KEY POINTS

BALANCE ON GOODS AND SERVICES

- In trend terms, the *balance on goods and services* was a deficit of \$1,270m in January 2013, a fall of \$239m (16%) on the deficit in December 2012.
- In seasonally adjusted terms, the *balance on goods and services* was a deficit of \$1,057m in January 2013, a rise of \$369m (54%) on the deficit in December 2012.

CREDITS (EXPORTS OF GOODS & SERVICES)

In seasonally adjusted terms, goods and services credits fell \$185m (1%) to \$25,023m.
 Non-rural goods fell \$424m (3%) and rural goods fell \$81m (3%). Non-monetary gold rose \$211m (17%) and net exports of goods under merchanting rose \$10m (200%).
 Services credits rose \$98m (2%).

DEBITS (IMPORTS OF GOODS & SERVICES)

In seasonally adjusted terms, goods and services debits rose \$185m (1%) to \$26,081m.
 Capital goods rose \$292m (5%) and *consumption goods* rose \$166m (3%). *Intermediate* and other merchandise goods fell \$258m (3%) and non-monetary gold fell \$6m (2%).
 Services debits fell \$10m.

REVISIONS

REVISIONS

The following goods and services debits components, on a balance of payments basis, have been revised since the release of the December 2012 issue of *International Trade in Goods and Services, Australia* (cat. no. 5368.0):

- capital goods n.e.s. component of goods debits series, revised back to January 2012
- civil aircraft and confidentialised items component of goods debits series, revised in October 2012
- industrial transport equipment n.e.s. component of goods debits series, revised in November 2012
- legal, accounting, management consulting, public relations and other professional services component of services debits, revised back to October 2012
- architectural, engineering and other technical services component of services debits, revised back to July 2012.

No other components in the balance of payments series have been revised.

Data in this issue aligns with the data in the December quarter 2012 issues of *Balance of Payments and International Investment Position, Australia* (cat. no. 5302.0) released on 5 March 2013, and *Australian National Accounts: National Income, Expenditure and Product* (cat. no. 5206.0) released on 6 March 2013.

Table 17 summarises revisions to goods and services on a balance of payments basis, in original current price terms, since the last issue of this publication. In original terms, the revisions have:

- increased the surplus on goods and services for 2011–12 by \$338m
- decreased the deficit on goods and services for the six months to December 2012 by \$446m.

CHANGES IN THIS AND FORTHCOMING ISSUES continued

.

CHANGES IN FORTHCOMING ISSUES AMENDMENT TO SCHEDULE 4 OF CUSTOMS TARIFF

The Australian Customs and Border Protection Service has introduced significant amendments to Schedule 4 of the Customs Tariff Act. The changes were implemented on 1 March 2013. More detail is available in Australian Customs Notice 2012/55.

These changes to treatment code and commodity classifications will be applied from March 2013 import statistics. These imports data are available via the tailored 'user pays' service.

The *Information Paper: Amendments to Schedule 4 of customs Tariff* (cat. no. 5368.0.55.019) will be released on 19 March 2013 to provide information on new treatment codes, commodity codes and a correspondence between the ceasing codes and the replacement codes. These changes will not impact on statistics in this publication.

VALUE ADJUSTMENTS

VALUE ADJUSTMENTS	International merchandise trade exports data presented in tables 12–15 of this publication are based on information provided by exporters to the <i>Australian Customs</i> <i>and Border Protection Service</i> (Customs and Border Protection). At the time of initial reporting to Customs and Border Protection quantity and unit price information might be estimated for commodities such as iron ore and coal. Final quantity and/or unit price information are updated progressively in merchandise trade data as exporters revise the information provided to Customs and Border Protection. When additional information on quantity and/or unit price for these commodities are available, the ABS may adjust the balance of payments series in current price, original terms to minimise future revisions. In most instances transfer of ownership occurs when goods cross the customs frontier. In certain circumstances the ownership of large value capital expenditure items can occur prior to the items crossing the customs frontier. To minimise revisions the ABS may adjust the relevant balance of payments series to record the timing when transfer of ownership was effected.
Goods credits	 Iron ore (in original terms) No adjustment has been applied to the 'metal ores and minerals' component for January 2013. The previous adjustment of negative \$80m applied to the 'metal ores and minerals' component for December 2012 remains.
Goods debits	 Capital expenditure (in original terms) the 'capital goods n.e.s.' component includes an estimate of expenditure on capital goods that have changed ownership but have not yet crossed the customs frontier.

