DEMOGRAPHY

1967 AND 1968

BULLETIN No. 85

PREPARED UNDER INSTRUCTIONS FROM THE HONOURABLE THE TREASURER

BY

J. P. O'NEILL

ACTING COMMONWEALTH STATISTICIAN

Reference No. 4.9

PREFACE

This Bulletin, which is the eighty-fifth in the series, furnishes detailed statistics relating to the years 1967 and 1968. Some comparative tables showing particulars for earlier years are included in each Section, but where the comparison is on the basis of individual years the period covered is necessarily limited. The more widely used totals and rates for each State and Territory for each year from 1901 to 1968 are given in a separate Statistical Summary included as Section VIII.

The detailed tables on causes of death which were included in this bulletin up to issue No. 80, which contained 1962 figures, are published in a separate bulletin *Causes of Death*.

Summary tables on causes of death classified according to the Abbreviated List of 60 Causes of the World Health Organisation's International Classification of Diseases (ICD) are included in this bulletin. The Eighth Revision of the ICD was used for the first time to classify deaths registered in 1968. Hence, cause of death figures for 1968 are not directly comparable with figures for 1967 and earlier years. To provide a link between the Eighth and Seventh Revisions, 1967 deaths, previously published according to the Seventh Revision of the I.C.D., have been reclassified according to the Eighth Revision. These figures have been published in summary form in the mimeograph publication *Deaths 1969* (Reference No. 4.8), and will be published in more detail in the 1969 Causes of Death bulletin (Reference No. 4.7).

Thanks are expressed to the Deputy Commonwealth Statisticians, the State Government Departments responsible for the registration of births, deaths and marriages, and the Department of Territories for the valuable assistance rendered by them in furnishing the data for the compilation of the vital statistics.

DEMOGRAPHY

SECTION I. POPULATION

For dates subsequent to the Census of 30 June 1966 the estimated population for Australia as a whole takes account of natural increase and net overseas migration since the Census.

The estimated population for each State or Territory represents the population ascertained at the Census plus recorded natural increase and recorded net gain from overseas migration for that State or Territory; gains and corresponding losses that result from movements between States and Territories are also taken into account in so far as they are recorded as transfers of State of residence under child endowment procedures or Commonwealth electoral procedures supplemented by results of any special count or sample survey. Holiday, business or other similar short-term movements between States and Territories are not taken into account. As records of migration by State or Territory are not complete, the estimated State and Territory populations so derived are approximate and are subject to revision when the actual population of each State is ascertained at the next Census.

The method represents a change from the former method of estimating State populations. The former method was based on the addition to Census population figures of natural increase and all net recorded movement from overseas according to State of embarkation/disembarkation as well as all net recorded movement by air, rail, sea and bus between States. The 1966 Census has confirmed that, despite very considerable efforts made to improve recording of interstate movements, it is not possible to measure such movements with the desired accuracy. The method now adopted, tested over the 1961 to 1966 intercensal period, appears to provide a more accurate result. It was therefore adopted for intercensal revision of the population (from 30 June 1961) and will be used from now on until the Census of 1971.

As a consequence of the omission of holiday, business or other similar short-term movements between States and Territories the marked seasonal movements in the population of some States due to interstate holiday movements are not reflected in the estimates since June 1961. However, two aspects of seasonal movements are reflected in the estimated populations of the States. These are:

- (i) People who were on holiday or other short-term travel interstate at the time of the Census are counted in the State where they spent Census night;
- (ii) There is some seasonal movement in the population of Australia as a whole which is due to movements of tourists and other visitors from overseas and of Australians travelling overseas for short periods.

The estimates of population herein include the first estimates to be made for a date subsequent to the repeal, in 1967, of Section 127 of the Constitution, which had required that in reckoning the numbers of the people of the Commonwealth, or of a State or other part of the Commonwealth, Aboriginal natives should not be counted. Accordingly, current estimates of population no longer exclude full-blood Aborigines and the series of such estimates has been taken back to 30 June 1961, superseding the corresponding series of estimates in Bulletin No. 84, 1966. Population figures for dates prior to 30 June 1961 (Census) and the detailed analyses of population enumerated at censuses remain as previously published, excluding full-blood Aborigines.

The difference between the population statistics as published herein for dates commencing 30 June 1961, and the statistics previously published for corresponding dates, which exclude full-blood Aborigines, cannot be taken as reliable statistics of Aboriginal population.

