NOVEMBER KEY FIGURES

TREND ESTIMATES

Turnover at current prices	Oct 98	Nov 98	% change
(\$ millions)	11 724.1	11 788.3	0.5
	Nov 97	Nov 98	% change
	11 186.6	11 788.3	5.4

SEASONALLY ADJUSTED ESTIMATES

Turnover at current prices	Oct 98	Nov 98	% change
(\$ millions)	11 751.2	11 792.3	0.3
	Nov 97	Nov 98	% change
	11 204 2	11 792 3	5.2

NOVEMBER KEY POINTS

TREND ESTIMATES

- Growth in the trend estimate of turnover for the Australian Retail and Hospitality/Services series has increased by 0.5% in November 1998. For each of the previous four months an increase of 0.6% was recorded.
- Over the three months to November 1998 the trend estimate increased by \$201.0m. The major contributors to this growth were Food retailing (\$64.9m), Hospitality and services (\$59.1m), Recreational good retailing (\$26.8m), Department stores (\$25.7m) and Clothing retailing (\$21.5m).
- The strongest growth for November 1998 was in Victoria, Western Australia and the Northern Territory. Only the Australian Capital Territory was in decline

TAKE CARE!
Trend estimates are revised as new monthly data become available.

SEASONALLY ADJUSTED

The seasonally adjusted series rose by 0.3% in November
 1998. This followed a revised increase of 1.0% in October 1998.

ORIGINAL ESTIMATES

- In original terms, Australian turnover rose by 3.9% over November 1997.
- Chains and other large retailers increased by 5.0% while smaller retailers increased by 2.6% over this same period.

CHANGES IN THIS ISSUE

Revisions have been made to Department stores across all States for October 1998 as a result of receiving amended data for that month.

SAMPLING ERRORS

Standard errors for the Australian estimates (original data) for November 1998 contained in this publication are:

DATA SERIES	ESTIMATE	STANDARD ERROR
Level of retail turnover (\$m)	11 936.7	109.3
Change from October to November (\$m)	-149.8	44.3
% change from October to November	-1.2	0.4

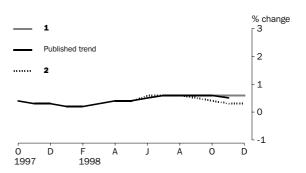

For more information see the Explanatory notes, paragraphs 12–15, or contact Margaret Keenan on 02 6252 5451 $\,$

WHAT IF?

The most recent trend estimates published in this release are likely to be revised when next month's seasonally adjusted estimates become available. To assist readers of this publication in analysing retail trends, the effect of two possible scenarios on the previous trend estimates of the percentage change in retail turnover are presented below.

- ${f 1}$ The December seasonally adjusted estimate of retail turnover is 1.0% higher than the November estimate.
- **2** The December seasonally adjusted estimate of retail turnover is 1.0% lower than the November estimate.

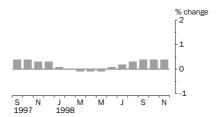

W. McLennan Australian Statistician

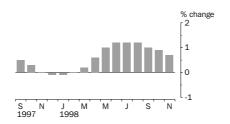

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

NEW SOUTH WALES

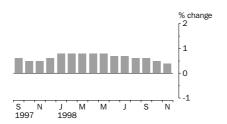

Growth remained steady at 0.4% for each of the past three months. The Hospitality and services, Department store and Clothing groups showed strong growth for the same period.

VICTORIA

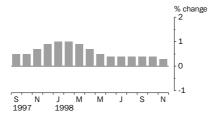

The trend estimate growth rate has eased over recent months. Apart from the Other retailing group, which has strengthened, all industry groups have exhibited a similar pattern.

QUEENSLAND

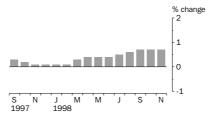

There has been a gradual easing in the growth rate since June 1998 with most industry groups contributing. The Clothing group moved from strong growth earlier in the year to decline.