TIME SERIES DATA

TIME SERIES DATA	Tables 1 to 16 of this publication are available free on the ABS website < <i>www.abs.gov.au</i> > from the 'Downloads' tab of this issue with longer time series. A number of these tables present more detailed breakdowns than included in the publication. A number of additional tables are available free on the ABS website.

TIME SERIES DATA continued

TRADE IN SERVICES DATA CUBES	Trade in services data cubes are usually updated on an annual basis. Calendar year (cat. no. 5368.0.55.004) statistics are updated following the March issue of this publication and financial year (cat. no. 5368.0.55.003) statistics are updated following the September issue of this publication.
	The following tables were included in the calendar and financial year data cubes:
	1 International trade in services, credits, state by year
	2 International trade in services, credits, year by state
	3 International trade in services, debits, state by year
	4 International trade in services, debits, year by state
	5 International trade in services, credits, year by country and service
	6 International trade in services, credits, service by year and by country
	7 International trade in services, debits, year by country and service
	8 International trade in services, debits, service by year and by country
	9 International trade in services, credits, year by country and travel service
	10 International trade in services, debits, year by country and travel service
	11 International trade in services, credits, education related travel, by educational sector, by type of expenditure by year.

ANALYSIS AND COMMENTS

BALANCE ON GOODS AND SERVICES	In trend terms, the balance on goods and services was a deficit of \$1,270m in January 2013, a fall of \$239m (16%) on the deficit in December 2012.
	In seasonally adjusted terms, the balance on goods and services was a deficit of \$1,057m in January 2013, a rise of \$369m (54%) on the deficit in December 2012.
EXPORTS OF GOODS AND SERVICES	Between December 2012 and January 2013, the trend estimate of goods and services credits rose \$197m (1%) to \$24,931m.
	In seasonally adjusted terms, goods and services credits fell \$185m (1%) to \$25,023m. Non–rural goods fell \$424m (3%) and rural goods fell \$81m (3%). Non–monetary gold rose \$211m (17%) and net exports of goods under merchanting rose \$10m (200%). Services credits rose \$98m (2%).
Exports of goods	GOODS CREDITS

(a) Trend breaks have been applied to April 2009 and April 2010

RURAL GOODS

In trend terms, exports of rural goods rose \$1m to \$2,943m.

In seasonally adjusted terms, exports of rural goods fell \$81m (3%) to \$2,877m.

The main component contributing to the fall in seasonally adjusted estimates was other rural, down \$142m (10%).

Partly offsetting this fall was the cereal grains and cereal preparations component, up 77m (12%).

NON-RURAL GOODS

In trend terms, exports of non-rural goods rose \$191m (1%) to \$16,180m.

In seasonally adjusted terms, exports of non-rural goods fell \$424m (3%) to \$16,280m.

The main components contributing to the fall in seasonally adjusted estimates were:

- coal, coke and briquettes, down \$146m (5%)
- other manufactures, down \$110m (8%)
- metals (excl. non-monetary gold), down \$79m (9%).

For price and volume details, see the Selected commodities section on page 14.

Exports of goods continued NET EXPORTS OF GOODS UNDER MERCHANTING

In trend terms, net exports of goods under merchanting remained steady at \$8m.

In seasonally adjusted terms, net exports of goods under merchanting rose \$10m (200%) to \$15m.

NON-MONETARY GOLD

In trend terms, exports of non-monetary gold fell \$4m to \$1,414m.

In original and seasonally adjusted terms, exports of non-monetary gold rose \$211m (17%) to \$1,426m.

Exports of services

SERVICES CREDITS

In trend terms, services credits rose \$9m to \$4,386m.

In seasonally adjusted terms, services credits rose \$98m (2%) to \$4,425m.

The main component contributing to the rise in seasonally adjusted estimates was travel, up \$63m (2%).

In seasonally adjusted terms, tourism related services credits rose \$63m (2%) to \$2,854m.