Mean populations are calculated for twelve-month periods to provide a satisfactory average basis for calculations requiring allowance for the continuous change in population figures during such periods. From 1901 onwards the mean population for any year has been calculated by the formula:

$$\text{Mean population} = \frac{a + 4b + 2c + 4d + e}{12}$$

where a , b , c , d and e , respectively, are the populations at the end of the quarter immediately preceding the year and at the end of each of the four succeeding quarters; e.g., in the case of a calendar year, 31 December of the preceding year, and 31 March, 30 June, 30 September and 31 December of the year under consideration.

Annual rates of natural increase, net migration and total increase, for single years, represent the increase during the year expressed as a proportion (per cent) of the population at the beginning of the year. These rates are slightly higher than those calculated as a proportion (per cent) of the mean population for the year.

Average annual rates of increase for periods greater than one year have been calculated in the following manner.

The average annual rate of total increase is computed by the formula:

$$P_t = P_o (1 + r)^t$$

where P_o and P_t are the populations at the beginning and end of a t -year period respectively, and r is the average annual rate of growth.

The average annual rate of natural increase and net migration is computed by dividing the average annual rate of total increase between its components in proportion to the fraction of total increase due to each component during the period. Differences between the sum of the rates of natural increase and of net migration and the rate of total increase are due to the intercensal adjustment.

(a) Excludes full-blood Aborigines prior to 30 June 1961. The difference between the statistics as now published for dates commencing 30 June 1961 and the corresponding statistics shown in Bulletin No. 84, 1966 and in Census publications cannot be taken as reliable statistics of the Aboriginal population. (b) Census results. (c) Based on Population Count of Canberra. (d) Includes an estimate for full-blood Aborigines out of contact at the Census. (e) The estimates of the population of the States and Territories at 30 September 1961 and subsequent quarters were prepared using the new method described on page 1, and those for earlier quarters on the basis of the method previously used.

(a) Part of New South Wales prior to 1 January 1911. (b) The mean population for 1962 and later years is calculated from population estimates prepared by the new method described on page 1 and that for 1961 and earlier years on the basis of the method previously used. In addition mean population for 1961 and earlier years excludes full-blood Aborigines.

NOTE. For mean population of each calendar year commencing with 1901, see Section VIII—Statistical Summary.

For a brief explanation of calculating mean population see page 1.

(a) Part of New South Wales prior to 1 January 1911. (b) The mean population for 1961-62 and later years is calculated from population estimates prepared by the new method described on page 1 and that for 1960-61 and earlier years on the basis of the method previously used. In addition mean population for 1960-61 and earlier years excludes full-blood Aborigines.

NOTE. For mean population of each financial year commencing with the year ended 30 June 1901, see Section VIII—Statistical Summary.

For a brief explanation of the method of calculating mean population see page 1.

(a) Includes adjustments to make the series of increases agree with the total intercensal increases revealed by census results. For total increase recorded for each year commencing with 1901, see Section VIII.—Statistical Summary. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) For the purpose of estimating total population increase for the period September 1939 to June 1947, troop movements have been excluded and deaths of Australian defence personnel have been included. However, in tables where the components of total increase are shown separately the figures relating to deaths or natural increase for this period exclude deaths of defence personnel, whether in Australia or overseas (except for 272 male deaths in 1940 and 418 male deaths in 1941, which were registered in civil registers). (e) There is a break in continuity between 1961 and 1962. Total increase for 1962 and later years is calculated from population estimates prepared by the new method described on page 1, and that for 1961 and earlier years on the basis of the method previously used. In addition, total increase for 1961 and earlier excludes full-blood Aborigines.

NOTE. Minus sign (—) denotes decrease.

(a) Excess of births registered over deaths registered. From September 1939 to June 1947 deaths of defence personnel, whether in Australia or overseas, were excluded (except for the deaths of 272 males in 1940 and 418 males in 1941 which were registered in civil registers). Excludes particulars of full-blood Aborigines prior to 1 January 1967. (b) Excess of recorded arrivals over recorded departures. Prior to June 1933 discrepancies disclosed by the various Censuses were corrected by adjusting recorded overseas departures. From September 1939 to June 1947 troop movements were excluded. (c) Includes adjustments to make the series of increases agree with the total intercensal increases revealed by Census results. Excludes full-blood Aborigines for years prior to 1962.

