial year.

The 2008 calendar year table 9 was released with the March issue of this publication but tables 1 to 8 and 10 to 12 will be released on 17 June 2009.

For financial year data cubes see cat. no. 5368.0.55.003 and for calendar year see 5368.0.55.004. The following tables are included in both sets of data cubes:

- 1 International trade in services, credits, state by year
- 2 International trade in services, credits, year by state
- 3 International trade in services, debits, state by year
- 4 International trade in services, debits, year by state
- 5 International trade in services, credits, year by country and service
- 6 International trade in services, credits, service by year and by country
- 7 International trade in services, debits, year by country and service
- 8 International trade in services, debits, service by year and by country
- 9 International trade in services, year by detailed service
- 10 International trade in services, credits, year by country and travel service
- 11 International trade in services, debits, year by country and travel service

In addition, the following table will be available on a calendar year basis from 17 June 2009 and a financial year basis from the September 2009 issue.

12 International trade in services, credits, education related travel, by educational sector, by type of expenditure by year.

ANALYSIS AND COMMENTS

BALANCE ON GOODS AND SERVICES

The trend estimate of the balance on goods and services was a surplus of \$1,369m in April 2009, a decrease of \$138m (9%) on a revised surplus in March 2009.

In seasonally adjusted terms, the balance on goods and services was a deficit of \$91m in April 2009, a turnaround of \$2,393m on a revised surplus in March 2009.

EXPORTS OF GOODS AND SERVICES

Between March 2009 and April 2009 the trend estimate of goods and services credits fell \$578m (2%) to \$22,819m.

In seasonally adjusted terms, goods and services credits fell \$2,760m (11%) to \$21,680m. Non-rural goods fell \$1,692m (12%), other goods fell \$784m (34%) and rural goods fell \$320m (11%). Services credits rose \$34m (1%).

Exports of goods

GOODS CREDITS

(a) Trend breaks of \$819m to April 2005, \$500m to April 2006 and \$2,725m to April 2008 have been applied.

RURAL GOODS

In trend terms, exports of rural goods rose \$9m to \$2,638m.

In seasonally adjusted terms, export of rural goods fell \$320m (11%) to \$2,519m.

The main component that contributed to the fall in the seasonally adjusted estimate of rural goods was cereal grains and cereal preparations, down \$234m (27%).

In original terms, exports of rural goods fell \$455m (15%) to \$2,530m.

NON-RURAL GOODS

In trend terms, exports of non-rural goods fell $619m\ (4\%)$ to 13,490m.

In seasonally adjusted terms, exports of non-rural goods fell \$1,692m (12%) to \$12,950m.

The main components contributing to the fall in seasonally adjusted estimates were:

- coal, coke and briquettes, down \$619m (15%)
- metal ores and minerals, down \$430m (10%)
- other non-rural, down \$172m (17%)
- other manufactures, down \$143m (9%)
- transport equipment, down \$135m (33%)
- other mineral fuels, down \$133m (9%).

An adjustment has been made to the value of the metal ores and minerals component, for details see page 4 - Commodity Prices Adjustment.

In original terms, exports of non-rural goods fell \$2,536m (17%) to \$12,290m.

ANALYSIS AND COMMENTS continued

Exports of goods continued

OTHER GOODS

In trend terms, exports of other goods rose \$12m (1%) to \$2,028m.

In seasonally adjusted terms, other goods fell \$784m (34%) to \$1,541m.

The main component contributing to the fall in seasonally adjusted estimates was non-monetary gold, down \$783m (37%).

In original terms, exports of other goods fell \$796m (34%) to \$1,531m.

Exports of services

SERVICES CREDITS

In trend terms, services credits rose \$19m to \$4,663m.

In seasonally adjusted terms, services credits rose \$34m (1%) to \$4,669m.

All components contributed to the rise in the seasonally adjusted estimates with:

- travel services, up \$20m (1%)
- other services, up \$12m (1%).

In seasonally adjusted terms, tourism related services credits rose 19m (1%) to 2,990m.

IMPORTS OF GOODS AND SERVICES

Between March 2009 and April 2009 the trend estimate of goods and services debits fell \$440m (2%) to \$21,450m.