ANALYSIS AND COMMENTS continued

IMPORTS OF GOODS AND SERVICES

Between December 2012 and January 2013, the trend estimate of goods and services debits fell \$43m to \$26,200m.

In seasonally adjusted terms, goods and services debits rose \$185m (1%) to \$26,081m. Capital goods rose \$292m (5%) and consumption goods rose \$166m (3%). Intermediate and other merchandise goods fell \$258m (3%) and non–monetary gold fell \$6m (2%). Services debits fell \$10m.

Imports of goods GOODS DEBITS

(a) Trend breaks have been applied to January 2011, July 2011 and January 2012.

CONSUMPTION GOODS

In trend terms, imports of consumption goods rose \$34m (1%) to \$5,793m.

In seasonally adjusted terms, imports of consumption goods rose \$166m (3%) to \$5,872m.

The main components contributing to the rise in seasonally adjusted estimates were:

- non-industrial transport equipment, up \$131m (8%)
- food and beverages, mainly for consumption, up \$38m (5%).

CAPITAL GOODS

In trend terms, imports of capital goods rose \$25m to \$5,639m.

In seasonally adjusted terms, imports of capital goods rose \$292m (5%) to \$5,669m.

The main components contributing to the rise in seasonally adjusted estimates were:

- telecommunications equipment, up \$257m (52%)
- capital goods n.e.s., up \$99m (7%).

Imports of goods continued

INTERMEDIATE AND OTHER MERCHANDISE GOODS

In trend terms, imports of intermediate and other merchandise goods fell \$66m (1%) to \$8,913m.

In seasonally adjusted terms, imports of intermediate and other merchandise goods fell \$258m (3%) to \$8,716m.

The main components contributing to the fall in seasonally adjusted estimates were:

- fuels and lubricants, down \$228m (7%)
- organic and inorganic chemicals, down \$75m (20%).

NON-MONETARY GOLD

In trend terms, imports of non-monetary gold fell \$33m (8%) to \$381m.

In original and seasonally adjusted terms, imports of non-monetary gold fell \$6m (2%) to \$371m.

In trend terms, services debits fell \$3m to \$5,475m.

In seasonally adjusted terms, services debits fell \$10m to \$5,452m.

The main component contributing to the fall in seasonally adjusted estimates was transport, down \$22m (2%).

In seasonally adjusted terms, tourism related services debits rose \$2m to \$2,889m.

(a) Data in this table are on a revised international merchandise trade basis and exclude value adjustments applied to balance of payments series.

On an international merchandise trade basis, in original terms (noting the footnote in the above table), between December 2012 and January 2013 the largest movements recorded for the following selected commodities were:

Iron ore lump fell \$77m (6%), with quantities down 15% and unit values up 11%. Exports to Japan fell \$100m (29%), with quantities down 32% and unit values up 4%.

Iron ore fines fell \$356m (9%), with quantities down 19% and unit values up 12%. Exports to:

- China fell \$127m (4%), with quantities down 15% and unit values up 13%
- Japan fell \$115m (25%), with quantities down 27% and unit values up 3%
- Republic of Korea fell \$71m (18%), with quantities down 24% and unit values up 8%.

Hard coking coal fell \$172m (13%), with quantities down 16% and unit values up 4%. Exports to:

- India fell \$140m (39%), with quantities down 39%
- China fell \$131m (30%), with quantities down 34% and unit values up 5%.

ANALYSIS AND COMMENTS continued

Selected commodities	Semi–soft coal fell \$87m (14%), with quantities down 16% and unit values up 2%.
continued	Exports to China fell $92m$ (38%), with quantities down 41% and unit values up 6%.
	Thermal coal fell \$147m (10%), with quantities down 10%.

Exports to China fell \$93m (29%), with quantities down 10%.

(a) For sign conventions, see paragraph 15 of the Explanatory Notes.

(b) For all time periods, estimates for sugar, sugar preparations and honey are included in Non-rural goods.
(c) This component is not seasonally adjusted.

(d) Caution should be used when interpreting recent trend estimates as they may be affected by unusual economic factors. For more details on trend estimates, please see paragraph 19 of the Explanatory Notes.

(a) For all time periods, estimates for sugar, sugar preparations and honey are included in Other non-rural.