(a) Excess of births over deaths per 1,000 of mean population. For rates of natural increase for each year commencing with 1901, see Section VIII.—Statistical Summary. (b) Included with South Australia prior to 1901. (c) Part of New South Wales prior to 1911. (d) Excess of births over civilian deaths for the period September 1939 to June 1947. (e) There is a break in continuity between 1961 and 1962. Mean population (States and Territories) for 1962 and later years is calculated from population estimates prepared by the new method described on page 1, and that for 1961 and earlier years on the basis of the method previously used. (f) Excludes full-blood Aborigines for years prior to 1967.

NOTE. (1) Minus sign (—) denotes rate of decrease. (2) From 1921 the rates for the Australian Capital Territory are based only on births and deaths registered in the Territory. See NOTE to Table 146, page 150 for an explanation of the effect of this on the rates. Special birth rate figures for all States based on the usual residence of mother are also shown. Similar rates for the Australian Capital Territory to 1960 are published in the NOTE to Table 75, page 51, in Bulletin No. 78, 1960.

(a) The population figures exclude full-blood Aborigines. The differences between the figures shown above for total population and the corresponding population figures shown in other tables herein cannot be taken as reliable statistics of Aboriginal population.

NOTE. For the purpose of presenting population statistics obtained at the census of 30 June 1966, new methods have been used in the delimitation of metropolitan and other urban centres. See *Explanatory Notes on the Delimitation of Urban Boundaries for Statistical Purposes, 1966 Census Field Count Statement No. 4*, pp 2-4.

Briefly, the metropolitan area of each State capital city and Canberra, the capital city of Australia, includes that area with a population density of 500 or more persons per square mile, together with other areas (e.g. industrial areas) classified as 'urban' on other grounds.

For each State the 'Other urban' figure comprises all population clusters of 1,000 or more persons outside the metropolitan area. For the Northern Territory, 'Other urban' includes urban Darwin, the capital city of that Territory. However, because of practical difficulties, the new criteria have at present been uniformly applied only to urban centres within the capital city statistical divisions and the statistical districts, to other urban centres with a population of 30,000 or more, and to a few smaller urban centres. It is proposed to extend the application of the new criteria to smaller centres in future censuses. For urban centres not yet delimited by the new criteria, the classification between urban and rural has been made using the most recent information available (e.g. from aerial photographs) or field inspection.

Rural comprises the remaining portion of each State and Territory.

'Migratory' relates to persons not elsewhere enumerated who, at midnight between 30 June and 1 July 1966, were travelling on ships or on long distance trains or aircraft.

(a) Excludes Canberra prior to 1954. (b) No satisfactory estimate prior to 1921. (c) At 30 June. (d) Census figures. (e) The statistical boundaries of Sydney, Melbourne and Hobart were extended from 1 January 1954. The estimated population shown relates to these extended areas. (f) Population count. (g) The statistical boundaries of the State capital cities were extended at the census of 30 June 1966 according to criteria outlined in *Explanatory Notes on the Delimitation of Urban Boundaries for Statistical Purposes, 1966 Census Field Count Statement No. 4*, pp 2-4. Populations are shown for 30 June 1961 which relate to the persons enumerated within the boundaries of the new State capital city statistical divisions introduced at the 1966 Census. Estimated populations from 30 June 1962 to 30 June 1965 have been revised in accordance with the new boundaries. In addition, this series of estimates commencing 30 June 1961, does not exclude full-blood Aborigines. The difference between the figures as published here for dates commencing 30 June 1961 and the corresponding figures shown in Bulletin No. 84, 1966, which exclude full-blood Aborigines, cannot be taken as reliable statistics of the Aboriginal population.

(a) Unless otherwise indicated as 'urban centre', 'statistical division' or 'statistical district' the population figures shown in the table refer to municipal boundaries. (b) Population at Census date. The difference between the statistics as published here and those shown in Census publications and in Bulletin No. 84, which exclude full-blood Aborigines, cannot be taken as reliable statistics of Aboriginal population. (c) The figures shown for urban centres (or metropolitan areas) and statistical divisions (or districts) are in accordance with new concepts adopted at the 1966 Census for the delimitation of metropolitan and other urban areas for statistical purposes. These concepts are described in detail in Census Field Count Statement No. 4, pp 2-4. Statistical Division and District boundaries are expected to remain unchanged for a substantial number of years. The boundaries of metropolitan areas and urban centres will, by definition, change at intervals. The present boundaries of these urban centres (metropolitan areas) are those established from 1966 Census data, except for Canberra Metropolitan Area, which has been established on the basis of the results of the June 1967 Canberra Population Count; in some cases it has not been possible to make post-censal estimates for these areas. (d) Includes Maitland (29,350 at 1968) and most (33,820 at 1968) of Greater Cessnock. (e) Includes Shellharbour (26,600 at 1968). (f) Partly (15,290 at 1968) included in Sydney Statistical Division. (g) Includes the population of Queanbeyan in New South Wales. The population of Queanbeyan at 30 June 1968 was 13,330.

n.a.—Not available. It has not been possible to make a post-censal estimate.