In seasonally adjusted terms, goods and services debits fell \$367m (2%) to \$21,771m. Other goods fell \$463m (35%), capital goods fell \$47m (1%) and consumption goods fell \$38m (1%). Intermediate and other merchandise goods rose \$160m (2%). Services debits rose \$20m.

Imports of goods

GOODS DEBITS

(a) A trend break of \$167m has been applied to Capital goods, n.e.s. debits and related aggregates in October 2008.

ANALYSIS AND COMMENTS continued

Imports of goods continued

CONSUMPTION GOODS

In trend terms, imports of consumption goods fell \$38m (1%) to \$4,954m.

In seasonally adjusted terms, imports of consumption goods fell \$38m (1%) to \$5,107m.

The main components contributing to the decrease in the seasonally adjusted estimates were:

- food and beverages, mainly for consumption, down \$50m (6%)
- textiles, clothing and footwear, down \$37m (5%).

These decreases were partly offset by the household electrical items component, up 74m (18%).

In original terms, imports of consumption goods fell \$212m (4%) to \$4,732m.

CAPITAL GOODS

In trend terms, imports of capital goods fell \$71m (2%) to \$3,964m.

In seasonally adjusted terms, imports of capital goods fell \$47m (1%) to \$4,195m.

The components contributing to the decrease in the seasonally adjusted estimates were:

- machinery and industrial equipment, down \$273m (16%)
- industrial transport equipment n.e.s., down \$93m (22%)
- telecommunications equipment, down \$70m (12%).

Partly offsetting these falls was the capital goods n.e.s. component, up \$377m (42%).

In original terms, imports of capital goods fell $341m\ (8\%)$ to 4,008m.

INTERMEDIATE AND OTHER MERCHANDISE GOODS

In trend terms, imports of intermediate and other merchandise goods fell \$259m (4%) to \$6,803m.

In seasonally adjusted terms, imports of intermediate and other merchandise goods rose \$160m (2%) to \$7,125m.

The main components contributing to the increase in the seasonally adjusted estimates were:

- other merchandise goods, up \$151m (196%)
- organic and inorganic chemicals, up \$65m (19%)
- fuels and lubricants, up \$39m (2%)
- iron and steel, up \$39m (12%).

Partly offsetting these increases were:

- processed industrial supplies n.e.s., down \$60m (3%)
- primary industrial supplies n.e.s., down \$46m (33%).

In original terms, imports of intermediate and other merchandise goods fell \$66m (1%) to \$6,990m.

ANALYSIS AND COMMENTS continued

Imports of goods continued

OTHER GOODS

In trend terms, imports of other goods fell \$68m (5%) to \$1,262m.

In both original and seasonally adjusted terms, other goods debits fell \$463m (35%) to \$842m. The main components contributing to this decrease were non-monetary gold, down \$305m (32%) and goods for processing, down \$165m (99%).

Imports of services

SERVICES DEBITS

In trend terms, services debits fell \$5m to \$4,466m.

In seasonally adjusted terms, services debits rose \$20m to \$4,502m.

The components contributing to the rise in the seasonally adjusted estimates were travel services, up \$53m (3%) and other services, up \$26m (2%) while transportation services fell \$58m (5%).

In seasonally adjusted terms, tourism related services debits rose 38m (2%) to 2,116m.

⁽a) For all time periods, estimates for sugar, sugar preparations and honey are included in Other non-rural.

⁽b) A trend break of \$725m has been applied to metal ores and minerals, and related aggregates in April 2008. This trend break will be reassessed with the annual seasonal reanalysis to be incorporated with results to be published in the August 2009 issue. Trend estimates from April 2008 should be used with caution.

⁽c) A trend break of \$2,000m has been applied to coal, coke and briquettes, and related aggregates in April 2008. This trend break will be reassessed with the annual seasonal reanalysis to be incorporated with results to be published in the August 2009 issue. Trend estimates from April 2008 should be used with caution.

na not available

np not available for publication but included in totals where applicable, unless otherwise indicated

⁽a) For sign conventions, see paragraph 11 of the Explanatory Notes.