(b) From July 1971 to June 2005, only a length–of–month adjustment has been applied to this component. From July 2005, this component is seasonally adjusted using seasonal factors derived from a monthly volume series.

(c) In using these seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

(d) This component is not seasonally adjusted.

(a) For sign conventions, see paragraph 15 of the Explanatory Notes.

.

(b) From July 2008, commodities subject to a 'no commodity details' or 'no value details' restriction are included in Civil aircraft and confidentialised items. For earlier periods, commodities subject to a 'no commodity details' or 'no value details' restriction are included in Other merchandise goods.

(c) This component is not seasonally adjusted.

(d) In using these seasonally adjusted series, care should be exercised because of the difficulties associated with reliably estimating the seasonal pattern.

(e) From July 1981, this component is not seasonally adjusted.

.

.

(a) For sign conventions, see paragraph 15 of the Explanatory Notes.

(b) Caution should be used when interpreting recent trend estimates as they may be affected by unusual economic factors. For more details on trend estimates, please see paragraph 19 of the Explanatory Notes. (c) From July 2008, commodities subject to a 'no commodity details' or 'no value details' restriction are included in Civil aircraft and confidentialised items. For earlier periods, commodities subject to a 'no commodity details' or 'no value details' restriction are included in Other merchandise goods.

nil or rounded to zero (including null cells)

(a) This table is presented consistent with BPM6 sign conventions. This means for the balance on goods and services a negative revision indicates a decrease in a surplus or an increase in a deficit. For debits a negative revision indicates an increase in debits while a positive revision indicates a decrease in debits.

## EXPLANATORY NOTES

#### INTRODUCTION

**1** This publication presents preliminary estimates of Australia's international trade in goods and services on a balance of payments basis (tables 1–11 and 17) and merchandise import and export statistics on an international merchandise trade basis (tables 12–15). In addition, table 16 Exchange rates and trade–weighted indexes (TWI) are derived by using exchange rates and indexes provided by the Reserve Bank of Australia (RBA). As of December 2011 the RBA has changed the methodology for compiling the TWI to include both merchandise and services trade, rather than merchandise trade only. This takes advantage of country–level services trade data that have been published by the Australian Bureau of Statistics (ABS).

**2** Merchandise trade statistics on an international merchandise trade basis are compiled from information submitted by exporters and importers or their agents to the Australian Customs and Border Protection Service (Customs and Border Protection). Adjustments for coverage, timing and valuation are made to international merchandise trade data to convert them to a balance of payments basis. The services data are sourced from the quarterly Survey of International Trade in Services and a range of administrative data and indicator series.

**3** More comprehensive quarterly estimates of Australia's trade in goods and services, together with comprehensive details of Australia's balance of payments are included in the quarterly publication, *Balance of Payments and International Investment Position, Australia* (cat. no. 5302.0). Detailed monthly statistics on merchandise trade are available in Time Series Spreadsheets on the ABS website or by subscription to tailored services. More information on the *International Trade in Services by Country, by State and by Detailed Services Category* are available on a financial year basis (cat. no. 5368.0.55.003) following the September issue of this publication.

CONCEPTS, SOURCES AND 4 METHODS can

**4** The conceptual framework used in compiling Australia's merchandise trade statistics can be found in *International Merchandise Trade, Australia: Concepts, Sources and Methods, 2001* (cat. no. 5489.0).

**5** The conceptual framework used in compiling Australia's balance of payments statistics is based on the International Monetary Fund's *Balance of Payments and International Investment Position Manual, Sixth Edition* (BPM6). Descriptions of the underlying concepts and structure of the balance of payments and the sources, methods and terms used in compiling estimates are presented in the publication *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods, 1998* (cat. no. 5331.0). This version reflects the international standards prior to BPM6 and is currently being revised. The first part of the revised document was released on 8 March 2011, featuring only the Goods Account. Other components will be released as they become available. Further information on the key changes introduced with BPM6 can be found in the *Information paper: Implementation of new international statistical standards in the ABS National and International Accounts, September 2009* (cat. no. 5310.0.55.002).