SOUTH AUSTRALIA

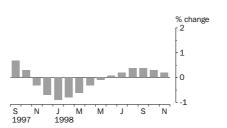

Monthly growth has eased from a strong 1.0% in February 1998 to 0.3% for November 1998. The main contributor to this easing has been the Hospitality and services group.

WESTERN AUSTRALIA

Consistent moderate growth has been observed over recent months. The Other retailing, Hospitality and services and the Clothing groups had the strongest growth in November 1998.

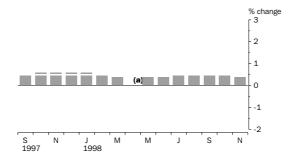

TASMANIA

The trend estimate growth rate has been moderate to weak over recent months. However, growth in the Clothing retailing group was strong.

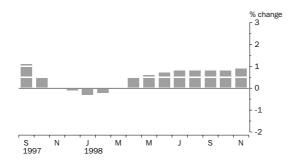

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

FOOD RETAILING

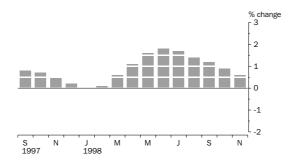

The growth rate for the Food retailing group eased slightly in November 1998. Most States contributed to this easing. Growth was strongest in South Australia. All other States, except the ACT, which was in decline, showed moderate to weak growth.

DEPARTMENT STORES

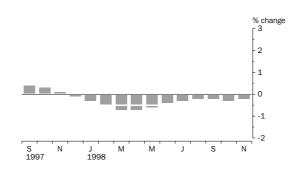

Department store growth rates have remained steady at around 0.8% over the past six months. In November 1998 the strongest growth was recorded in New South Wales, Victoria and Western Australia.

CLOTHING AND SOFT GOOD RETAILING

The growth rate eased over recent months for most States. Growth remained strong in New South Wales, Western Australia, Tasmania and the Northern Territory. All other States recorded growth except Queensland, which was in decline.

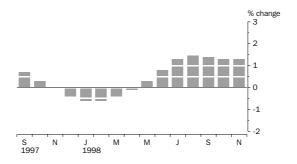

HOUSEHOLD GOOD RETAILING

This industry group has been in decline since December 1997. In November 1998 only Victoria, Queensland and the Northern Territory showed growth. All other States were in decline.

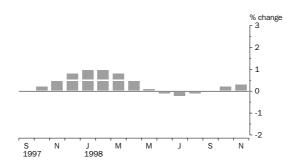

MONTHLY PERCENTAGE CHANGE IN TREND ESTIMATES

RECREATIONAL GOOD RETAILING

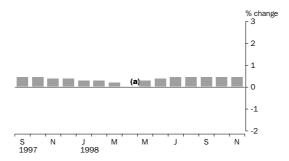

Growth has been consistently strong at around 1.3% since July 1998. The strongest growth was in Queensland, Victoria and the Australian Capital Territory. Only South Australia was in decline.

OTHER RETAILING

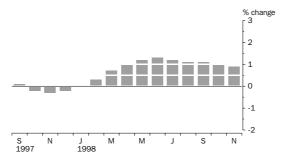

There has been a gradual strengthening from the decline recorded in August 1998 of 0.1% to growth of 0.3% in November 1998. Victoria, South Australia and Western Australian recorded the strongest growth over this period.

TOTAL RETAIL (excluding Hospitality and Services)

In recent months, growth in the trend estimate for Total retail (excluding the Hospitality and services group) has been slightly weaker than that observed for Total industries (including the Hospitality and services group).

HOSPITALITY AND SERVICES

Although easing, growth has been strong in the last eight months. In November 1998 Western Australia, New South Wales and the Australian Capital Territory recorded strong growth, only South Australia was in decline.

