CDATA Online - Your Census at work...

CDATA Online combines a range of information on Australian society from the 2006 Census, with web graphing and mapping software. CDATA Online provides instant access to valuable Census data topics such as age, education, housing, income, transport, religion, ethnicity, occupation and more. This free online product allows you to create your own tables, maps and graphs of Census characteristics for all ABS geographic areas.

Who would benefit from using CDATA Online?

CDATA Online would suit anyone interested in Census data, so whether you work in government, small business, part of a community service organisation or in the education sector, CDATA Online would be a great asset.

Which geographic areas are available in CDATA Online?

You can access data for areas as small as a Collection District (approximately 225 households) or as large as an entire state or territory or all of Australia. CDATA Online allows you the freedom to select and combine areas that interest you by creating your own customised geographic areas. Data is available based on Place of Usual Residence and Location on Census Night.

Functionality - the real power of CDATA Online!

CDATA Online gives you the ability to cross-tabulate Census data with your geographic areas of interest to produce a customised table which can also be viewed as a graph or thematic map.

CDATA Online allows you to begin by choosing from a list of predetermined tables which you can then customise to suit your own needs. You can add additional data items to your table and remove any existing data items from the table. You can even create your own Census data items by grouping characteristics to suit your own needs.

CDATA Online

What exporting options are availble?

You can download tables as Excel or CSV files. Maps and graphs can be exported in PDF or PNG formats.

Do I need to register?

No, you don't need to register to use this product. However by registering as a CDATA Online user you will be able to create and save customised data groups, geographies and tables online. This means that anytime you log in to use the product all previously saved items will be there for you to use again. This will save you time and effort if you often use the same data items or geographic areas.

What assistance is available for CDATA Online?

A CDATA Online help manual can be downloaded from the ABS website. The manual includes simple step by step instructions on how to navigate through the product and use it to generate and download customised tables. Help is also available within CDATA Online at any time by pressing the CDATA Help link on each screen.
Create and customise your own Census Tables