**6** To bring merchandise trade statistics on an international merchandise trade basis to a balance of payments basis, timing adjustments are made to ensure that the transaction is recorded in the period in which ownership changed, rather than in the period in which the transaction was recorded by Customs and Border Protection or the period in which the goods arrived in/departed from an Australian port. Adjustments are also made to account for the change of ownership of goods not included in merchandise trade statistics. Chapter 6 of cat. no. 5331.0 provides more detail on the relationship between statistics on an international merchandise trade basis and on a balance of payments basis.

CONCEPTS, SOURCES AND METHODS <i>continued</i>	7 International merchandise trade exports data presented for recent months in tables 12–15 of this publication are based on information initially reported by exporters to Customs and Border Protection. At the time of initial reporting to Customs and Border Protection the final prices may not be known for some commodities. Therefore, the information recorded for recent months for commodities like iron ore and coal can include a variety of prices including previous or current contract prices and the prevailing spot prices. Newly negotiated contract prices may not be fully reflected in the data first reported to Customs and Border Protection, and to compensate for this, the balance of payments series may reflect adjusted price levels.
	<b>8</b> The Concepts, Sources and Methods publications and information papers are available to download for free from the ABS website. Select <i>Statistics</i> , then select <i>By Catalogue Number</i> , and then the catalogue numbers as above.
CLASSIFICATIONS	<ul> <li>9 The merchandise trade data on an international merchandise trade basis are presented using the following commodity classifications:</li> <li>the Harmonized System 2012 (available on request)</li> <li>the Standard International Trade Classification (SITC Revision 4)</li> <li>the Classification by Broad Economic Categories (BEC)</li> <li>the industry classification: Australian and New Zealand Standard Industrial Classification, 2006 (ANZSIC 06) from July 2005.</li> </ul>
	<ul> <li>10 The balance of payments 'goods and services' series are presented according to three classifications with the goods classifications derived from SITC Revision 4 and BEC. The classifications are:</li> <li>for goods: <ul> <li>the Balance of Payments Commodities for Exports (BoPCE)</li> <li>the Balance of Payments Broad Economic Categories (BoPBEC) for Imports</li> </ul> </li> <li>for services: <ul> <li>the Extended Balance of Payments Services Classification (EBOPS).</li> </ul> </li> </ul>
ACCURACY, RELIABILITY AND REVISIONS	<b>11</b> While every effort is made to ensure the accuracy and reliability of estimates, most series are subject to revision as more complete and accurate information becomes available. Care should be exercised in the use and interpretation of estimates in this publication. The transactions occurring in international trade in goods and services are of many different kinds, and therefore the compilation of trade estimates entails the use of a very wide range of statistical data of varying degrees of accuracy and timeliness. For further information on the monthly services series, see paragraph 25.
	<b>12</b> The revisions are applied differently for merchandise trade and balance of payments series. Each month, merchandise trade data are revised for the previous six months to incorporate latest available data.
	<b>13</b> For the balance of payments 'goods and services' series, in original terms, revisions are not usually applied in the July, October, January or April issues. This is to ensure the monthly series align with the comparable series in the <i>Balance of Payments and International Investment Position, Australia</i> (cat. no. 5302.0). In the September issue revisions can be applied to the four previous financial years. In other issues revisions can be applied to the previous and current financial years to incorporate the latest available survey and administrative data.
	<b>14</b> In seasonally adjusted and trend terms, revisions may occur at any time point but tend to focus on the most recent estimates. Please also refer to paragraphs 17 (seasonal adjustment) and 19 (trend estimates) below.

SIGN CONVENTION	<b>15</b> In keeping with BPM6 conventions, balance of payments basis credit entries are shown with an implied positive sign and debit items are shown as negative entries. For statistics on an international merchandise trade basis, both imports and exports are shown without sign. The calculation of percentage changes on balance of payments debit items are made without regard to sign. References to balance of payments debit items in Key Figures, Key Points, and Analysis and Comments are also made without regard to sign.
SEASONALLY ADJUSTED AND TREND ESTIMATES	<b>16</b> The estimates of international trade in goods and services on a balance of payments basis are seasonally adjusted, however the merchandise exports and imports statistics on an international merchandise trade basis are not. Monthly original estimates are volatile, being subject to calendar–related and large irregular influences. Seasonally adjusted estimates are derived by estimating and removing from the original series systematic calendar related effects, such as seasonal (e.g. Christmas), trading day and moving