NOTE. Particulars of the mid-year population for the years 1967 and 1968 for each of the Statistical Divisions of the several States will be found in Table Nos. 142 and 143, pages 144-7.

DEMOGRAPHY

SECTION II. OVERSEAS ARRIVALS AND DEPARTURES

This section contains statistics of persons arriving in Australia from overseas, or departing from Australia for overseas. The statistics *exclude* passengers passing through Australia on board the same ship or on the same flight (variously called 'direct transit' passengers or 'through' passengers), passengers on short pleasure cruises in the South-west Pacific commencing and finishing in Australia on ships not then engaged in regular voyages, and all air crew and ships' crew. The number of direct transit passengers who passed through Australia on board ship was 31,227 in 1967 and 26,415 in 1968. There were 20 pleasure cruises in the South-west Pacific carrying 18,922 passengers in 1967, and 33 cruises with 32,154 passengers in 1968. Up to June 1947, movements of defence personnel have been excluded.

Prior to 1959, overseas arrivals and departures were classified, for statistical purposes, as either *permanent* or *temporary*. Revised questions for travellers were introduced in 1958 which enabled the arrivals and departures previously classified as *permanent* to be sub-divided (as from 1 January 1959) into two categories, *permanent movement* and *long-term movement*.

Permanent movement consists of persons arriving with the stated intention of settling permanently in Australia, and Australian residents departing with the stated intention of residing permanently abroad. *Settlers* are persons who, on arrival in Australia, indicated that they came intending to settle. *Former settlers* are persons who, on departure from Australia, stated that they had come to Australia intending to settle, had stayed for a period of twelve months or more and were now departing permanently.

Long-term movement consists of the arrival of visitors and the departure of Australian residents with the stated intention of staying (in Australia or in a country abroad, respectively) for twelve months or more, and the departure of visitors and the return of Australian residents who have stayed (in Australia or in a country abroad, respectively) for twelve months or more.

Short-term movement consists of all other movements, including the movement of Australian troops irrespective of period of stay and U.S. troops visiting Australia on rest and recreation leave. U.S. troops on rest and recreation leave have been classified for statistical purposes as short-term visitors travelling to and from Australia by air for holiday purposes and staying in Australia less than one week and whose country of residence and of embarkation/disembarkation is 'Asia, other'.

Visitors arriving and Australian residents departing in the long-term and short-term categories are further classified according to their stated purpose of journey, the categories being: for visitors, 'In transit', 'Business', 'Holiday', 'Education', and 'Other purposes'; and for residents, 'Business', 'Holiday', 'Education', and 'Other purposes'. 'In transit' visitors include those who show 'In transit' as their stated purpose of journey to Australia provided that their intended length of stay in Australia does not exceed one month.

The classification into permanent, long-term and short-term is based on information supplied by the traveller on arrival in, or departure from, Australia. *These statements represent the traveller's intention at the time. Many travellers subsequently change their intentions and this must be borne in mind in interpreting the statistics.*

SECTION IV. DIVORCE

The *Matrimonial Causes Act 1959* came into operation on 1 February 1961. This Act established uniform matrimonial causes laws throughout Australia and superseded the matrimonial causes laws of the States and Territories except in so far as it provided for the completion of pending proceedings. Under the legislation, a court may grant decrees of dissolution of marriage (divorce), judicial separation, nullity of marriage, restitution of conjugal rights and jactitation of marriage (i.e. that a person should refrain from making the false claim that a marriage has taken place between him and another person). Orders may be made for the custody and welfare of children, maintenance, the settlement of property and damages for adultery.

The statistics shown hereunder refer only to petitions filed and final decrees granted for dissolution, nullity and judicial separation. Statistics of petitions filed relate only to the original petition, i.e. a cross-petition contained in an answer by the respondent is not taken as a separate petition, nor are the grounds cited in a cross-petition included in Tables 109 and 110, pages 120-1. Statistics of petitions filed since February 1961, are on a uniform basis for all States and Territories, but statistics of decrees granted since that date include some decrees made on petitions under the superseded laws and to that extent are not uniformly based. The number of such decrees is now insignificant.

