## OCTOBER KEY POINTS

## TREND ESTIMATES

- The provisional trend estimate of the balance on goods and services is a deficit of $\$ 370$ million in October 2000, a decrease of $\$ 204$ million on the deficit in September.
- Goods and services credits rose $\$ 224$ million (2\%), while debits rose $\$ 20$ million.
- The trend calculations exclude an 'Olympics effect'. See notes on page 2.

## SEASONALLYADJUSTEDESTIMATES

- In seasonally adjusted terms, the balance on goods and services is a surplus of $\$ 324$ million, down $\$ 342$ million on the surplus in September.
- Goods and services credits fell $\$ 411$ million (3\%). Non-rural and other goods exports were up $\$ 561$ million (8\%), largely reflecting higher crude oil and metals (excl. gold) exports. Rural goods rose $\$ 138$ million ( $6 \%$ ). Services credits were down $\$ 1,110$ million (29\%). The net effect of the Olympics included in October was $\$ 160$ million, down from the September figure of $\$ 1,400$ million. See notes on page 2.
- Goods and services debits fell $\$ 69$ million (1\%). A decrease in imports of intermediate and other merchandise goods, down $\$ 172$ million (3\%), was partly offset by an increase in capital goods, up $\$ 107$ million (5\%), largely reflecting higher telecommunications equipment imports. Services debits were flat at $\$ 2,710$ million.

## ORIGINALESTIMATES

- In original terms, the balance on goods and services in October is a deficit of $\$ 643$ million, a turnaround of $\$ 950$ million on the surplus in September.
- Exports of goods to our major south east Asia and north Asia trading partners rose $7 \%$. Exports to other destinations rose $9 \%$. See page 4 for details.

## Revisions

In original terms, revisions due to the incorporation of the latest available data on insurance have reduced the deficit on goods and services:

- by $\$ 87$ million for 1999-2000; and
- by $\$ 36$ million for the 3 months to September 2000.

## Imports deflators

The telecommunications equipment deflator is now chained at the component level, rather than as an aggregate, to correct anomalous movements in the deflator in recent quarters that were caused by compositional change. The revised deflator for telecommunications equipment for the four quarters of 1999-2000 will be incorporated in the September quarter 2000 issue of Balance of Payments and International Investment Position, Australia (5302.0). Revisions to earlier periods are less significant and will not be incorporated until the June quarter 2001 issue of 5302.0. The revised deflators for 1999-2000 are

|  | $\begin{aligned} & \text { Sep qtr } \\ & 1999 \end{aligned}$ | $\begin{aligned} & \text { Dec qtr } \\ & 1999 \end{aligned}$ | Mar qtr | $\begin{aligned} & \text { Jun qtr } \\ & 2000 \end{aligned}$ |

| Telecommunications equipment | 97.2 | 94.4 | 94.1 | 99.9 |

In original terms, the October 2000 estimate for services credits includes $\$ 160$ million which is the combined impact of Olympic visitors on travel estimates ( $\$ 100$ million) and Olympic-related audio-visual services ( $\$ 60$ million). See the feature article in the July 2000 issue of this publication for further details. This $\$ 160$ million, and the $\$ 1,400$ million of Olympic-related services credits in September, which are not seasonally adjusted, are included in the seasonally adjusted series but excluded from the calculation of trend estimates.

## R.W. Edwards

Acting Australian Statistician

## ANALYSIS AND COMMENTS

BALANCE ON GOODS AND SERVICES

EXPORTS OF GOODS AND SERVICES

The trend estimate of the balance on goods and services is a deficit of $\$ 370$ million in October, an decrease of $\$ 204$ million on the deficit in September. The irregular effects of the Olympics have been excluded from the calculation of the trend estimates.

In seasonally adjusted terms, this balance is a surplus of $\$ 324$ million, down $\$ 342$ million on the surplus in September.

The trend estimate of goods and services credits rose $\$ 224$ million to $\$ 12,445$ million with rises in both rural goods and non-rural goods, and in services.