⁽b) From December 2008, the Civil aircraft series and commodities subject to a 'no commodity details' or 'no value details' restriction are included in Capital goods n.e.s.. From September to November 2008 commodities with these restrictions are included in Civil aircraft and for earlier periods are included in Other merchandise goods. Trend estimates for the Capital goods n.e.s. series from December 2008 have been suppressed due to the change in the composition of the series.

⁽c) A trend break of \$167m has been applied to Capital goods, n.e.s. debits and related aggregates in October 2008.

⁽a) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank of Australia in respect of each trading day.

⁽b) May 1970 = 100. The Trade-weighted index is reweighted annually on 1 October and on special occasions as required.

EXPLANATORY NOTES

INTRODUCTION

- **1** This publication presents preliminary estimates of Australia's international trade in goods and services on a balance of payments basis and merchandise import and export statistics on a recorded trade basis.
- **2** Merchandise trade statistics on a recorded trade basis are compiled from information submitted by exporters and importers or their agents to the Australian Customs Service (ACS). Adjustments for coverage, timing and valuation are made to recorded trade data to convert them to a balance of payments basis. The main source for services data is the quarterly Survey of International Trade in Services.
- **3** More comprehensive quarterly estimates of Australia's trade in goods and services, together with comprehensive details of Australia's balance of payments are included in the quarterly publication, *Balance of Payments and International Investment Position*, *Australia* (cat. no. 5302.0). Detailed monthly statistics on merchandise trade are available on Time Series Spreadsheets or by subscription to tailored services.

CONCEPTS, SOURCES AND METHODS

- **4** The conceptual framework used in compiling Australia's merchandise trade statistics can be found in *International Merchandise Trade*, *Australia: Concepts*, *Sources and Methods*, *2001* (cat. no. 5489.0).
- 5 The conceptual framework used in compiling Australia's balance of payments statistics is based on the Fifth Edition of the International Monetary Fund's *Balance of Payments Manual* (BPM5,1993). Descriptions of the underlying concepts and structure of the balance of payments and the sources, methods and terms used in compiling the estimates are presented in *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998* (cat. no. 5331.0). To bring merchandise trade statistics on a recorded trade basis to a balance of payments basis, timing adjustments are made to ensure that the transaction is recorded in the period in which ownership changed, rather than in the period in which the transaction was recorded by ACS. Adjustments are also made to account for the change of ownership of goods not included in merchandise trade statistics. Chapter 6 of cat. no. 5331.0 provides more detail on the relationship between statistics on international merchandise trade on a recorded trade basis and on a balance of payments basis.
- **6** Both of the Concepts, Sources and Methods publications are available to download for free from the ABS website. Select *Methods, Classifications, Concepts & Standards*, then choose *ABS concepts, classifications and statistical standards* and then the catalogue numbers as above.

SEASONAL ADJUSTMENT

- 7 The estimates of international trade in goods and services on a balance of payments basis are seasonally adjusted, however the merchandise exports and imports statistics on a recorded trade basis are not. Monthly original estimates are volatile, being subject to calendar–related and large irregular influences. Seasonally adjusted estimates are derived by estimating and removing from the original series systematic calendar related effects, such as seasonal, trading day, length of month and moving holiday influences. Seasonal adjustment does not aim to remove the irregular or non–seasonal influences which may be present in any particular month. These irregular influences may reflect both random economic events and difficulties of statistical recording.
- **8** The seasonally adjusted statistics in this publication use the concurrent seasonal adjustment technique and Autoregressive Integrated Moving Average (ARIMA) Modelling to estimate factors for the current and previous months. Under concurrent seasonal adjustment, the estimates of seasonal factors are fine tuned as new original estimates become available each period. The seasonally adjusted estimates are subject to revisions at each reference month as the estimates of seasonal factors are improved. For more information on seasonal adjustment methods, see *Information Paper: An Introductory Course on Time Series Analysis, Jan 2005* (cat. no. 1346.0.55.001), *Time Series Analysis*

SEASONAL ADJUSTMENT continued

Frequently Asked Questions, 2003 (cat. no. 1346.0.55.002), alternatively contact the Assistant Director, Time Series Analysis on (02) 6252 6345 or e-mail <time.series.analysis@abs.gov.au>.