(a) Decrees absolute. (b) Statistics in respect of dissolutions of marriage for which petitions were lodged in or after February 1961 are on a uniform basis in all States. Petitions lodged before that date were dealt with under the various, now superseded, State laws even if they were heard in 1961 or later years. Furthermore, there were changes made in some States regarding the way in which divorce statistics were compiled, for instance, dissolutions made on more than one ground were allocated to the more important ground in earlier years. For these reasons, comparisons from year to year of the figures shown in the above table should be made with caution. (c) Separation was a ground for dissolution in only two States under the old legislation. (d) This was a ground in one State only under the old legislation. Separate figures were not compiled before 1961, the dissolutions on this ground being included with desertion. (e) This was a ground for dissolution in only one State under the old legislation. (f) Not separately compiled before 1961. See footnote (b) above. (g) 'Adultery and bigamy' is not a ground for dissolution under the new Commonwealth legislation.

(a) Decrees absolute. This table excludes nullities of marriage and judicial separations. (b) At time of petition. The term 'children' is not used uniformly in this table. For 1960 and previous years, 'children' was defined according to State legislation and Court rules, as follows:—New South Wales, Victoria and Western Australia, issue of the marriage of all ages, living and dead; Queensland, including adoptions and stepchildren of all ages, living and dead; South Australia, living issue of the marriage under 16 years of age; Tasmania, living issue of the marriage. Since 1961, these definitions continued in respect of dissolutions arising from petitions lodged under the old legislation, except that 'children' 21 years of age and over were excluded as far as possible. For dissolutions arising from petitions under the *Matrimonial Causes Act* a uniform interpretation of number of children is applied. The Act requires that particulars should relate to 'children of the marriage' aged under 21 years, these being defined to include all children born to the husband and wife (unless adopted by another person) or adopted since the marriage, and other children of either party (including adopted children) who were members of the household when the parties last lived together.

(a) Includes one case of triplets. (b) Includes two cases of triplets.

NOTE. (1) In the cases of multiple births included above, the following stillbirths were recorded:—Twins, Nuptial—New South Wales, 24; Victoria, 9; Queensland, 5; South Australia, 2; Western Australia, 11; Tasmania, 1; Northern Territory, 3; Australian Capital Territory, 1; Australia, 56; Triplets, Nuptial—New South Wales, 1; Victoria, 2; Western Australia, 1; Northern Territory, 1; Australia, 5. Twins and Triplets, Ex-nuptial—New South Wales, 5; Victoria, 2; Western Australia, 1; Australia, 8.

(2) Owing to the registration procedure adopted in some States, it is possible that in some cases where only one child of a multiple pregnancy is live-born the confinement has been treated as a single birth. However, the number of multiple births is not significantly affected.

(a) The statistical divisions shown are those adopted for use at the population census of 30 June 1966. New statistical division boundaries were introduced to embrace the area in close economic and social contact with the capital cities. Detailed explanatory notes on the delimitation of urban boundaries for statistical purposes together with maps showing the new boundaries for the capital city and adjacent statistical divisions can be found in 1966 census publications. (b) In cases where usual residence is outside the State or Territory the birth is included in the division in which it occurred. (c) Includes migratory population. (d) Based on population count of Canberra, 30 June 1967.

(a) The statistical divisions shown are those adopted for use at the population census of 30 June 1966. New statistical division boundaries were introduced to embrace the area in close economic and social contact with the capital cities. Detailed explanatory notes on the delimitation of urban boundaries for statistical purposes together with maps showing the new boundaries for the capital city and adjacent statistical divisions can be found in 1966 census publications. (b) In cases where usual residence is outside the State or Territory the birth is included in the division in which it occurred. (c) Includes migratory population.

(a) Number of live births per 1,000 of mean population. (b) Excludes particulars of full-blood Aborigines prior to January 1967. (c) Part of New South Wales prior to 1911. (d) The population figures used in the calculation of rates for the period 1961 to 1966 are based on the final results of the census of 30 June 1966.