In seasonally adjusted terms, goods and services credits fell $\$ 411$ million to $\$ 13,154$ million. Goods credits rose $\$ 699$ million, with non-rural goods up $\$ 437$ million (6\%) due in part to increased exports of crude oil and metals (excl. gold). Rural goods were up $\$ 138$ million ( $6 \%$ ) to $\$ 2,539$ million. Services credits were down $\$ 1,110$ million (29\%), with the Olympics effect in October at $\$ 160$ million, down $\$ 1,240$ million on the effect in September.

GOODS CREDITS

SERVICES CREDITS

RURAL GOODS The trend estimate of rural goods rose $\$ 77$ million to $\$ 2,461$ million. In seasonally adjusted terms, rural goods rose $\$ 138$ million (6\%) to $\$ 2,539$ million.

Rural goods, in original terms, rose $\$ 194$ million ( $8 \%$ ) to $\$ 2,483$ million. The main rises were in:

- wool and sheepskins, up $\$ 87$ million (29\%), due mainly to increased volumes of greasy wool exports; and
- meat and meat preparations, up $\$ 83$ million (19\%), mainly attributed to higher export volumes of beef and veal.

## ANALYSIS AND COMMENTS

NON-RURAL AND The trend estimate of non-rural and other goods rose $\$ 144$ million to $\$ 7,449$ million. In OTHER GOODS seasonally adjusted terms, non-rural and other goods rose $\$ 561$ million (8\%) to $\$ 7,850$ million.

Non-rural and other goods in original terms rose $\$ 627$ million (8\%) to $\$ 8,131$ million. Non-rural goods rose $\$ 503$ million with the largest increases in:

- metals (excl. gold), up $\$ 181$ million ( $24 \%$ ) to $\$ 920$ million, mainly due to higher exports of non-ferrous metals, with two thirds of the increase due to higher aluminium export volumes;
- other mineral fuels, up $\$ 117$ million ( $10 \%$ ) to $\$ 1,286$ million. Exports of crude oil rose $\$ 267$ million, with three quarters of this increase attributable to higher volumes; and
- metal ores and minerals, up $\$ 116$ million (10\%) to $\$ 1,321$ million.

Other goods rose $\$ 124$ million ( $23 \%$ ) to $\$ 656$ million, due mainly to non-monetary gold exports increasing $\$ 96$ million to $\$ 510$ million.

MERCHANDISE EXPORTS BY COUNTRY

The table below shows Australia's recorded merchandise exports for the 9 months to October 2000 (in original terms, not adjusted for BOP purposes) to 10 selected south east Asia and north Asia trading partners. Movements in the individual series reflect a range of seasonal and irregular influences. In October, exports to selected Asian destinations were up $7 \%$ on the previous month. Exports to other countries rose $9 \%$. There were significant rises in exports to Korea, up $\$ 227$ million ( $37 \%$ ) on a low September figure, Taiwan, up $\$ 112$ million (24\%) and China, up $\$ 88$ million ( $16 \%$ ). Exports to Japan fell $\$ 113$ million (5\%), from the record high in September. There were also falls in exports to Malaysia, down $9 \%$ and Hong Kong, down $8 \%$. Overall, exports to the group of 10 countries listed below is up $35 \%$ for the 10 months to October 2000 compared with the 10 months to October 1999, while exports to all other countries are up $21 \%$ over the same period. Comparing these periods after excluding gold, exports to the selected Asian destinations rose $37 \%$ while exports to the rest of the world rose $22 \%$.

AUSTRALIA'S MERCHANDISE EXPORTS(a) TO SELECTED MAJOR TRADING PARTNERS

## ANALYSIS AND COMMENTS

MPORTS OF GOODS AND SERVICES

The trend estimate of goods and services debits rose $\$ 20$ million to $\$ 12,815$ million. Goods debits were almost unchanged at $\$ 10,126$ million while services debits rose slightly to $\$ 2,689$ million.

In seasonally adjusted terms, goods and services debits fell $\$ 69$ million to $\$ 12,830$ million. Goods fell $\$ 74$ million (1\%) to $\$ 10,120$ million. A fall in intermediate and other goods, down $\$ 172$ million ( $3 \%$ ) to $\$ 4,926$ million, was partly offset by a rise in imports of capital goods, up $\$ 107$ million (3\%) to $\$ 2,268$ million. Services debits rose slightly to $\$ 2,710$ million.