These irregular influences may reflect both random economic events and difficulties of statistical recording.**17** The seasonally adjusted statistics in this publication use the concurrent seasonal adjustment technique and Autoregressive Integrated Moving Average (ARIMA) modelling to estimate factors for the current and previous months. Under concurrent seasonal adjustment, the estimates of seasonal factors are fine tuned as new or revised original estimates become available each period. The seasonally adjusted estimates are subject to

revisions at each reference month as the estimates of seasonal factors are improved.

holiday (e.g. Easter) influences. Seasonal adjustment does not aim to remove the irregular or non–seasonal influences which may be present in any particular month.

**18** ARIMA modelling relies on the characteristics of the series being analysed to project future period data. ARIMA modelling is used on a case–by–case basis where it results in reduced revisions to seasonally adjusted series when subsequent data becomes available. The projected values are temporary, intermediate values, that are only used internally to improve the estimation of the seasonal factors. The projected data do not affect the original estimates and are discarded at the end of the seasonal adjustment process. The ARIMA model is assessed as part of the annual review and, following the 2012 annual review, the majority of directly seasonally adjusted trade in goods and services time series use an ARIMA model.

**19** The month–to–month movements of the seasonally adjusted estimates may not be reliable indicators of underlying behaviour because they include irregular or non–seasonal movements. Trend estimates reduce the effect of these movements as they are derived by applying a 13–term Henderson moving average to the seasonally adjusted series. The 13–term Henderson moving average (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. While the asymmetric weights enable trend estimates for recent months to be produced, it does result in revisions to the estimates for the most recent six months as additional observations become available. Revisions to trend estimates can also occur because of revisions to the original data and as a result of the re–estimation of the seasonal factors. Trend estimates should be used with caution, especially around the time of unusual influences, until these have been appropriately taken into account.

**20** Information papers and articles on time series methods are available on the ABS website:

 for seasonal adjustment methods, see Information Paper: An Introductory Course on Time Series Analysis, Jan 2005 (cat. no. 1346.0.55.001) and Time Series Analysis Frequently Asked Questions, 2003 (cat. no. 1346.0.55.002)

SEASONALLY ADJUSTED AND TREND ESTIMATES continued	<ul> <li>for ARIMA modelling, see <i>Feature article: Use of ARIMA modelling to reduce revisions</i> in the October 2004 issue of <i>Australian Economic Indicators</i> (cat. no. 1350.0)</li> <li>for trend estimates methods, see <i>Information Paper: A Guide to Interpreting Time Series – Monitoring Trends</i> (cat. no. 1349.0)</li> <li>alternatively contact the Assistant Director, Time Series Analysis on (02) 6252 6345 or e-mail: <i>time.series.analysis@abs.gov.au</i>.</li> </ul>
ECONOMIC TERRITORY	<ul> <li>21 In accordance with BPM6 definitions, Australia's economic territory, on a balance of payments basis, is the area under the effective control of the Australian government. It includes the land area, airspace, territorial waters, including jurisdiction over fishing rights and rights to fuels and minerals. Australian economic territory also includes territorial enclaves in the rest of the world. These are clearly demarcated areas of land, located in other countries and which are owned or rented by the Australian government for diplomatic, military, scientific or other purposes. Specifically, the economic territory of Australia consists of:</li> <li>a Geographic Australia which includes Cocos (Keeling) Islands and Christmas Island;</li> <li>Norfolk Island;</li> <li>Australian Antarctic Territory;</li> <li>Heard Island and McDonald Islands;</li> <li>Territory of Ashmore Reef and Cartier Island;</li> <li>Coral Sea Islands;</li> <li>Australia's territorial enclaves overseas; and</li> <li>the Joint Petroleum Development Area (joint territory between Australia and East Timor (Timor–Leste)).</li> </ul>
	<b>22</b> Because of administrative complexities and measurement difficulties, Norfolk Island transactions with the rest of the world will not always be captured in all relevant balance of payments statistics. Most of the transactions involving Norfolk Island are not material to Australia's trade performance and not capturing these transactions will not distort these statistics. However, any significant transactions will be identified and included in the relevant statistics.
COMMODITY BREAKDOWN OF GOODS	<b>23</b> For details of the classifications used to present goods exports (credits) and imports (debits) on a balance of payments basis, see tables 6.6 and 6.7, respectively, in <i>Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods</i> (cat. no. 5331.0).
	<b>24</b> The international merchandise trade statistics shown in tables 12 and 13 are classified by the Standard International Trade Classification (SITC). Imports and exports of goods at a more detailed level are available from the time series spreadsheets on the ABS website. All data from July 2005 are presented according to SITC Rev 4 and data prior to July 2005 are presented according to SITC Rev 3. For details refer to the 'Classifications and Standards Update' in the July 2008 issue of this publication.
MONTHLY SERVICES SERIES	<b>25</b> Monthly indicators for many of the services components that are only surveyed quarterly are not available. Monthly estimates for the freight and other transportation components of services credits in table 9 are derived by dividing the quarterly estimate by three. Freight debits are derived directly from imports data for the reference month as a difference between total merchandise cost, insurance and freight (CIF) and free on board (FOB), adjusted to reflect timing and processing adjustments. For freight credits and other transportation credits and debits, estimates are derived by extrapolating the last quarter's data by an average of movements for the same quarter over the three same quarter over the previous three years, and then dividing the estimate by three.