- NOTE. (1) The birth rates in the table above are based on live births registered in the respective States and Territories. Year to year variations in the rates shown for those States and Territories in which a small number of events take place are of less significance than the same variation in rates based on a larger number of events.
- (2) For crude birth rates in each year commencing 1901 see Section VIII.—Statistical Summary.
- (3) For crude birth rates in years prior to 1901 see Demography, Bulletin No. 67, 1949.
- (4) Some confinements, however, take place in a State other than the State in which the mother usually resides, particularly in areas near State borders. The variation thus caused in the birth rates for the States and Territories by referring the birth registrations to the mother's usual residence, are shown by the following corrected rates for 1967:—New South Wales, 18.32; Victoria, 19.96; Queensland, 20.35; South Australia, 18.28; Western Australia, 20.56; Tasmania, 20.07; Northern Territory, 33.31; Australian Capital Territory, 23.31. See Demography, Bulletin No. 78 of 1960 (page 51) for the effect of the variations in the availability of hospital facilities on the birth rate in the Australian Capital Territory and in the neighbouring town of Queanbeyan in New South Wales.

(a) Number of births per 1,000 of female population in each age group. Births to mothers with age not stated are excluded. (b) Excludes particulars of full-blood Aborigines prior to 1967.

NOTE. For a graph of the birth rates by age of mother as shown in the table above see page 152.

BIRTH RATES, BY AGE OF MOTHER: AUSTRALIA

1921 TO 1968

(NUMBER OF BIRTHS PER 1,000 OF FEMALE POPULATION IN EACH AGE GROUP)

Note. (1) The vertical scale is logarithmic, and the curves rise and fall according to the rate of increase and decrease; actual numbers are indicated by the scale.
 (2) There is a break in continuity between 1966 and 1967. From 1967 the figures include Aborigines. Prior to 1967 birth registrations identified as those of full-blood Aborigines were excluded.

(a) Infants not born alive, of at least seven months gestation in New South Wales and twenty eight weeks in other States and Territories. (b) Excludes particulars of full-blood Aborigines prior to 1967. (c) Not available. (d) Three years 1938-1940. (e) Four years 1942-1945. (f) Excludes Queensland for 1941. (g) Excludes Northern Territory. (h) Includes 25 foetal deaths occurring in remote localities for which the period of gestation was not stated. The Registration Ordinance requires registration of any foetal death of at least twenty weeks gestation. (i) Includes 13 foetal deaths occurring in remote localities for which the period of gestation was not stated.

NOTE. Interstate comparisons of the numbers and rates in the above table are affected by differences in the definitions of stillbirths adopted by the various States and Territories. For various reasons, the registration of stillbirths is not as complete as the registration of live births; particulars for the smaller States and the Territories are most affected by this. Prior to March 1967, notification of stillbirths was voluntary in Tasmania.

(a) Number of deaths per 1,000 of mean population. Year to year variations in the rates shown for those States and Territories in which a small number of events take place are of less significance than the same variation in rates based on a larger number of events. (b) Excludes particulars of full-blood Aborigines prior to 1967. (c) Part of New South Wales prior to 1911. (d) Excludes deaths of defence personnel and of internees and prisoners of war from overseas from September 1939 to June 1947.

NOTE. (1) For crude death rates (total only) recorded for each year commencing with 1901 see Section VIII.—Statistical Summary. (2) For crude death rates recorded for years prior to 1901 see *Demography*, Bulletin No. 67, 1949.

(a) Deaths per 1,000 of mid-year population in each age-group. The average annual rates are based on the deaths in the three year period surrounding a population census. The annual rates are based on the estimated age distribution of the population at 30 June for the years shown. (b) Excludes particulars of full-blood Aborigines prior to 1967. (c) Infant deaths per 1,000 live births registered.

(a) The statistical divisions shown are those adopted for use at the population census of 30 June 1966. New statistical division boundaries have been drawn to embrace the area in close economic and social contact with the capital cities. Detailed explanatory notes on the delimitation of urban boundaries for statistical purposes together with maps showing the new boundaries for the capital city and adjacent statistical divisions can be found in 1966 census publications.

(b) In cases where usual residence is outside the State or Territory the death is included in the division in which it occurred.

NOTE. Particulars of the mid-year population for the year 1967 for each of the statistical divisions of the several States will be found in Table 140, pages 144 and 145.

(a) Excludes particulars of full-blood Aborigines prior to 1967. (b) These columns include only those deaths registered during 1965, 1966, 1967 and 1968 which were registered within eleven months following the month of occurrence. The figures shown for infant deaths registered in 1968 will not be complete until 1969 registrations become available. The symbol '—' has been used to denote the monthly and annual totals which cannot be completed until 1969 death registrations become available.

SECTION VII. POPULATION AND VITAL STATISTICS OF EXTERNAL TERRITORIES

The particulars of estimated populations of the External Territories and the data for compilation of vital statistics are supplied by the Department of External Territories.