GOODS DEBITS

CONSUMPTION GOODS The trend estimate of consumption goods rose $\$ 12$ million to $\$ 2,966$ million in October. In seasonally adjusted terms, consumption goods fell $\$ 9$ million to $\$ 2,926$ million.

Consumption goods, in original terms, rose $\$ 338$ million (11\%) to $\$ 3,416$ million. The largest increases were in non-industrial transport equipment, up $\$ 90$ million (11\%) to $\$ 894$ million, mainly due to a rise in imports of passenger motor vehicles; consumption goods n.e.s., up $\$ 81$ million (9\%) to $\$ 985$ million; and toys, books and leisure goods, up $\$ 58$ million (18\%) to $\$ 386$ million.

CAPITAL GOODS The trend estimate of capital goods fell $\$ 12$ million to $\$ 2,260$ million. In seasonally adjusted terms, capital goods rose $\$ 107$ million (5\%) to $\$ 2,268$ million.

Capital goods, in original terms, rose $\$ 164$ million ( $8 \%$ ) to $\$ 2,345$ million. The largest increases were in telecommunications equipment, up $\$ 169$ million (47\%) to $\$ 530$ million; and machinery and industrial equipment, up $\$ 58$ million (8\%) to $\$ 792$ million. These rises are partially offset by a decrease in civil aircraft, down $\$ 78$ million (84\%) to $\$ 15$ million.

INTERMEDIATE AND OTHER GOODS

In October the trend estimate of intermediate and other goods fell $\$ 2$ million to $\$ 4,900$ million. In seasonally adjusted terms, intermediate and other goods fell $\$ 172$ million (3\%) to $\$ 4,926$ million.

Intermediate and other goods, in original terms, rose $\$ 350$ million (7\%) to $\$ 5,306$ million. The largest increases were in fuels and lubricants, up $\$ 215$ million (27\%) to $\$ 1,023$ million, mainly due to increased crude petroleum import volumes and prices; and processed industrial supplies n.e.s., up $\$ 103$ million ( $11 \%$ ) to $\$ 1,040$ million. These increases were partly offset by a fall in organic and inorganic chemicals, down $\$ 171$ million (39\%) from a record high in September to $\$ 269$ million.

|  | (a) These exchange rates and the trade-weighted index are derived using rates provided by the Reserve Bank of Australia in respect of each trading day. |  |  | (b) May 1970=100. The Trade Weighted Index is reweighted annually (on 1 October) and on special occasions as required. |  |  |

## EXPLANATORYNOTES

| INTRODUCTION | 1 This publication contains preliminary estimates of Australia's international trade in goods and services on a balance of payments basis. These estimates form part of Australia's balance of payments statistics. <br> 2 More comprehensive quarterly estimates of Australia's trade in goods and services, together with comprehensive details of Australia's balance of payments and international investment position statistics are included in the quarterly publication, Balance of Payments and International Investment Position, Australia (Cat. no. 5302.0). |
| :---: | :---: |
| CONCEPTS, SOURCES AND METHODS | 3 The conceptual framework used in Australia's balance of payments and international investment position statistics is based on the Fifth Edition of the International Monetary Fund's Balance of Payments Manual (BPM5, 1993). Descriptions of the underlying concepts and structure of the balance of payments and international investment position, and the sources, methods and terms used in compiling the estimates are presented in Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods (Cat. no. 5331.0), which was released on 22 September, 1998. |
| RELIABILITY AND VOLATILITY | 4 Care should be exercised in interpreting month-to-month movements in original and seasonally adjusted series as short-term movements cannot be assumed to indicate changes in trend. The monthly estimates are volatile, being subject to seasonal factors (except where adjusted in Table 1) and large irregular influences. The irregular influences may reflect both random economic events and difficulties of statistical recording. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that the month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour. For example, irregular factors unrelated to the trend account for more than half the seasonally adjusted monthly movements with the following frequency: <br> balance on goods and services: 9 in 10 months <br> goods and services credits: 8 in 10 months <br> goods and services debits: 8 in 10 months. |
| TREND ESTIMATES | 5 The trend estimates are derived by applying a 13-term Henderson moving average to the seasonally adjusted series. The 13 -term Henderson average (like all Henderson averages) is symmetric, but as the end of a time series is approached, asymmetric forms of the average are applied. While the asymmetric weights enable trend estimates for recent months to be produced, it does result in revisions to the estimates for the most recent six months (the most recent three months in particular) as additional observations become available. There may also be revisions because of changes in the original data and as a result of the re-estimation of the seasonal factors. Details of trend-cycle weighting patterns are available on request from Time Series Analysis Section on Canberra (02) 62526076. |
| SEASONAL ADJUSTMENT | 6 The factors used in seasonally adjusting the monthly goods and services statistics can be obtained from Balance of Payments Section on Canberra (02) 6252 5878. There is a charge for this service. |
| SIGN CONVENTION | 7 In keeping with balance of payments conventions, credit entries are shown without sign and debit items are shown as negative entries. However, references to debit items in Key Figures, Key Points, and Analysis and Comments are made without regard to sign. |

