USUAL RESIDENTS COMMUNITY PROFILE EXPLANATORY NOTES
.....

INTRODUCTION

- 1. The Usual Residents Community Profile differs from other Census Community Profiles in that it provides data based on where people 'usually' live or their 'usual address' rather than where they were counted on Census night.
- 2. 'Usual' address is that address at which the person lived or intended to live for a total of 6 months or more in 1996.
- 3. This profile provides 26 tables based on Usual Residents of Statistical Local Areas (SLAs) and aggregates of SLAs and is available for the following geographic levels: SLA, LGA, SSD, SD, S. Dist., Postcode of Usual Residence, State and Australia.
- 4. Information was collected from the 1996 Census of Population and Housing.
- 5. Each table title in the Usual Residents Community Profile consists of two parts. The first part lists the variables used in the table. The second part describes the table population.
- 6. A glossary of terms and concepts used in the Usual Residents Community Profile appears below.

7. For more information on classifications and Census concepts, see the 1996 Census Dictionary (Cat. No. 2901.0).

GLOSSARY

Aboriginal and/or Torres Strait Islander Origin

8. The 1996 Census was the first Census to allow a person's origin to be recorded as both Aboriginal and Torres Strait Islander; prior to this only one or the other could be reported.

Employed full-time/part-time

9. Employed full-time means that the person worked 35 hours or more in all jobs held during the week prior to Census night. Employed part-time means that the person worked less than 35 hours in all jobs during the week prior to Census night.

10. For Census purposes, people who stated they were employed, but worked zero hours in the week prior to Census night have been coded to 'employed part-time'.

Nfd

11. Nfd means 'not further defined'.

Postcode of Usual Residence

12. POCUCP is derived from the postcode of usual residence as reported by the respondent in answer to question 7 on the Population Census form. POCUCP comprises all Australia Post postcodes (except secondary postcodes) valid at the time of the Population Census plus several codes used to classify uncodeable responses. The total of the States do not add up to the Australian total because some postcodes cross State borders. A postcode can be counted in several states.

Social Marital Status

13. Social Marital Status is the relationship status of an individual with reference to another person who is usually resident in the household. A marriage exists when the two people live together as husband and wife, or partners, regardless of whether the marriage is formalised through registration. In the 1996 Census, where information about same-sex couples is volunteered in the relationship question, it is included in the family coding and classified as a partner in a de facto marriage.

Table Population

14. Table population is a description of what the table is counting. For example, tables containing marital status usually have a table population of persons aged 15 years and over. It appears under the table title.

USUAL RESIDENTS COMMUNITY PROFILE EXPLANATORY NOTES

DATA QUALITY	15. The Census is subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing of the data. Some of these are overcome or 'repaired' by careful processing procedures and quality management of the processing itself. The effect of those that remain is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:
Partial non-response	16. In some cases where an answer was not provided to a question an answer was imputed or derived (often from other information on the form). In other cases a 'not stated' code was allocated.
Processing error	17. While such errors can occur in any processing system, quality management is used to continuously improve the quality of processed data, and to identify and correct data of unacceptable quality.
Usual Residence	18. A minor processing error has been identified in the variables Usual Residence Indicator One Year Ago (UAI1P) and Usual Residence Indicator Five Years Ago (UAI5P). For further information on the nature and extent of the error, please contact the ABS and request a copy of Census Fact Sheet 9.

DATA QUALITY (cont'd)	
Random adjustment	19. Cells containing small values are randomly adjusted to avoid releasing information about particular individuals, families or households. The effect of random adjustment is statistically insignificant.
Respondent error	20. Processing procedures cannot detect or repair all errors made by persons in completing the form, therefore some may remain in final data.
Undercount	21. Although the Census aims to count each person once, there are some people who are missed and others who are counted more than once. A post enumeration survey is conducted soon after the Census to measure the undercount. 22. Further information on data quality will be provided progressively in Census Update and in the 1996 Census fact sheets and working papers.

U01 SELECTED CHARACTERISTICS

All persons

	Male	Female	Persons
Total persons			
Counted at home on Census night			
Aged 15 years and over			
Australian born			
Born overseas:			
Canada, Ireland, NZ, South Africa, UK(a) and USA			
Other country(b)			
Total			
Speaks English only and aged 5 years and over