In the population estimates for Papua and New Guinea distinction is made as between the 'indigenous' and 'non-indigenous' population. The estimates of indigenous population for Papua and New Guinea are based on counts of the population by administrative patrols in areas under full administration control and in the remaining areas on whatever information is available. The variations that exist between the latest estimate and those for previous years are partly due to the extension of administrative control which makes possible the replacement of estimates by more accurate enumeration. The estimates of non-indigenous population are subject to revision when actual population figures are ascertained at the next Census.

The particulars of vital statistics relate to the total population for Norfolk Island and Christmas Island and to the non-indigenous population for Papua and New Guinea.

For a number of reasons registration of vital events is often delayed (e.g., suspension of civil administration arising out of the 1939-45 War, access to the registration authorities) and particulars of births and deaths have been shown in respect of events registered on the basis of 'year of occurrence' up to 1962. Commencing with 1963 they are shown on the basis of 'year of registration'.

(a) Excludes full-blood Aborigines prior to 30 June 1961. For years prior to 1901, see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1 January 1911. The estimated male population at 31 December 1910, was 969. (c) Population increased by 156 males owing to the transfer of the Jervis Bay area to the Australian Capital Territory. (d) There is a break in continuity between 1960 and 1961. The estimates of the population of the States and Territories for dates subsequent to 30 June 1961 were prepared using the new method described on page 1, and those for earlier dates on the basis of the method previously used.

NOTE. All estimates have been corrected for discrepancies disclosed by the various Censuses of the Commonwealth up to the Census of 30 June 1966. Figures from 1939 to 1946 include all living Australian defence service personnel according to the State in which they resided prior to their enlistment and irrespective of whether they were within Australia or overseas, but exclude members of Allied Services and prisoners of war and internees from overseas. The population estimates from 31 December 1947, onwards include Australian defence personnel in Australia according to their actual location and are exclusive of members of the Forces overseas.

(a) Excludes full-blood Aborigines prior to 30 June 1961. For years prior to 1901, see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1 January 1911. The estimated female population at 31 December 1910 was 676. (c) Population increased by 126 females owing to the transfer of the Jervis Bay area to the Australian Capital Territory. (d) There is a break in continuity between 1960 and 1961. The estimates of the population of the States and Territories for dates subsequent to 30 June 1961 were prepared using the new method described on page 1, and those for earlier dates on the basis of the method previously used.

NOTE. See NOTE to Table No. 233, page 249.

(a) Excludes full-blood Aborigines prior to 30 June 1961. For years prior to 1901, see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1911. The estimated total population at 31 December 1910 was 1,645. (c) Population increased by 282 persons owing to the transfer of the Jervis Bay area to the Australian Capital Territory. (d) There is a break in continuity between 1960 and 1961. The estimates of the population of the States and Territories for dates subsequent to 30 June 1961 were prepared using the new method described on page 1, and those for earlier dates on the basis of the method previously used.

NOTE. See NOTE to Table No. 233, page 249.

(a) Excludes full-blood Aborigines prior to 1962. For years prior to 1901, see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1911. (c) Increase due principally to the inclusion of the Jervis Bay area in the Australian Capital Territory. (d) There is a break in continuity between 1961 and 1962. The mean population for 1962 and later years is calculated from population estimates prepared by the new method described on page 1, and that for 1961 and earlier years on the basis of the method previously used.

NOTE. See NOTE to Table No. 233, page 249.

(a) Excludes full-blood Aborigines prior to 1962. Total increase includes adjustments to make the series of intercensal increases agree with the total increases revealed by Census results. For years prior to 1901, see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1911. (c) Population increased by 282 persons owing to the transfer of the Jervis Bay area to the Australian Capital Territory. (d) For the period September 1939 to June 1947 troop movements were excluded and deaths of defence personnel, whether in Australia or overseas, included. (e) There is a break in continuity between 1961 and 1962. Total increase for 1962 and later years is calculated from population estimates prepared by the new method described on page 1, and that for 1961 and earlier years on the basis of the method previously used.

NOTE. For the period from September 1939 to June 1947 natural increase (Table No. 239, page 255) relates only to births and civilian deaths.

Minus sign (-) denotes decrease.