## EXPLANATORYNOTES

COMMODITY BREAKDOWNS OF GOODS

COMMODITY BREAKDOWNS OF SERVICES

RELATED PRODUCTS AND SERVICES

8 For details of the classification used for rural and non-rural goods see Table 6.6 in Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods (Cat. no. 5331.0).

9 Table 6.7 in 5331.0 provides details of the classification used for goods debits. Most of the 25 commodity groups shown in Table 4 for merchandise goods debits are further sub-divided into a total of 106 commodity sub-groups. Although the information at this level is not published, it is available as a special data service, and can be obtained from Balance of Payments Section on Canberra (02) 62527630.

10 For more information on the commodity classification of merchandise goods debits, refer to Information Paper: Change to Commodity Classification of Merchandise Imports in Balance of Payments Publications (Cat. no. 5344.0).

11 The quarterly detailed services data published in Table 6 are consistent with the monthly aggregates shown in Table 5. A further 14 sub-commodities are available on request. Detailed annual data are published for 61 services commodities, and a further 4 are available. Services trade data by major partner countries and by Australian State of production/consumption are also published annually. Additional detail and additional presentations of the data may be available on request. For further information contact Balance of Payments Section on Canberra (02) 62525336.

12 Monthly indicators for many of the services components that are surveyed only quarterly are not available. In particular, the Freight and Other transportation components of Total services credits are not available for publication on a monthly basis. Therefore the estimates for these items shown in Table 5 are derived by dividing the quarterly estimate by three.

13 Detailed data of exports and imports of goods dissected by commodity and country are available on an international trade basis by contacting the National Information Service. Contact details are shown on the back of this publication. There may be a charge for this information, depending on the volume of data requested.

14 Users may also wish to refer to the following publications which are available from ABS Bookshops:

- Balance of Payments and International Investment Position, Australia (Cat. no. 5302.0)—issued quarterly
- Balance of Payments and International Investment Position, Australia: Concepts, Sources and Methods (Cat. no. 5331.0)
- Information Paper: Quality of Australian Balance of Payments Statistics (Cat. no. 5342.0)
- International Merchandise Trade, Australia (Cat. no. 5422.0)—issued quarterly
- Information Paper: Implementing New International Statistical Standards in ABS International Accounts Statistics (Cat. no. 5364.0)-irregular, issued on 29 September 1997
- Information Paper: Upgraded Balance of Payments and International Investment Position Statistics (Cat. no. 5365.0)—irregular, issued on 24 November 1997.
n.e.s. not elsewhere specified
n.i.e. not included elsewhere
n.p. not published
.. not applicable

Readers should exercise care in the interpretation of the trend data as the last three observations, in particular, are likely to be revised with the addition of subsequent months' data. For further information, see Explanatory Note 5.

TREND REVISIONS
The graph below presents the effect of two possible scenarios on the previous trend estimates:

1 The November seasonally adjusted estimate of the balance on goods and services 'improves' by $\$ 200$ million when compared with the October seasonally adjusted estimate. (An 'improvement' refers to an increase in a surplus or a decrease in a deficit.)

2 The November seasonally adjusted estimate of the balance on goods and services 'deteriorates' by $\$ 200$ million when compared with the October seasonally adjusted estimate. (A 'deterioration' refers to a decrease in a surplus or an increase in a deficit.)

The change of $\$ 200$ million has been chosen because in the last decade the average monthly movement, without regard to sign, of the seasonally adjusted balance on goods and services series has been approximately $\$ 200$ million.