⁽a) See paragraph 3 of the Explanatory Notes

INTRODUCTION

- **1** This publication presents monthly estimates of the value of turnover of retail businesses classified by industry, and by State. The principal objective of the Retail Trade survey is to show month to month movement of retail turnover.
- **2** Estimates of turnover contained in this publication are based on a survey of about 7,000 retail and selected service businesses (covering 20,000 outlets). All 'large' businesses are included in the survey, while a sample of about 4,400 'smaller' businesses is selected. The 'large' business' contribution of approximately 54% of the total estimate ensures a highly reliable Australian total turnover estimate.

SCOPE AND COVERAGE

- **3** The Retail Trade survey covers all employing businesses, with at least one retail establishment. The scope of the survey (classified according to the Australian and New Zealand Standard Industrial Classification [ANZSIC]) is detailed below:
- Food Retailing

Supermarkets and grocery stores (5110)

and non-petrol sales of identified convenience stores of petrol stations

Takeaway food retailing (5125)

Other food retailing

Fresh meat, fish and poultry retailing (5121)

Fruit and vegetable retailing (5122)

Liquor retailing (5123)

Bread and cake retailing (5124)

Specialised food retailing n.e.c. (5129)

- Department Stores (5210)
- Clothing and Soft Good Retailing

Clothing retailing (5221)

Other clothing related retailing

Footwear retailing (5222)

Fabric and other soft good retailing (5223)

Household Good Retailing

Furniture and floorcovering retailing

Furniture retailing (5231)

Floor covering retailing (5232)

Domestic hardware and houseware retailing (5233)

Domestic appliance retailing

Domestic appliance retailing (5234)

Recorded music retailing (5235)

Recreational Good Retailing

Newspaper, book and stationery retailing (5243)

Other recreational good retailing

Sport and camping equipment retailing (5241)

Toy and game retailing (5242)

Photographic equipment retailing (5244)

Other Retailing

Pharmaceutical, cosmetic and toiletry retailing (5251)

Other retailing

Antique and used good retailing (5252)

Garden supplies retailing (5253)

Flower retailing (5254)

Watch and jewellery retailing (5255)

Retailing n.e.c. (5259)

SCOPE AND COVERAGE continued

Hospitality and Services

Hotels and licensed clubs

Pubs, taverns and bars (5720)

Clubs (Hospitality) (5740)

Cafes and restaurants (5730)

Selected services

Video hire outlets (9511)

Hairdressing and beauty salons (9526).

DEFINITION OF TURNOVER

4 Turnover includes retail sales; wholesale sales; takings from repairs, meals and hiring of goods (except for rent, leasing and hiring of land and buildings); and commissions from agency activity (e.g. commissions received from collecting dry cleaning, selling lottery tickets, etc.) and net takings from gaming machines etc.

SEASONAL ADJUSTMENT

- **5** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences can be more clearly recognised.
- **6** In the seasonal adjustment of the turnover estimates, account has been taken of both normal seasonal factors and 'trading-day' effects (arising from the varying length of each month and the varying numbers of Sundays, Mondays, Tuesdays, etc. in the month). There is some evidence suggesting possible changes in retail trading patterns, including increased activity on weekends and public holidays. The impact of these changes on the seasonal pattern and trading day component of the data is being investigated and can only be confirmed once sufficient data becomes available. While these changes may impact on the unadjusted and seasonally adjusted data, the trend estimate is less likely to be affected. Further, the seasonal adjustment does not remove from the series the effect of irregular influences (e.g. abnormal weather, industrial disputes). The seasonally adjusted estimates still reflect the sampling and non-sampling errors to which the original estimates are subject.
- **7** The State component series have been seasonally adjusted independently. Therefore, the adjusted components may not add to the Australian Group totals.
- **8** As happens with all seasonally adjusted series, the seasonal factors are reviewed annually to take account of each additional year's data. For Retail Trade, the results of the latest review are shown in the July issue each year.