ARIMA MODELLING

9 ARIMA modelling relies on the characteristics of the series being analysed to project future period data. ARIMA modelling is used on a case–by–case basis where it results in reduced revisions to seasonally adjusted series when subsequent data become available. The projected values are temporary, intermediate values, that are only used internally to improve the estimation of the seasonal factors. The projected data do not affect the original estimates and are discarded at the end of the seasonal adjustment process. The ARIMA model is assessed as part of the annual reanalysis and, following the 2008 annual re–analysis, 41 of the 42 directly seasonally adjusted trade in goods and services time series use an ARIMA model. For more information on the details of ARIMA modelling see *Feature article: Use of ARIMA modelling to reduce revisions* in the October 2004 issue of *Australian Economic Indicators* (cat. no. 1350.0).

TREND ESTIMATES

10 The month—to—month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour because they include irregular or non—seasonal movements. Trend estimates are derived by applying a 13—term Henderson moving average to the seasonally adjusted series. The use of a 13—term Henderson average can result in revisions to the estimates for the most recent six months as additional observations become available. Revisions can also occur because of changes in the original data and as a result of the re—estimation of the seasonal factors. For more information on trend estimates methods, see *Information Paper: A Guide to Interpreting Time Series—Monitoring Trends* (cat. no. 1349.0), alternatively contact the Assistant Director, Time Series Analysis on (02) 6252 6345 or e—mail <time.series.analysis@abs.gov.au>.

SIGN CONVENTION

11 In keeping with balance of payments conventions, where statistics are on a balance of payments basis, credit entries (exports) are shown without sign and debit items (imports) are shown as negative entries. For statistics on a recorded trade basis, both imports and exports are shown without sign. The calculation of percentage changes on balance of payments debit items are made without regard to sign. References to balance of payments debit items in Key Figures, Key Points, and Analysis and Comments are also made without regard to sign.

COMMODITY BREAKDOWNS
OF GOODS

- **12** For details of the classifications used to present goods exports (credits) and imports (debits) on a balance of payments basis, see tables 6.6 and 6.7, respectively, in *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998* (cat. no. 5331.0).
- 13 The correspondences used to compile statistics on a Balance of Payments basis were updated in the July 2008 issue with estimates for all time periods recompiled on the basis of the revised correspondences to maintain consistency in the time series.
- **14** The recorded trade statistics shown in tables 12 and 13 are classified by the Standard International Trade Classification (SITC). Imports and exports of goods at a more detailed level are available from the Time Series spreadsheets. All data from July 2005 are presented according to SITC Rev 4 and data prior to July 2005 are presented according to SITC Rev 3. For details refer to the July 2008 issue of this publication.

COMMODITY BREAKDOWNS
OF SERVICES

15 The quarterly detailed services data published in table 11 are consistent with the monthly aggregates shown in table 9.

COMMODITY BREAKDOWNS
OF SERVICES continued

16 Monthly indicators for many of the services components that are only surveyed quarterly are not available. In particular, the Freight and Other transportation components of Total services credits are not available for publication on a monthly basis. The estimates for these items shown in table 9 are therefore derived by dividing the quarterly estimate by three. Where quarterly survey data are not available, freight debits are derived directly from imports data for the reference month as a difference between total merchandise cost, insurance and freight (CIF) and free on board (FOB), adjusted to reflect timing and processing adjustments. For freight credits and other transportation credits and debits, estimates are derived by extrapolating the last month's data by an average of movements for the same month over the three previous years.