(a) Recorded net interstate and overseas migration together with adjustments for the differences between the population estimated and recorded at census dates. Net overseas migration is taken to be the excess of recorded overseas arrivals over recorded overseas departures. Net interstate migration, since 1961, is estimated on the basis of interstate transfers of residence as recorded under child endowment procedures and Commonwealth electoral procedures. See page 1, section I.—Population. As the records of migration, particularly interstate, are not complete, it is possible to attribute such differences largely to migration, though they may be due partly to differences in the coverage of census enumeration and deficiencies in the records of natural increase, i.e., births and deaths. In making the estimates above, the whole of the unexplained difference found at each census has been attributed to migration and the recorded migration figures have been adjusted accordingly. For years prior to 1901, see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1911. (c) Increase due principally to the inclusion of the Jervis Bay area in the Australian Capital Territory. (d) Excludes troop movements from September 1939 to June 1947. (e) Excludes interstate migration from July 1943, to June 1947. (f) There is a break in continuity between 1961 and 1962. See note (a) above and the description (—) on page 1, Section I.—Population.

Minus sign (—) denotes excess of departures over arrivals.

(a) The rates represent total increase in population during the year expressed as a proportion per cent. of the population at the end of the previous year. See NOTE to Table No. 233, page 249. For years prior to 1901, see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1911. (c) Population increased by 156 males and 126 females owing to the transfer of the Jervis Bay area to the Australian Capital Territory. (d) For the period September 1939 to June 1947 troop movements were excluded and the deaths of defence personnel, whether in Australia or overseas, included. (e) There is a break in continuity between 1961 and 1962. Rate of growth of population (States and Territories) for 1962 and later years is calculated from population estimates prepared by the new method described on page 1, and that for 1961 and earlier years on the basis of the method previously used. In addition rates of growth for years prior to 1962 are based on population excluding full-blood Aborigines.

Minus sign (—) denotes rate of decrease.

(a) Excess of births over deaths per 1,000 of mean population. Excludes full-blood Aborigines prior to 1967. (b) For years prior to 1901 see *Demography*, Bulletin No. 67, 1949. (c) Part of New South Wales prior to 1911. (d) Excess of births over civilian deaths for the period September 1939 to June 1947. (e) There is a break in continuity between 1961 and 1962. Mean population for 1962 and later years is calculated from population estimates prepared by the new method described on page 1, and that for 1961 and earlier years on the basis of the method previously used.

Minus sign (-) denotes rate of decrease.

(a) Recorded net interstate and oversea migration together with adjustments for the difference between the population estimated and recorded at Census dates per 1,000 of mean population. See footnote (a) to Table 240, page 256. For years prior to 1901 see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1911. (c) Increase due principally to inclusion of the Jervis Bay area in the Australian Capital Territory. (d) Excludes troop movements for the period September 1939 to June 1947. (e) Excludes interstate migration from July 1943 to June 1947. (f) There is a break in continuity between 1961 and 1962. Mean population for 1962 and later years is calculated from population estimates prepared by the new method described on page 1, and that for 1961 and earlier years on the basis of the method previously used. In addition rates for years prior to 1962 are based on estimates of population excluding full-blood Aborigines.

Minus sign (-) denotes rate of decrease.

(a) Number of marriages per 1,000 of mean population. Excludes full-blood Aborigines prior to 1967. For years prior to 1901 see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1911. (c) There is a break in continuity between 1961 and 1962. Mean population for 1962 and later years is calculated from population estimates prepared by the new method described on page 1 and that for 1961 and earlier years on the basis of the method previously used.

(a) Number of births per 1,000 of mean population. Excludes full-blood Aborigines prior to 1967. For years prior to 1901 see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1911. (c) There is a break in continuity between 1961 and 1962. Mean population for 1962 and later years is calculated from population estimates prepared by the new method described on page 1 and that for 1961 and earlier years on the basis of the method previously used.

NOTE. See NOTE to table No. 144, page 150.

(a) Number of deaths per 1,000 of mean population. Excludes full-blood Aborigines prior to 1967. For years prior to 1901 see *Demography*, Bulletin No. 67, 1949. (b) Part of New South Wales prior to 1911. (c) Excludes deaths of defence personnel from September 1939 to June 1947. (d) There is a break in continuity between 1961 and 1962. Mean population for 1962 and later years is calculated from population estimates prepared by the new method described on page 1 and that for 1961 and earlier years on the basis of the method previously used.

(a) Deaths of serving members of the Forces, whether occurring in Australia or overseas. The figures above are based on slightly incomplete records and show the State or Territory in which the deceased members of the Forces resided prior to enlistment. The complete total for Australia for deaths of defence personnel from September 1939 to June 1947 was 37,599 males, 179 females, 37,778 persons. It is not possible to show a dissection of these figures by State or Territory of residence.