TREND ESTIMATES

- **9** Most monthly trend estimates in this publication have been obtained by smoothing the seasonally adjusted series using a centred 13–term Henderson weighted moving average (7–term for quarterly series). However, to estimate the last six monthly trend values (or the last three quarters) a set of asymmetric moving averages have been designed to reduce a small bias associated with estimating these recent values when the trend growth is increasing or decreasing. Overall, revision to the estimates should be reduced, however, there may be a greater revision to the estimates whenever there are large irregular movements in the seasonally adjusted series.
- **10** For further information, see *A Guide to Interpreting Time Series Monitoring 'Trends': an Overview* (1348.0) or contact the Assistant Director, Time Series Analysis on (02) 6252 6345.

CHAIN VOLUME MEASURES

11 The chain volume measures of retail turnover appearing in the quarterly issue of this publication are annually reweighted chain Laspeyres indexes referenced to current price values in a chosen reference year (currently 1996–97). The reference year will be updated in the June quarter publication each year. Each year's data in the Retail chain volume series are based on the prices of the previous year, except for the quarters of the latest incomplete year (i.e. for the 1998–99 financial year) which are based upon the 1996–97 financial year. Comparability with previous years is achieved by linking (or chaining) the series together to form a continuous time series.

RELIABILITY OF ESTIMATES

12 There are two types of error possible in estimates of retail turnover:

Sampling error which occurs because a sample, rather than the entire population, is surveyed. One measure of the likely difference resulting from not including all establishments in the survey is given by the standard error, see below.

Non sampling error which arises from inaccuracies in collecting, recording and processing the data. The most significant of these errors are: misreporting of data items; deficiencies in coverage; non-response; and processing errors. Every effort is made to minimise reporting error by the careful design of questionnaires, intensive training and supervision of interviewers, and efficient data processing procedures.

STANDARD ERRORS

- **13** Seasonally adjusted and trend estimates and chain volume measures are also subject to sampling variability. For seasonally adjusted estimates, the standard errors are approximately the same as for the original estimates. For trend estimates, the standard errors are likely to be smaller. For chain volume measures, the standard errors may be up to 10% higher than those for the corresponding current price estimates because of the sampling variability contained in the prices data used to deflate the current price estimates.
- **14** To assist users in assessing the reliability of estimates, each data series has been given a grading of A to D. Where:
- A represents a relative standard error on level of less than 2%. The published estimates are highly reliable for movement analysis;
- B represents a relative standard error on level between 2 and 5%, meaning the estimate is reliable for movement analysis purposes;
- C represents a relative standard error on level between 5 and 10%, meaning users are advised to exercise some caution in interpreting movements for such series; and
- D represents a relative standard error on level greater than 10% (mainly affects unpublished state by industry series).

15 The table below provides an indicator of reliability for key retail turnover estimate	15	5 The table below	provides an indicator	of reliability for key	retail turnover estimates

IMPROVEMENTS T	O COVERAGE
----------------	------------

16 The Retail Trade survey, like most ABS economic surveys, takes its frame (i.e. the retail business population) from the ABS Business Register. The frame is updated quarterly to take account of new businesses, cessations and other general business changes. The Business Register primarily sources its information about new businesses from those businesses applying for group employer (GE) registration with the Australian Taxation Office (ATO).

BACKCASTING OF SERIES

- **17** Improvements to coverage were undertaken and introduced to the retail trade series from the July 1997 issue. The series was backcast to 1982.
- **18** The improvements focused on accounting for the impact of businesses known to be missing from the Business Register, and the inclusion of an allowance for the time it takes for a newly registered business to get on to a survey frame.

FURTHER INFORMATION

19 For more information on these adjustments see any one of the July to October 1997 issues of this publication, or the ABS Information paper—*Improvements to ABS Economic Statistics* 1997 (1357.0).

UNPUBLISHED DATA

20 The Retail Survey Special Data Service provides additional retail trade statistics which include further State industry dissections through to 'top ten' industry reports. For more information, contact the Retail Trade Special Data Services manager on (02) 6252 5220.

RELATED PUBLICATIONS

21 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products, Australia* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.