CONFIDENTIALITY O	F
MERCHANDISE TRAI	DE
STATISTICS	

**26** The release of statistics for certain merchandise trade commodities is restricted in order to prevent the identification of the activities of an individual business, where this is requested by the business concerned. These restrictions do not affect the total value of exports and imports, but they can affect statistics at the country, state and commodity levels. Imports data that have the confidentiality restrictions 'No commodity details' or 'No value details' are aggregated into a single confidential commodity code. For data prior to September 2008, these data are added back into the appropriate state total and country total (i.e. these totals show the correct level of trade). From September 2008 these confidential data are not added back. Instead the confidential data are published as 'No country details' in the country totals and 'State not available for publication' in the state totals. Therefore, country and state totals from September 2008 may not represent the actual amount of trade in each country/state but only the trade in commodities without a 'No commodity details' or 'No value details' restriction. For information on the confidentiality restrictions applied to the merchandise trade statistics in this publication, refer to the current issue of International Merchandise Trade: Confidential Commodities List (CCL) (cat. no. 5372.0.55.001).

**TOURISM RELATED SERVICES 27** The tourism related services memorandum items provide timely indicators of the movements in tourism related activities, not an absolute measure of the level of these activities. The tourism related indicator has been derived by combining total travel services (business, education–related and other personal travel) and passenger transportation services (which includes agency fees and commissions for air transport).

SERVICES BY STATE AND BY28Annual services data by state, by country and detailed services are released twice<br/>yearly. Calendar year data are usually released following the March issue of this<br/>publication and financial year data are usually released following the September issue.<br/>Refer to time series data under trade in services data cubes for details.

**29** Services credits are classified by the state of provision, while services debits are classified by the state of consumption. The state allocations for transportation, travel, postal and courier, and telecommunication services are based on a number of indicators including merchandise trade statistics by state, overseas passenger arrivals and departures by state of clearance and data provided by the Department of Immigration and Citizenship. The allocation for other services (about 25% of all trade in services) is primarily based on the location of the business reporting the information, which serves as a proxy for the state of provision/consumption of that service. The data should be used with care but are considered suitable for analysis over time.

**30** A comprehensive explanation of the data sources used and the methodology applied in the compilation of partner country statistics is provided in Chapter 17 of *Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods* (cat. no. 5331.0). Approximately 5% of total services credits and debits for both 2009–10 and 2010–11 were either confidential, or unable to be allocated to individual countries.

ABS DATA AVAILABLE **31** More detailed balance of payments and international merchandise trade data, including forward seasonal factors are available as time series spreadsheets or data cubes from the ABS website. Merchandise trade data by commodity, country and state that are not on the ABS website may be available on request. Inquiries should be made to the National Information and Referral Service as shown on the back of this publication.

RELATED PRODUCTS AND**32** Users may also wish to refer to the following publications which can bePUBLICATIONSdownloaded free of charge from the ABS website by using the 'Statistics' tab and<br/>selecting the relevant catalogue number:
