Preliminary information

Q1. In which state or territory are you/your organisation based?

- ACT
- NSW
- Victoria
- Queensland
- South Australia
- Western Australia
- Tasmania
- Northern Australia
- Overseas (Please Specify:)

Note: For organisations with offices at more than one location please tick the state or territory where your head office is located.

Q2. Are you completing this questionnaire as a private individual or as a representative of an organisation?

- Private individual – not representing any organisation
- Representative of an organisation

Q3. Which sector best describes your organisation?

- Government Sector – Federal
- Government Sector – State
- Government Sector – Local
- Private sector (fewer than 20 employees)
- Private sector (20 or more employees)
- Other (please specify):

Views on the proposal to enhance the 2006 Population Census dataset

Proposal 1

The ABS is proposing to create the Statistical Longitudinal Census Dataset (SLCD) by:

- combining data from the 2006 Census with data from future censuses; and
- combining data from the 2001 Census with data from the 2006 Census.

Data would be brought together without using name and address, using statistical techniques. Name and address would be destroyed after census processing. The SLCD would be for statistical use only and no identifiable data would be released from the ABS.

The reasons for the ABS considering this proposal are explained in the Discussion Paper in Section 2.

Q4. Do you, or does your organisation, support Proposal 1 if 2006 Census data are combined with data from future censuses?

- Yes
- No
- Don't Know

Q5. What are your reasons?

As a health service provider to culturally and linguistically diverse communities the Multicultural Health Unit would be better informed through a comprehensive longitudinal picture of the changes in populations and communities. This data would facilitate a more targeted approach in developing and tailoring services to meet their needs.

Q6. Do you, or does your organisation, support Proposal 1 if 2001 Census data are combined with data from the 2006 Census?

- Yes
- No
- Don't Know

Q7. What are your reasons?

Provision and use of the 2001 Census adds to the data and begins to improve the knowledge for planning and allocation of resources.

Proposal 2

The ABS is proposing to make the SLCD available for use in conjunction with other ABS statistical collections, such as ABS household surveys, using statistical techniques. Use would be for

statistical purposes only, with no identifiable data released outside the ABS.

The reasons for the ABS considering this proposal are explained in the Discussion Paper in Section 3.

Q8. Do you, or does your organisation, support Proposal 2?

- Yes
- No
- Don't Know

Q9. What are your reasons?

Again, further data would enable the service to refine its information and help to ensure scarce resources are allocated on a 'needs basis'.

Proposal 3

The ABS is proposing to make the SLCD available for use, in conjunction with selected non-ABS datasets. These datasets are birth and death register data, long-term immigration data and national disease registers. This would involve using statistical techniques to bring the datasets together. Use would be for statistical purposes only, and no identifiable data would be released from the ABS.

The reasons for the ABS considering this proposal are explained in the Discussion Paper in Chapter 4.

Q10. Do you, or does your organisation, support Proposal 3?

- Yes
- No
- Don't Know

Q11. What are your reasons?

As for Proposal 2

Proposal 4

(a) The ABS is proposing to use name and address information, available at the time of census processing, to bring together the 2006 Population Census data with the ABS' 2006 Agricultural Census.

Name and address information used in combining the data would be destroyed on completion of census processing. The dataset would be used for statistical purposes only, and no identifiable data would be released from the ABS.

The reasons for the ABS considering this proposal are explained in the Discussion Paper in Section 5.

Q12. Do you, or does your organisation, support Proposal 4(a) if the ABS used 2006 Population Census data with 2006 Agricultural Census data?

- Yes
- No
- Don't Know

Q13. What are your reasons?

The use of agricultural data in conjunction with the population Census has the possibility of providing better information on people employed in that industry who are of CALD background. The current census provides very limited information on the employment status of people employed from CALD backgrounds and in particular women from CALD backgrounds working in the industry.

(b) For quality studies and other particular statistical studies, the ABS proposes to consider the use of name and address information available at the time of census processing to bring together 2006 Population Census data with other selected datasets, namely ABS household surveys, birth and death register data, long-term immigration data and national disease register data.

Any datasets created for these statistical studies would be kept for a limited time and destroyed after completion of each project. Census name and address information would be destroyed on completion of census processing. No identifiable data would be released from the ABS.

The reasons for the ABS considering this proposal are explained in the Discussion Paper in Section 5.

Q14. Do you, or does your organisation, support Proposal 4(b) if the ABS used 2006 Population Census data with these additional datasets?

- Yes
- No
- Don't Know

Q15. What are your reasons?

The proposed Privacy Impact Assessment and other protective measures to be implemented appear to be adequate protection to the general public.

Privacy and Confidentiality

The ABS abides by a range of privacy and confidentiality provisions. These are discussed in Section 6 of the Discussion Paper.

Q16. Are there any additional procedures or protocols you would like the ABS to consider?

No

Statistical user requirements

Q17. If the ABS adopted any of these proposals, would you, or your organisation, be likely to apply to use the SLCD, either in its own right or in conjunction with one of the other datasets specified in the Discussion Paper?

- Yes
- No
- Don't Know

Q18. If yes, what types of projects would you use the datasets for, why would you need the SLCD (or a combination of the SLCD and other datasets) and if known, which data items would you need?

As all projects developed in this Unit target people from Non - English speaking backgrounds. Any data which would enhance our knowledge will be of benefit. In particular, information on employment and CALD background women would enable better planning.

General comments

Q19. Do you have any other comments on the proposal to enhance the census dataset?

no