CONFIDENTIALITY OF MERCHANDISE TRADE STATISTICS

17 The release of statistics for certain merchandise trade commodities is restricted in order to prevent the identification of the activities of an individual business, where this is requested by the business concerned. These restrictions do not affect the total value of exports and imports, but they can affect statistics at the country, state and commodity levels. Imports data that have the confidentiality restrictions 'No commodity details' or 'No value details' are aggregated into a single confidential commodity code. For data prior to September 2008, these data are added back into the appropriate state total and country total (i.e. these totals show the correct level of trade). From September 2008 these confidential data are not added back. Instead the confidential data are published as 'No country details' in the country totals and 'State not available for publication' in the state totals. Therefore, country and state totals from September 2008 may not represent the actual amount of trade in each country/state but only the trade in commodities without a 'No commodity details' or 'No value details' restriction. For information on the confidentiality restrictions applied to the merchandise trade statistics in this publication, refer to the current International merchandise trade: Confidential Commodities List (CCL) (cat. no. 5372.0.55.001) which can be accessed from ABS web site.

TOURISM RELATED SERVICES

- **18** The tourism related services memorandum items provide timely indicators of the movements in tourism related activities, not an absolute measure of the level of these activities. These series are not compiled on a balance of payments conceptual basis. However, they do provide a reasonable approximation of world tourism related activities.
- 19 The memorandum items have been derived by re–aggregating relevant components of the international trade in services series of the balance of payments accounts. The tourism related indicator has been derived by combining total travel services (business, education–related and other personal travel) and passenger transportation services (which includes agency fees and commission receipts for air transport).

SERVICES BY STATE AND BY PARTNER COUNTRY

- **20** Annual services data by state and by partner country are released twice yearly. Calendar year data are usually released with the March issue of this publication and financial year data are released with the September issue. Refer to Time series data for details.
- 21 Services credits are classified by the state of provision, while services debits are classified by the state of consumption. The state allocations for transportation, travel and communication services are based on a number of indicators including merchandise trade statistics by state, overseas passenger arrivals and departures by state of clearance and data provided by the Department of Education, Science and Training. The allocation for other services (about 25% of all trade in services) is primarily based on the location of the business reporting the information, which serves as a proxy for the state of provision/consumption of that service. The data should be used with care but are considered suitable for analysis over time.

SERVICES BY STATE AND BY PARTNER COUNTRY continued

22 A comprehensive explanation of the data sources used and the methodology applied in the compilation of partner country statistics is provided in Chapter 17 of *Balance of Payments and International Investment Position, Australia – Concepts, Sources and Methods* (cat. no. 5331.0). Approximately 7% of total services credits and 5% of total services debits for both 2006–07 and 2007–08 are either confidential, or unable to be allocated to individual countries.

ABS DATA AVAILABLE

- **23** More detailed balance of payments and recorded merchandise trade data, including forward seasonal factors are available as time series spreadsheets or data cubes from the ABS website.
- **24** More detailed merchandise trade data by commodity, country and state, and statistics included in this and related publications are available on request. Inquiries should be made to the National Information and Referral Service as shown on the back of this publication.

RELATED PRODUCTS AND PUBLICATIONS

- **25** Users may also wish to refer to the following publications which can be downloaded free of charge from the ABS web site:
 - Balance of Payments and International Investment Position, Australia (cat. no. 5302.0) issued quarterly
 - International Merchandise Imports, Australia (cat. no. 5439.0) issued monthly
 - International Trade Price Indexes, Australia (cat. no. 6457.0) issued quarterly
 - Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods (cat. no. 5331.0)

 - International Merchandise Trade, Australia: Concepts, Sources and Methods (cat. no. 5489.0)
 - A Guide to Australian Balance of Payments and International Investment Position Statistics (cat. no. 5362.0.55.001).
- **26** Current publications and other products released by the ABS are available from the *Statistics View*. The ABS also issues a daily *Release Advice* on the web site which details products to be released in the week ahead.

CAUTIONARY NOTE

27 The tables in this publication are presented on two bases. Tables 1–11 contain estimates of Australia's international trade in goods and services which have been adjusted for coverage, valuation and timing to a balance of payments basis. Tables 12–15 contain estimates of merchandise exports and imports based on Australian Customs Service records. Paragraph 5 of the Explanatory Notes provides an explanation of the difference between these bases.

ROUNDING

28 Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Percentage movements are calculated from data at the level of precision presented in this publication (i.e. \$m) except for international merchandise trade tables.
